inch branch line on the east basement wall for serving the two (2) three-quarter (¾) inch hose drops at the gallery floors, and the three-quarter (¾) inch compression wall hydrants on the east side of and near the center of the building. Three-quarter (¾) inch connections shall be provided to the hot water tank, to the hose drop at north end of boiler room, to the two (2) compression wall hydrants on the west side of and near the north and south ends of the building, and to the flow control valve. A three-quarter (¾) inch connection with three-quarter (¾) inch branches to the water closets, and a one-half (½) inch branch to the shower bath. There shall be provided a three-quarter (¾) inch connection with a one-half (½) inch branch to the urinal and a three-quarter (¾) inch branch to slop sink. Three-quarter (¾) inch connections shall also be provided to each of the recording and indicating water columns for flushing as indicated on the drawings. One-half (½) inch connections shall be made to the drinking fountain and to the lavatory.

The Contractor shall also install the two (2) three-quarter (¾) inch supply lines between the flow control valve and the fourteen (14) inch hydraulically operated gate valve.

The connection to the hot water tank and to the heating boiler shall each be equipped with a check and pressure relief valve.

Check and waste cocks shall be provided in the main header just in front of the supply leads to the toilet room fixtures, and also in the main header near the outlet at the meter.

All hot and cold water piping shall be made up with galvanized wrought-iron pipe and galvanized malleable iron fittings.

Water Hose and Appurtenances.

(Eb17) The Contractor shall furnish and deliver at the pumping station four (4) fifty (50) foot lengths of three-quarter (¾) inch garden hose, each length equipped with approved hose couplings made of stamped heavy brass. The hose shall be reinforced with four (4) plies of braided jackets of twisted cotton yarn between which and on the inside and outside is a layer of fine rubber vulcanized into a solid tube. It shall be guaranteed to be non-kinking regardless of bending or twisting or pulling around sharp corners. The Contractor shall furnish with the above garden hose four (4) cast brass spray nozzles of the needle valve type for regulating the discharge from a solid stream to a fine spray. He shall also furnish two (2) lawn sprinklers with a standpipe five (5) feet high. They shall be of James B. Clow & Sons make, catalogue No. A-7168 or equal. The Contractor shall also furnish two (2) hose reels with strong tubular frames with all joints electrically welded. The drums shall be made of galvanized iron not less than nine (9) inches in diameter and each shall have a capacity of one hundred (100) feet of three-quarter (¾) inch garden hose.

Hot Water Header and Connections.

(Eb18) The distributing header shall be connected at the top of the hot water storage tank in the northwest corner of basement and run the full length of the pumping station. It shall be three-quarter (¾) inch in size, provided with the necessary distributing connections. Each connection shall be equipped with a union and gate valve, and the following connections shall be provided and completely connected up to the particular apparatus to be served: A three-quarter (¾) supply to the slop sink and one-half (½) inch supplies to each the lavatory and shower.

The connection of the distributing header to the hot water storage tank shall be equipped with a union connection and a gate valve, and also a check and waste cock.

Pipe Covering and Painting.

(Eb19) All cold water piping shall be covered with wool felting not less than one-half (½) inch thick, over which shall be drawn smooth an eight (8) ounce canvas duck covering securely fastened and held in place by suitable lacquered metal bands.

All hot water piping shall be covered with an approved standard section eighty-five (85) per cent asbestos fibre, or a genuine eighty-five (85) per cent magnesia covering, in sections three (3) feet in length and covered over with an eight (8) ounce canvas duck covering, drawn smooth and securely fastened and held in place by suitably lacquered metal bands. All section joints shall be properly sealed.

Both the cold and hot water pipe covering shall be painted with one (1) coat of white lead and linseed oil of a color to be approved by the Engineer.

All other piping and other metal work in the basement and not required to be covered shall be painted with three (3) coats of approved asphaltum varnish or other approved rust-resisting paint, in addition to any shop coat. All surfaces must be perfectly clean and dry when paint is applied.

III—GAS FITTING AND WATER HEATER.

General.

(Eb20) The Contractor shall furnish and install one (1) automatic gas water heater, gas and water piping and connections, valves, fittings, trimmings, and all appurtenances necessary for the successful operation of the water heating equipment, complete, as specified herein.

Water Heater.

(Eb21) The heater shall be of the combined automatic storage and heater unit type, Ruud No. 30 automatic storage combination, as manufactured by the Ruud Manufacturing Company or equal. The heater shall be of the spiral coil construction with an exposed heating surface of not less than four and ninety-one hundredths (4.91) square feet.

The coils shall be made of three-quarter (¾) inch number nineteen (19) gauge copper tubing. The ends of the coils shall be brought out through the heater shell and terminate into a common manifold with union connections. Brazed joints and connections will not be permitted.

The burners shall be durable and efficient, provided with an adjustable air inlet. A properly arranged pilot jet, rigidly mounted in the heater shell shall be provided.

The shell of the heater shall be made of heavy cast iron, with a durable sheet metal lining, providing a dead air space as insulation. The top head of the shell shall have a three (3) inch diameter collar for fitting a vent stack to same. The Contractor shall furnish and install the vent stack complete. It shall be made of heavy galvanized stove-pipe iron, equipped with a shut-off damper, and shall be connected into the side of the smoke flue from the heating boiler as directed by the Engineer.

Hot Water Tank.

(Eb22) The hot water tank shall have a storage capacity of forty (40) gallons. It shall be made of galvanized sheet charcoal iron, thoroughly insulated with a layer of ground cork not less than one (1) inch in thickness. The tank and its insulation shall be incased in a neat and well reinforced heavy galvanized sheet iron jacket. The tank shall be supported in a vertical position on a neat substantial heavy cast iron pedestal equipped with a bracket for supporting the heater. The arrangement shall be such as to give a neat and compact water heating unit.

Trimmings and Connections.

(Eb23) The tank shall be equipped with an approved thermostatic moment valve, properly mounted on the side of the storage tank. The valve shall be designed to regulate the water temperature and gas supply so that when the water in the tank has reached the temperature at which the moment valve is set, the gas supply will be shut off and remain shut off until the temperature of the water has dropped approximately twenty (20) degrees Fahrenheit, when the moment valve will open full and supply the heater with gas until the water has reached the temperature at which the valve is adjusted.

The Contractor shall also furnish and install on the hot water tank in a conspicuous location an approved thermometer graduated to read from sixty (60) to two hundred and twenty (220) degrees Fahrenheit. Necessary piping and connections shall be provided on the tank consisting of two (2) three-quarter (¾) inch connections in the top of the tank, one each for cold and hot water. A three-quarter (¾) inch drain connection shall be provided in the bottom of the tank, equipped with a three-quarter (¾) inch brass compression bibb cock fitted with three-quarter (¾) inch hose threads. Water circulating piping between the heater and tank shall be one (1) inch with necessary fittings.

Piping and Fittings.

(Eb24) The Contractor shall furnish and install all pipe and fittings to completely install the water heat-

ing equipment, as indicated on the drawings and specified herein, from the gas meter to the heater.

All piping shall be galvanized wrought iron with galvanized malleable iron fittings. All bronze gas cocks of an approved make shall be installed where necessary or as directed in the gas line. Valves will not be permitted in a gas line.

A three-quarter (¾) inch gas supply pipe from the moment valve shall be run up to an elevation approximately the height of the top of the storage tank and terminate with a three-quarter (¾) inch tee with the openings fitted with pipe plugs as directed by the Engineer.

The Sanitary District will furnish and install the gas supply line from the street main into the building up to the gas meter and will make the connection between the meter and supply pipe to heater.

IV—CONDUCTOR PIPES AND HEADS AND MISCELLANEOUS FLOOR DRAINS.

Conductor Pipes.

(Eb25) The Contractor shall furnish and install the conductor pipes, fittings and heads as indicated on the plans, to remove the rain water from the roof. The conductor pipes shall be four (4) inches, inside diameter, extra heavy cast-iron soil pipe, coated inside and out with an approved asphaltum dip. They shall be installed by the Contractor as the work of constructing the walls of the station is carried on. All joints shall be filled with oakum and molten lead and shall be caulked perfectly watertight. The conductor pipes and all necessary fittings shall be properly supported in the walls at every joint with suitable galvanized iron pipe supports. The Contractor shall keep the top ends of pipes properly capped as the work is carried up, to prevent them from becoming clogged with wood, mortar or other material of any kind during the construction of the building. After the entire work is completed the Contractor shall demonstrate by actual test that all of the conductor pipes are open and free from all obstructions.

Conductor Heads.

(Eb26) The heads of conductor pipes at the roof shall consist of type No. 6 Holt roof vent and leader connections as manufactured by the Barrett Co., or equal. These roof connections shall have cast-iron strainers, gravel stops, copper flashings, strainer fittings and expansion joints all complete. They shall be installed at proper elevations, well fitted to conductor pipes and otherwise constructed and placed in accordance with the specifications of the manufacturer. The roof connections shall be left in perfect condition and watertight upon completion of the work. All necessary patching is to be done in the concrete roof around connections, by the Contractor.

Boiler Room Floor Drain.

(Eb27) The Contractor shall furnish and install in the boiler room floor a nine (9) inch by nine (9) inch floor drain with cast iron body, top and strainer. He shall also furnish and connect up to the floor drain a three (3) inch galvanized wrought iron drain pipe which shall be run to the sump pit in the basement floor at the north end of station as indicated on the plans. Necessary supports shall be provided as directed by the Engineer.

GENERAL CONDITIONS.

Sanitary District Law.

Article 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove obstructions from the Desplaines and Illinois Rivers," approved May 29th, 1889, in force July 1st, 1889, and all amendments and acts supplementary thereto.

City Ordinances.

Art. 2. The said Contractor agrees to carry on all work provided for in this contract in strict conformity with the ordinances and rules passed by the City of Evanston covering the construction of said work, and to conform to all other regulations or ordinances of said city, and to furnish to the Sanitary District, at his own expense, all permits and certificates required by said city.

Omission on Plans.

Art. 3. The plans furnished, or to be furnished, form a part of these

specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications or plans.

Examination of Site.

Art. 4. All bidders for the work under this contract are required before submitting proposals to examine the site of the work and adjacent premises, and the various means of approach to the site, and to make all necessary investigations in order to inform themselves thoroughly as to the character and magnitude of all work involved in the complete execution of this contract; also as to the facilities for delivering, handling and installing the equipment at the pumping station and the conditions and the difficulties that will be encountered in the performance of the work specified herein. No pleas of ignorance of conditions that exist or that may hereafter exist, or of difficulties that will be encountered in the execution of the work hereunder, as a result of failure to make necessary examinations and investigations, will be accepted as a sufficient excuse for any failure or omission on the part of the Contractor to fulfill in every detail all the requirements of this contract, or will be accepted as a basis for any claim whatsoever for extra compensation.

Interference.

Art. 5. The Contractor shall so conduct the work of installation that there shall be no interference with work which may be in progress under contracts with other contractors. In case of dispute between the Contractor and other contractors employed by the Sanitary District, the decision of the Chief Engineer shall be final and binding on both the parties hereto.

The Contractor shall, at his own expense, repair any damage to machinery, equipment, masonry, building, painting or other property of the Sanitary District or under construction by other contractors, occasioned by the Contractor in the execution of this contract.

The disposal of tools, material, machinery, and other supplies and appurtenances during storage and erection on the property of the Sanitary District shall be subject to the approval of the Engineer. The Contractor shall assume all responsibility for the security of everything he may have on the property of the Sanitary District.

Changes in Plans.

Art. 6. The Sanitary District reserves the right to make any changes in the specifications and plans which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby.

If such alterations increase the amount of work to be done, such increase shall be paid for as an extra as provided in Articles 7 and 8. If such alterations or omissions diminish the amount of work to be done, such alterations or omissions shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the Sanitary District shall not be required to pay for work or material omitted. The Contractor shall allow a credit for all such work or material omitted, the amount of the credit to be fixed by the Chief Engineer on the basis of the estimated cost of the labor and material omitted.

Extra Work.

Art. 7. The Contractor shall perform only such extra work as the Engineer may order in writing, provided however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided, he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for

in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this contract, and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actual cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work performed hereinbefore and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 8. In estimating the cost of extra work, the cost of material and equipment shall be the actual price paid for same delivered at the site of work. The cost of labor shall be taken as the amount paid for same, as shown by the pay rolls of the Contractor with cost of indemnity insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, when requested by the Chief Engineer, certify, by his affidavit, the correctness of the amounts paid for material, equipment and labor.

It is further agreed that in all cases of question or dispute arising or growing out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision, Materials, Workmanship and Inspection.

Art. 9. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents.

All inspection of any and all material furnished for use in work to be performed under this contract, shall be made at the site of the work after delivery of the material.

All equipment and materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately, and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all equipment and materials and work, which during the progress and before its final acceptance, may become damaged from any cause, or do not for any reason satisfy the requirements of these specifications, shall be removed and replaced by good and satisfactory equipment, materials and work, without extra charge therefor. The Engi-

neer and his assistants shall have at all times free access to every part of the work, and at all places where equipment or material to be used in the work is manufactured, or stored, and shall be allowed to examine any equipment or material furnished for use in the work under this contract.

Progress Certificates.

Art. 10. It is further expressly agreed that the granting of any progress certificates, or the payment of any moneys hereunder, shall in no wa lessen the liability of the Contractor to replace defective equipment, material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Cost of Work.

Art. 11. The Contractor shall furnish the Engineer reasonable facilities for obtaining such information as he may desire respecting the progress and execution of the work and the character of the materials, including all information necessary to determine the cost of the work, such as the number of men employed, their pay, the time during which they have worked on the various classes of construction, and other information required by the Engineer.

Plant.

Art. 12. The Contractor shall furnish all material and supplies, plant, staging and falsework, tools and implements, teams, and care; in fact, all material and appliances of every sort or kind that may be necessary for the full and complete carrying out of this contract, and shall furnish and maintain, subject to the approval of the Engineer, all necessary barricades, and other protections, lights and signs, necessary for the proper protection of the public. He shall also furnish a watchman. The cost of all the above shall be covered by the amounts paid at the lump sum or unit prices herein specified, and no extra charge shall be made therefor.

Night, Sunday or Holiday Work.

Art. 13. Whenever the Contractor shall be permitted or directed to perform work at night, or on Sundays or a holiday, or to vary the period of hours during which work is carried on each day, he shall give written notice, to the Engineer, so that proper inspection may be provided. Such work shall be done under the regulations to be furnished in writing by the Engineer, and no extra compensation shall be allowed therefor.

Cleaning Site.

Art. 14. The Contractor shall keep the site of the work and adjacent premises as free from material, debris and rubbish as is practicable and shall remove same from any portion of the site, if, in the opinion of the Engineer such material, debris or rubbish constitutes a nuisance or is objectionable in any way to the public. The Contractor further agrees to remove all materials, implements, barricades, staging, falsework, debris and rubbish connected with or caused by said work immediately upon the completion of the same, and to leave the premises in perfect condition in so far as affected by the work under this contract.

Precautions.

Art. 15. The Contractor shall take whatever precaution that may be necessary to render any portion of the work secure in every respect, or to decrease the liability of accident from any cause, or to avoid contingencies which are liable to delay the completion of the work.

Superintendence.

Art. 16. The Contractor shall at all times have a competent foreman, superintendent or other representative on the work who shall have full authority to act for the Contractor and to receive and execute orders from the Engineer, who shall receive shipments of material to the Contractor, and who shall see that the work is executed in accordance with the specifications and plans and the orders of the Engineer, thereunder. The Contractor shall furnish the necessary watchmen to protect all materials, tools, and equipment and all work performed by the Contractor until said work has been completed and accepted by the Engineer.

Workmen.

Art. 17. The Contractor shall employ competent foremen and laborers, and shall discharge, at the request of the Engineer, any incompetent or un-

faithful men in his employ. None but men expert in their respective branches of work shall be employed where special skill is required.

Sanitation.

Art. 18. In accordance with the rules and regulations for the guidance of Sanitary Inspector, etc., adopted by the Board of Trustees on July 31, 1913, page 997 of the Proceedings for 1913, the Contractor shall introduce and enforce among his employees such regulations in regard to cleanliness and the disposal of garbage and wastes, as shall conduce to their health, and tend to prevent the inception and spread of contagious and infectious diseases among them, and shall take such means as the Engineer may direct to effectually prevent the creation of a nuisance on any part of the property of said Sanitary District, streets, or adjacent property. Necessary sanitary conveniences for the use of the laborers on the work, properly secluded from public observation, shall be constructed, and maintained by the Contractor in such manner and at such points as shall be approved, and their use shall be strictly enforced.

Patents.

Art. 19. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Damages.

Art. 20. If any damage shall be done by the Contractor or by any person or persons in his employ to the owner or occupants of any land or to any real or personal property adjoining or in the vicinity of the work herein contracted to be done, or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damage, and cause the Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself, or of his employees, that is in the nature of a legal liability, and he hereby agrees to indemnify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such injuries or such damages received or sustained by any person or persons, from said Contractor, his servants, agents or employees, in the execution of said work; or by or in consequence of any negligence in guarding the same; or by or on account of any omission or act of said Contractor, his agents or employees; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employers' Liability Act.

Art. 21. The Contractor further agrees to insure to his employees or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State"; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an act entitled "An Act to promote

the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10th, 1911, in force May 1st, 1912;" approved June 28th, 1913, in force July 1st, 1913 and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employees in and about the performance of this contract.

Responsibility of Contractor.

Art. 22. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor shall be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it, except as hereinafter specified. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employees.

The Contractor shall not assign by power of attorney or otherwise any portion of the moneys that may become due through the performance of this contract or any part thereof.

Subletting Work.

Art. 23. The Contractor shall not sublet any part of the work herein mentioned to any person or corporation that is not, in the opinion of the Engineer, competent, experienced and financially able to properly carry out and execute the same, and in the event that said Contractor desires to sublet any part in the work he shall, prior to such subletting, submit to the Engineer a statement showing the character of the work and the party or parties to whom it is proposed to sublet the same and his or their experience, financial ability and other qualifications for properly carrying out and completing the same, and the decision of the Engineer as to said qualifications, financial ability, experience and competency shall be final and binding upon both parties hereto. It is further understood and agreed that such subletting, or the approval thereof by the Sanitary District or by said Engineer, shall not directly or indirectly release or modify the responsibility of the Contractor for the satisfactory and entire completion of said work at each and every part and portion thereof, and that said Sanitary District shall not be liable to any sub-contractor for any claim or damages whatsoever. In case any party or parties, to whom any work under this contract shall have been sublet, shall disregard the directions of the Engineer or his duly authorized representatives, or shall furnish any unsatisfactory work, or shall fail or refuse in any way to conform to any of the conditions of this contract, then in that case, upon the written order of the Engineer, the Contractor shall require said party or parties in default to discontinue work under this contract. Said work shall be corrected or made good and shall be completed by the Contractor or by such other party or parties agreed upon who shall be satisfactory to the Engineer.

It is distinctly understood and agreed that the subletting of the work covered by this contract or any part thereof, except as herein above provided shall, after twenty (20) days notice to said Contractor, work a forfeiture of this contract at the option of the Sanitary District.

Liens.

Art. 24. If at any time during the progress of said work the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon, or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor, or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make payment hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer

the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporation, for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Co-operation.

Art. 25. It is understood and agreed that all work shall be executed in such manner and in such order or procedure as will permit of the commencement and carrying on of work of the Sanitary District and of other contractors with the least interference possible under a reasonable procedure whenever it is necessary or desirable to prosecute said work, either simultaneously with the work under this contract or otherwise. To this end the Contractor shall co-operate with and assist the Sanitary District and other contractors in every reasonable way and shall interfere as little as possible with their work in order to expedite all work of construction of the Evanston Sewage Pumping Station and all work collateral thereto. The Contractor shall so arrange his work, plant and equipment that work of the Sanitary District and of other contractors for the Sanitary District can be performed without unnecessary or unreasonable expense on account of the work, plant or equipment of the Contractor hereunder. The Contractor shall move, free of charge, his plant and equipment or any part of same whenever the Engineer shall consider reasonable and necessary for the work of the Sanitary District or other contractors. The Contractor when requested by the Engineer shall also furnish the Sanitary District and other contractors with material and with the use of plant and equipment of the Contractor at reasonable rates therefor, whenever in the opinion of the Engineer such use of such plant and equipment will not unreasonably delay or interfere with the work under this contract.

The Contractor shall not be entitled to any damages or to any anticipated profits on work dispensed with or to any extra compensation from the Sanitary District on account of any work performed by the Sanitary District, or other contractors, that is contemplated in these specifications or on the plans or that is necessary for carrying on or completion of or that in any way affects the work under this contract, provided that such work of the Sanitary District and other contractors, in the opinion of the Engineer, is performed in a proper and expeditious, or a necessary manner. The Engineer shall decide all questions between the Contractor and the Sanitary District or other contractors, and the order or carrying on the work shall always be subject to the Engineer's direction and approval. His decision upon all questions relating thereto shall be final and binding on both parties to this contract.

In case the Contractor, by his own acts or the acts of any person or persons in his employ, shall unnecessarily delay, in the opinion of the Engineer, the work of the Sanitary District or other contractors by not properly co-operating with them or affording them sufficient opportunity or facilities to perform work, as hereinbefore specified, the Contractor shall, in that case, pay all costs and expenses incurred by such parties, due to any such delays, and hereby authorizes the Sanitary District to deduct the amount of such costs and expenses from any moneys due or to become due him under this contract. The Engineer shall decide the extent of such delay or delays and amount of such costs and expenses and his decision shall be final and binding upon both parties to this contract. Nothing contained in this paragraph shall, however, relieve said Contractor from any liability or damages resulting to the Sanitary District on account of such delay or delays.

Time and Progress.

Art. 26. The Contractor agrees to begin the work covered by this contract within ten (10) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor.

The Contractor further agrees to furnish promptly all material and labor as and when ordered by the Engineer to carry out such work as is required to be placed during the construction of the building.

The Contractor agrees to prosecute promptly the work of installation of

material and equipment, as soon as the building has progressed to a point where the work can be readily prosecuted in a workmanlike manner.

Under Subdivision b, at the Evanston Sewage Pumping Station, the Contractor agrees to complete the entire work on or before April 2, 1920.

In case of any delay in the completion of the substructure and superstructure of the building or in the erection of the equipment under Divisions A, B, C, and D of the Evanston Sewage Pumping Station contracts, by other contractors, this Contractor agrees to delay the shipment and installation of material and equipment, without charge, until such time as he may be notified in writing by the Engineer to proceed.

It is understood and agreed that TIME is of the essence of this contract, and that a failure on the part of any contractor to complete his work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 27. It is, therefore, covenanted and agreed that in case the said Contractor shall fail or neglect to complete work under Division E, Subdivision b for each and every day that ive times specified in Article 26, even though he is allowed to complete any one or more of said items of work, then said Contractor shall pay to said Sanitary District the sum of TEN DOLLARS ($10.00) for Subdivision b for each and every day that said Contractor shall be in default in the completion of said work ready for operation. Provided, however, that in case both divisions are included under this contract, the liquidated damages shall be paid only upon the division or divisions in which the contractor shall be in default.

Said sum of ten dollars ($10.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which said Sanitary District will suffer by reason of such default, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the same, then Engineer shall decide the number of days said Contractor is in default and the decision of said Engineer shall be final and binding upon both parties hereto.

It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to TIME AND LIQUIDATED DAMAGES FOR DELAYS.

Extensions or Additions.

Art. 28. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provisions of this contract with reference to LIQUIDATED DAMAGES, and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 29. The Contractor shall delay or suspend the progress of the work, or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided that in the event of such delay or delays or of such suspension or suspensions of the progress of the work or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions, shall be extended

for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Enginer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay or delays, suspension or suspensions.

Unavoidable Delay.

Art. 30. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by any act or delay of the Sanitary District, or by any act or delay on the part of railroads in furnishing cars or transporting said equipment, material or appurtenances for said work, or by War Boards or Councils of the Federal Government or State Councils of Defense, or by Federal administrators, or by delays in obtaining priority certificates from the United States government if such are required, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods, or through any default or delay of other parties under contract with said Sanitary District, or due to strikes, or to other causes, which causes of delay mentioned in this article (Art. 30), in the opinion of the Chief Engineer are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless at the commencement of the delay the Contractor notify verbally the Engineer in direct charge in the field, and unless the Contractor notify the Chief Engineer in writing before the fifth of each succeeding month of all delays occurring in the preceding month.

It is further expressly agreed that said Contractor shall not be entitled to any damages or compensations from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article (Art. 30) except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond, actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. The Chief Engineer shall decide the number of days that said Contractor has been so delayed and his decision shall be final and binding upon both parties hereto.

Forfeiture of Contract.

Art. 31. It is further agreed by and between the parties hereto, that if said Contractor abandons this contract or fails financially or from any other cause whatsoever, is unable to carry out the terms and conditions of this contract and is unable to complete the same or if he assigns this contract without the consent of the Sanitary District first having been obtained, then said Sanitary District may declare this contract forfeited either as to a portion of the same or the whole thereof and may readvertise for bids for furnishing and delivering the balance of the material, machinery or equipment herein specified, and installing the same, and award a contract therefor to the lowest responsible bidder. The cost of obtaining said material, machinery or equipment and labor, by awarding a new contract therefor, and all costs and expenses incurred by the Sanitary District in readvertising in excess of the cost hereunder to said Sanitary District, shall be paid to the Sanitary District by said Contractor.

Contractor's Bond.

Art. 32. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the amount of this contract for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond

in place of the bond so having become insufficient, with such securities thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Maintenance Bond.

Art. 33. Division E. subdivision b. For one year, subsequent to the completion of the work and the issuance of the final certificate, the Contractor shall make good, at his own expense, any excessive wear to any parts, any defects in or damages to any equipment included in this contract, which may arise from faulty materials, design or construction, or from the inability of any of the equipment to successfully perform all the work put upon it within the limits of these specifications.

The Contractor shall furnish a bond in the sum of five (5) per cent of the amount of this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, for the faithful fulfillment of the requirements of this section. The execution of said bond shall be a condition precedent to the final payment specified in Article 36.

Prices.

Article 34. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the equipment and material, and for doing all the work contemplated and specified in this contract; also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements, or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work and the whole thereof, in full compliance with the drawings and specifications and the requirements of the Engineer under them, to-wit:

SUBDIVISION B.

For furnishing, delivering and installing at the Evanston Sewage Pumping Station all the sanitary plumbing, service water piping, gas fitting and water heater and conductor pipes and heads, with all necessary supports, covering and appurtenances, complete, as specified, for the lump sum of eighteen hundred six dollars and no cents ($1,806.00).

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents and patented material, appliances and processes used in the work described in the specifications and agreements. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

Art. 35. The said Sanitary District agrees to pay said Contractor the sum herein specified in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed eighty-seven and one-half (87½) per cent of the value of the work properly performed under this contract, and that the remaining twelve and one-half (12½) per cent shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and delivery of the final certificates of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract.

The value of the work properly performed shall be estimated by the Engineer at the end of each month. Where lump sum prices are specified, the Engineer shall estimate the proportionate part of the lump sum accomplished. To facilitate this estimate, the Contractor shall furnish the Engineer with a balanced statement in detail showing the division of cost for each of the various sub-items comprised in the lump sum.

Final Payment.

Art. 36. Upon the completion of all the work included under this contract, the performance of satisfactory operation and acceptance tests, and the execution of the bond called for in Article 33, the Engineer will certifiy to that effect. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials except in the manner set forth in this agreement; nor until all the stipulations, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificates pay, and it hereby binds itself to pay the said Contractor in cash the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid, and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the heirs and legal representatives of said Contractor.

In Witness Whereof, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Finance Committee, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its President to be duly attested and its corporate seal to be hereunto attached.

CONTRACTOR'S BOND

Know All Men by These Presents, That we, the Murphy Plumbing Company, as principal and the Massachusetts Bonding & Insurance Company, as surety are held and firmly bound unto The Sanitary District of Chicago in the penal sum of nine hundred three dollars and no cents ($903.00), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this 22nd day of May A. D. 1919.

The Condition of the Above Obligation Is Such, That whereas the above bounden Murphy Plumbing Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the 22nd day of May, A. D. 1919, for doing all the work, and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the furnishing, delivering and installing plumbing, service piping, gas fitting and conductor pipe work at the Evanston Sewage Pumpnig Station in the City of Evanston, County of Cook, State of Illinois, as specified under Subdivision b of Division E of the attached contract.

Now, If the said Murphy Plumbing Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the plans accompanying the same, and in the time and manner therein prescribed, and further shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities,

judgments, costs, damages, expenses and attorney's fees which may in any wise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said Murphy Plumbing Company, its agents, employees or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract; and moreover shall pay to The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including repayment of overpayments and including also all valid claims and demands for first aid, medical, surgical and hospital services and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10th, 1911; in force May 1st, 1912," approved June 28th, 1913; in force July 1st, 1913, and all Acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said Murphy Plumbing Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

And It Is Hereby Expressly Understood and Agreed, And made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suits for damages occasioned by carelessness or neglect of said Murphy Plumbing Company or its agents, employees or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under said Act of the General Assembly of the State of Illinois, approved June 28th, 1913; in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or death suffered by employees, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Murphy Plumbing Company shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

Mr. Lawley presented the following report from the Committee on Finance:

Chicago, June 5, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

Gentlemen—Your Committee on Finance reports that it has examined and approved the bond of the Bedford Foundry & Machine Co. with the United States Fidelity & Guaranty Company thereon as surety, for the faithful performance of its contract for furnishing and delivering one traveling crane of ten tons rated capacity for the Desplaines River Sewage Treatment Works, designated as division "N" of the specifications, to The Sanitary District of Chi-

cago, and therefore recommends the passage of the following order:

Ordered, That the bond of the Bedford Foundry & Machine Co. for the faithful performance of the above specified contract, said bond being in the penal sum of $1,150.00 be, and the same is hereby approved, and it is further

Ordered, That the form of said contract and bond be printed in the proceedings of the Board.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the contract of the Bedford Foundry & Machine Company with the Sanitary District:

THE SANITARY DISTRICT OF CHICAGO.
CONTRACT AND SPECIFICATIONS FOR DES PLAINES RIVER SEWAGE TREATMENT WORKS.

THIS AGREEMENT, Made and entered into this 15th day of May, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the Bedford Foundry & Machine Company, a corporation organized under the laws of the State of Indiana, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty expressed in the bond hereto attached; at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances and appurtenances called for by this agreement, free from all claims, liens and charges whatsoever, in the manner and under the conditions hereinafter specified, that are necessary for furnishing and delivering the Traveling Crane, and the apparatus, equipment and appurtenances thereto, as called for under Division N, of the attached specifications, complete, as specified, freight prepaid, on board cars, the Chicago and North-Western Railway in the Village of Maywood, County of Cook, State of Illinois.

The work done and equipment furnished shall be strictly pursuant to and in conformity with the specifications and the plans, which plans are signed, and attached hereto. The specifications and drawings furnished by the Contractor with his proposal and the additional drawings or prints and other information to be furnished by the Contractor in accordance with Section 4 of the specifications are made a part of this agreement. The said specifications, plans, drawings or prints are intended to co-operate, and any work appearing in or upon the one and not mentioned in the others, shall be executed according to the true intent and meaning of the said specifications, and plans, drawings or prints, the same as though the said work was contained and described in all.

It is further convenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and his properly authorized agents, by whose calculations said quantities and amounts (including extras) of the work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Chief Engineer of said Sanitary District, shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and be-

tween the said Sanitary District and said Contractor that said Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide all questions which may arise relative to the execution of the work under this contract on the part of the said Contractor, and his estimate and decision shall be final and conclusive; and such estimate and decision, in case any question may arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Whenever the words "Chief Engineer" or "Engineer" are used herein, they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the word "Contractor" is used, spelled with a capital "C," it shall be understood to refer to the Contractor under this contract, namely, for Division N, of the Des Plaines River Sewage Treatment Works.

Wherever the words "the work" or "the equipment" are used herein, they shall be interpreted to mean the traveling crane, and all other fittings and appurtenances, including all material, labor, tools and appliances necessary to perform and complete everything specified or implied in the contract or shown on the plans, the specifications and drawings furnished by the Contractor with his proposal, and the additional plans and information furnished by the Contractor under Section 4 of this contract, in full compliance with the terms and conditions hereof.

Wherever the word "section" is used herein, it shall be understood to refer to the entire section of the specifications following the number referred to in the parenthesis.

The general sections are numbered consecutively. The particular sections describing the various items of each division of the entire sewage treatment works are numbered, A1, A2, etc., B1, B2, etc., C1, C2, etc., respectively, to correspond to the division.

Whenever, under the provisions hereof, an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

GENERAL SPECIFICATIONS.

Location of Work.

(1) The Des Plaines River Sewage Treatment Works are to be erected on property owned by the Sanitary District situated between 12th and 22nd streets, just west of the Des Plaines River and east of First avenue extended, in the Village of Broadview, County of Cook, State of Illinois.

Description.

(2) The work included under this contract and specifications consists in furnishing, delivering and erecting at the site of the Des Plaines River Sewage Treatment Works and in furnishing and delivering f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., the following:

Traveling Crane.

The Contractor shall also furnish all appurtenances to said items specified or necessary to make the work complete in accordance with the most modern practice.

Contract Drawings.

(4) Within thirty (30) days after the approval by the Board of Trustees of the Sanitary District of the bond of the Contractor, he shall submit to the Engineer, for approval, additional drawings or prints in duplicate, of the equipment included under this contract and the foundations for same, other than that for which working drawings are given in the plans attached hereto by the Sanitary District, together with other information in such detail as may be necessary to permit the Engineer to inform himself of the design of the same and the character of the various materials which the Contractor proposes to use. Under this head plans and information shall be furnished by the Contractor, in part, as follows:

DIVISION N.

Traveling Crane.

The Contractor shall make such changes in the above drawings as may be found necessary upon inspection by the Engineer to make the same conform to the specifications, or to the station layout, at his own expense. Prior to the approval of any such drawings any work which the Contractor may do on the equipment

covered by the same shall be at his own risk, as the Sanitary District will not be responsible for any expense incurred by the Contractor in changing equipment to make the same conform to the drawings as finally approved.

Of the minor equipment for which drawings may not be required, the Contractor shall furnish to the Engineer tabulated lists, from time to time, showing the name of the manufacturer and the catalog number and type of equipment proposed, together with such prints, dimensions, specifications, samples, or other data, as may be required to permit intelligent judgment of the acceptability of the equipment proposed.

Upon approval of the above drawings, lists, prints, samples and other data, the same shall become a part of this contract, and the equipment furnished shall be in conformance with the same; provided, that the approval of the above drawings, lists, prints, specifications, samples or other data shall in no way release the Contractor from his responsibility for the proper fulfillment by any equipment of the requirements of this contract and of the purpose for which said equipment is installed, nor from his liability to replace the same should it prove defective.

Prior to the issuance by the Engineer of the final certificate specified in Article 37, the Contractor shall furnish to the Engineer a set of record blue prints of the various equipment, as actually installed, for which drawings are required from the Contractor.

These drawings shall include complete wiring diagrams and such plans and elevations and sectional assemblies as may be necessary to show the size, location and method of assembly of all parts of the equipment, to facilitate the dismantling and reassembling of the same. Each part shown shall be identified by a number and each drawing shall contain a bill of material giving the name, material and number required of each part. Such dimensions shall be given on the drawings as are desirable for the proper erection and adjustment of the equipment.

Checking Drawings.

(5) The Contractor shall check all dimensions and quantities on the drawings furnished by the Sanitary District or by himself, and shall notify the Engineer of all errors or omissions which he may discover by examining and checking the same. He will not be allowed to take advantage of any error or omission in the drawings, as full instructions will be furnished by the Engineer, should such error or omission be discovered, and the Contractor shall carry out such instructions as if originally specified.

Shipment.

(9) Unless otherwise notified, as specified in Article 27, the Contractor (under Division N) shall ship the material and equipment included under this contract, when ready, to the Chicago and Northwestern Railway, Maywood, Illinois, freight prepaid, consigned to the contractor named as the consignee by the Chief Engineer of the Sanitary District. All equipment shall be carefully crated, as required, and protected from dust, dirt and weather.

Guarantees.

(10) Before the completion of the work and immediately prior to the issuance of the final certificate, the Contractor shall furnish a maintenance bond or guarantee against all improper workmanship or materials, for the period stated from the date of the completion of the work, as herein specified, under Article 34. This date shall be taken as the date when the Board of Trustees of The Sanitary District of Chicago approves the final voucher of the Contractor.

SPECIFICATIONS.

DIVISION N, TRAVELING CRANE.

General.

(N1) The Contractor shall furnish, complete, ready for operation, one (1) traveling crane of ten (10) tons rated capacity, with hand operated bridge, trolley, and hoisting apparatus, with all operations of the crane to be controlled from the pump room operating floor level.

The elevation of the top of the the crane rail is +59.5 above Chicago city datum, or 14 feet above the floor at elevation +45.5.

The distance, center to center, of crane rails shall be taken as fifty-eight (58) feet.

The crane will be erected by the

Sanitary District under another division.

Runway.

(N2) The Sanitary District will furnish and place the crane rails to support the crane, including the fastenings to the girders, under another division. The Contractor, however, shall submit his clearances for approval. The runway rails will be set exactly parallel and horizontal, and at the same level, and will weigh not less than fifty (50) pounds per lineal yard. The rails will be of the standard section most recently recommended by the American Society of Civil Engineers and of the quality specified for rails in the most recent Manufacturers' Standard Specifications.

The Contractor shall furnish steel chocks where required to limit the travel of crane or trolley. The steel chocks on the crane rails will be placed by the Sanitary District.

Design.

(N3) The crane shall be capable of lifting and transporting in regular service a weight of ten (10) tons. All parts of the crane shall be of the best standard grade and design, workmanship and material, designed with a factor of safety of not less than five (5) for all maximum stresses produced by the raising, lowering or transporting of the maximum line load in any and all positions. It shall be designed to fit into the space shown on the plans, with ample clearance from the wall and roof trusses, and with the clear height of crane hook from the pump room floor.

Bridge.

(N4) The material used in the construction of the bridge shall conform to the specifications adopted by the Association of American Steel Manufacturers. The bridge shall be of a type, made up with two (2) plate girders, stiffened to be rigid and amply strong to withstand not only the direct load and impact, but also any tendency to distortion due to the location of the load with respect to the bridge and operation of bridge, trolley or hoist under full load.

Stresses of Bridge.

(N5) The girder of the bridge shall be so designed that the stress produced in the lower flange by the maximum load shall not exceed one-fifth (1-5) of the ultimate strength of the material, while the stress in the top flange shall be limited to the crippling formula usually employed for compression members and by the lateral strains due to starting and stopping of the bridge suddenly when fully loaded. Girders shall be so designed as to keep crane in perfect alignment. The section shall be such that the stresses per square inch shall not exceed 10,000 pounds for compression, nor 12,000 pounds net for tension.

Bridge Trucks

(N6) The bridge trucks shall be substantially and rigidly connected to the bridge to maintain alignment. Double-flanged wheels of cast steel or chilled cast iron shall be provided of ample size and strength to take the maximum load when the load is lifted at one end of the bridge. The faces of the wheels shall be ground true to exact diameters to secure uniform movement. They shall be fastened to suitably designed steel axles running in roller bearings, with suitable provisions for lubrication. One wheel at each end of the bridge shall be driven by a cross shaft.

A chain and pulley shall be provided to operate the drive shaft of the bridge trucks by hand from the floor (at elevation 45.5) with the entire dead and live load on the crane.

Trolley.

(N7) The trolley shall be strong and compact, provided with steel or chilled cast iron wheels, finished true and to exact diameter in the treads and running on suitable runway rails. Stops shall prevent overrunning at the ends. The axles of the trolley wheels shall run in roller bearings. The trolley shall be provided with a chain and pulley to move by hand from the floor (at elevation +45.5), the trolley and maximum live load.

The trolley may be of the single or double drum type. The drums shall be of large diameter, with turned grooves and of sufficient size to take the full length of rope without overlapping.

A flexible and durable plow-steel wire hoisting rope shall be supplied, with factor of safety of not less than seven (7). The hoisting rope shall be long enough to hoist from the

basement floor at elevation +12.0 C. C. D.

Hoisting Blocks.

(N8) The hook and block shall be of steel and of liberal size. The hook shall be ball bearing, and shall swivel freely between hardened steel plates, covered to exclude dust and dirt. The sheaves shall be fitted with steel pins and bronze bushings. The construction shall prevent the rope from leaving the sheave or binding in any way.

Gears, Pinions and Bearings.

(N9) All hoisting gears shall be cut from steel blank castings, and all pinions shall be cut from forged steel blanks.

Journals and bearings shall be of ample size symmetrically loaded, carefully fitted, and properly lubricated. Cap bearings shall be provided for all parts except the bridge truck axle bearings and the cross shaft bearings.

Painting and Protection of Parts.

(N10) All finished parts shall be protected in the shop and during transportation to prevent injury and abrasion. All injured parts shall be replaced when in the opinion of the Chief Engineer refitting will not suffice.

All parts of structural work in contact with other parts shall be given one (1) coat of red lead and linseed oil paint before assembling. All parts shall be protected from rust due to exposure or other cause until the completion of the contract. Before shipment the crane shall be given one (1) coat of shop paint, and all bright parts shall be protected with a coat of white lead and tallow.

Tests.

(N11) The crane, when erected, shall be tested by the Contractor at his expense in such ways as the Chief Engineer may require to demonstrate the compliance with contract requirements. Any part or parts failing to comply with such requirements or showing undue weakness or strain shall be corrected or removed and replaced by the Contractor until such requirements are met.

The crane shall operate satisfactorily to the Engineer under all working conditions, without any undue strain, wear or vibration.

Transportation and Delivery.

(N12) The traveling crane and appurtenances furnished hereunder shall be delivered by the Contractor at his own risk, f. o. b. cars, on the Chicago and Northwestern Railway, Maywood, Illinois, consigned to the contractor designated by the Chief Engineer.

Superintendence During Erection.

(N13) The Contractor shall furnish, at his own expense, a competent erecting engineer, who shall be on the work during the erection and the operating tests for a total of ten (10) working days, on such days as the Engineer shall designate. He shall see that the work is properly erected and shall be responsible for the correct alignment. Any additional time required and ordered by the Chief Engineer will be paid for as specified for extra work under Article 8.

Guarantee.

(N14) All equipment furnished hereunder shall be guaranteed free from mechanical defects in workmanship, design and materials, and the Contractor shall replace, without cost to the Sanitary District, any part or parts proving defective within one (1) year after the equipment has been placed in operation, in accordance with the maintenance bond for this purpose specified under Article 34.

GENERAL CONDITIONS.

Sanitary District Law.

Article 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove obstructions from the Desplaines and Illinois Rivers," approved May 29th, 1889, in force July 1st, 1889, and all amendments and acts supplementary thereto.

Omission on Plans.

Art. 3. The plans furnished, or to be furnished, form a part of these specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications or drawings.

Approximate Quantities.

Art. 4. It is expressly understood and agreed by the parties hereto that the quantities of the various classes of work to be done and material to be furnished under this contract, which have been estimated as stated in the "Requirements for Bidding and Instructions to Bidders," attached hereto, are only approximate and are to be used solely for the purpose of comparing on a uniform basis, the proposals offered for the work under this contract; and the Contractor further agrees that the Sanitary District will not be held responsible if any of said quantities shall be found incorrect; and said Contractor will not make any claim for damages or for loss of profits because of a difference between the quantities of the various classes of work as estimated and the work actually done. If any error, omission, or mis-statement shall be discovered in the said estimated quantities, the same shall not invalidate this contract or release the Contractor from the execution and completion of the whole or any part of the work herein specified, to the satisfaction of the Engineer and in accordance with the specifications and the plans herein mentioned and for the prices herein agreed upon and fixed therefor, or excuse him from any of the obligations or liabilities hereunder, or entitle him to any damages or compensation otherwise than may be provided for in this contract, except for such extra work as may be required, for the performance of which written orders must be given and received as herein specified.

Changes in Plans.

Art. 7. The Sanitary District reserves the right to make any changes in the specifications and plans which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby.

If such alterations increase the quantity of work to be done, where unit prices are specified, such increase shall be paid for according to the quantity of work actually done at the unit price specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done, where unit prices are specified, they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

If such alterations increase the amount of work to be done, where lump sum prices are specified, such increase shall be paid for as an extra as provided in Articles 8 and 9. If such alterations or omissions diminish the amount of work to be done, where lump sum prices are specified, such alterations or omissions shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the Sanitary District shall not be required to pay for work or material omitted. The Contractor shall allow a credit for all such work or material omitted, the amount of the credit to be fixed by the Chief Engineer on the basis of the estimated cost of the labor and material omitted.

Extra Work.

Art. 8. The Contractor shall perform only such extra work as the Engineer may order in writing, provided however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided, he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall

be final and binding upon both parties to this agreement, and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actual cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work performed herein before and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 9. In estimating the cost of extra work, the cost of material and equipment shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amount paid for same, as shown by the pay rolls of the Contractor, with the cost of indemnity insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, when requested by the Chief Engineer, certify, by his affidavit, the correctness of the amounts paid for material, equipment and labor.

It is further agreed that in all cases of question or dispute arising or growing out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision, Materials, Workmanship and Inspection.

Art. 10. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents.

All equipment and materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately, and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all equipment and materials and work, which during the progress and before its final acceptance, may become damaged from any cause, or do not for any reason satisfy the requirements of these specifications, shall be removed and replaced by good and satisfactory equipment, materials and work, without extra charge therefor. Provided, however, that for material or equipment furnished under Division N, where delivery is specified, f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., any damage done after delivery shall be repaired by the contractor furnishing the material and equipment and shall be paid for by the contractor responsible for the damage. The Engineer and his assistants shall have at all times free ac-

cess to every part of the work, and at all places where equipment or material to be used in the work is manufactured, or stored, and shall be allowed to examine any equipment or material furnished for use in the work under this contract.

Progress Certificates.

Art. 11. It is further expressly agreed that the granting of any progress certificates, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective equipment, material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Patents.

Art. 20. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Provided, however, that the obligations imposed on said Contractor by this Article 20 shall not apply to claims for infringements of patents on activated sludge processes or machinery or equipment used in connection therewith.

Damages.

Art. 21. If any damage shall be done by the Contractor or by any person or persons in his employ to the owner or occupants of any land or to any real or personal property adjoining or in the vicinity of the work herein contracted to be done, or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damage, and cause the Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself, or of his employees, that is in the nature of a legal liability, and he hereby agrees to indemnify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such inquiries or damages received or sustained by any person or persons, from said Contractor, his servants, agents or employees, in the execution of said work; or by or in consequence of any negligence in guarding the same; or by or on account of any omission or act of said Contractor, his agents or employees; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employers' Liability Act.

Art. 22. The Contractor further agrees to insure to his employees or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State"; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an act entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death

suffered in the course of employment, approved June 10th, 1911, in force May 1st, 1912;" approved June 28th, 1913, in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employees in and about the performance of this contract.

Responsibility of Contractor.

Art. 23. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor shall be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it, except as hereinafter specified. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employees.

The Contractor shall not assign by power of attorney or otherwise any portion of the moneys that may become due through the performance of this contract or any part thereof.

Subletting Work.

Art. 24. The Contractor shall not sublet any part of the work herein mentioned to any person or corporation that is not, in the opinion of the Engineer, competent, experienced and financially able to properly carry out and execute the same, and in the event that said Contractor desires to sublet any part of the work he shall, prior to such subletting, submit to the Engineer a statement showing the character of the work and the party or parties to whom it is proposed to sublet the same and his or their experience, financial ability and other qualifications for properly carrying out and completing the same, and the decision of the Engineer as to said qualifications, financial ability, experience and competency shall be final and binding upon both parties hereto. It is further understood and agreed that such subletting, or the approval thereof by the Sanitary District or by said Engineer, shall not directly or indirectly release or modify the responsibility of the Contractor for the satisfactory and entire completion of said work at each and every part and portion thereof, and that said Sanitary District shall not be liable to any sub-contractor for any claim or damages whatsoever. In case any party or parties, to whom any work under this contract shall have been sublet, shall disregard the directions of the Engineer or his duly authorized representatives, or shall furnish any unsatisfactory work, or shall fail or refuse in any way to conform to any of the conditions of this contract, then, in that case, upon the written order of the Engineer, the Contractor shall require said party or parties in default to discontinue work under this contract. Said work shall be corrected or made good and shall be completed by the Contractor or by such other party or parties agreed upon who shall be satisfactory to the Engineer.

It is distinctly understood and agreed that the subletting of the work covered by this contract or any part thereof, except as herein above provided shall, after twenty (20) days' notice to said Contractor, work a forfeiture of this contract at the option of the Sanitary District.

Liens.

Art. 25. If at any time during the progress of said work the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon, or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor, or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make payment hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said

Contractor to any laborer or laborers, or to any person or persons, or corporation, for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Time and Progress.

Art. 27. The Contractor agrees to begin the work covered by this contract within ten (10) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor.

The Contractor for Division N hereby agrees to deliver the traveling crane to the railroad within one hundred and fifty (150) calendar days from the said date of approval of the bond.

The words "deliver to the railroad" or "deliver" as used in this article shall be understood to mean delivery f. o. b. cars, The Chicago and North-Western Railway, Maywood, Illinois.

It is understood and agreed that Time is of the essence of this contract, and that a failure on the part of any contractor to complete his work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 28. It is, therefore, covenanted and agreed that in case the said Contractor shall fail or neglect to complete work under Division N within the respective times specified in Article 27, even though he is allowed to complete any one or more of said items of work, then said Contractor shall pay to said Sanitary District the sum of ten dollars ($10.00) for Division N for each and every day that said Contractor shall be in default in the completion of said work ready for operation. Provided, however, that in case two or more divisions are included under this contract, the liquidated damages shall be paid only upon the division or divisions in which the Contractor shall be in default.

Said sum of ten dollars ($10.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which said Sanitary District will suffer by reason of such default, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the same, then Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto.

It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to time and liquidated damages for delays.

Extensions or Additions.

Art. 29. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provisions of this contract with reference to Liquidated Damages, and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 30. The Contractor shall delay or suspend the progress of the work, or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided that in the event of such delay or delays of such suspension or sus-

pensions of the progress of the work or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions, shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay or delays, suspension or suspensions.

Unavoidable Delay.

Art. 31. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by any act or delay of the Sanitary District, or by any act or delay on the part of railroads in furnishing cars or transporting said equipment, material or appurtenances for said work, or by War Boards or Councils of the Federal Government or State Councils of Defense, or by Federal administrators, or by delays in obtaining priority certificates from the United States government if such are required, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods, or through any default or delay of other parties under contract with said Sanitary District, or due to strikes, or to other causes, which causes of delay mentioned in this article (Art. 31), in the opinion of the Chief Engineer are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless at the commencement of the delay the Contractor notify verbally the Engineer in direct charge in the field, and unless the Contractor notify the Chief Engineer in writing before the fifth of each succeeding month of all delays occurring in the preceding month.

It is further expressly agreed that said Contractor shall not be entitled to any damages or compensations from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article (Art. 31) except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond, actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. The Chief Engineer shall decide the number of days that said Contractor has been so delayed and his decision shall be final and binding upon both parties hereto.

FORFEITURE OF CONTRACT.

Division N.

Art. 32. It is further agreed by and between the parties hereto, that if said Contractor abandons this contract or fails financially or from any other cause whatsoever, is unable to carry out the terms and conditions of this contract and is unable to complete the same or if he assigns this contract without the consent of the Sanitary District first having been obtained, then said Sanitary District may declare this contract forfeited either as to a portion of the same or the whole thereof and may readvertise for bids for furnishing and delivering the balance of the material, machinery or equipment herein specified and award a contract therefor to the lowest responsible bidder, or the Sanitary District may purchase on the open market at the lowest price then obtainable, such quantity or quantities of material, machinery or equipment as the said Contractor shall fail to furnish and deliver as herein specified, notwithstanding such forfeiture. The cost of obtaining said material, machinery or equipment, if the same is obtained by awarding a new contract therefor or if so purchased on the open market, and all costs and expenses incurred by the Sanitary District in purchasing and delivering such cable, material, machinery or equipment in excess of the cost hereunder to said Sanitary District, shall be paid to the Sanitary District by said Contractor.

Contractor's Bond.

Art. 33. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the amount of this contract for the performance of the work under this contract, with good and

sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such securities thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Maintenance Bond.

Division N. For one year, subsequent to the completion of the operating tests and the acceptance of the equipment included under this contract, the Contractor shall make good, at his own expense, any excessive wear to any parts, any defects in or damages to any equipment included in this contract, which may arise from faulty materials, design or construction, or from the inability of any of the equipment to successfully perform all the work put upon it within the limits of these specifications.

The Contractor shall furnish a bond in the sum of five (5) per cent of the amount of this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, for the faithful fulfillment of the requirements of this section. The execution of said bond shall be a condition precedent to the final payment specified in Article 37.

Prices.

Art. 35. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the equipment and material, and for doing all the work contemplated and specified in this contract; also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements, or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work and the whole thereof, in full compliance with the drawings and specifications and the requirements of the Engineer under them, to-wit:

DIVISION N.

TRAVELING CRANE.

For furnishing and delivery, complete, of the traveling crane with appurtenances, as specified, f. o. b. cars, the Chicago and North-Western Railway, Maywood, Ill., the lump sum of twenty-three hundred dollars ($2,300).

The traveling crane will be fabricated at Bedford, Indiana, in the shops of Bedford Foundry and Machine Company.

The Contractor guarantees that the crane to be furnished under this contract will work satisfactorily under all the conditions proposed without any undue strain, wear or vibration. The Contractor guarantees the workmanship and the strength and quality of all materials entering into its construction, agreeing to make good at his own expense all damages caused by defects in the same during the erection of all the machinery and electrical equipment and during the maintenance period of one year after acceptance of said crane. The Contractor agrees that defective parts shall not be patched or repaired, but shall be replaced with new parts wherever and whenever ordered by the Chief Engineer during said periods, it being understood that they must be operated in the proper manner and not loaded above their rated capacity.

The Contractor further agrees that in the event that the crane, or any part thereof, shall fail to conform to the requirements of the specifications in any particular, the Sanitary District shall have the option of rejecting said crane or of accepting the same at such reduced price, as will in its judgment fully compensate for such failure to meet the guarantees.

If the Sanitary District shall elect to reject any part or all of the crane which fall below the guarantees, the Contractor agrees that they shall remain in place and be operated by the Sanitary District until other apparatus which does compiy with the guarantees is furnished.

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents and patented material, appliances and processes used in the work described in the specifications and agreements. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

Art. 36. Division N. The said Sanitary District agrees to pay said Contractor the sum herein specified in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed eighty-seven and one-half (87½) per cent of the value of the work properly performed under this contract, and that the remaining twelve and one-half (12½) per cent shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and the completion of the erection and the operating tests, and delivery of the final certificates of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract, provided however, that said twelve and one-half (12½) per cent so reserved may be paid to said Contractor at the expiration of thirty (30) days from the completion of delivery f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., with the consent of the Chief Engineer and the sureties on the bond of the Contractor, in which case said bond is to remain in full force to the completion of the operating tests and the final acceptance of the equipment included under this contract.

The value of the work properly performed shall be estimated by the Engineer at the end of each month. Where unit prices are specified, the estimate shall be based on the quantities estimated. Where lump sum prices are specified, the Engineer shall estimate the proportionate part of the lump sum accomplished. To facilitate this estimate, the Contractor shall furnish the Engineer with a balanced statement in detail showing the division of cost for each of the various sub-items comprised in the lump sum.

Final Payment.

Art. 37. Upon the completion of all the work included under this contract, the performance of satisfactory operation and acceptance tests, and the execution of the bond called for in Article 34, the Engineer will certify to that effect. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials except in the manner set forth in this agreement; nor until all the stipulations, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificates pay, and it hereby binds itself to pay the said Contractor in cash the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid, and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the heirs and legal representatives of said Contractor.

In Witness Whereof, on the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Finance Committee, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its President to be duly attested and its

corporate seal to be hereunto attached.

CONTRACTOR'S BOND.

KNOW ALL MEN BY THESE PRESENTS, That we, the Bedford Foundry and Machine Company as principal and United States Fidelity & Guaranty Co., as surety, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of eleven hundred and fifty dollars and no cents ($1,150.00), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this 15th day of May A. D. 1919.

THE CONDITION OF THE ABOVE OBLIGATION IS SUCH, That whereas the above bounden Bedford Foundry & Machine Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the 15th day of May, A. D. 1919, for doing all the work, and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the Furnishing and Delivering The Traveling Crane, of 10 ton capacity, f. o. b. cars, The Chicago and North-Western Railway, in the Village of Maywood, County of Cook, State of Illinois, as specified under Division N of the attached contract.

Now, if the said Bedford Foundry and Machine Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the plans accompanying the same, and in the time and manner therein prescribed, and further shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees which may in any wise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said Bedford Foundry and Machine Company, its agents, employees or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, except insofar as all liability on account of claims for infringements of patents on activated sludge processes or machinery, or equipment used in connection therewith, is expressly exempted; and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including repayment of overpayments and including also all valid claims and demands for first aid, medical, surgical and hospital services and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries

or death suffered in the course of employment,' approved June 10th, 1911; in force May 1st, 1912," approved June 28th, 1913; in force July 1st, 1913, and all Acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said Bedford Foundry and Machine Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

AND IT IS HEREBY EXPRESSLY UNDERSTOOD AND AGREED, and made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suits for damages occasioned by carelessness or neglect of said Bedford Foundry and Machine Company, or its agents, employees or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28th, 1913; in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or death suffered by employees, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Bedford Foundry and Machine Company shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

BEDFORD FOUNDRY AND MACHINE COMPANY, (Seal)
ED. A. SOLIN,
President.
FRED E. PITTMAN,
Secretary.

UNITED STATES FIDELITY & GUARANTY COMPANY, BALTIMORE, MD., (Seal)
By LOUIS W. WITTE,
Attorney-in-Fact.

Approved as to form, May 22, A. D. 1919:
CHARLES E. ANTHONY,
Assistant Attorney.
C. ARCH WILLIAMS,
Attorney.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 5, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that the Clerk of the Sanitary District issued his checks on the Continental & Commercial National Bank to the order of the following named employes of the Sanitary District for services rendered, in the sums stated, as follows:

February 14, 1919, check No. 236, order of Charles J. Case.....$50.00
February 28, 1919, check No. 973, order of R. L. Walsh..... 27.68
March 15, 1919, check No. 443, order of R. T. Kelly..... 65.00

which checks have been lost or mislaid.

The payment of said checks has been stopped at the bank and said employes have offered to indemnify the Sanitary District and the Clerk from all loss if the Board will authorize the Clerk to issue new checks in the place of the ones so lost or mislaid.

Your Commitee having considered the matter, recommends the passage of the following order:

Ordered, That the Clerk of the Sanitary District be and he is hereby authorized and directed to issue new checks in the several sums stated payable to the persons above named and deliver the same to them in payment of salaries due them on their executing bonds to be approved by the Attorney to indemnify the Sanitary District and the Clerk from all loss occasioned thereby in a sum double the amount of each check.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 5, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance herewith transmits to the Board a form of lease between the Chicago Ship Building Company and the Sanitary District, under the terms of which said Company leases to the Sanitary District, for a nominal consideration, a piece of land 100 feet square on Goose Island, just east of Halsted street, on the north bank of the North Branch of the Chicago River, with a right of way thereto over other land of said Company, for a period of one year from May 1, 1919, but determinable by said Company on its giving the Sanitary District sixty days' notice in writing that it desires said lease terminated. Said piece of land is to be used by the Sanitary District as the site of an experimental station to test and analyze trade waste coming from an adjacent tannery.

Your Committee having considered said lease, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute said lease in duplicate, the same having been heretofore executed by said Company.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 5, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has examined and approved the bond of the Carl John Stein Co. with the Hartford Accident & Indemnity Company thereon as surety, for the faithful performance of its contract for furnishing, delivering and installing the plumbing service piping, gas fittings and conductor pipe work at the Calumet-Sewage Pumping Station for the Sanitary District, and therefore recommends the passage of the following order:

Ordered, That the bond of the Carl John Stein Co., for the faithful performance of the above specified contract, said bond being in the penal sum of $4,221.00, be and the same is hereby approved, and it is further

Ordered, That the form of said con-

tract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the contract of the Carl John Stein Company with the Sanitary District:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR PLUMBING, SERVICE PIPING, GAS FITTING AND CONDUCTOR PIPE WORK FOR CALUMET SEWAGE PUMPING STATION.

THIS AGREEMENT, Made and entered into this 22nd day of May, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the Carl John Stein Company, a corporation organized under the laws of the State of Illinois, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty expressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances and appurtenances called for by this agreement, free from all claims, liens and charges whatsoever, in the manner and under the conditions hereinafter specified, that are necessary for furnishing, delivering and installing the Plumbing, Service Piping, Gas Fitting and Conductor Pipe Work as called for under Subdivision a of the attached specifications, complete, as specified, at the Calumet Sewage Pumping Station of the Sanitary District of Chicago, in the City of Chicago, County of Cook, State of Illinois.

The work done and equipment furnished shall be strictly pursuant to and in conformity with the specifications and the plans, which plans are signed, and attached hereto. The specifications and drawings furnished by the Contractor with his proposal and the additional drawings or prints and other information to be furnished by the Contractor in accordance with Section 4 of the specifications are made a part of this agreement. The said specifications, plans, drawings or prints are intended to co-operate, and any work appearing in or upon the one and not mentioned in the other, shall be executed according to the true intent and meaning of the said specifications, and plans, drawings or prints, the same as though the said work was contained and described in all.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and his properly authorized agents, by whose calculations said quantities and amounts (including extras) of the work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Chief Engineer of said Sanitary District, shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between the said Sanitary District and said Contractor that said Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide all questions which may arise relative to the execution of the work under this contract on the part of said

Contractor, and his estimate and decision shall be final and conclusive; and such estimate and decision, in case any question may arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Chief Engineer" or "Engineer" are used herein, they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the word "Contractor" is used, spelled with a capital "C," it shall be understood to refer to the Contractor under this contract, namely for Subdivision a, at the Calumet Sewage Pumping Station.

Wherever the words "the work" or "the equipment" are used herein, they shall be interpreted to mean the plumbing, service piping, gas fitting and conductor pipe work, and all other fittings and appurtenances, including all materials, labor, tools and appliances necessary to perform and complete everything specified or implied in the contract or shown on the plans, the specifications and drawings furnished by the Contractor with his proposal, and the additional plans and information furnished by the Contractor under Section 4 of this contract, in full compliance with the terms and conditions hereof.

Wherever the word "section" is used herein, it shall be understood to refer to the entire section of the specifications following the number referred to in the parenthesis.

The general sections are numbered consecutively. The particular sections describing the various items of each subdivision for all the plumbing, service piping, gas fitting and conductor pipe work are numbered, a1, a2, etc., b1, b2, etc., respectively, to correspond to the division.

Whenever, under the provisions hereof, an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

GENERAL SPECIFICATIONS.

Location of Work.

(1) The Calumet Sewage Pumping Station is now under construction on property owned by the Sanitary District situated about eleven hundred (1100) feet north of the junction of 127th street and Indiana avenue, in the City of Chicago, County of Cook, State of Illinois. The property on which the station is located is immediately adjacent to the main line of the Illinois Central Railroad.

Description.

(2) The work included under this contract and specifications consists in furnishing, delivering and installing at the Calumet Sewage Pumping Station the following: Plumbing, service piping, gas fitting and conductor pipe work, as specified under Division E, subdivision a, of the Calumet Sewage Pumping Station contract.

The Contractor shall also furnish all appurtenances to said items specified or necessary to make the work complete in accordance with the most modern practice.

Provisions for Handling Equipment at Site.

(3) At the Calumet Sewage Pumping Station, the Sanitary District will provide access on an unpaved road to the station site, for teams, from Michigan avenue on the west, and will provide and maintain a spur track from the Illinois Central Railroad. A hand operated crane equipped with an electric hoist will be available for handling the equipment to be installed in the pump room. The Contractor shall operate this, however, at his own expense and shall properly oil and maintain it during his use thereof.

The Contractor shall, at his own expense, provide any temporary blocking, supports or other protection for the station floor necessary to prevent injury to the same, and shall make good at his own expense any damages done by him to the station structure or its appurtenances in unloading and installing any of the equipment included under this contract, or in removing plant or other property or in cleaning up.

The Contractor shall furnish such protections as may be necessary against damage in any way to the equipment included under the contract after the same has been installed, and shall be fully responsible for such equipment until its final acceptance.

The Contractor shall also furnish his own storage facilities.

Contract Drawings.

(4) The specifications and plans are intended to cover complete equipment. It is not the intent to give every detail in the plans and specifications. The Sanitary District will not be responsible for the absence of any detail the Contractor may require, or for any special construction which may be found necessary as the work progresses. No additional compensation will be allowed for material or labor used in performing any work hereunder unless the work can be clearly shown to be beyond the intent and scope of the plans and specifications, to the satisfaction of the Chief Engineer.

Within thirty (30) days after the approval by the Board of Trustees of the Sanitary District of the bond of the Contractor, he shall submit to the Engineer, for approval, additional drawings or prints in duplicate, of the final layouts included under this contract, other than that for which working drawings are given in the plans attached hereto by the Sanitary District, together with other information in such detail as may be necessary to permit the Engineer to inform himself of the design of the same and the character of the various materials which the Contractor proposes to use.

The Contractor shall make such changes in the above drawings as may be found necessary upon inspection by the Engineer to make the same conform to the specifications, or to the station layout, at his own expense. Prior to the approval of any such drawings any work which the Contractor may do on the equipment covered by the same shall be at his own risk, as the Sanitary District will not be responsible for any expense incurred by the Contractor in changing equipment or layout to make the same conform to the drawings as finally approved.

The Contractor shall also furnish the Engineer tabulated lists, from time to time, showing the name of the manufacturer and the catalog number and type of equipment proposed, together with such prints, dimensions, specifications, samples, or other data, as may be required to permit intelligent judgment of the acceptability of the equipment and materials proposed.

Upon approval of the above drawings, lists, prints, samples and other data, the same shall become a part of this contract, and the equipment furnished shall be in conformance with the same; provided, that the approval of the above drawings, lists, prints, specifications, samples or other data shall in no way release the Contractor from his responsibility for the proper fulfillment by any equipment of the requirements of this contract and of the purpose for which said equipment is installed, nor from his liability to replace the same should it prove defective.

Checking Drawings.

(5) The Contractor shall check all dimensions and quantities on the drawings furnished by the Sanitary District or by himself, and shall notify the Engineer of all errors or omissions which he may discover by examining and checking the same. He will not be allowed to take advantage of any error or omission in the drawings, as full instructions will be furnished by the Engineer, should such error or omission be discovered, and the Contractor shall carry out such instructions as if originally specified.

Co-operative Service.

(6) The sub-structure and superstructure of the pumping stations will be erected by the contractor under Division A of the Calumet Sewage Pumping Station. As the work progresses, from time to time, material called for under this contract (Division E, subdivision a) will require placing in the concrete, brickwork, or elsewhere, as necessary to properly complete the structure. The purpose of this contract is to provide for the labor and material required from time to time for this work, as specified herein, and to secure prompt service.

The Contractor under Division E (subdivision a) shall co-operate with the contractor under Division A by promptly placing all piping included under this contract, where it passes through or lies in walls, floors, roofs, or other parts of the building. Promptly upon notice from the Engineer, the Contractor shall furnish and place material as required, and shall securely line up and fasten any piping in concrete forms. He shall also rough in piping to be bedded in walls as required. He shall furnish labor and material, as required from

time to time to keep step with the work under Division A.

The Contractor shall further give in advance to the Engineer all information needed as to boxes, chases, holes, gullets, or other openings needed in the work to be placed by the contractor under Division A.

The Contractor shall keep posted on the progress of the work under Division A, and shall be ready at all times upon demand to supply labor and material as required at the proper time without delay.

Under existing contracts, the Sanitary District expects to have the Calumet Sewage Pumping Station building roofed in by January 30, 1920, and the pumping station completed by July 28, 1920. These dates are not guaranteed, however, but are stated as approximate.

Shipment and Installation.

(7) Upon notification, the Contractor shall from time to time deliver the equipment included under this contract upon the station grounds, shall unload the same, providing all necessary labor, power, blocking, hoisting apparatus and other material, shall place the same in a position as called for on the drawings and as directed by the Engineer, shall line up and adjust the various parts one to another, complete all joints and do all other work necessary to completely install and prepare for operation all the equipment included under this contract, and afterwards shall take down and remove from the premises any scaffolding, tackle, blocking or other apparatus which may have been used in the installation, but which is not a part of the equipment included under this contract.

Cutting, Fitting and Patching.

(8) The Contractor under subdivision a of Division E shall, whenever possible, give in advance definite and exact information to the Engineer so that the Engineer can instruct the contractor under Division A (the substructure and superstructure) to leave the required holes, chases or boxes as the work progresses. Should any cutting be required through the neglect of the Contractor under Division E to give the necessary information to the Engineer, sufficiently in advance, the Contractor shall have the work done, at his own expense, by the appropriate trade. Excessive cutting will not be allowed. Only sharp tools suitable for the purpose shall be used. No beams, purlins, joists or other structural features shall be cut without the express permission of the Engineer and then only when and as directed.

All work shall be neatly fitted. Excessive openings will not be permitted.

The Contractor shall have all patching done by the appropriate trade at his own expense.

Tests.

(9) The Contractor shall make all tests required to demonstrate the tightness of his work under the working conditions specified. Where pipes are to be painted, coated or jacketed, after erection, the tests shall be made first. The Contractor shall furnish, at his own expense, all apparatus, water, and appurtenances necessary or proper for all tests, except the gauges. All joints shall be examined and all visible leaks stopped.

SPECIFICATIONS.

DIVISION E—SUBDIVISION A.

Description.

(Ea1) The work to be done under this division of the Calumet Sewage Pumping Station contract includes the plumbing service piping, gas fitting and conductor pipe and drain work as specified herein under the following heads:

I. Sanitary Plumbing.
II. Transformer Oil Drains.
III. Service Water Piping.
    1. Low Pressure System.
    2. Lawn Sprinkling System.
    3. High Pressure System.
IV. Gas Fitting and Water Heater.
V. Compressed Air Piping.
VI. Conductor Pipes and Heads.

All the work specified under subdivision a of Division E shall be executed in a thoroughly first-class manner, strictly in accordance with the ordinances of the City of Chicago and the rules and regulations of the Department of Health of the City of Chicago. The Contractor shall take out all permits required by said ordinances, rules or regulations, at his own expense.

The specifications are not intended to specify every detail of construction or equipment. The Contractor shall, therefore, furnish and place all

pipes, traps, fixtures, fittings, supports, bolts, or devices which are necessary to fully complete the entire work, whether said details are particularly specified or not.

Wherever the construction of the pumping station or appurtenances thereto requires pipes or fittings to pass through walls of whatever kind, or to be imbedded in work, the Contractor shall install all such pipes or fittings when and as ordered by the Engineer, so that the work may proceed at the same time and as fast as the work under other contracts. All such work so installed shall be neatly capped temporarily so as to be kept free of all debris or other clogging material.

Materials.

(Ea2) All materials used in the construction of work under this contract shall be of the best grade in established use for the purposes furnished.

All wrought iron piping shall be Byer's genuine wrought iron pipe or equal, of standard weight and thickness for the sizes specified or required. All pipe shall be smooth inside, free from imperfections and true to shape. All threads shall be clean cut, straight and true.

All fittings for wrought iron pipe shall be malleable iron, free from all defects, with sound clean threads.

All unions shall be of galvanized malleable iron with brass seats inserted to make brass to iron ground joints on all piping 2½-inch diameter and smaller.

All soil pipe shall be extra heavy cast-iron free from all defects and shall be caulked at joint with oakum and molten lead, perfectly water tight.

Unless otherwise specified herein, all wrought-iron pipe and fittings shall be galvanized and all soil pipe shall be coated both inside and out with an asphaltum or other approved pipe dip, applied hot.

Placing of Pipes.

(Ea3) All piping shall be carefully placed and properly graded. All risers, return risers and drop shall be erected plumb and straight. A liberal number of unions shall be used to permit ready removal of any sections. All pipe shall be neatly supported by hangers or fastenings of approved design. Screwed joints on water piping shall be made tight with a paste of graphite and engine oil and screwed home. Screwed joints on gas piping shall be made tight with red lead paste. Nickel plated floor, wall and ceiling plates shall be used at all points where pipes pass through the floor, ceiling or walls.

Where screws or anchor bolts are used to attach piping, supports or fixtures to walls, lead plugs shall be used in the wall holes to screw into. The use of wooden plugs will not be permitted.

Valves.

(Ea4) All gate valves shall be of the double disc type of Crane Co. make, or equal, with rising stems, fitted with hand wheels. Gate valves under three (3) inches in size shall be of brass, throughout, except the hand wheel, which shall be of iron. Gate valves three (3) inches and over shall be of cast iron with full brass mountings, of the outside screw and yoke pattern where possible. All gate valves shall open by turning to the left.

All gate valves shall be packed by the Contractor with approved materials, and left in good working condition upon the completion of the work.

Check valves shall be of the standard pattern made by the Crane Co., or equal, for the given service. All check valves two (2) inches in size and under shall be of brass throughout. All check valves over two (2) inches in size shall be iron body, with brass facings. Swing check valves shall be used where ordered by the Engineer, in the sizes over 2-inch.

I—SANITARY PLUMBING.

General.

(Ea5) The sanitary plumbing shall include all the hot and cold water piping required for sanitary purposes, together with all valves, fixtures including water closets, urinals, shower baths, drinking fountains, lavatories, sinks, taps, vents, revent piping, soil and waste piping, etc.

The catalog numbers of fixtures referred to in these specifications, unless otherwise specified, are those of the L. Wolff Mfg. Co. of Chicago. All fixtures and appurtenant equipment or finish, unless otherwise specified, shall be of the L. Wolff Mfg. Co.,

make, or equal.

All marble work will be furnished and placed by the Sanitary District under another contract.

Pipes.

(Ea6) The hot and cold water supply pipes and the vent pipes, except those included with the fixtures, shall be of galvanized wrought iron with galvanized malleable iron fittings as specified.

All waste and drain pipes except those included with fixtures, shall be of standard weight wrought iron pipe, Durham system, and standard Durham cast iron drainage fittings. The pipe and fittings shall be coated inside and out with hot asphalt varnish or an approved pipe dip.

The fixtures are to be trapped and connected with waste pipes led to the dry weather channel of the suction chamber, as shown on the plans.

The waste, vent and revent pipes shall be two (2) inches inside diameter, and the soil pipes shall be four (4) inches inside diameter. The soil and vent pipes shall extend above the roof of the one-story portion of the building. The pipes shall be supported on the walls with galvanized iron pipe holders spaced every five (5) feet. All revent pipes shall be connected into soil or vent pipes, and shall be concealed in the brick walls. Where vent pipes pass through the roof they shall be carried up at least twelve (12) inches above roof and flashed with four (4) pound sheet lead. This flashing shall extend under roofing not less than twelve (12) inches in all directions and turned down four (4) inches in the pipes.

The soil pipe and urinal waste pipes shall be provided with clean-out openings at the floor line with brass caps screwed in place. These clean-outs shall be placed where easily accessible and the face of caps shall be flush with floors or walls.

Water Supply Pipes and Connections.

(Ea7) The Contractor shall provide a two (2) inch cold water pipe from the four (4) inch main in the northwest basement room to the main toilet room, and install a one and one-half (1½) inch main supply pipe in the toilet room with a three-quarter (¾) inch supply line to the toilet room for the engineers. From the cold water supply pipe, branches shall be run to fixtures and outlets as follows: A one and one-half (1½) inch branch to the hose drop in north end of the store room, one (1) inch branch to hot water storage trank, three-quarter (¾) inch branches to slop sinks and water closet tanks and one-half (½) inch branches to urinals, lavatories, shower baths and drinking fountains.

The Contractor shall install a one (1) inch hot water pipe system in the main toilet room and a three-quarter (¾) inch line to the engineers' toilet, parallel to cold water lines, including circulating pipe. The hot water supplies shall be one-half (½) inch to lavatories and shower and three-quarter (¾) inch to slop sinks.

Valves.

(Ea8) Valves shall be as specified in Section Ea4. In addition to the valves shown on the plans, a separate valve shall be placed on each water supply pipe to the various fixtures and outlets. The main supply pipes shall be provided with brass check and waste cocks so that the entire water supply system may be shut off and all pipes drained of water.

Water Closets.

(Ea9) The water closets shall be the No. a-1324 "Superior," or equal, syphon jet duroware lipped bowl-closets with No. 8 Vitreous "Vitlow" tank with operating lever and china handle, brass flush connection, No. 5 quarter sawed oak, sanitary seat with cast brass box hinges, reinforcing rings, ⅜-inch iron pipe size seamless brass supply pipe with stop valve, floor screws and china caps. All special metal parts shall have "Wolffloid," or equal, white finish.

Each water closet and shower bath compartment door is to be provided with a No. H. 8935 combination bumper and coat hook. In each water closet compartment a No. H. 6278 toilet paper holder shall be securely fastened to the marble partition slabs with suitable brass bolts. All of these fittings and bolts shall have "Wolffloid," or equal, white finish.

Lavatories.

(Ea10) The lavatories shall be the No. H. 3525 "Monument" vitreous "Virginia," or equal, equipped with apron, bowl and overflow with "Monument" vitreous leg with iron rod, two (2) enameled iron wall supports with

brass screws and toggle bolts, two (2) No. H. 912 "Gielow," or equal, self-closing faucets with china index handles, one and one-quarter (1¼) inch cast brass trap to wall with cast brass escutcheon, No. H. 5165 supply pipes and stop valves, chain stay, chain and rubber stopper. All exposed metal parts above the lavatories shall be duro-white metal and all metal parts below shall have "Wolffloid," or equal, white finish.

Shower.

(Ea11) One shower with "Niedecken" mixer, or equal, is to be mounted on the marble wainscot, provided with one-half (½) inch supplies to wall, and one-half (½) inch mixing pipe, ball joint and a four (4) inch cast brass perforated head with removable face. Two combination hooks in the dressing room compartment are to be installed on the wall. All exposed metal is to be of the "Wolffloid," or equal, white finish.

The floor slab of marble in the shower compartment is to drain to the center into a No. H. 2121 trap enameled on the inside and provided with a white metal strainer.

Urinals.

(Ea12) The urinals shall be No. H. 8529, Class B porcelain urinals, each twenty-four (24) inches wide and forty-eight (48) inches high, with integral drip receptor, glazed inside and on exposed parts outside, with cast brass waste outlet connection and porcelain strainer, No. H. 2121 drum traps enameled inside and painted outside. The flushing tank is to be of vitreous china, automatic in action, with cast brass angle supports and with brass flush and spreader pipes with flush connection. All exposed metal shall be of "Wolffloid," or equal, white finish.

Slop Sinks.

(Ea13) The slop sinks are to be No. H. 8137, eighteen (18) by twenty-four (24) inch size, cast iron roll rim sinks with integral backs twelve (12) inches high. The sinks shall be provided with two (2) inch adjustable trap standards with outlets tapped for two (2) inch wrought iron pipe and shall be enameled inside and out with white metal cast brass strainer and two (2) five-eighths (⅝) inch white metal "Quaturn" compression faucets with metal handles. One (1) faucet on each sink is to be provided with hose connection.

Drinking Fountains.

(Ea14) A No. H. 6945 vitreous china pedestal drinking fountain shall be placed in the locker room where directed by the Engineer. It shall be thirty (30) inches high with vitreous china bubbling cup, concealed waste and supply pipe and with white metal self-closing valve with loose key stop cock to control water supply.

The Contractor shall also furnish a drinking fountain, similar to the one specified for locker room, which shall be installed on the station grounds near the south entrance to the building as specified in Section Ea23.

II—OIL DRAIN FOR TRANSFORMERS.

General.

(Ea15) The Contractor shall furnish all materials and install complete the transformer oil drain system as shown on the drawings and specified herein.

Pipe and Fittings.

(Ea16) All piping shall be standard weight galvanized wrought iron pipe with galvanized malleable iron tees and elbows, as specified in Section Ea2. Pipe plugs shall be of bronze with taper pipe threads. Unions shall be of galvanized malleable iron with brass seats inserted to make brass to iron ground joints.

Valves and Cocks.

(Ea17) The gate valves indicated on the drawings at each transformer will be furnished by the Sanitary District and the Contractor's work on the oil drains will begin from the gate valves. The Contractor shall furnish and install in the oil drain from each transformer a standard iron cock with brass plug No. 324 of Crane Co., or equal, make.

III—SERVICE WATER SYSTEM.

General Description.

(Ea18) The Contractor shall furnish, deliver and install the entire service water system, consisting of both the high and low pressure systems in the station and the sprinkling systems for the station grounds, with all valves, fittings and connections, complete, with appurtenances, as specified herein or indicated on the

drawings accompanying these specifications, and shall install the steel water tank which will be furnished and delivered by the Sanitary District at the pumping station, outside the building.

With the exception of the lawn-sprinkling system, as specified in Section Ea25, all service water piping shall be made up with galvanized wrought-iron pipe and galvanized malleable iron fittings.

1. Low Pressure System.

General.

(Ea19) The low pressure system shall include that part of the service water piping, which under normal conditions will operate at the City of Chicago water main pressure of approximately thirty (30) pounds per square inch. The low pressure piping will, however, have a by-pass connection from the high pressure piping and shall be so installed and equipped that a pressure of one hundred (100) pounds gauge pressure can be applied to the low pressure piping continuously, without injury to any of the parts.

Main Header and Connections.

(Ea20) The six (6) inch water supply main leading to the station will enter at the northwest corner of the building on an elevation of approximately six (6) feet above Chicago City Datum. The Contractor shall begin his work at this point by installing a six (6) inch gate valve and continue the pipe line the length of the basement room. He shall provide a three (3) inch connection to each of the pressure pumps with a gate valve in each connection; a three (3) inch connection with gate valve to station lawn piping, and a four inch (4) inch by-pass connection properly valved between the high and low pressure headers. From the six (6) inch incoming main specified above the Contractor shall install a four (4) inch header running east through the west wall of the main pump room and under the balcony at the north end of the pump room to the east wall of the station. The Contractor shall install the following connections from the above four (4) inch header, with a gate valve provided in each connection: A two (2) inch connection to the toilet main specified under Section Ea7 of these specifications; a two and one-half (2½) inch connection at west wall of main pump room, and a two (2) inch connection at the east wall of main pump room for the water seal headers, and from the end of the four (4) inch header shall be run a one and one-half (1½) inch line through east station wall into the boiler room to be connected with a one (1) inch line into the boiler feed header installed by the Sanitary District near west wall of boiler room. At a point near the connection to the boiler feed header, a three-quarter (¾) inch drop shall be installed, terminating with a three-quarter (¾) inch hose valve at the elevation given by the Engineer. From the one (1) inch line there shall be run a three-quarter (¾) inch riser through the roof slab of the boiler room terminating with a three-quarter (¾) inch garden hose valve of Crane Co. No. 58 make, or equal. The riser shall be equipped with a check and waste cock of Crane Co. No. 806 make, or equal.

Near the center of the north pump room wall the Contractor shall make a one and one-half (1½) inch connection from the four (4) inch header. This connection shall run through the wall and drop to an elevation above the screen room floor as directed by the Engineer, and terminate with a one and one-half (1½) and a three-quarter (¾) inch hose valve.

The Contractor shall also install a one and one-half (1½) inch hose drop at the north end of the main store room and on the east wall of the boiler room complete with one and one-half (1½) inch hose valves as directed by the Engineer.

Headers for Sealing Water.

(Ea21) Beginning at the two and one-half (2½) inch valved connection from the four (4) inch main the Contractor shall install a union and run a two and one-half (2½) inch header on the west wall of the pump room up to a connection provided for pumping unit No. 6, and at an elevation as directed by the Engineer. From the two and one-half (2½) inch header there shall be provided a one and one-quarter (1¼) inch connection with gate valve and union to each of the three (3) centrifugal pumps, which shall be split into two three-quarter (¾) inch branches with a gate valve

in each branch, each branch connecting with a gland on a pump.

From the end of the two and one-half (2½) inch header at pumping unit No. 6, the Contractor shall install a gate valve and union and continue with one and one-half (1½) inch line up to the southwest corner of pump room, terminating with a three-quarter (¾) inch hose valve as directed by the Engineer.

In the northwest corner of pump room a three-quarter (¾) inch hose drop, with hose valve near pump room floor level, shall be installed as directed by the Engineer.

On the east wall of the pump room there shall be installed a two (2) inch sealing water header from the connection provided on the four (4) inch main in the northeast corner of the pump room. This header shall be similar in construction to the sealing water header on the west wall of pump room, with connections and branches to each of the centrifugal and vacuum pumps. The Contractor shall also install a three-quarter (¾) inch hose connection on the east wall near the vacuum pumps, as directed by the Engineer.

2. Lawn Sprinkling System.

General.

(Ea22) The Contractor shall furnish and install all of the flush hydrants or street washers and lay the water pipe, make necessary excavations and refilling to complete the lawn sprinkling system as indicated on the drawings and specified herein. The sprinkling system under normal conditions will operate at the City of Chicago water main pressure of approximately thirty (30) pounds. The system shall, however, be so installed and equipped that it can be operated at a pressure of one hundred (100) pounds continuously without injury to any of its parts.

Mains and Connections.

(Ea13) From the three (3) inch connection provided on the incoming line in the northwest corner of station, a three (3) inch main shall be run west through the basement wall at an elevation approximately six (6) feet below grade to the two (2) inch pipe line running north and south on the west side of the station grounds. A one (1) inch drain connection with gate valve shall be provided on the three (3) inch main just inside the station wall. This drain shall be run to the catch basin provided in the floor of the northwest basement room. A two (2) inch line shall be laid across the north and south sides of the station grounds and connect to the east side of the pipe loop which shall be a one and one-half (1½) inch line.

The Contractor shall install the drinking fountain specified in Section Ea14 at the south end of the station and connect same into the two (2) inch main with a one (1) inch line. He shall provide a shut-off cock with cast iron service box and wrench in the one (1) inch line, and install a drain pipe of the proper size from the drinking fountain to the twelve (12) inch drain tile installed by the Sanitary District near the southwest corner of the building as directed by the Engineer.

Flush Hydrants.

(Ea24) The flush hydrants shall be bronze mounted, with a three-quarter (¾) inch garden hose connection. They shall all be of the same make, first class in every respect, of heavy and substantial material. They shall be so designed that all working parts can be taken out from the top of hydrant. Each hydrant shall be equipped with an automatic valve to allow the barrels to completely drain. The cover shall be provided with a locking arrangement. The Contractor shall furnish with each hydrant a combined key and wrench.

Pipe and Fittings.

(Ea25) All pipe used for the station grounds sprinkling system shall be standard weight wrought-iron pipe, coated with asphaltum, applied in a hot dip, with recessed galvanized malleable iron fittings as specified in Section Ea2 of these specifications. Unions shall be installed as directed by the Engineer to facilitate laying or removal of pipe in case of a break in the mains. Unions shall be Crane Co. No. 515 make, or equal, made of galvanized malleable iron with brass hexagon ring and brass seat ring with ground joint.

All pipe joints shall be given a coat of hot asphalt and covered with burlap and a second coat of hot asphalt over the burlap.

The one and one-half (1½) inch

main laid on the east side of station shall be at an elevation of approximately eighteen (18) inches below grade and all of the mains shall be so pitched as to properly drain back to drain connection in the station.

3. High Pressure System.

General.

(Ea26) The high pressure system shall include that part of the service water piping which under normal operating conditions will have a pressure of approximately one hundred (100) pounds per square inch, and which is intended for serving the cylinders on the sluice gates and hydraulically operated gate valves, and the hydraulic plunger elevator.

Main Header and Connections.

(Ea27) The Contractor shall begin the installation of the high pressure system at the discharge connections on the pressure pumps located in the northwest basement room. The discharge connections from these pumps shall be properly equipped with check and gate valves with all joints flanged, and shall connect into a common four (4) inch pressure main. This four (4) inch main shall run each through the west wall and up to the east wall of the pump room. The Contractor shall complete the four (4) inch by-pass connection between the high and low pressure systems specified in Section Ea20. A four (4) inch connection with gate valve shall be provided for a branch main, from the main header which shall rise through the floor up to the ceiling of the locker room near its southeast corner. A check and gate valve shall be installed in the main header between this four (4) inch branch connection and the above specified by-pass connection. The four (4) inch branch main shall run south through the toilet and store rooms and over the suspended ceiling of the office into the gate room in the southwest corner of the station. The four (4) inch main shall be continued over the suspended ceiling of the vestibule into the southeast gate room. A three (3) inch branch header provided with a gate valve shall be run to each group of sluice gates located in the store room, southwest and southeast gate rooms and the southeast corner of pump room. Each of the three (3) inch branch headers shall have a two (2) inch by-pass properly valved through a hand pressure pump as directed by the Engineer. The hand pressure pumps will be furnished by the Sanitary District but shall be installed by the Contractor.

The Contractor shall furnish and install the necessary control and waste piping for the sluice gate cylinders with a four-way control cock. The four-way cocks shall be iron body with brass plug and cap, No. 339, of the Crane Co. make, or equal. There shall be furnished with each cock a suitable wrench for operating same.

A steel water tank twenty (20) feet long by six (6) feet in diameter will be furnished by the Sanitary District and installed by the Contractor in the screen room. This tank shall be connected into the four (4) inch pressure main with a four (4) inch connection properly valved so that the storage water in the tank can be fed back into the pressure main under air pressure for operating the hydraulic cylinders on sluice gates and gate valves. The Contractors shall also provide a one (1) inch drain with gate valve at the bottom of the storage tank, the drain pipe so arranged that the water will drain into the intake basin.

At the east wall of the pump room the Contractor shall provide a three (3) inch connection with gate valve from the four (4) inch main, with a two (2) inch by-pass properly valved through a hand pressure pump as directed by the Engineer. This hand pump will be furnished by the Sanitary District but shall be installed by the Contractor.

The above three (3) inch header shall be run along the east wall of the pump room up to the south centrifugal pump, with a one and one-half (1½) inch branch equipped with gate valve and union and necessary control and waste piping for each hydraulically operated gate valve. A four-way control cock shall be installed for controlling each gate valve with a suitable wrench for each. The cocks and wrenches shall be similar to those specified above for the sluice gates.

From the end of the four (4) inch main at the northeast corner of the pump room the Contractor shall install a two and one-half (2½) inch gate valve and run a pressure line the full size of valve through the boiler room and along its east wall

to the elevator pit and make the proper connection to the control valve for the hydraulic elevator.

Pipe Covering and Painting.

(Ea28) All cold water piping, except such piping in the basement store room as may be designed by the Engineer, shall be covered with wool felting not less than one-half (½) inch thick, over which shall be drawn smooth an eight (8) ounce canvas duck cover securely fastened and held in place by suitable lacquered metal bands. All points shall be properly sealed. The covering shall be painted with one (1) coat of white lead and linseed oil of a color to be approved by the Engineer. The balance of the exposed metal work shall the painted with a coat of filler and one (1) coat of enamel or bronze of a color to be selected. All piping and other metal work installed by this Contractor in the basement store room and not required to be covered with felting shall be painted with three (3) coats of approved asphaltum varnish or other approved rust-resisting paint, in addition to any shop coat. All surfaces must be perfectly clean and dry when paint is applied.

Water, Hose and Appurtenances.

(Ea29) Water hose consisting of garden hose and hose of the underwriters' standard, with necessary fittings and parts, as specified herein, shall be furnished by the Contractor.

Garden hose shall be three-quarter (¾) inch in size, in fifty (50) feet lengths. Ten (10) lengths shall be furnished, each equipped with approved hose couplings made of stamped heavy brass. The hose shall be reinforced with four (4) plies of braided jackets of twisted cotton yarn between which and on the inside and outside is a layer of pure rubber vulcanized into a solid tube. It shall be guaranteed to be non-kinking regardless of bending or twisting or pulling around sharp corners. The Contractor shall furnish with the above garden hose five (5) cast brass spray nozzles of the needle valve type for regulating the discharge from a solid stream to a fine spray. He shall also furnish five (5) lawn sprinklers with a standpipe five (5) feet high, of the James B. Clow & Sons make, catalog A-7168 or equal. The Contractor shall also furnish five (5) hose reels made with strong tubular frames with all joints electrically welded. The drums shall be made of galvanized iron not less than nine (9) inches in diameter and with a capacity of one hundred (100) feet of three-quarter (¾) inch garden hose.

The hose of underwriters' standard shall be one and one-half (1½) inch size in fifty (50) foot lengths. Three (3) lengths shall be furnished, each equipped with approved hose couplings of heavy brass, and a heavy brass plain hose pipe. The hose shall be made of unlined woven linen, with no rubber in its construction, of the very best grade obtainable on the market for emergency fire protection, to be folded on racks when idle.

The Contractor shall furnish and install three (3) hose racks for the underwriters' hose as indicated on the plans. The racks shall be of the swinging wall type, made of steel tubing and malleable iron castings, with a hump in the center of the bottom to take the weight off the folds of hose. The front shall be partly enclosed, making it impossible to jerk too much hose off at once. The racks shall be given a finishing coat of paint after erection of a quality and color as directed by the Engineer.

IV—GAS FITTING AND WATER HEATER.

General.

(Ea30) The Contractor shall furnish and install one (1) gas water heater, complete, with water storage tank, gas and water piping and connections, valves, fittings, trimmings and all appurtenances necessary for the successful operation of the water heating equipment, complete, as specified herein.

Water Heater.

(Ea31) The heater shall be of the combined automatic storage and heater unit type, Ruud No. 50, automatic storage system, as manufactured by the Ruud Manufacturing Company or equal. The heater shall be of the spiral coil construction with an exposed heating surface of not less than seven and eighty-five hundredths (7.85) square feet.

The coils shall be made of three-quarter (¾) inch number nineteen (19) gauge copper tubing. The ends of the coils shall be brought out through the heater shell and terminate

with a common manifold with union connections. Brazed joints and connections will not be permitted.

An efficient and durable burner with adjustable air inlet openings, equipped with a properly arranged pilot jet, rigidly mounted in the heater shell shall be provided.

The heater shell shall be constructed of heavy cast iron, with a sheet metal lining, providing a dead air insulation. The top of the heater shell shall be equipped with a collar for fitting a vent stack to same. The Contractor shall furnish and install the vent stack complete. It shall be made of heavy galvanized stove-pipe iron, carried up through the roof of the one-story section of the building and terminate in an approved vent head with heavy copper flashing. The heater shall be mounted on a firm and neat appearing standard.

Hot Water Tank.

(Ea32) The hot water tank shall be made of galvanized sheet charcoal iron not less than one-quarter (¼) inch in thickness. It shall be approximately twenty (20) inches in diameter, with a capacity of eighty (80) gallons. The tank shall be supported in a horizontal position on a neat and well braced pipe frame. The tank shall be thoroughly insulated with a layer of ground cork one and one-half (1½) inches in thickness. The tank with its insulation shall be incased in a neat and well reinforced heavy galvanized sheet iron jacket.

Trimmings and Construction.

(Ea33) The tank shall be equipped with an approved thermostatic moment valve, properly mounted. The valve shall be so designed that it will regulate and control the water temperature and the gas supply. The regulation shall be such that when the water in the tank has been brought to the temperature at which the moment valve is set, the gas supply will be shut off and remain shut off until the temperature of the water has dropped approximately twenty (20) degrees Fahrenheit, when the moment valve will open full and supply the heater with gas until the water has reached the temperature at which the valve is adjusted.

The Contractor shall also furnish and install on the hot water tank in a conspicuous location, an approved thermometer graduated to read from sixty (60) to two hundred twenty (220) degrees Fahrenheit. Proper and necessary pipe connections shall be provided on the tank, consisting of one (1) inch hot water tap on the top side of tank and one (1) inch cold water tap at each end of the tank at the lower edge. One of the cold water taps shall be plugged as directed by the Engineer. A three-quarter (¾) inch drain connection taken from the bottom side of tank and run to the pump discharge basin directly below shall be furnished and installed, complete, with an all brass, double wedge, rising stem, three-quarter (¾) inch gate valve of an approved make. Water circulating connections between heater and tanks consisting of one and one-quarter (1¼) inch piping with necessary fittings shall be furnished and installed.

Piping and Fittings.

(Ea34) The Contractor shall furnish and install all pipe and fittings for completely installing the water heating equipment, as indicated on the drawings and specified herein and shall connect into the hot water distributing line specified in Section Ea7. The gas supply header shall be a one and one-half (1½) inch pipe line. The end of the gas supply header in the northwest corner of the locker room basement shall be capped, and shall terminate at a point directed by the Engineer. The Sanitary District will furnish and install the gas meter and gas main to the station and will make the necessary connections between gas supply header and meter. A three-quarter (¾) inch line shall be taken from the gas supply header near the southwest corner of the locker room basement and be brought up through the locker room floor and connect to a hot plate hereinafter specified in Section Ea35. At a point above the locker room floor and as directed by the Engineer, the Contractor shall install in the above three-quarter (¾) inch lead an outlet with a shut-off cock with nipple for attaching a small service gas hose. The one and one-half (1½) inch gas header shall run full size up to and be connected into the moment valve mounted on the water tank. All necessary gas supply and pilot burner piping and fittings for properly connecting the moment valve with heater shall be installed

according to the latest standard practice.

All piping used in connection with the water heater installation shall be standard weight galvanized wrought iron with galvanized malleable iron fittings as specified in Section Ea2. Unions shall be of galvanized malleable iron with brass seat insert, with brass to iron ground joint. Union elbows and tees shall be used to facilitate installation and reduce the number of joints. All bronze gas cocks of an approved make shall be installed where necessary or as directed by Engineer in the gas header and branches. Valves will not be permitted in any gas line.

Hot Plate.

(Ea35) The Contractor shall furnish and install a three (3) burner hot plate of an approved make, where directed by the Engineer. The hot plate shall be made of heavy cast iron with heavy nickel plate trim, neatly mounted on a substantial steel or iron stand of neat appearance.

V—COMPRESSED AIR PIPING.

General.

(Ea36) The Contractor shall furnish, deliver and install for the compressed air system all the piping, valves, fittings and connections, with all appurtenances and supports, complete, as specified herein and shown on the plans. He shall also install the air container tanks furnished and delivered by the Sanitary District under another contract and make the necessary connections to same.

All compressed air piping shall be galvanized wrought-iron piping and all fittings galvanized malleable iron.

Air Intake.

(Ea37) Air intake connections shall be made full size of the suction inlets of the air compressor, with a three (3) inch suction pipe which shall run vertically through the floor and up to the ceiling of the locker room, then through the outside south wall and terminate with an approved protected inlet over the toilet room roof.

Distributing Main and Connections.

(Ea38) The discharge connection from the compressor shall be two (2) inches in size, connected into the air container tank and equipped with necessary shut-off and check valves. A two (2) inch main supply header shall be run from the container tank across the north end of pump room to east pump room wall. A one and one-half (1½) inch connection shall be made from the above supply header in the basement store room and run up through the floor to the ceiling of the locker room, thence south through the toilet and store rooms and over the ceiling of the office into the southwest gate room, and over the ceiling of the vestibule into the southeast gate room, and up through the ceiling into the high tension room. Three-quarter (¾) inch leads terminating with a three-quarter (¾) inch air hose connection shall be installed near the floor in each of the store rooms, southwest and southeast gate room, and in the high tension room.

From the two (2) inch main supply header, a one and one-half (1½) inch connection shall be made at the northwest corner of the pump room. A distributing line the full size of the connection shall be run south along the west wall of pump room to a point opposite last motor at south end of pump room, and terminate with a plugged tee. Four (4) three-quarter (¾) inch air hose connections near the pump room floor shall be provided on this line, spaced approximately as shown on the plans and as directed by the Engineer. A two (2) inch branch from the main supply header shall be provided to the air container tank in the screen room. Necessary by-pass, drain and blow-off piping between the air and water tank shall be installed in a manner to give simple and safe operation of these tanks for the purpose for which they are installed.

At the northeast corner of the pump room, a one and one-half (1½) inch connection shall be made from the main supply header. A distributing line, the full size of the connection, shall run south along the east wall of the pump room to a point opposite the vacuum pump and continue from this point as a three-quarter (¾) inch line and extend up to the rheostat balcony floor at a centrally located position terminating with a plugged tee. Three-quarter (¾) inch air hose connections shall be provided on this line near the floor, one to be located at each motor for the pumping units

and one on the rheostat balcony floor.

From the end of the two (2) inch supply header in the northeast corner of pump room a three-quarter (¾) inch line shall be extended into the boiler room and along its west wall to a point near front of boilers, terminating with a plugged tee, and three-quarter (¾) inch air hose connection, as directed by the Engineer.

Valves, Hose Connections, Etc.

(Ea38) All valves shall be specially adapted for compressed air service and shall be given an air-under-water test for tightness. Shut-off valves shall be the quick opening and closing Crane mine cocks No. 318 or equal for compressed air lines. Necessary wrenches for operating these cocks shall be furnished. Check valves shall be furnished with special construction designed for compressed air service. All hose connections shall be three-quarter (¾) inch, made from wrought iron pipe nipples with hose end threaded for hose coupling. The shut-off valves for these connections shall be quick opening and closing type as specified above.

Air Container Tanks.

(Ea39) The air container tanks will be furnished and delivered to the station site by the Sanitary District, but shall be installed by the plumbing Contractor. He shall equip the tanks with all necessary parts and make all supply, drain and blow-off connections properly fitted with valves as directed by the Engineer.

Air Hose.

(Ea40) The Contractor shall furnish four (4) lengths of three-quarter (¾) inch air hose, each length fifty (50) feet long, complete with all couplings and fittings. This hose shall be specially constructed for compressed air service. It shall be flexible, tough and oil proof, both inside and outside. Material used in its construction shall be the highest grade pure elastic rubber reinforced with not less than two independent layers of braided yarn formed into a basket weave. The Contractor shall furnish with each length of air hose a nozzle made of hard fibre or other insulating material, of a pattern as approved by the Engineer.

Painting.

(Ea41) All air piping and exposed metal work in the pump room, gate rooms and main store and toilet rooms shall be painted with a coat of filler and one (1) coat of enamel or bronze of a color to be selected. All piping, container tanks and other metal work in the basement store room, screen and boiler rooms shall be painted with three (3) coats of approved asphaltum varnish or other approved rust-resisting paint, in addition to any shop paint. All surfaces must be perfectly clean and dry when paint is applied.

VI—CONDUCTOR PIPES AND HEADS.

Conductor Pipes.

(Ea42) The Contractor shall furnish and install the conductor pipes, fittings and heads as shown on the plans to remove the rain water from the roofs. These pipes shall be four (4) inches inside diameter, of extra heavy cast iron soil pipe, coated inside and out with asphaltum paint. They shall be installed by the Contractor as the work of constructing the walls of the station is carried on. All joints shall be filled with oakum and molten lead, and shall be thoroughly caulked perfectly water tight. The conductor pipes and all fittings necessary shall be properly supported in the walls at every joint with suitable galvanized iron pipe supports. The Contractor shall keep the top ends of pipes properly capped, as the work is carried up to prevent them from becoming clogged with wood, mortar or other material of any kind during the construction of the building. After the entire work is completed, the Contractor shall demonstrate by actual test that all of the conductor pipes are open and free from all obstructions.

Conductor Heads.

(Ea43) The heads of conductor pipes on the roofs shall consist of type No. six (6) "Holt" roof vent and leader connections as manufactured by the "Barrett Mfg. Co.," or equal. These roof connections shall have cast iron strainers, gravel stops, copper flashings, strainer fittings, and expansion joints all complete. They shall be installed at proper elevation, well fitted to conductor pipes and otherwise constructed and placed in accordance with the specifications of the manufacturer. These roof connections shall be left in perfect condition and watertight upon completion of the

work and all necessary patching is to be done in the concrete roof around connections by the Contractor.

GENERAL CONDITIONS.

Sanitary District Law.

Article 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The anitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove obstructions from the Desplaines and Illinois Rivers," approved May 29th, 1889, in force July 1st, 1889, and all amendments and acts supplementary thereto.

City Ordinances.

Art. 2. The said Contractor agrees to carry on all work provided for in this contract in strict conformity with the ordinances and rules passed by the City of Chicago covering the construction of said work, and to conform to all other regulations or ordinances of said city, and to furnish to the Sanitary District, at his own expense, all permits and certificates required by said city.

Omission on Plans.

Art. 3. The plans furnished, or to be furnished, form a part of these specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications or plans.

Examination of Site.

Art. 4. All bidders for the work under this contract are required before submitting proposals to examine the site of the work and adjacent premises, and the various means of approach to the site, and to make all necessary investigations in order to inform themselves thoroughly as to the character and magnitude of all work involved in the complete execution of this contract; also as to the facilities for delivering, handling and installing the equipment at the pumping station and the conditions and the difficulties that will be encountered in the performance of the work specified herein. No pleas of ignorance of conditions that exist or that may hereafter exist, or of difficulties that will be encountered in the execution of the work hereunder, as a result of failure to make necessary examinations and investigations, will be accepted as a sufficient excuse for any failure or omission on the part of the Contractor to fulfill in every detail all the requirements of this contract, or will be accepted as a basis for any claim whatsoever for extra compensation.

Interference.

Art. 5. The Contractor shall so conduct the work of installation that there shall be no interference with work which may be in progress under contracts with other contractors. In case of dispute between the Contractor and other contractors employed by the Sanitary District, the decision of the Chief Engineer shall be final and binding on both the parties hereto.

The Contractor shall at his own expense, repair any damage to machinery, equipment, masonry, building, painting or other property of the Sanitary District or under construction by other contractors, occasioned by the Contractor in the execution of this contract.

The disposal of tools, material, machinery, and other supplies and appurtenances during storage and erection on the property of the Sanitary District shall be subject to the approval of the Engineer. The Contractor shall assume all responsibility for the security of everything he may have on the property of the Sanitary District.

Changes in Plans.

Art. 6. The Sanitary District reserves the right to make any changes in the specifications and plans which may be deemed necessary either before or after beginning any work under this contract without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby.

If such alterations increase the amount of work to be done, such increase shall be paid for as an extra as provided in Articles 7 and 8. If such alterations or omissions diminish the amount of work to be done, such alterations or omissions shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the Sanitary District shall not be required to pay for work or material omitted. The Con-

tractor shall allow a credit for all such work or material omitted, the amount of the credit to be fixed by the Chief Engineer on the basis of the estimated cost of the labor and material omitted.

Extra Work.

Art. 7. The Contractor shall perform only such extra work as the Engineer may order in writing, provided, however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided, he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this contract, and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actual cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work performed hereinbefore and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 8. In estimating the cost of extra work, the cost of material and equipment shall be the actual price paid for same delivered at the site of work. The cost of labor shall be taken as the amount paid for same, as shown by the pay rolls of the Contractor, with cost of indemnity insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, when requested by the Chief Engineer, certify, by his affidavit, the correctness of the amounts paid for material, equipment and labor.

It is further agreed that in all cases of question or dispute arising or growing out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision, Materials, Workmanship and Inspection.

Art. 9. All work provided for under this contract shall be done under the direction and supervision of the En-

gineer and his properly authorized agents.

All inspection of any and all material furnished for use in work to be performed under this contract, shall be made at the site of the work after delivery of the material.

All equipment and materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately, and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all equipment and materials and work, which during the progress and before its final acceptance, may become damaged from any cause, or do not for any reason satisfy the requirements of these specifications, shall be removed and replaced by good and satisfactory equipment, materials and work, without extra charge therefor. The Engineer and his assistants shall have at all times free access to every part of the work, and at all places where equipment or material to be used in the work is manufactured, or stored, and shall be allowed to examine any equipment or material furnished for use in the work under this contract.

Progress Certificates.

Art. 10. It is further expressly agreed that the granting of any progress certificates, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective equipment, material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Cost of Work.

Art. 11. The Contractor shall furnish the Engineer reasonable facilities for obtaining such information as he may desire respecting the progress and execution of the work and the character of the materials, including all information necessary to determine the cost of the work, such as the number of men employed, their pay, the time during which they have worked on the various classes of construction, and other information required by the Engineer.

Plant.

Art. 12. The Contractor shall furnish all material and supplies, plant, staging and falsework, tools and implements, teams, and care; in fact, all material and appliances of every sort or kind that may be necessary for the full and complete carrying out of this contract, and shall furnish and maintain, subject to the approval of the Engineer, all necessary barricades, and other protections, lights and signs, necessary for the proper protection of the public. He shall also furnish a watchman. The cost of all the above shall be covered by the amounts paid at the lump sum or unit prices herein specified, and no extra charge shall be made therefor.

Night, Sunday or Holiday Work.

Art. 13. Whenever the Contractor shall be permitted or directed to perform work at night, or on Sundays or a holiday, or to vary the period of hours during which work is carried on each day, he shall give written notice, to the Engineer, so that proper inspection may be provided Such work shall be done under the regulations to be furnished in writing by the Engineer, and no extra compensation shall be allowed therefor.

Cleaning Site.

Art. 14. The Contractor shall keep the site of the work and adjacent premises as free from material, debris and rubbish as is practicable and shall remove same from any portion of the site, if, in the opinion of the Engineer such material, debris or rubbish constitutes a nuisance or is objectionable in any way to the public. The Contractor further agrees to remove all materials, implements, barricades, staging, falsework, debris and rubbish connected with or caused by said work immediately upon the completion of the same, and to leave the premises in perfect condition in so far as affected by the work under this contract.

Precautions.

Art. 15. The Contractor shall take whatever precaution that may be ne-

cessary to render any portion of the work secure in every respect or to decrease the liability of accident from any cause, or to avoid contingencies which are liable to delay the completion of the work.

Superintendence.

Art. 16. The Contractor shall at all times have a competent foreman, superintendent or other representative on the work who shall have full authority to act for the Contractor and to receive and execute orders from the Engineer, who shall receive shipments of material to the Contractor, and who shall see that the work is executed in accordance with the specifications and plans and the orders of the Engineer thereunder. The Contractor shall furnish the necessary watchmen to protect all materials, tools, and equipment and all work performed by the Contractor until said work has been completed and accepted by the Engineer.

Workmen.

Art. 17. The Contractor shall employ competent foremen and laborers, and shall discharge, at the request of the Engineer, any incompetent or unfaithful men in his employ. None but men expert in their respective branches of work shall be employed where special skill is required.

Sanitation.

Art. 18. In accordance with the rules and regulations for the guidance of Sanitary Inspector, etc., adopted by the Board of Trustees on July 31, 1913, page 997 of the Proceedings for 1913, the Contractor shall introduce and enforce among his employees such regulations in regard to cleanliness and the disposal of garbage and wastes, as shall conduce to their health, and tend to prevent the inception and spread of contagious and infectious diseases among them, and shall take such means as the Engineer may direct to effectually prevent the creation of a nuisance on any part of the property of said Sanitary District, streets, or adjacent property. Necessary sanitary conveniences for the use of the laborers on the work, properly secluded from public observation, shall be constructed, and maintained by the Contractor in such manner and at such points as shall be approved, and their use shall be strictly enforced.

Patents.

Art. 19. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Damages.

Art. 20. If any damage shall be done by the Contractor or by any person or persons in his employ to the owner or occupants of any land or to any real or personal property adjoining or in the vicinity of the work herein contracted to be done, or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damage, and cause the Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself, or of his employees, that is in the nature of a legal liability, and he hereby agrees to indemnify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such injuries or such damages received or sustained by any person or persons, from said Contractor, his servants, agents or employees, in the execution of said work; or by or in

consequence of any negligence in guarding the same; or by or on account of any omission or act of said Contractor, his agents or employees; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employers' Liability Act.

Art. 21. The Contractor further agrees to insure to his employees or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State"; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an act entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10th, 1911, in force May 1st, 1912," approved June 28th, 1913, in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employees in and about the performance of this contract.

Responsibility of Contractor.

Art. 22. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor shall be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it, except as hereinafter specified. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employees.

The Contractor shall not assign by power of attorney or otherwise any portion of the moneys that may become due through the performance of this contract or any part thereof.

Subletting Work.

Art. 23. The Contractor shall not sublet any part of the work herein mentioned to any person or corporation that is not, in the opinion of the Engineer, competent, experienced and financially able to properly carry out and execute the same, and in the event that said Contractor desires to sublet any part in the work he shall, prior to such subletting, submit to the Engineer a statement showing the character of the work and the party or parties to whom it is proposed to sublet the same and his or their experience, financial ability and other qualifications for properly carrying out and completing the same, and the decision of the Engineer as to said qualifications, financial ability, experience and competency shall be final and binding upon both parties hereto. It is further understood and agreed that such subletting, or the approval thereof by the Sanitary District or by said Engineer, shall not directly or indirectly release or modify the responsibility of the Contractor for the satisfactory and entire completion of said work at each and every part and portion thereof, and that said Sanitary District shall not be liable to any sub-contractor for any claim or damages whatsoever. In case any party or parties, to whom any work under this contract shall have been sublet, shall disregard the directions of the Engineer or his duly authorized representatives, or shall furnish any unsatisfactory work, or shall fail or refuse in any way to conform to any of the conditions of this contract, then, in that case, upon the written order of the Engineer, the Contractor shall require said party or parties in default to discontinue work under this contract. Said work shall be corrected or made good and shall be completed by the Contractor or by such other party or parties agreed upon who shall be satisfactory to the Engineer.

It is distinctly understood and agreed that the subletting of the work

covered by this contract or any part thereof, except as herein above provided shall, after twenty (20) days, notice to said Contractor, work a forfeiture of this contract at the option of the Sanitary District.

Liens.

Art. 24. If at any time during the progress of said work the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon, or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor, or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make payment hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporation, for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Co-operation.

Art. 25. It is understood and agreed that all work shall be executed in such manner and in such order or procedure as will permit of the commencement and carrying on of work of the Sanitary District and of other contractors with the least interference possible under a reasonable procedure whenever it is necessary or desirable to prosecute said work, either simultaneously with the work under this contract or otherwise. To this end the Contractor shall co-operate with and assist the Sanitary District and other contractors in every reasonable way and shall interfere as little as possible with their work in order to expedite all work of construction of the Calumet Sewage Pumping Station and all work collateral thereto. The Contractor shall so arrange his work, plant and equipment that work of the Sanitary District and of other contractors for the Sanitary District can be performed without unnecessary or unreasonable expense on account of the work, plant or equipment of the Contractor hereunder. The Contractor shall move, free of charge, his plant and equipment or any part of same whenever the Engineer shall consider reasonable and necessary for the work of the Sanitary District or other contractors. The Contractor when requested by the Engineer shall also furnish the Sanitary District and other contractors with material and with the use of plant and equipment of the Contractor at reasonable rates therefor, whenever in the opinion of the Engineer such use of such plant and equipment will not unreasonably delay or interfere with the work under this contract.

The Contractor shall not be entitled to any damages or to any anticipated profits on work dispensed with or to any extra compensation from the Sanitary District on account of any work performed by the Sanitary District, or other contractors, that is contemplated in these specifications or on the plans or that is necessary for carrying on or completion of or that in any way affects the work under this contract, provided that such work of the Sanitary District and other contractors, in the opinion of the Engineer, is performed in a proper and expeditious, or a necessary manner. The Engineer shall decide all questions between the Contractor and the Sanitary District or other contractors, and the order of carrying on the work shall always be subject to the Engineer's direction and approval. His decision upon all questions relating thereto shall be final and binding on both parties to this contract.

In case the Contractor, by his own acts or the acts of any person or persons in his employ, shall unnecessarily delay, in the opinion of the Engineer, the work of the Sanitary District or other contractors by not properly co-operating with them or affording them sufficient opportunity or facilities to perform work, as herein-

before specified, the Contractor shall, in that case, pay all costs and expenses incurred by such parties, due to any such delays, and hereby authorizes the Sanitary District to deduct the amount of such costs and expenses from any moneys due or to become due him under this contract. The Engineer shall decide the extent of such delay or delays and amount of such costs and expenses and his decision shall be final and binding upon both parties to this contract. Nothing contained in this paragraph shall, however, relieve said Contractor from any liability or damages resulting to the Sanitary District on account of such delay or delays.

Time and Progress.

Art. 26. The Contractor agrees to begin the work covered by this contract within ten (10) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor.

The Contractor further agrees to furnish promptly all material and labor as and when ordered by the Engineer to carry out such work as is required to be placed during the construction of the building.

The Contractor agrees to prosecute promptly the work of installation of material and equipment, as soon as the building has progressed to a point where the work can be readily prosecuted in a workmanlike manner.

Under Subdivision a, at the Calumet Sewage Pumping Station, the Contractor agrees to complete the entire work on or before July 28, 1920.

In case of any delay in the completion of the substructure and superstructure of the building or in the erection of the equipment under Divisions A, B, C, and D of the Calumet Sewage Pumping Station contracts, by other contractors, this Contractor agrees to delay the shipment and installation of material and equipment, without charge, until such time as he may be notified in writing by the Engineer to proceed.

It is understood and agreed that Time is of the essence of this contract, and that a failure on the part of any contractor to complete his work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 27. It is, therefore, covenanted and agreed that in case the said Contractor shall fail or neglect to complete work under Division E, Subdivisions a and b, within the respective times specified in Article 26, even though he is allowed to complete any one or more of said items of work, then said Contractor shall pay to said Sanitary District the sum of Ten Dollars ($10.00) for Subdivision a for each and every day that said Contractor shall be in default in the completion of said work ready for operation. Provided, however, that in case both divisions are included under this contract, the liquidated damages shall be paid only upon the division or divisions in which the contractor shall be in default.

Said sum of ten dollars ($10.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which said Sanitary District will suffer by reason of such default, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the same, then Engineer shall decide the number of days said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto.

It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to Time and Liquidated Damages for Delays.

Extensions or Additions.

Art. 28. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period of time as may be fixed by said Engineer, and his de-

cision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provisions of this contract with reference to Liquidated Damages, and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 29. The Contractor shall delay or suspend the progress of the work, or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided that in the event of such delay or delays or of such suspension or suspensions of the progress of the work or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions, shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay or delays, suspension or suspensions.

Unavoidable Delay.

Art. 30. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by any act or delay of the Sanitary District, or by any act or delay on the part of railroads in furnishing cars or transporting said equipment, material or appurtenances for said work, or by War Boards or Councils of the Federal Government or State Councils of Defense, or by Federal administrators, or by delays in obtaining priority certificates from the United States government if such are required, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods, or through any default or delay of other parties under contract with said Sanitary District, or due to strikes, or to other causes, which causes of delay mentioned in this article (Art. 30), in the opinion of the Chief Engineer are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless at the commencement of the delay the Contractor notify verbally the Engineer in direct charge in the field, and unless the Contractor notify the Chief Engineer in writing before the fifth of each succeeding month of all delays occurring in the preceding month.

It is further expressly agreed that said Contractor shall not be entitled to any damages or compensations from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article (Art. 30) except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond, actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. The Chief Engineer shall decide the number of days that said Contractor has been so delayed and his decision shall be final and binding upon both parties hereto.

Forfeiture of Contract.

Art. 31. It is further agreed by and between the parties hereto, that if said Contractor abandons this contract or fails financially or from any other cause whatsoever, is unable to carry out the terms and conditions of this contract and is unable to complete the same or if he assigns this contract without the consent of the Sanitary District first having been obtained, then said Sanitary District may declare this contract forfeited either as to a portion of the same or the whole thereof and may readvertise for bids for furnishing and delivering the balance of the material, machinery

or equipment herein specified, and installing the same, and award a contract therefor to the lowest responsible bidder. The cost of obtaining said material, machinery or equipment and labor, by awarding a new contract therefor, and all costs and expenses incurred by the Sanitary District in readvertising in excess of the cost hereunder to said Sanitary District, shall be paid to the Sanitary District by said Contractor.

Contractor's Bond.

Art. 32. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the amount of this contract for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such securities thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Maintenance Bond.

Art. 33. Division E. subdivision a. For one year, subsequent to the completion of the work and the issuance of the final certificate, the Contractor shall make good, at his own expense, any excessive wear to any parts, any defects in or damages to any equipment included in this contract, which may arise from faulty materials, design or construction, or from the inability of any of the equipment to successfully perform all the work put upon it within the limits of these specifications.

The Contractor shall furnish a bond in the sum of five (5) per cent of the amount of this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, for the faithful fulfillment of the requirements of this section. The execution of said bond shall be a condition percedent to the final payment specified in Article 36.

Prices.

Article 34. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the equipment and material, and for doing all the work contemplated and specified in this contract; also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements, or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work: and for well and faithfully completing the work and the whole thereof, in full compliance with the drawings and specifications and the requirements of the Engineer under them, to-wit:

SUBDIVISION A.

For furnishing, delivering and installing at the Calumet Sewage Pumping Station all the sanitary plumbing, transformer oil drains, service water piping, gas fitting and water heater, compressed air piping, and conductor pipes and heads, with all necessary supports, covering and appurtenances, complete, as specified, for the lump sum of eight thousand four hundred forty-two dollars and no cents ($8,442.00).

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents and patented material, appliances and processes used in the work described in the specifications and agreements. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

Art. 35. The said Sanitary District agrees to pay said Contractor the sum herein specified in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final

responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed eighty-seven and one-half (87½) per cent of the value of the work properly performed under this contract, and that the remaining twelve and one-half (12½) per cent shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and delivery of the final certificates of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract.

The value of the work properly performed shall be estimated by the Engineer at the end of each month. Where lump sum prices are specified, the Engineer shall estimate the proportionate part of the lump sum accomplished. To facilitate this estimate, the Contractor shall furnish the Engineer with a balanced statement in detail showing the division of cost for each of the various sub-items comprised in the lump sum.

Final Payment.

Art. 36. Upon the completion of all the work included under this contract, the performance of satisfactory operation and acceptance tests, and the execution of the bond called for in Article 33, the Engineer will certify to that effect. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials except in the manner set forth in this agreement; nor until all the stipulations, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificates pay, and it hereby binds itself to pay the said Contractor in cash the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid, and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the heirs and legal representatives of said Contractor.

In Witness Whereof, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Finance Committee, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its President, to be duly attested, and its corporate seal to be hereunto attached.

CONTRACTOR'S BOND

Know All Men by These Presents, That we, the Carl John Stein Company, as principal and Hartford Accident and Indemnity Company as surety are held and firmly bound unto The Sanitary District of Chicago in the penal sum of four thousand two hundred twenty-one dollars and no cents ($4,221.00), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this 22d day of May, A. D. 1919.

THE CONDITION OF THE ABOVE OBLIGATION IS SUCH, That whereas the above bounden Carl John Stein Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the 22d day of May, A. D. 1919, for doing all the work, and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the furnishing, delivering and installing plumbing service, piping, gasfitting and conductor pipe work at the Calumet Sewage Pumping Station, in the City of Chicago, County of Cook, State of Illinois, as specified under Subdivision a of Division E of the attached contract.

Now, If the said Carl John Stein Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the plans accompanying the same, and in the time and manner therein prescribed, and further shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees which may in any wise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said Carl John Stein Company, its agents, employees or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract; and moreover shall pay to The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including repayment of overpayments and including also all valid claims and demands for first aid, medical, surgical and hospital services and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled 'An Act to promote the general welfare of the people of this state by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10th, 1911; in force May 1st, 1912," approved June 28th, 1913; in force July 1st, 1913, and all Acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said Carl John Stein Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

AND IT IS HEREBY EXPRESSLY UNDERSTOOD AND AGREED, And made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suits for damages occasioned by carelessness or neglect of said Carl John Stein Company or its agents, employees or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under said Act of the General Assembly of the State of Illinois, approved June 28th, 1913; in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or death suffered by employees, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Carl John Stein Company shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

CARL JOHN STEIN COMPANY. (Seal)

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 5, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance, to which were referred at the meeting held May 8, 1919 (page 469 of the Proceedings), bids for furnishing a five-ton motor truck to the Sanitary District reports that it has considered all the proposals presented and the qualifications of each bidder, together with the report submitted by the Electrical Engineer and finds that the lowest responsible bidder is the Hall Truck Sales Company.

Your Committee further reports that it is of the opinion that said Hall Truck Sales Company is competent to comply satisfactorily with the terms and conditions of the contract for the furnishing said five-ton motor truck and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the contract for furnishing the five-ton motor truck above specified be and the same is hereby awarded to the Hall Truck Sales Company for the lump sum price of $4,750.00, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute in duplicate said contract in accordance with the specifications of the Sanitary District when the same shall have been executed by said Hall Truck Sales Company, and it is further

Ordered, That the checks of the respective bidders for furnishing said five-ton truck be returned upon the execution of said contract by the parties thereto.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 5, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has had under consideration the question of paying to Byrne Bros. Dredging & Engineering Company current vouchers Nos. 25 and 26 in the sums of of $6,072.50 and $3,953.25 respectively for work performed by said company in the construction of the Calumet intercepting sewer contract section, No. 6, under its contract with the Sanitary District dated June 29, 1916 (page 903 of the Proceedings).

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that by the terms of said contract the entire work should have been completed on or before May 1, 1918, but certain questions relating to delays in the performance of said work have not yet been determined. That the work actually accomplished is about 93.3 per cent

of the entire work and the reserve percentage retained by the Sanitary District under said contract is sufficient to protect the rights of the Sanitary District if said payments are made.

Your Committee further reports that said contractor also entered into a contract with the Sanitary District dated June 29, 1916 (page 864 of the Proceedings), for the construction of the Calumet Intercepting Sewer contract, section No. 5, and is behind in the progress of said work and your Committee is of the opinion that said payments of $6,072.50 and $3,953.25 should only be made to said contractor on condition that the sureties on the bonds of said contractor for the faithful performance of each of said contracts consent thereto in writing and your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to draw warrants in the sums of $6,072.50 and $3,953.25, payable to the order of Byrne Bros. Dredging & Engineering Company and deliver the same to said Company on the receipt of the vouchers therefor, provided the United States Fidelity & Guaranty Company, as surety on the bond of said contractor for the faithful performance of its contract for the construction of said contract, section 6, and also as surety on the bond of said contractor for the faithful performance of its contract for the construction of contract section 5 of said intercepting sewer consents in writing that said payments may be made and that all the conditions and terms of both said contracts shall remain in full force and effect.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 5, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of June payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Construction Account.

T. J. Forschner Contracting Company (work on Calumet Sewage Pumping Station)	$ 62,185.58
Jas. O. Heyworth (work on Section 1, Calumet-Sag Channel)	11,133.06
A. Guthrie & Co., Inc. (work on Section 14, Calumet-Sag Channel)	1,531.25
Nash-Dowdle Company (labor and material on temporary pumping service at Evanston, Ill.)	775.00
Hutchins Lumber & Storage Company (lumber)	97.02
Amount carried forward	$ 75,721.91

Amount brought forward		$ 75,721.91
Engineering News Record (advertising)	52.20	
The Chicago Evening Post (advertising)	9.30	
Chicago, Rock Island & Pacific Ry. (labor for installing cribbing, etc., on R. I. bridge in Blue Island)	746.44	
A. Guthrie & Co., Inc. (labor for shoring banks at abutment for C. R. & P. Ry. bridge in Blue Island)	67.77	
A. Guthrie & Co., Inc. (labor for removing tines, etc., north of Channel on line of old Chicago Central Division)	10.20	
A. Guthrie & Co., Inc. (labor for piling, sorting, bracing of old C. R. I. & P. bridge No. 3, Blue Island	3.17	
A. Guthrie & Co., Inc. (work on Section 13, Calumet-Sag Channel)	17,164.02	
		$ 93,775.01
Maintenance and Operation Account.		
United Asbestos & Packing Company (tools, 39th St. Pumping Station)	$ 9.55	
Stewart Ice Company (ice, 39th St. Pumping Station)	9.50	
The Lunkenheimer Company (brass glove valves, 39th St. Pumping Station)	8.46	
H. W. Johns-Manville Company (cement and rings for valve stems, Lawrence Ave. Pumping Station)	54.25	
City Collector, City of Chicago (inspection, Lawrence Ave. Pumping Station)	13.00	
John McGillen, Clerk (special roll, repairs to boilers, Lawrence Ave. Pumping Station)	132.00	
Geo. B. Carpenter & Co. (repairs)	.52	
Sweet-Wallach & Co. (neg. preservers)	3.45	
Jas. A. Sackley Company (labor and material, Kenilworth avenue bridge)	359.90	
Consumers Company (material)	69.56	
Bentley, Murray & Co. (printing)	54.00	
Auto Trimming & Printing Company (changing tops of auto)	35.00	
Jas. Carmichael (labor and material)	12.00	
		781.19
Illinois & Michigan Canal and Illinois River Conditions Department.		
E. H. Heilbron (expenses)	$ 21.24

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

GEO. W. PAULLIN,
MATT A. MUELLER.
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel *(except as to voucher to the T. J. Forschner Contracting Company, for work on the Calumet Sewage Pumping Station, for $62,185.58, on which Mr. Sergel voted "nay")*, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance *(except as to voucher to the T. J. Forschner Contracting Company, for work on the Calumet Sewage Pumping Station, for $62,185.58, on which Mr. Nance voted "nay")* and Paullin—Seven on all vouchers and nine on all vouchers with the exceptions above noted.

Nays—None (except as above noted).

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, June 5, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that it has had under consideration the communication addressed to the Board of Trustees from the Commissioner of Public Works of the City of Chicago enclosing a report of the Division of Bridges of the City of Chicago to John Ericson, City Engineer, submitting a new layout for a bascule bridge across the south branch of the Chicago River at Twelfth street with estimates of cost and requesting the approval of the Board to the new layout.

Before giving any details of the new layout in question, the Committee deems it advisable to recount the activities of the Sanitary District with reference to building a bridge at the site in question.

As early as February, 1908, the Bridge Department of the Sanitary District made several preliminary designs of a double leaf bascule bridge at this site but it was found that very valuable railroad tracks crossing Twelfth street close to the east dock line and serving a freight house and yard north of the site would be destroyed by an abutment placed back of the dock line.

The river bends toward the east and it was desirable that the channel should be unobstructed up to the east

dock line and the bend should not be increased and navigation made more difficult, by placing an abutment in the river, which arrangement would be necessary in order to avoid large damages to railroad property that would result from blocking the railroad tracks. A single leaf bascule bridge could be built resting on an abutment on the west side of the river and with a narrow pier behind the east dock line that would not interfere with the tracks, but a 200 foot navigable channel was demanded by all interests and a very long single leaf, necessary for this width of the channel, was considered very objectionable and the idea of constructing a bascule bridge was therefore abandoned.

Again in 1909, the Bridge Department resumed its study of the situation and a vertical lift bridge was proposed at an estimated cost of $275,000.00 which provided a 200 foot clear navigable channel with the river unobstructed up to the east dock line and without interfering with the tracks on the east side of the river.

On February 21, 1910, your Committee held a hearing on the subject matter and representatives of the Chicago Association of Commerce, the Manufacturer's Association, the Lumbermen's Association and other river interests and the Chairman of the Committee on Harbors, Wharves and Bridges of the City of Chicago appeared before your Committee, an exhaustive report of the Bridge Engineer was read, sketches of the bridge inspected and all the questions involved were thoroughly discussed, pro and con and it was the unanimous opinion of the interests mentioned that the vertical lift type of bridge was the one best suited to meet the peculiar conditions of the site both as regards the railroads and the public and the vessel interests.

Following the meeting of your Committee, the Board on February 23, 1910, (page 235 of the Proceedings) adopted a report presented by your Committee and recommended that a bridge of the vertical lift type be erected at Twelfth street, designed to provide a navigable channel 200 feet wide in the clear.

On March 28, 1910, the Bridge Department received a letter from Mr. F. A. Delano, representing the Chicago Plan Commission, stating that Twelfth street would be widened and requesting that a bridge be constructed at this point eighty or ninety feet in width. Further work on the design of the vertical lift bridge was then suspended, pending the development of the Twelfth street widening project.

On September 11, 1910, at a meeting of your Committee attended by representatives of the City, the City was advised that the District was willing to construct a new bridge if the City would pay all cost of constructing a wider bridge over and above the cost of constructing a bridge within the existing sixty-six foot street.

On October 13, 1911, (page 1207 of the Proceedings) the Board of Trustees adopted a resolution that it would co-operate with the City of Chicago in the construction of a movable bridge at Twelfth street which would conform to the plans of said City for the widening of said street and that the Sanitary District would enter into a contract with the City of Chicago to be approved by the Engineering and Law Departments of the Sanitary District for doing said work and pay one half the cost thereof.

On May 24, 1912, at a conference of the Board of Trustees and the Commissioner of Public Works of the City of Chicago, it was agreed to abandon the lift bridge project and to construct a bridge of the double leaf bascule type. The City was asked to obtain the land necessary for the site

of such a bridge and during the years 1912 and 1913, negotiations were had with the Railroad Companies to obtain from them the necessary land on the east side of the river for the east abutment of such a bridge, but without success.

It became necessary in the year 1914, to provide as soon as possible, plans for an adequate wide bridge at Twelfth street to introduce in evidence in certain court proceedings for the widening of Twelfth street.

On December 28, 1914, the Finance Committee of the City Council recommended that a direct lift type of bridge be constructed at Twelfth street and the City Council adopted this type and authorized the Commissioner of Public Works to enter into a contract with the Strauss Bascule Bridge Company for plans and specifications. Preliminary plans and estimates of cost of a direct lift bridge were transmitted by the Commissioner of Public Works to the Sanitary District for approval under date of March 25, 1915.

On May 27, 1915 (page 555 of the Proceedings) the Board of Trustees of the Sanitary District passed an order that the President and Clerk be authorized and directed to enter into a contract with the City of Chicago to pay one-half the cost of such a bridge and the contract between said municipalities was adopted by the Board on December 9, 1915, (page 1763 of the Proceedings).

The cost of this bridge was estimated at $521,000.00 and included $35,000.00 for plans to be made by the Strauss Bascule Bridge Company, one half of which cost was to be paid by the Sanitary District. The sum of $10,000 has been paid to the City of Chicago on account of the work done by said Bridge Company. Bids were received by the City on the direct lift bridge design on January 10, 1917, the lowest bid being around $1,200,000.00.

A further conference between the Commissioner of Public Works and your Committee was held February 5, 1917, and it was agreed that all bids were to be rejected and new bids advertised for in the future.

On March 23, 1914, the City Council passed what is known as the Union Station Ordinance in which is a provision for the straightening of the south branch of the Chicago river by constructing a new channel from north of Taylor street to Eighteenth street. Under the terms of this ordinance there is to be no encroachment on the railroad property west of a line parallel to and distant 1086.8 feet east of the east line of Canal street between Twelfth and Sixteenth streets.

This new channel cuts off the bend of the river and lies almost entirely to the west of the present river at Twelfth street.

In designing the Strauss vertical lift bridge in 1916, it was contemplated that if and when said river is straightened the bridge would be moved bodily to the new site and placed upon a new substructure at an estimated cost of $95,000.00.

After the bids for the construction of this bridge were rejected in 1917, the Bridge Department of the City of Chicago made a further study of the situation and prepared a new layout which is the one under consideration, of constructing a bascule bridge over the existing river channel that could be utilized very largely either when the river is straightened or if it is not straightened. The present layout in substance is as follows:

The City proposes to construct a single leaf deck bascule bridge over the present river channel, the west abutment of which will lie east of and adjoining the future east dock line of the proposed new straightened channel. The east face of this abutment will be about 1384 feet east of

Canal street extending about 85 feet into the existing river measured from the west dock line in the north line of Twelfth street. This leaves room for but 140 feet width of channel to the east dock line, the channel through the bridge being considerably skewed. Owing to the presence of railroad tracks along the east dock line a bridge abutment cannot be placed in the east side of the river and only a single leaf bascule bridge can be built with its abutment on the west side of the channel.

This single leaf bascule bridge is to be so constructed that in case the river is not straightened the single leaf can be shortened and an additional east leaf constructed to be carried by an abutment located east of the tracks on the east side of the river and the east dock line can then be moved back by acquiring additional property and shifting certain of the railroad tracks, so as to provide 170 feet clear width of channel.

In case the river is straightened, instead of constructing the additional east leaf as above described, it is proposed by the City to shorten the single lead and rotate it 180 degrees on its abutment so as to face in the opposite direction to become the east leaf of a double leaf deck bascule bridge over the new channel.

It is therefore apparent that the layout of the single leaf bascule bridge under construction has been adopted by the Bridge Department of the City of Chicago in order to save and utilize most of the substructure and superstructure of the new bridge whether the proposed straightening of the Chicago river between the points above stated is or is not accomplished in the future.

To compensate for the narrow 140 foot width of navigable channel, the City of Chicago proposes to widen the river by acquiring a point of land on the west side of the river south of Twelfth street and dredging same to provide a straight channel one hundred forty feet wide, extending from north of Twelfth street through the new bridge and for a distance of 1,000 feet south of same. This will give a straighter channel for navigation purposes than would a bridge providing 200 feet clear width of channel without such widening.

To provide sufficient flow of water through the bridge during and after construction, the City of Chicago has agreed, to purchase the required land and construct a bypass behind the site of the west abutment of sufficient area to reduce the mean velocity of the flow in the river to less than one and one quarter miles per hour. It has been further agreed that this bypass shall be built before the construction of the abutment of the new bridge is commenced and shall be maintained unobstructed for as great a width as possible at all times thereafter. The City further agrees before commencing work on said abutment to extend the east arm of the existing center pier swing bridge so as to provide at least 92 feet clear width of channel at all times thereafter. This 92 feet channel together with the bypass is to provide sufficient cross section of channel to insure that the velocity of current through the bridge during construction will not be dangerous for navigation at the site of the work.

It is proposed to maintain the swing bridge in service until the south part of the new bridge is completed and in use for traffic and then to remove the swing span and complete the bridge, thereby causing the least possible interruption to street traffic.

Your Committee further reports that on April 21, 1919, your Committee held a meeting to consider the layout in question. To this meeting were invited representatives of the Chicago Association of Commerce, Chicago

Plan Commission, City Club of Chicago, the Chicago Real Estate Board, Lumbermen Association of Chicago, Lake Carriers Association and numerous officials of the City of Chicago and representatives of navigation interests in the City of Chicago.

The Chicago Association of Commerce, the Chicago Plan Commission and the Municipal Art Committee, Illinois Chapter A. I. A. presented resolutions recommending the plan of the City of Chicago for the layout under consideration, which resolutions are herewith presented to the Board and made a part of this report.

The questions involved were thoroughly discussed by representatives of the civic bodies mentioned and by persons interested in the navigation of the Chicago River and it was the concensus of opinion that the plan under discussion should be adopted with the distinct understanding that the new bridge to be constructed at Twelfth street should be of a temporary character and that the adoption by the Sanitary District of such a plan was requested so that the great public improvement of Twelfth street should not at this time be delayed until the question of straightening the Chicago river as contemplated could be finally accomplished.

Your Committee further reports that it has been the settled policy of the Sanitary District to widen the Chicago River to a uniform width of two hundred (200) feet at all points between bridges and to reduce all encroachments into the channel width of the river by way of piers, abutments or bridge protections to the minimum in order to afford a suitable waterway for navigation. And it has been the aim of the Trustees to have the work on the Chicago River as well as the main channel meet the greatest efficiency in aid of the deep waterway now under consideration and contemplated by the State of Illinois for which the people of this state have authorized for its development a $20,000,000 bond issue. The work of the District on the Chicago river and main channel forms the most important link of this waterway connecting the Great Lakes with the Mississippi river. To this end the Sanitary District has expended in its river widening policy upwards of $11,000,000. The Sanitary District has received the support of all the civic bodies of the city and river interests in carrying out this policy and your Committee is of the opinion that the policy above outlined should not be deviated from at this time, unless proper showing can be made that the design of bridge as recommended by the city engineers with an abutment extending approximately eighty-five (85) feet into the channel is for but temporary use and that within a reasonable time such encroachment as the design of bridge submitted would create would be removed, as the permission of such encroachment and bridge opening as designed of a permanent nature at the most pronounced angle of the river would be a complete reversal of past policies of the District, defeating the purpose for which millions of dollars of expenditures have been made and materially aecting the efficiency of the deep waterway contemplated.

It has been stated by representatives of the City of Chicago and representatives of various civic bodies of the City of Chicago that a proper showing can be made that the bridge design as approved by the city engineers will be but of temporary use as a result of plans now under way for the straightening of the south branch of the Chicago river and that the design of bridge recommended is designed to answer a great public demand that the improvement of Twelfth street which has cost the tax payers of the City of Chicago a vast sum of money shall not be delayed.

Your Committee further recommends the passage of the following order:

Ordered, That the Sanitary District hereby approves the new layout for the construction of a single leaf bascule bridge across the south branch of the Chicago river as hereinbefore described, *provided however,* that the City of Chicago shall make a reasonable showing that the straightening of the south branch of the Chicago river can be brought about within a reasonable time thereby making said single leaf bascule bridge of temporary use; and it is further

Ordered, That pending such showing being made the Chief Engineer and Attorney be, and they are hereby authorized to negotiate with the City of Chicago for a contract relating to the construction of said bridge which will safeguard the Sanitary District; and it is further

Ordered, That a copy of this resolution be sent to his Honor, the Mayor, and City Council, the Plan Commission, the Association of Commerce and all parties in interest.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

The following are the communications from the Commissioner of Public Works of the City of Chicago:

Subject: Bascule Bridge at 12th Street.

DEPARTMENT OF PUBLIC WORKS
COMMISSIONER'S OFFICE
CHICAGO.

June 4, 1919.

Mr. Wallace Clark, Chairman, Engineering Committee, Board of Sanitary District Trustees, Karpen Building, Chicago.

DEAR SIR—The attached letter from the Bureau of Engineering of the City of Chicago and the attached plans and drawings show definitely the fact that the single leaf bascule bridge the City proposes to construct over the South Branch of the Chicago River at 12th street will be readily convertible at any time in the near future into a part of the proposed double leaf bascule bridge spanning the river at this point, when said river is straightened in accordance with the Chicago Union Station ordinance.

In conclusion we summarize by stating that the proposed single leaf bascule bridge is temporary in location. We therefore trust that this statement is sufficient assurance from the City of Chicago that this proposed bridge is of a temporary nature only.

Yours very truly,
CHAS. R. FRANCIS,
Commissioner of Public Works.

BRIDGES: TWELFTH ST.
SUBJECT: Plans.

June 4, 1919.

Hon. Charles R. Francis, Commissioner of Public Works.

DEAR SIR—In a meeting held June 3rd in the Council Chambers in reference to the City's plan for the Twelfth Street Bridge, Mr. Wallace Clark, Chairman of the Engineering Committee of the Sanitary District of Chicago, stated that his committee stood ready to recommend the approval, by the Sanitary District Trustees, of a single leaf bridge with 140 ft. temporary channel with by-pass, shown on City's drawing No. 4NPre-701, providing the City would give a reasonable assurance that the use of the bridge to be constructed in accordance with this plan, be of a temporary nature.

In reply to this inquiry we would say that while this bridge over the present channel as a structure is permanent, its location however, is temporary. This is evident by the fact that the Bureau of Engineering of the City of Chicago, has designed a bridge in such a way that it can be turned around in the event that the present channel is moved west in accordance with the Chicago Union Station Co. ordinance and thus become the permanent east leaf over the new channel.

The channel given by the single leaf bridge layout together with by-pass gives an area of 4680 sq. ft. at a velocity of 1.17 miles per hour or 8040

cu. ft. flow per second, which is more than is given by the 200 ft. standard channel required by the Sanitary District having a cross sectional area of 4944 sq. ft. at a velocity of 1.1 miles per hour or 7995 cu. ft. flow per second.

This design is conclusive evidence that the City authorities consider this layout as an expedient to complete the Twelfth Street Improvement now.

Yours truly,
JOHN ERICSON,
City Engineer, PSC.

Recommended by:
THOS. G. PIHLFELDT,
Engineer of Bridges.
P. S. CORNBE,
Assistant City Engineer.

Mr. Clark moved that the report be adopted and the accompanying order passed, and that the communications from the Commissioner of Public Works of the City of Chicago be published with the report.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, June 5, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Simonds Manufacturing Company, one of the Sanitary District's oldest and best consumers, has requested the Sanitary District to furnish it with approximately 400 H. P. additional electrical energy, which request has been favorably acted upon by the Commitee on Electrical Development.

Your Committee further reports that it is advised by the Electrical Engineer that in order to comply with said request, it is necessary to purchase and install three K. V. A. 2200/220-440 volt transformers and increase the capacity in the leads from the transformers to the service switches; that he has received three bids for furnishing such transformers of a make and type similar to those now in service, which bids are herewith transmitted to the Board. The lowest of said bids is that of the Pittsburgh Transformer Company in the sum of $1,984.17 f. o. b. Pittsburgh, and he recommends that said bid be accepted.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Electrical Engineer be and he is hereby authorized and directed to accept the bid of the Pittsburgh Transformer Company in the sum of $1,984.17, to furnish the transformers above specified.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
MATT A. MUELLER,
PATRICK J. CARR,
H. E. LITTLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, June 5, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith presents renewal contracts with Edward F. Reineck, doing business as the Commercial Wall Paper Mill, two contracts,

one for power and the other for welder service with Morris Kurtzon and George B. Kurtzon, copartners doing business under the name and style of Garden City Plating & Manufacturing Company, both concerns being located at 1430 South Talman avenue, with E. C. Pronger, W. H. Pronger and H. F. Pronger, copartners doing business under the name and style of Blue Island Livery and Transfer Company and with the Advance Waterproof Cement Company, both of Blue Island, Illinois, wherein the Sanitary District agrees to furnish and said parties agree to take electrical energy for the periods of time and upon the terms and conditions therein set forth. All of said contracts have been approved by the Electrical Engineer.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute in duplicate the attached contracts which have heretofore been executed by said parties.

Respectfully submitted,
H. E. LITTLER,
Chairman.
MATT A. MUELLER,
WM. J. HEALY,
WALLACE G. CLARK,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, June 5, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development reports that it has received a communication from the Electrical Engineer in which he states that the Chicago and Cook County School for Boys, one of the present consumers of electrical current of the Sanitary District, has requested the District to install a bank of transformers for furnishing electrical energy for supplying one 15 H. P. motor for operating the pumps, which furnish water for the grounds and buildings of said school, at an estimated cost of $300.00, and he recommends that said request be granted.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Electrical Engineer be and he is herey authorized and directed to furnish and install the bank of transformers above specified and perform the necessary work connected therewith, provided the total cost of the same shall not exceed the sum of $300.00.

Respectfully submitted,
H. E. LITTLER,
Chairman.
MATT A. MUELLER,
WALLACE G. CLARK,
WM. J. HEALY,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, June 5, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith transmits to the Board a form of application for use by consumers who desire to obtain electric light and limited power service.

The form in which said electrical energy is to be furnished, the term of such service, the rate, minimum charge therefor and the discount allowed, are all stated in said application and rules and regulations are indorsed on the back of said application and made a part of the same which govern the installation, inspection and care of the electrical equipment both of the consumer and the Sanitary District.

Your Committee further reports that said application provides that when it is accepted and signed by the Electrical Engineer, then the same shall constitute a contract between the applicant and the Sanitary District.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the form of application for electric light service and rules and regulations relating thereto above referred to be and the same is hereby adopted by the Board, and it is further

Ordered, That the Electrical Engineer be and he is hereby authorized to accept and sign such applications for electric light service when in his judgment the furnishing of such service is advantageous to the Sanitary District and report the same to the Board for its approval.

Respectfully submitted,

H. E. LITTLER,
Chairman.
MATT A. MUELLER,
WALLACE G. CLARK,
WM. J. HEALY,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Employment.

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, June 5, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of actions taken:

NEW APPOINTMENTS.

Provided for in 1919 Budget.

Engineering Department.

John S. Leininger, rough carpenter, 55 cents per hour.

Michael Stradata, laborer, 45 cents per hour.

Jos. Thomas, laborer, 45 cents per hour.

Silvio Marek, laborer, 45 cents per hour.

INCREASES.

Provided for in 1919 Budget.

Police Department.

George McPherson, from patrolman at $125.00 per month to sergeant at $135.00 per month.

William Wittlieb, from patrolman at $125.00 per month to sergeant at $135.00 per month.

REINSTATEMENTS.

Due to Honorable Discharge from the U. S. Army Service.

Clerical Department.

Edward J. McCabe, stenographer, $150.00 per month.

Engineering Department.

Glen V. Munday, rodman, $115.00 per month.

Electrical Department.

Wm. D. Mackie, lineman, $165.00 per month.

TRANSFER.

Clerical Department.

Bryan Hartnett, from stenographer at $150.00 per month to stenographer and index clerk at $150.00 per month.

Respectfully submitted,

GEORGE W. PAULLIN,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
Committee on Employment.

Mr. Paullin moved that the report be received, approved and placed on file:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Cark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Passed and not voting—Mr. Sergel—One.

Report of Special Committee.

Mr. Clark presented the following report from the Special Committee appointed to carry on negotiations with reference to compromise of controversies between the Sanitary District and the United States Government:

CHICAGO, June 5, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Special Committee appointed by order of the Board to carry on negotiations with reference to compromise of controversies between the Sanitary District and the United States Government concerning the amount of the withdrawal of water from Lake Michigan by the Sanitary District makes the following report:

(1) There is attached hereto copy of letter signed by W. V. Judson, Colonel, Corps of Engineers, the District Engineer at Chicago, U. S. Army, addressed to Mr. Edmund D. Adcock, Special Attorney, Sanitary District, dated May 29, 1919. Accompanying this letter is a paper entitled "Memorandum," in which memorandum there is contained certain suggestions with reference to the sewage disposal problems of Chicago and vicinity. Paragraph 3 is the only one with which the Sanitary District is concerned. It is as follows:

"3. Chicago now disposes of its sewage by conveying it into the Illinois River, using about 8,000 cubic feet per second of Lake Michigan water. Unless steps are now taken to begin the purification of Chicago District sewage in accordance with a reasonable and progressive plan it will be necessary for the health of Chicago continually to increase the draft of water from Lake Michigan on the one hand and continually to dump the sewage of Chicago on the people of the Illinois and Mississippi valleys. The United States will doubtless meet this locality in a fair anl frank way, but at this time it is necessary to have assurance that the purifications of sewage will be begun in the very near future and continued at a reasonable rate so that twenty years from now it may not seem necessary for the protection of the health of Chicago to withdraw from the lake, to the great detriment of other interests, quantities of water which every one concerned would be compelled to call excessive. There will always be a tendency to increase the flow from Lake Michigan by reason of the advantages that would thus result to water powers already existing or to be developed between Lockport and Starved Rock. In any event, if the Drainage District be permitted, in accordance with any new policy that may be adopted, to withdraw either temporarily or for all time, more than 4,166 cubic feet per second as

now authorized by the War Department, in my opinion the Drainage District should be required to advance to the United States sufficient funds to build, maintain and operate works for the regulation of the levels of Lakes Michigan, Huron, Erie and Ontario."

A substantially identical letter, with copy of "Memorandum" above mentioned, was sent by Colonel Judson to Mr. George M. Wisner, Chief Engineer of the Sanitary District.

(2) Your Committee has considered sidered the contents of said letters and memorandum and has drafted a letter or communication to be sent to Colonel W. V. Judson, U. S. Army District Engineer at Chicago, in reply to said letters and suggestions contained in said memorandum, and recommends that a letter in accordance with the draft hereto attached be immediately signed by your Committee and sent to Colonel Judson, and, therefore, your Committee recommends the passage of the following order:

Ordered, That your Committee be and it is hereby authorized and directed to send to W. V. Judson, Colonel, Corps of Engineers, United States Army, the District Engineer at Chicago, a letter in accordance with the attached draft.

Respectfully submitted,

WALLACE G. CLARK,
GEORGE W PAULLIN,
WILLIAM J. HEALY,
PATRICK J. CARR,
Special Committee.

DRAFT OF LETTER TO W. V. JUDSON, COLONEL, CORPS OF ENGINEERS, TO BE SENT BY SPECIAL COMMITTEE ON LAKE LEVEL CONTROVERSY, WHICH IS REFERRED TO IN THE FOREGOING REPORT AND ORDER OF SAID COMMITTEE.

W. V. Judson, Colonel, Corps of Engineers, United States Army, Chicago, Ill.

DEAR SIR—The undersigned were appointed some time ago as a Special Committee to represent the Board of Trustees of The Sanitary District of Chicago to carry on negotiations looking to the compromise of controversies between the Sanitary District and the United States concerning the amount of withdrawal of water from Lake Michigan at Chicago.

The Committee has considered your letters to Mr. George M. Wisner, Chief Engineer of the Sanitary District, and Mr. Edmund D. Adcock, Special Attorney in this matter, dated respectively May 24 and 29, and also the suggestions contained in Paragraph No. 3 of "Memorandum" attached to each of said letters. The Commitee has made a report concerning the said letters and suggestions contained in the Memorandum to the Board of Trustees of the Sanitary District, and the Board has authorized by formal action the sending of this letter, the contents of which have been duly considered:

(1) The Sanitary District is not only willing, but anxious to accept the suggestion that co-operation be brought about between the Sanitary District and the United States for the purpose of finally settling all controversies having to do with the amount of the diversion of water from Lake Michigan at Chicago.

In this connection we call your attention to the ordinance duly passed and adopted by a unanimous vote of the Board of Trustees of the Sanitary District on January 5, 1918, and a copy of the Proceedings of the Board of Trustees of said date, containing copy of said ordinance, is herewith handed you. Under the ordinance mentioned the Sanitary District offered to compromise the litigation pending with reference to the Chicago diversion by paying to the United States the amount of money necessary to construct compensating works in the St. Clair and Niagara Rivers, recommended by the Board of Engineers for Rivers and Harbors in report entitled, "Final Report on Waterway from Lockport to Utica." This report was submitted to Congress by the Secretary of War in the early part of the year 1914. In consideration of the money mentioned to construct compensating works the United States was expected to fix the maximum amount of withdrawal of water at Chicago at 12,000 second feet. The compensating works were to be constructed of such size and in such manner as to compensate for the alleged lowering of lake

surfaces (Huron, Michigan and Erie, Ontario being taken care of by the Gut Dam construction), due to the withdrawal of 12,000 second feet. The cost of constructing these works was estimated in 1913 by the Engineer Corps to be approximately $475,000.00. It was understood, however, by the Board of Trustees of the Sanitary District that war conditions would make the cost considerably more, and the Sanitary District appropriated $600,000.00 in its appropriation ordinance for the year 1918 to take care of such expenditure.

The Board now stands ready to provide the money necessary either out of funds in its hands or by bond issue.

On January 29, 1918, a bill was introduced in Congress by Congressman Gallagher of Illinois, providing for the fixing of the maximum amount of withdrawal of water at Chicago on condition that the Sanitary District should defray the expense necessary to construct these compensating works according to the estimate of cost to be made by the Chief of Engineers of the United States Army and approved by the Secretary of War. This bill was later referred by the House Committee on Rivers and Harbors to the Secretary of War and the Chief of Engineers of the United States Army for consideration. The Chief of Engineers by letter dated February 15, 1918, indicated to the Chairman of the Committee on Rivers and Harbors that the bill could not be approved on the ground principally that Canada objected because of alleged lowering of the surface levels of the water in Montreal Harbor in the Lower St. Lawrence River, due, as claimed, to the Chicago diversion.

Accordingly the Chief Engineer and Attorney of the Sanitary District took up negotiations with Canadian authorities, the Harbor Board of Montreal and others for the purpose of working out some plan to which Canada, the United States and the Sanitary District might agree. After several conferences with the Chief Engineer of the Harbor Board and others at Montreal, and at Chicago, a plan was suggested which contemplated the control to some extent of the outflow of Lake Ontario. This plan comprehended the construction of a movable dam in the upper part of the St. Lawrence River, whereby a certain amount of water could be stored during nine months of the year in Lake Ontario, making it possible to deliver during September, October and November an amount considerably larger than the normal flow to the St. Lawrence River, thereby raising the levels of the Lower St. Lawrence an amount in excess of the claimed lowering due to the Chicago diversion during the said three months when navigation in the Lower St. Lawrence River requires greater depths.

The District thereupon employed Francis C. Shenehon, for a number of years head of the Lake Survey, and Dean of the College of Civil Engineering of the University of Minnesota, to draw plans for regulation works for Lake Ontario to be constructed in the St. Lawrence River, which works would accomplish the purposes mentioned. Those plans have been drawn and Mr. Shenehon has made a report to the Chief Engineer of the Sanitary District, describing and recommending the construction of certain works there, which works he states will be feasible and will accomplish the purposes desired.

Mr. Wisner, Chief Engineer of the Sanitary District, after conference with General Black in the early part of July, presented a letter setting forth in a preliminary way the basis of the position taken by the District for a compromise of the difficulties existing between the United States and the Sanitary District. To this letter was attached a letter from the Secretary of State, enclosing certain papers having to do with the negotiations between the United States and Great Britain relative to Canadian boundary waters. A copy of said letter of the Chief Engineer of the Sanitary District to General Black is herewith handed you. In the latter part of October, 1918, Colonel Mehaffey of the Engineer Corps, U. S. Army, and Professor Phelps visited Chicago and inspected the works of the Sanitary District for the diversion of sewage, drainage and water from Lake Michigan.

Recently Generals Black and Taylor, Colonel W. V. Judson and others inspected the works of the District.

A brief is being prepared in accordance with the understanding with the Chief of Enginers, wherein all the historical facts relating to this controversy will be collated and there will be set forth the reasons for the District's position taken in the negotiations for a compromise of the controversies mentioned. The brief will also contain suggestions concerning the method of compensating for the alleged lowering of lake sur-

faces (Huron, Michigan and Erie), and also with reference to the best method of taking care of alleged damage to Canadian navigation interests if the United States considers that under all the circumstances Canada has any right at this time to make any objection. We believe that a consideration of the various steps taken in the negotiations for the treaty of 1909 between Great Britain and the United States concerning Canadian Boundary Waters clearly shows that Canada received full compensation for any damage which might result to her navigation interests by reason of the Chicago diversion. Canada was given the right to divert 36,000 cubic feet per second of water at Niagara Falls for power purposes, while the United States was only permitted under the treaty to divert 20,000 cubic feet per second. The 16,000 additional allowed Canada was because of the Chicago diversion, and in the negotiations for the treaty all of the persons carrying on such negotiations in arriving at the division of waters at Niagara Falls considered that the United States should be charged with the Chicago diversion in addition to the 20,000 c. f. s. diversion permitted for power purposes to the United States at Niagara Falls.

Part of the brief above mentioned has been set up in galley form. The completion of the brief is awaiting certain engineering investigations. It will be ready for delivery shortly when the negotiations on this matter can immediately proceed.

(2) The good faith of the Sanitary District in endeavoring to plan, install and operate artificial purification works supplementary to and in aid of the works constructed to withdraw water from Lake Michigan for dilution purposes (20,000 cubic feet per minute for each 100,000 of population, as required by state law) is clearly demonstrated by experiments made by the District to ascertain the best method of artificially purifying sewage, works constructed and under construction, and the acquirement of sites for such works. Erroneous statements have been made and expressed by persons opposed to the plans of the District, that the District contemplated and proposed to continuously divert from Lake Michigan the amount of water required by State law according to the population of the District without regard to the amount. The Sanitary District has never taken the position, and it does not now, that it had the right to withdraw more than the maximum flow of the rock section of the main channel of the District. The District has always assumed there would be such limitation of the withdrawal of water and that then it would be necessary to install and operate works to take care of the sewage that could not be disposed of by this limited flow. The District has also comprehended that works for the disposition of trade wastes and sewage in various localities where the dilution system could not effectually operate by reason of inability to deliver at such points the required amount of dilution water would have to be installed and operated to take care of local nuisances.

The District constructed and has now in operation at Morton Grove, Illinois, an Imhoff Tank, and is constructing, or is about to construct in connection with such tank a sprinkling filter for the disposition of the sewage of Morton Grove.

In the Desplaines River Valley, to eliminate nuisances in the Desplaines River and to take care of the sewage of the Towns of Riverside, Maywood, River Forest and others, the District is now constructing an Activated Sludge Plant, together with the necessary intercepting sewers for the collection of the sewage of those towns.

The Board of Trustees has authorized the condemnation of one hundred acres of land near the Calumet Sewage Pumping Station at 125th street and Michigan avenue, Chicago, on which there is to be constructed an artificial sewage disposal plant.

In the Stock Yards District, to take care of the trade wastes of Packingtown, the District has acquired a site for purification works of eight to fourteen acres.

At 39th street and Lake Michigan the South Park Improvement project contemplates the setting aside of sufficient land for the construction of purification works for the sewage collected at that point.

The Sanitary District has recently been carrying on experiments for the construction of small disposal plants at sewer outlets along the North Branch of the Chicago River, in order to eliminate the nuisanes now existing in the North Branch due to the inability to provide sufficient water from Lake Michigan to dilute the sewage flowing in that river.

At Summit, Illinois, the District owns over two hundred acres of land which may be available for such works.

The Sanitary District has for a number of years carried on extensive experiments in sewage purification. As you well know, the art of sewage purification has been for some time in a state of flux. Various methods have been presented and for a time approved, and afterwards cast aside and replaced by some other method which has received like treatment. Some of the best sanitary engineer talent in the United States has been provided by the District for these experiments, so that sanitary engineers throughout the United States frequently come to the Sanitary District to obtain information regarding the solution of sanitary problems under consideration by them.

While the Sanitary District constructed in 1907 a hydro-electric plant at Lockport, Illinois to develop the water power incidentally created by the operation of the Main Channel of the Sanitary District, and has operated such plant for the past twelve years, not one single drop of water has been taken by the Sanitary District from Lake Michigan for this water power. The mean twenty-four hour withdrawal has never at any time exceeded the state law requirement for dilution purposes.

(3) The Sanitary District is ready at any time to give you any data that it has with reference to the subject matter of this letter, to proceed at any time with conferences concerning the solution of the questions above mentioned and to co-operate with the United States, with a view to fixing the permanent maximum amount of diversion from Lake Michigan and also specifying the progress of installation of artificial purification works to supplement the diversion works, so that when the sewage of the District cannot any longer be taken care of by the maximum permanent flow fixed, artificial sewage purification works will be provided for the sewage of the increased population.

Of course, any statements made in connection with these negotiations are understood to be without prejudice to litigation pending between the Sanitary District and the United States.

Very respectfully yours,
WALLACE G. CLARK,
GEORGE W. PAULLIN,
PATRICK J. CARR,
WM. J. HEALY,
Special Committee.

FROM: W. V. JUDSON, COLONEL, CORPS OF ENGINEERS,

TO: MR. EDMUND D. ADCOCK, SPECIAL ATTORNEY, SANITARY DISTRICT OF CHICAGO, KARPEN BUILDING, CHICAGO, ILLINOIS.

DEAR SIR—I enclose herewith a memorandum which is in a way self-explanatory. It itemizes the three principal respects in which it is desirable there should be co-operation between certain local bodies and the United States and the adoption of harmonious policies.

I am sending a copy of this memorandum to a number of gentlemen of Chicago, requesting each to advise me as to whether anything can be done at this time through proper conferences or otherwise to advance the cause of co-operation and harmonious action as proposed.

Thanking you in advance for any suggestions you may be kind enough to make in this connection, I am,

Yours very respectfully,
(Signed) W. V. JUDSON,
Colonel, Corps of Engineers.

MEMORANDUM.

In several important matters involving the care and protection of navigable waters it is important that the city of Chicago and other local agencies come to a proper understanding with the United States. In the following numbered paragraphs an effort is made to describe these matters as to which it is advisable that mutual understanding be sought and harmonious action taken.

1. How long will it be advisable for the United States to require drawbridges on the Chicago River and its branches to facilitate navigation by lake vessels? Such navigation is rapidly declining. The cost of constructing, maintaining and operating draw bridges, and, through their operation, of delaying land traffic is already enormous and, of course, increasing. It is necessary to estimate the situation in this matter in order that economic loss incident to a change of policy with reference to the river, if and when such change of policy may occur, may be kept at a minimum.

In its fore shore along Lake Michigan Chicago possesses a marvelous asset. Nearly a hundred square miles, now submerged by Lake Michigan off the water front of Chicago, lie within less than forty-two feet of water. If this area be properly allocated to

park, harbor and possibly other purposes, many interests can be served exceedingly well to the great advantage, at once, of the locality and of the United States, considering the latter as the guardian of interstate navigation. To understand what a wealth this fore shore confers upon Chicago, it is only necessary to consider what would be the situation if the lake front of Chicago were like the lake front of Michigan City, where the 42 foot contour is only one-fifth as far out in the lake as it is here. Water deeper than 42 feet is practically useless for the creation of land in any considerable quantities. It will be possible for the United States to be very much more liberal at this time in authorizing the creation of park lands in this fore shore area if the state agrees that the park lands within certain areas may be caused to revert to harbor purposes upon the proper demand of the United States. It is necessary to reserve certain lands for harbor purposes at this time, and to have the possibility of changing certain lands, temporarily allocated to other purposes, to harbor purposes if the demand arises in the future. No one can say today how large an area will be required for harbor purposes in the distant future, when deep waterways may connect the Great Lakes with the sea and permit Chicago to become a great seaport. It is also obvious that if Chicago River ceases to be used by lake vessels, a considerable provision must be made before this happens to accommodate lake vessels in greater numbers than now on the lake front.

3. Chicago now disposes of its sewage by conveying it into the Illinois River, using about 8,000 cubic feet per second of Lake Michigan water. Unless steps are now taken to begin the purification of Chicago District sewage in accordance with a reasonable and progressive plan it will be necessary for the health of Chicago continually to increase the draft of water from Lake Michigan on the one hand, and continually to dump the sewage of Chicago on the people of the Illinois and Mississippi valleys. The United States will doubtless meet this locality in a fair and frank way, but at this time it is necessary to have assurance that the purification of sewage will be begun in the very near future and continued at a reasonable rate so that twenty years from now it may not seem necessary for the protection of the health of Chicago, to withdraw from the lake, to the great detriment of other interests, quantities of water which everyone concerned would be compelled to call excessive. There will always be a tendency to increase the flow from Lake Michigan by reason of the advantages that would thus result to water powers already existing or to be developed between Lockport and Starved Rock. In any event, if the Drainage District be permitted, in accordance with any new policy that may be adopted, to withdraw either temporarily or for all time, more than 4,166 cubic feet per second as now authorized by the War Department, in my opinion the Drainage District should be required to advance to the United States sufficient funds to build, maintain and operate works for the regulation of the levels of Lake Michigan, Huron, Erie and Ontario.

THE SANITARY DISTRICT OF CHICAGO.

PRELIMINARY STATEMENT.

July, 1918.

GEORGE M. WISNER,
Chief Engineer.

CHICAGO, July 15, 1918.

Major General W. M. Black,
Chief of Engineers, U. S. Army,
Washington D. C.

1. *Prefatory*—This statement is made pursuant to conference held at your office between you and members of your department and myself and others representing The Sanitary District of Chicago, and suggestion previously made to me by Brigadier General Charles Keller. It concerns the diversion of water from Lake Michigan into the Chicago Drainage Canal and is made for the purpose of placing before the Engineer Department certain salient facts and considerations preliminary to the inspection of our works by certain officers of the Corps assigned by you to study and report upon this matter, and also to printed brief of the matter more fully discussing the questions involved to be submitted after the inspection is made.

2. *Purpose*—The Drainage Canal was designed to dispose of the sewage and drainage of the City of Chicago and contiguous areas by the dilution method.

3. *Water Supply*—The reversal of flow in the Chicago River removed the principal menace of a sewage contaminated water supply for the population tributary to the Sanitary District.

4. *Method*—At the time of the inception of the project (1889) the method employed appeared to eminent Sanitary and Hydraulic Engineers the best solution of Chicago's water-supply and sewage-disposal problems.

5. *River Pollution*—At the time of the opening (1900) of the greater canal the Illinois River with a low water summer flow of less than 500 cubic seconds feet had been receiving since 1848 some of the sewage of Chicago, pumped over the Divide prior to 1872 and flowing by gravity since that time; it drained manured farm lands, and received the sewage and industrial wastes of towns on its banks. This Illinois River was not an entirely pure stream. The population of the Illinois River Valley largely use the artesian or deep-well sources for municipal water supply.

6. *Canal Capacity*—While the Engineers in designing the canal intended to have a capacity in the rock cut of the minimum provided by State law —10,000 cubic seconds feet,—the rock cut when actually constructed proved to have a capacity of 14,000 cubic seconds feet. The works as now constructed have a capacity for a diversion to the Main Channel and its adjuncts at Lockport of 12,000 cubic seconds feet. It was generally understood during the period of construction of the Main Channel, and subsequently, that the contemplated diversion was 10,000 cubic seconds feet, and for the purpose of this discussion that will be considered as the designed capacity.

7. *Internal Waterway*—In addition to its uses for sanitary purposes the Chicago Drainage Canal was designed as a navigable channel serving to connect Lake Michigan with the Mississippi River through the Desplaines and Illinois Rivers. This link in a system of internal waterways financed by the State of Illinois must not be lost sight of in judging the whole project. While internal waterways may be yet somewhat in the future, the years to come will certainly fully utilize them. Plans for the utilization of the Illinois River may prefer a development by slack-water pools, but the cost of reasonably deep-water navigation will be lessened with more ample flow. The Chicago Drainage Canal is really an enlarged Illinois and Michigan Canal, and has taken over its functions. This predecessor of the Drainage Canal was authorized by Congress in Acts of 1822 and 1827.

8. *Water Power*—Incidentally the diversion from Lake Michigan permitted the development of a water power generating about two and eight tenths electrical horsepower for each cubic foot of water per second passing through the turbines. About 85 per cent of the electric power is used for municipal lighting and for pumping water and sewage. Other water powers on the Desplaines and Illinois Rivers are in operation, or in contemplation, amounting to about six horse power per cubic foot of water per second.

9. *Damage to Lakes Not Appreciated*—In the years during the construction of the canal it was not credited that the contemplated diversion from Lake Michigan would in any tangible measure lower lake levels, so as to practically lessen the carrying capacity of lake vessels. Up to the time of the measurements of the Niagara River, by the Deep Waterways Commission (1898), no reliable engineering conclusion, based on adequate observations existed. The vessels of 1889 were relatively small, with fourteen-foot drafts, and the lake commerce relatively inconsiderable. Water power at Niagara was in its infancy; work on the construction of the Niagara Falls Power Company's plant began in the Fall of 1890. With great, tangible sanitary benefits to the well-being of the large population of Chicago and suburban towns, the possibility of real hurtful effects to navigation on the Great Lakes appeared insubstantial in comparison.

10. *Compensation*—Should the lake levels be substantially lowered, the ability to restore them was axiomatic. The report of the Board of Engineers on Waterway from Lockport to Mississippi, points out ways for this restoration; the report of the Board of Engineers on Deep Waterways (1900) presented a plan for raising water surface levels from Buffalo to Chicago and Sault Ste. Marie, by regulating works at the head of the Niagara River; Lake Superior was raised six inches by the building of

the piers of the International Bridge and the Chandler Dam; Lake Ontario was raised six inches by the building of the Gut Dam.

11. Current—What appeared to be a real obstruction to navigation existed in the current created in the Chicago River. This was largely obviated by deepening and widening the river prism; and the Calumet Sag branch canal, now practically complete, is designed to relieve by 2000 cubic seconds feet the Chicago River flow. This current in the Chicago River was the real reason for the first restrictions in diversion by the Secretary of War, not the menace to lake levels. The first permit, for intermediate volume, was eventually cut down in 1901 to the present permit of 4167 cubic feet per second by reason of this current. Since that time the betterment in the canalized river section has permitted a diversion of from 7000 to 8000 cubic seconds feet without substantial injury to the facility of navigation. The cost of the prism betterment in the past seventeen years has been upward of thirteen million dollars. This navigation betterment has all been done at the expense of the Sanitary District, under the authority of the Chief of Engineers and the Secretary of War; and with the principal object of making practicable greater diversion.

12. *The Dilemma*—By the year 1908 the diversion in the Drainage Canal was 6596 cubic seconds feet, or 2429 cubic seconds feet in excess of the diversion authorized by the Secretary of War. The District was in the perplexing position of requiring a dilution of 3⅓ cubic seconds feet for each 1000 of population of the District, while the Secretary of War was convinced that he had reached the limit of his discretionary power in permitting diversion, and that any further diversion should have the sanction of Congress.

13. *Division of Waters*—Meanwhile a very significant event had taken place. This was the Joint Report of the International Waterways Commission of May 3, 1906, on the partition of waters tributary to the Niagara River, for the Preservation of the Scenic Grandeur of Niagara Falls. This report recommended limitations as follows:

Canada—in Niagara River	36,000 c. s. f.	
United States—in Niagara River	18,500	
at Chicago	10,000	28,500 c. s. f.

14. *Report on Drainage Canal*—A second significant event was the Joint Report of the International Waterways Commission of January 4, 1907. After careful examination of the physical phases, and the equities involved, the International Commission recommended in substance that Chicago be allowed to divert 10,000 cubic seconds feet.

15. *Treaty*—The third significant event was the Treaty of 1909 with Great Britain, which partitions the waters of Niagara Falls as follows:

Canada	36,000 c. s. f.
United States	20,000 c. s. f.

What appears a manifest unfairness to the United States in the Canadian excess of 16,000 seconds feet, vanishes in part when the Treaty is understood to apportion to Chicago a potentially existing diversion of 10,000 cubic seconds feet, as recommended by the Joint Report of the International Waterways Commission above mentioned.

16. *Interpretation*—The Sanitary District is prepared to present additional conclusive evidence that the Treaty with Great Britain contemplated for Chicago a diversion of 10,000 cubic seconds feet; and that Canada in this partition at Niagara is reimbursed for a diversion of that amount at Chicago. Canada, for a diversion up to 10,000 cubic seconds feet, can have no shadow of a claim for any damages to navigation or water power. The Treaty followed the quantity recommendations for Niagara Falls of the International Waterways Commission, except that it made the allowance for power on the American side 20,000 cubic seconds feet instead of 18,500; and this additional 1500 feet for the American side was not intended to disturb Chicago's apportionment of 10,000 cubic seconds feet.

17. *Treaty Forecloses Canada*—It is not intended to infer here that the Treaty authorizes Chicago to divert 10,000 cubic seconds feet without a permit from the Secretary of War, or the sanction of the Congress of the United States,—provided the police power of the State of Illinois is insufficient,—but it is believed that the acquiescence of Canada is complete and ultimate. She received at Niagara

her *quid pro quo* for the diversion at Chicago of 10,000 cubic seconds feet.

18. *Friendly Suit*—Reverting now to the year 1908, when the Sanitary District was between the devil and the deep sea, must violate the State law if it diverted less, or decline to accept a Federal invasion of State rights, and divert more; it was agreed that the United States, through the Department of Justice, should institute a friendly suit to define the rights of the State of Illinois, and the reach of the Federal Government. The original case was to enjoin the building of the Calumet-Sag branch of the Drainage Canal. Later, by mutual agreement, the litigation included diversions in excess of the formal permit, wherever taken, in order to settle all controversies.

19. *Delay*—The case of the United States vs. the Sanitary District, involved the most elaborate hydraulic and sanitary testimony. The disaster to Chicago would be so serious should the decision be adverse, that it is not extraordinary that it was the year 1915 before all evidence was finally in, and the case submitted to Judge Landis. A decision in the case has not yet been handed down. The District will welcome a decision when it is practicable to reach it. But after that decision it is probable that the case must be reviewed by the Supreme Court of the United States, and this means additional uncertainty and delay.

20. *Congressional Sanction Urged*—The present perplexity of the Engineering Department of the District in providing for the future is obvious. To avoid further delay the District finally decided to go to Congress for sanctions of it diversion. Secretaries of War Taft and Stimson had indicated this as necessary, and the Attorneys for the United States had reiterated the necessity of this course. The desirability of the Sanitary District going to Congress was again emphasized by the Report of the Board of Engineers for Rivers and Harbors in connection with the Final Report on Waterway from Lockport, Ill., to the Mouth of the Illinois River. (House Document No. 762, 63d Congress, 2nd Session.) A portion of paragraph 15, page 8, is as follows:

"Further, the board believes that the total volume of water to be diverted from the natural discharge channels of the Lakes should be definitely fixed by Congress; that a project, with estimate of cost; for works necessary to compensate for such diversion should be prepared to the satisfaction of the Chief of Engineers and the Secretary of War; that before any diversion is made beyond that at present existing, the State of Illinois shall transfer to the Secretary of War funds necessary for such works as given by the approved estimate of cost; that the works shall be built by the United States with the funds so provided; and that the control and maintenance of such works shall be in and at the cost of the United States."

21. *Funds Appropriated*—A bill has been introduced in Congress asking for a diversion of fixed amount. In this Bill it is conditioned that the Sanitary District appropriate the funds necessary for navigable restorations or betterments. An appropriation of $600,000 was made on January 10, 1918, by the Board of Trustees to be placed in the hands of the Secretary of War towards the accomplishment of the compensation desirable. It is suggested that these funds be used to construct the regulating works in the St. Lawrence River (with the acquiescence of the United States and Canada) to redistribute the out-flow of Lake Ontario so as to benefit both navigation and water power in that river, and navigation on the Lake; and to construct regulating works at the head of the Niagara River to raise the levels of Lakes Erie, St. Clair, Michigan and Huron.

22. *Engineers*—The District has retained as Consulting Engineer, Mr. Francis C. Shenehon, of Minneapolis, well known to the Engineering Department, to investigate and report on the best methods of accomplishing this regulation; and to work in conjunction with Mr. Gardner S. Williams, long our Consulting Hydraulic Engineer, under my direction

23. *Montreal*—Conferences have been held with officials of the Harbor Board on Montreal, and it is through their suggestion that the redistribution of the St. Lawrence River flow is under investigation. A special

report on this proposed regulation will in the near future be completed.

24. *Purification*—Any unwholesomeness of the Illinois River can be bettered in two ways; first, by a higher rate of dilution; second, by some purification of the sewage and wastes before entering the canal. The District has spent upwards of $350,000 in the past few years in the investigation of methods of purification. Some sewage betterment already exists. The District purposes to put into operation the activated sludge treatment of the stock yards wastes. The estimated cost of this purification plant is $4,000,000, and the annual operating expense $750,000.

25. *Art of Sewage Disposal in Transition Stage*—One of the great difficulties in dealing with sewage purification and disposal is the lack of finality in the methods available. The art appears to be in a state of flux, with little demonstrated as practical and economical. The old dilution method, relying on the demonstrated ability of a running stream to digest a certain percentage of organic matter, is still in predominant use as an accepted method; but some predigestion is desirable, and will be used by the Sanitary District in increasing measure.

26. *Supplemental Sewage Treatment*—Sound policy on the part of the District indicates the desirability of keeping the Illinois River inoffensive. The degree of dilution fixed by the State law was designed to satisfy the river valley population. Ultimately when the needs of the population of the District exceeds the limit fixed for diversion, excess sewage will be treated in some supplemental way.

27. *Illinois as an Outlaw*—The State of Illinois—of which the Sanitary District is an instrumentality—has been put in the wrong, and at times apparently regarded as a culprit by the United States—of which it is not an inconspicuous part—because it acted with boundless confidence in the propriety of this great project and omitted the securing of early formal Federal assent to its proposed enlarged diversion from Lake Michigan. Having in mind that the diversion of 1900 was different in quantity, but not in principle from the diversions beginning in the pumping of 1848, and the gravity diversion of 1872 continuing and increasing up to 1900, it is not strange that the need of formal assent was not fully appreciated.

28. *Other Inadvertent Trespassers*—Other diversions of the waters of the Great Lakes affecting navigable depths had existed under State authorization or charter. At Niagara Falls, the two American Power Companies had built great plants costing upwards of twenty million dollars, and contemplating a diversion of 18,000 cubic seconds feet, with an estimated lowering of the interstate and International navigable waters of the Niagara River of nearly six inches. Diversions of approximately 13,000 cubic seconds feet were in operation on the American side, before Secretary of War Taft issued the first permits in 1906. These diversions were made by private companies as commercial enterprises, and profitable investments.

In citing these precedents for unauthorized diversions at Niagara, of the navigable waters of the United States, no implication is intended that these diversions are not wholesome and beneficial. But these companies spent twenty million dollars without appreciating the need of permits, other than State permits; just as Chicago for sanitary and navigational purposes spent her many millions. The Sanitary District asked for a permit from the Federal Government six years before the companies at Niagara Falls asked for permits; and these private power companies are properly regarded as desirable citizens, not culprits.

29. *Extenuation for Non-observance of Limitations*—The parallel ceases, however, after permits were issued at Niagara Falls, and at Chicago. The power companies observed the limitations of the permits, while Chicago for many years has exceeded her permitted diversion. In partial extenuation of this it may be said that the permits at Niagara gave the two power companies substantially all the water needed (15,100 cubic feet) to operate their existing plants, and to fulfill their existing contractual obligations. At Chicago, on the other hand, the permit is for but 63 per cent of the actual existing sanitary needs of 1908, and but 52 per cent of the actual present existing sanitary needs. This permit allows only 41.67 per cent of the designed capacity of the canal, and but 34.7 per cent of the actual

constructed capacity. The diversion at Chicago has never exceeded the obligation created by sanitary necessity and by the Illinois State law, and up to 1909—the date of the Treaty—was but 70 per cent of the designed capacity of the canal. It is easier to be a good citizen when you have substantially all you urgently need; and the Sanitary District and the State of Illinois are confident of the same indulgent magnanimity ultimately on the part of the Federal Government as these great power enterprises at Niagara have received.

Moreover, the District has acted always on the theory that the refusal of the Secretary of War to extend the permit was not a prohibition, but a statement of lack of jurisdiction; that the authority must come from the Courts or from Congress—and this meant only delay in making the diversion federally legitimate.

30. *Acquiescence*—Further extenuation of the excess diversion at Chicago enters in the fact that the canalization was entered into and effected with the full knowledge, acquiescence and authority of the Federal Government.

31. *Damages and Remedies*—In the final analysis the diversion at Chicago has but three hurtful effects.

First—Lowering the levels of the Great Lakes and the out-flow rivers.

Second—Diminishing by less than 5 per cent the average volume of flow in the Niagara and St. Lawrence Rivers, and hence lessening by this percentage the total water power content.

Third—A diminution of the flow on the cataract at Niagara.

The Sanitary District has appropriated a part of the funds to substantially undo all losses in lake levels, and in part to better natural condition. The lakes constitute a slack-water system of navigation and do not depend entirely on volume of flow any more than the Illinois River navigation does. Navigation in the Detroit River and the lower St. Clair River will be bettered by the regulation to be proposed. The navigable capacity of the St. Lawrence River will be improved by a better distribution of the out-flow of Lake Ontario. Water powers on the Niagara and St. Lawrence Rivers will be benefited by fuller utilization of Lakes Erie and Ontario as storage reservoirs. The flow over the cataract at Niagara will be augmented over certain hours of the day to the extent of the diversion at Chicago by a better distribution of the out-flow of Lake Erie.

32. *Diversion as Mean Value*—It is desirable to fix the limit of diversion in the Drainage Canal, as a monthly mean, not a rigid quantity never to be even momentarily exceeded. Some variation of flow is desirable by reason of fluctuating volumes of sewage, and in order to conserve the water power possibilities of the stream. The limit of variation of flow should be controlled by navigational requirements in the Chicago River. The effect on the lakes and out-flow rivers is understood not dependent on hourly or daily variations of flow at Chicago, but on the monthly or annual mean diversion.

33. *U. S. Control*—Federal supervision and control of the out-flow through the Drainage Canal will be welcomed by the Sanitary District.

34. *In Perspective*—It is desired to quote paragraph 19 of the Joint Report of January 4, 1907, of the International Waterways Commission, which is as follows:

> "In the expenditure of $40,000,000 for the drainage canal the people of Chicago, with its population of 2,000,000, incurred a burden equivalent to that due to an expenditure of $1,600,000,000 by the United States, with its population of 80,000,000—that is, enough to build eight or more Panama Canals. It was a very serious effort and has commanded the admiration and sympathy of all observers. The diversion of 10,000 cubic feet per second from Lake Michigan affects other interests adversely, but these interests have withheld their opposition, seeming to believe that some such amount was necessary, and apparently willing to contribute their share to protect the lives and health of the people of a great city. The plans calling for that amount have been under public discussion for some years. Although withholding formal approval, the Federal authorities have taken no steps to prevent their execution. Congress has called for a plan and estimates for an improvement of the waterways connecting with it, the scope of which is fixed by that

amount. There appears to be a tacit general agreement that Chicago needs or will need about 10,000 cubic feet of water per second for sanitary purposes, and that the city should have it without further question."

35. *Expectations*—Taking into consideration all the facts:—the early Congressional sanction for some diversion, involving the principle at least; the knowledge of the project purpose, and the approval of channel improvements by Federal Officers; the recommendations of the International Waterways Report; the Treaty with Great Britain; the pendency of the friendly litigation to determine State rights,—considering all these things, has there ever been a time when the Sanitary District could reasonably dismiss expectation of a diversion of at least 10,000 cubic seconds feet? Has it ever been face to face with the desperate need of counting as loss the many millions spent to make its canal ample; and of spending many millions more to retrieve in some other way its supposed mistake?

36. *Equity*—It is submitted whether good faith and magnanimity on the part of the Federal Government do not assure to the State of Illinois the authority to divert 10,000 cubic seconds feet of water at Chicago. The present requirement under the Illinois State law is about 8700 cubic seconds feet By 1922 to 1925 the legal dilution will require a flow of 10,000 cubic seconds feet. It is not purposed to increase the use of water any faster than the legal rate of dilution requires.

37. *Diversion of 12,000 C. S. F.*—The Bill introduced in Congress limits the diversion at Chicago to 12,000 cubic seconds feet. This diversion, larger than the amount considered in the negotiations leading up to the Treaty, is wanted by the District because its works have that capacity. In the use of this additional 2000 cubic seconds feet, and with a view of working out a solution and compromise recognizing the needs of all concerned. the District approaches the Federal Government in the attitude of requesting something for which it is willing to pay,—an economic benefit to the two and one-half million people it represents, for which it is ready to render a corresponding economic benefit to the Great Lakes and their outflow rivers—benefits to both Canada and the United States.

38. *Admissions*—This statement to you has in part waived controversial questions, or expressed facts as viewed by the United States, for the purpose of amicable discussion. It is understood that nothing herein is to be construed as admissions to be used against the District in the litigation still pending.

39. *Inspection of Works*—I believe that a personal examination of the works by officers assigned to study and report upon this matter is absolutely essential to a fair and just solution of the problem. It is my understanding that at the conference between us held at your office on June 29th you assigned to this matter Colonel Newcomer and Major Mehaffey, who it was understood would at their early convenience come to Chicago and personally inspect the works and plans of the District and at first hand observe as far as possible the conditions and difficulties to be overcome. Upon advice from them as to the time they will be here I will be prepared to submit all facts and give them every opportunity to make a complete and expeditious inspection of the works and plans of the District.

Very respectfully,
G. M. WISNER,
Chief Engineer.

Appended hereto:

1—Letter from Secretary of State Robert Lansing to Congressman Henry T. Rainey of Illinois, enclosing certain papers before the Secretary of State when Treaty with United States and Canada was negotiated.

2—Maps showing works and territorial limits of the Sanitary District.

April 23, 1918.

Honorable Henry R. Rainey, House of Representatives.

MY DEAR MR. RAINEY—Referring to your letter of February 15th, and to your calls at the Department in respect to obtaining from the archives certain documents bearing on the negotiation of the Boundary Waters Treaty between the United States and Great Britain of 1909, I beg to say that upon considering the papers selected by Mr. Adcock of Chicago, it appears that there is no objection to furnishing you with a copy of the

memorandum from the State Department to the Committee of Foreign Relations for their consideration in connection with the treaty (a copy of which may doubtless also be obtained from that Committee), or with a copy of the memorandum of extracts from the report of the International Waterways Commission; but that the other two papers selected by Mr. Adcock appear not to have been used directly in the negotiations resulting in the treaty of 1909, and were never submitted to the Canadian Government.

For these reasons which I am sure you will appreciate it seems preferable not to give out the papers mentioned. In discussing the matter with the Honorable Chandler P. Anderson, who represented the State Department in the negotiations with the Canadian officials which resulted in the treaty of 1909, he pointed out that it might be of more assistance to you to have a short statement from him as to what was brought out during the negotiations in respect to the diversion of the water for the Chicago Drainage Canal than to have the documents selected by Mr. Adcock, which do not clearly bring out the attitude of the negotiators on this point. If you desire to have such a memorandum by Mr. Anderson I would be pleased to ask him to prepare it for use.

Very truly yours,

ROBERT LANSING,
Sec'y of State.

Enclosures: Copies of first two papers mentioned.

Extracts from reports of the International Waterways Commission, including Joint Reports of the Commission and Separate reports of the American Section, containing recommendations with respect to the regulation by treaty of the use of boundary waters.

Extract from the report of the American Commissioners, date March 19, 1906:

---

32. If the falls are to be preserved it must be by mutual agreement between the two countries. As a step in that direction we recommend that legislation be enacted which shall contain the following provisions, viz:

(a) The Secretary of War to be authorized to grant permits for the diversion of 28,500 cubic feet per second, and no more from the waters naturally tributary to Niagara Falls, distributed as follows:

	Cubic feet.
Niagara Falls Hydraulic Power and Manufacturing Company	9,500
Niagara Falls Power Company	8,600
Erie Canal or its tenants (in addition to lock service)	400
Chicago Drainage Canal	10,000

(b) All other diversion of water which is naturally tributary to Niagara Falls to be prohibited, except such as may be required for domestic use or for the service of locks in navigation canals.

(c) Suitable penalties for violation of the law to be prescribed.

(d) The foregoing prohibition to remain in force two years, and then to become the permanent law of the land, if in the meantime, the Canadian government shall have enacted legislation prohibiting the diversion of water which is naturally tributary to Niagara Falls, in excess of 36,000 cubic feet per second, not including the amount required for domestic use or for the service of locks in navigation canal. It is assumed, however, that an understanding upon this subject would be reached by treaty.

33. The object of such legislation would be to put a stop to the further depletion of the falls, and at the same time inflict the least possible injury upon the important interests now dependent upon this water power The amount to be diverted on the Canadian side, has been fixed with a view to allowing to the companies on that side the amount for which they now have works under construction, which are:

	Cubic feet.
Canadian Niagara Power Company	9,500
Ontario Power Company	12,000
Electrical Development Company	11,200
Niagara Falls Park Railway Company	1,500
Welland Canal or its tenants (in addition to lock service)	18,000

34. One of the effects on such legislation would be to give to

Canada the advantage of diverting 7,500 cubic feet per second more than is diverted in the United States. The advantage is more apparent than real, since the power generated on the Canadian side will to a large extent be transmitted to and used in the United States. In the negotiation of a treaty, however, the point should be considered.

Note: The recommendations of this report were not very closely followed by Congress, as will appear from the Act approved June 29, 1906, for the control and regulation of the waters of Niagara River, for the preservation of Niagara Falls and for other purposes, the first two sections of which Act are as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the diversion of water from Niagara River or its tributaries, in the State of New York, is hereby prohibited, except with the consent of the Secretary of War as hereinafter authorized in section two of this Act: Provided, That this prohibition shall not be interpreted as forbidding the diversion of the waters of the Great Lakes or of Niagara River for sanitary or domestic purposes, or for navigation, the amount of which may be fixed from time to time by the Congress of the United States or by the Secretary of War of the United States under its direction

Sec. 2. That the Secretary of War is hereby authorized to grant permits for the diversion of water in the United States from said Niagara River or its tributaries for the creating of power to individual companies, or corporations, which are now actually producing power from the waters of said river, of its tributaries, in the State of New York, or from the Erie Canal; also permits for the transmission of power from the Dominion of Canada into the United States, to companies legally authorized therefor, both for diversion and transmission, as hereinafter stated, but permits for diversion shall be issued only to the individuals, companies or corporations as aforesaid, and only to the amount now actually in use or contracted to be used in factories the buildings for which are now in process of construction, not exceeding to any one individual, company or corporation as aforesaid a maximum amount of eight thousand six hundred cubic feet per second, and not exceeding to all individuals, companies or corporation as aforesaid an aggregate amount of fifteen thousand six hundred cubic feet per second; but no revocable permits shall be issued by the said Secretary under the provisions hereafter set forth for the diversion of additional amounts of water from the said river or its tributaries until the approximate amount for which permits may be issued as above, to wit, fifteen thousand, six hundred cubic feet per second, shall for a period of not less than six months have been diverted from the waters of said river or its tributaries, in the State of New York; Provided, That the said Secretary, subject to the provisions of section five of this Act, under the limitations relating to time above set forth is hereby authorized to grant revocable permits, from time to time, to such individuals companies, or corporations, or their assigns, for the diversion of additional amounts of water from the said river or its tributaries to such amount, if any, as, in connection with the amount diverted on the Canadian side, shall not injure or interfere with the navigable capacity of said river, or its integrity and proper volume as a boundary stream, or the scenic grandeur of Niagara Falls; and that the quantity of electrical power which may by permits be allowed to be transmitted from the Dominion of Canada into the United States, shall be one hundred and sixty thousand horsepower; provided further, That the said Secretary, subject to the provisions of section five of this Act, may issue revocable permits for the transmission of additional electrical power so generated in Canada, but in no event shall the amount included in such permits, together with the said one hundred and sixty thousand horsepower and the amount generated and used in Canada exceed three hundred and

fifty thousand horsepower: Provided always, That the provisions herein permitting diversions and fixing the aggregate horsepower herein permitted to be transmitted into the United States, as aforesaid, are intended as a limitation on the authority of the Secretary of War, and shall in nowise be construed as a direction to said Secretary to issue permits and the Secretary of War shall make regulations preventing or limiting the diversion of water and the admission of electrical power as herein stated; and the permits for the transmission of electrical power issued by the Secretary of War may specify the persons, companies, or corporations by whom the same shall be transmitted, and the persons, companies, or corporations to whom the same shall be delivered.

This Act also provides as follows:

Sec. 4. That the President of the United States is respectfully requested to open negotiations with the Government of Great Britain for the purpose of effectually providing, by suitable treaty with said Government for such regulation and control of the water of Niagara River and its tributaries as will preserve the scenic grandeur of Niagara Falls and of the rapids in said river.

Sec. 5. That the provisions of this Act shall remain in force for three years from and after date of its passage; at the expiration of which time all permits granted hereunder by the Secretary of War shall terminate unless sooner revoked, and the Secretary is hereby authorized to revoke any or all permits granted by him by authority of this Act, and nothing herein contained shall be held to confirm, establish, or confer any right heretofore claimed or exercised in the diversion of water or the transmission of power.

Extract from the joint report of the Canadian and American members of the Commission, dated May 3, 1906:

3. The Commission therefore recommend that such diversions, exclusive of water required for domestic use or the service of locks in navigation canals, be limited on the Canadian side to 36,000 cubic feet per second, and in addition thereto a diversion for sanitary purposes not to exceed 10,000 cubic feet per second be authorized for the Chicago Drainage Canal, and that a treaty or legislation be had limiting these diversions to the quantities mentioned.

The effect of the diversion of water by the Chicago Dainage Canal upon the general navigation interest of the Great Lakes system will be considered in a separate report.

The Canadian section, while assenting to the above conclusions, did so upon the understanding that in connection therewith should be expressed their view that any treaty or arrangement as to the preservation of Niagara Falls should be limited to the term of twenty-five years, and should also establish the principles applicable to all diversions or uses of water adjacent to the international boundary and of all streams which flow across the boundary.

The following principles are suggested:

1. In all navigable waters the use for navigation purpose is the primary and paramount right. The Great Lakes system on the boundary between the United States and Canada, and finding its outlet by the St. Lawrence to the sea, should be maintained in its integrity.

2. Permanent or complete diversions of navigable waters or their tributary streams should only be permitted for domestic purposes and for the use of locks in navigation canals.

3. Diversions can be permitted of a temporary character where the water is taken and returned again, when such diversions do not interfere in any way with the interests of navigation. In such cases each country is to have a right to diversion in equal quantities.

4. No obstruction or diversion shall be permitted in or upon any navigable water crossing the boundary, or in or from streams tributary thereto, which would injuriously affect navigation in either country.

5. Each country shall have the right of diversion for irrigation or extraordinary purposes in equal quantities of the waters of non-navigable streams crossing the international boundary.

6. A permanent joint commission can deal much more satisfactorily with the settlement of all disputes arising as to the application of these principles, and should be appointed.

Extract from the recommendations at the end of the joint report of the commission dated January 4, 1907, on the Chicago Drainage Canal:

RECOMMENDATIONS.

41. The waters of Lake Michigan in the United States, the waters of Georgian Bay in Canada, and the waters of Lake Superior partly in the United States and partly in Canada all form sources of supply of the Great Lake system, finding their way by the St. Lawrence to the sea. All are interdependent and there can be no diversion from any of them without injury to the whole system. By Article XXVI it is provided that "navigation of the river St. Lawrence, ascending and descending from the forty-fifth parallel of north latitude, where it ceases to form the boundary between the two countries, from, to, and into the sea, shall forever remain free and open for the purposes of commerce to the citizens of the United States, subject to any laws and regulations of Great Britain, or of the Dominion of Canada, not inconsistent with such privileges of free navigation." It is desirable that in any treaty arrangement the waters of Lake Michigan, Georgian Bay, and all other waters forming part of the Great Lake system should be declared to be "forever free and open for the purpose of commerce" to the citizens of the United States and the subjects of His Britannic Majesty, subject to any laws and regulations of either country not inconsistent with such privilege of free navigation.

42. The preservation of the levels of the Great Lakes is imperative. The interest of navigation in these waters is paramount, subject only to the right of use for domestic purposes, in which term is included necessary sanitary purposes. In our report of November 15, 1906, upon the application of the Minnesota Canal and Power Company to divert certain waters in Minnesota, we recommend among other things—

> that any treaty which may be entered into should define the uses to which international waters may be put by either country without the necessity of adjustment in each instance, and would respectfully suggest that such uses should be declared to be (a) uses for necessary domestic and sanitary purposes; (b) service of locks for navigation purposes; (c) the right to navigate.

It is our opinion that so far as international action is concerned a treaty provision of that kind is all that is required in this case. We accordingly renew our recommendation of November 15, 1906, just quoted.

43. A careful consideration of all the circumstances leads us to the conclusion that the diversion of 10,000 cubic feet per second through the Chicago River, will, with proper treatment of the sewage from areas now sparsely occupied, provide for all the population which will ever be tributary to that river, and that the amount named will therefore suffice for the sanitary purposes of the city for all time. Incidentally it will provide for the largest navigable waterway from Lake Michigan to the Mississippi River which has been considered by Congress.

We therefore recommend that the Government of the United States prohibit the diversion of more than 10,000 cubic feet per second for the Chicago Drainage Canal.

Extract from the report of the American Members of the Commission, dated September 9, 1907:

> The American members of the International Waterways Commission have the honor to return herewith the letter dated July 25, 1907, addressed to yourself by the honorable Secretary of State, inclosing a letter dated June 5, 1907, which he had received from the president of the Niagara Falls Hydraulic Power and Manufacturing Company, which letter, with its inclosures, was referred to us for report.
>
> The Niagara Falls Hydraulic Power and Manufacturing Company represents that as the riparian owner it has the right to divert from the Niagara River for the development of power, a right which it has been exercising for many years; that in the year 1896 this right was specifically recognized, declared, and confirmed by the state of New York, but

the quantity of water to be diverted was at the same time restricted to the amount which could be drawn through a canal 100 feet wide, flowing with a depth of 14 feet, an amount computed to be 9,500 cubic feet per second under the plans adopted for the works; that its works have been planned, and their construction nearly completed, with a view to the use of this full amount costing over $5,000,000; that under recent legislation of Congress it is for the present restricted to the diversion of 6,500 cubic feet per second, which restriction, if made permanent, will subject it to heavy pecuniary loss; and that it is commonly understood that the United States and Great Britain are negotiating, or about to negotiate, a treaty affecting, among other things, the diversion of water from the Niagara River for the development of power. The company asks that its right to divert water to the extent of 9,500 cubic feet per second be protected and secured to it by a suitable provision in any treaty which may be made.

The situation is fairly stated by the company, and the request seems to us reasonable. It is consistent with the recommendations contained in our report of March 19, 1906, which reads as follows, viz.: (The recommendations will be found in the extract from this report on pages 1 and 2 of this memorandum.)

Those recommendations were not adopted by Congress without qualification. In the act approved June 29, 1906, the quantity of water authorized to be diverted on the American side at this time is less than that recommended, and it is only under certain contingencies that additional amounts may be diverted hereafter. The act is a temporary measure designed to apply an immediate remedy to evils of which the final remedy must be found in a treaty. Congress did not finally deprive itself, or even the Executive under certain contingencies, of authority to increase the amount. Whether the power to authorize the diversion of 9,500 cubic feet per second by the Niagara Falls Hydraulic Power and Manufacturing Company is ever to be exercised or not, it would seem wise for the United States to retain the power in making the agreements with Great Britain.

The American members are of opinion that the enunciation of principles to govern the making of a general treaty is not within the scope of their functions nor over the jurisdiction of the American members is restricted to the Great Lakes system.

The following matter involving international interests, directly or indirectly, have been under consideration by the Commission or the American members of it.

---

(1) Richelieu River and Lake Champlain. Plan for the improvement of the navigation of the Richelieu River and for the maintenance of Lake Champlain at a fixed level by the construction of a movable dam in the Richelieu River at St. Johns. (Third Progress Report, November 27, 1907, at page 5, and appendix E at page 66. Second Progress Report, November 27, 1906, at page 7.)

(2) Power works in the St. Lawrence River near Long Sault Island. This project contemplated the construction of dams, canals, power works, etc., on the American side of the St. Lawrence River near Long Sault or Barnhart's Island, and across the river at that point, if Canadian consent was secured, and either in connection with or independently of like works to be erected on the Canadian side of the boundary, and subject to the approval of the Secretary of War and to the requirement that they be so maintained as to permit of convenient navigation at all times. A bill authorizing the construction of such works was introduced in the House of Representatives in February, 1907, but failed to become a law. (Third Progress Report, November 27, 1907, at page 7.)

(3) Application for a permit for the diversion of 175 cubic feet per second from the Niagara River on the American side at the head of Whirlpool Rapids below the Falls. This application was reported on by the Secretary of the Commission, who reached the conclusion that the development of power at the point indicated would not injure or interfere with the navigable capacity of the river, or affect the integrity or the proper volume of the river as a boundary stream or affect or impair the scenic grandeur of Niagara Falls, on which conclusions the Chairman of the American Section reported that if any permit was required in this case, there was no objection to granting it. (Third

Progress Report, November 27, 1907, at page 1, and appendix A, at page 12.)

(4) Regulation of Lake Erie. The question of the advisability of locating a dam at the outlet of Lake Erie for the benefit of navigation has been referred to the Commission to report with recommendations, looking to an agreement or treaty providing for the construction of such dam. (Third Progress Report, November 27, 1907, at page 8.)

(5) Improvement of Rainy River. The Canadian Government has submitted to the Commission for consideration and report a project for the improvement of the navigation of Rainy River by the construction of a dam at the foot of Long Sault Rapids in that river, a section of which will abut on American territory, and has appropriated $50,000 towards the commencement of this work. As the jurisdiction of the American Section does not extend to these waters, it has referred the question of considering this matter to the Department of State. (Third Progress Report, November 27, 1907, at page 8 and appendix K at page 80.)

(6) Sault Ste. Marie. In addition to the matters above referred to, the Commission has examined the conditions existing at Sault Ste. Marie, and has made a joint report thereon, recommending rules for the control of the same, dated May 3, 1906. (Second Progress Report, November 27, 1906, at page 5, and appendix A at page 11.)

Extract from the recommendations at the end of the joint report of the Commission, dated November 15, 1906, in the matter of the application of The Minnesota Canal & Power Company.

RECOMMENDATIONS.

1. The Commission would, therefore, recommend that the permit applied for be not granted without the concurrence of the Canadian government.

2. As questions involving the same principles and difficulties, liable to create friction, hostile feelings, and reprisals, are liable to arise between the two countries, affecting waters on or crossing the boundary line, the Commission would recommend that a treaty be entered into which will settle the rules and principles upon which all such questions may be peacefully and satisfactorily determined, as they arise.

3. The Commission would recommend that any treaty which may be entered into should define the uses to which international waters may be put by either country without the necessity of adjustment in each instance, and would respectfully suggest that such uses should be declared to be:

(a) Use for necessary domestic and sanitary purposes.

(b) Service of locks used for navigation purposes.

(c) The right to navigate.

4. The Commission would also respectfully suggest that the treaty should prohibit the permanent diversion of navigable streams which cross the international boundary or which form a part thereof, except upon adjustment of the rights of all parties concerned by a permanent commission, and with its consent.

NEW YORK, January 30, 1908.

Hon. Elihu Root, Secretary of State,
Department of State,
Washington, D. C.

MY DEAR MR. ROOT:

I have prepared and enclose herewith for your use a series of extracts from the reports of the International Waterways Commission, including joint reports of the Commission and separate reports of the American Section, containing recommendations with respect to the regulation by treaty of the use of boundary waters.

In this connection I wish to submit for your consideration the suggestion that in entering into any treaty arrangements regulating the use of the waters of Niagara River for power purposes provision be made that no tax or duty shall be laid by the Dominion Government or by the Provincial Government upon the exportation from Canada to the United States of any electric power generated by the use of the boundary waters.

Respectfully yours,

CHANDLER P. ANDERSON.

MEMORANDUM FOR FOREIGN RELATIONS COMMITTEE OF THE SENATE.

(Submitted by the State Department when the Treaty of May 13, 1910, was under consideration.)

In discussing the questions which have been raised in regard to certain provisions of the pending treaty relating to the use of waters along the boundary between the United States and Canada, it is important to have in mind certain

general features of the treaty which may be briefly stated as follows:

(1) The distinction which is drawn in the preliminary article between the boundary waters and waters which are tributary to boundary waters and waters of rivers flowing across the boundary is carefully observed in Articles II and III of the treaty.

(2) Article II applies only to waters which in their natural channels would flow across the boundary or into boundary waters, that is before they have passed the boundary or become part of boundary waters; and it cannot by any construction of its provisions apply to the use of obstruction or diversion of boundary waters.

(3) Article III by its express provisions applies only to uses, obstructions or diversions of boundary waters, and cannot by any construction of its provisions have any application to the use, obstruction or diversion of tributary waters or waters of rivers flowing across the boundary.

(4) Article IV, exclusive of the paragraph thereof relating to the pollution of waters, applies only to waters flowing from boundary waters or to the waters of rivers flowing across the boundary *after they have passed the boundary* and can have no application to waters tributary to boundary waters or to waters of rivers flowing across the boundary before they have passed the boundary.

(5) The jurisdiction of the International Commission is strictly limited by Article VIII to cases arising under Articles III and IV and it will be observed that under Article IV the Commission is given no jurisdiction over cases arising under the pollution clause of that Article; it is evident, therefore, that the International Commission can have no jurisdiction over cases arising under Article II.

(6) The right of action for damages provided for in Article II applies to private or individual interests in distinction from public or governmental interests. Any question on this point is set at rest by the use of the words "injured parties." Wherever the word party is used in the treaty referring to the High Contracting Parties, a capital P is used, so that the absence of the capital and the use of the word in the plural indicates that it can refer only to individuals.

The purpose of this provision of Article II is to permit parties who are injured on the other side of the line to secure the same damages that they would be entitled to if the damages had been done within the same jurisdiction where the cause of the damage originated; but their claim is subject to the laws of the jurisdiction where the cause of the damage arises, and they must come into the courts of that jurisdiction and prove their case on exactly the same footing as if the property injured was within that jurisdiction.

(7) The provisions of Articles II, III and IV do not apply to cases provided for by special agreement between the Parties, and Article XIII defines such special agreements as "not only direct agreements between the High Contracting Parties but also any mutual arrangements between the United States and the Dominion of Canada expressed by current or reciprocal legislation on the part of Congress and the Parliament of the Dominion."

Turning to the questions raised with respect to the pending treaty, it will be found that most of them can be answered conveniently by reference to the above numbered paragraphs.

Taking up the first point made by Senator Nelson, it appears that a large tract of swamp or marsh lands is located near the northwest border of the State of Minnesota, which the state intends some day to reclaim by drainage. The drainage will have to be done through a number of rivers flowing from this tract into the Rainy River within a space of thirty or forty miles from where it empties into the Lake of the Wood. Those rivers under the definition in the preliminary article of the treaty, are tributary waters in distinction from boundary waters and come under the provisions of Article II of the treaty. Senator Nelson raises the point that under the damage clause in Article II, if the drainage of this swamp increases the flow of these tributary rivers to such an extent that damage is done on the other side of the line, a right of action which would not otherwise exist with respect to such damage is created by the treaty. His objection to the provision is understood to be that under existing conditions, the state would not be responsible to its own citizens for any damages that may occur, and should not be made responsible to foreigners for damages suffered by them. It will be observed, however, as pointed out in paragraph

(6) above that the right of action given by Article II is a private right in distinction to a public right, and can be asserted only by individuals in distinction from the Government; and that such parties are given only the same right of action which they would have if they actually were within the State of Minnesota. Therefore, if the State of Minnesota is now at liberty to drain this swamp land as proposed without being liable to any one for damages on its own side of the boundary, it is not believed that this provision will give any right of action to any one on the other side of the boundary.

Moreover, owing to the height of the banks of the Rainy River on the Canadian side for most of the distance through which its flow would be increased on account of the drainage of this swamp land, it does not seem likely that any important damage could result to individual owners there and in any event it is doubtful if the provisions of the treaty contemplated giving a right of action for such an improvement as this, which is not a diversion of waters from their natural watershed, but simply in effect an acceleration of the passage of such waters through the rivers to which they are naturally tributary to the natural outlet which they would ultimately find if left undisturbed. Moreover, normal conditions would be restored as soon as the swamps were drained. So far as any damage from overflowing the banks of the Lake of the Woods on the Canadian side is concerned, on account of the water released from these swamps, here again the shores on the Canadian side are higher than on the American side and any overflowing that would result from such increased volume of water would be more seriously felt on the American side than on the Canadian. In this connection, moreover, it will be remembered that the outlets of the Lake of the Woods are all on the Canadian side, and the present level of the lake is maintained by dams at these outlets, and can be controlled within a range of eight or ten feet by the insertion or removal of stops logs in these dams. The Canadian authorities have control of these dams and at present maintain the level of the lake six or eight feet above its natural level. It is evident, therefore, that if the level should be further raised by draining these swamps into the Lake of the Woods, the responsibility for damage resulting on the Canadian side would rest with the Canadian authorities and not with the State of Minnesota.

Senator Nelson's second objection is that important improvements on tributary streams on the American side of the boundary could not be made except by the consent of the Government of the United States and of the International Joint Commission.

In answer to this point, reference is made to paragraphs numbered (2), (3), (4) and (5) above. It will be noticed that the application of Article III by its own terms is limited to the uses, obstructions or diversions of *boundary waters* affecting the level or flow of boundary waters and, as the rivers to which he refers are tributary streams to boundary waters and come under Article II and not under Article III, the treaty cannot fairly be construed to give the International Commission any jurisdiction over the case he refers to.

The point which Senator Nelson raises above the pollution clause in Article IV is considered separately below.

Taking up Senator Heyburn's objections in the order in which they are stated in his memorandum, his first point raises the objection that the Lake of the Woods should not be included with the other boundary waters under the provision extending mutually the privilege of free navigation on both sides of the line. This objection seems to be based on the view that this provision is a surrender of jurisdiction over the portion of the Lake of the Woods which lies wholly within the United States, but it is submitted that the provisions of the treaty are not susceptible of that construction. By the provision of Article I, the privilege of free navigation is expressly subjected to any laws or regulations of either country within its own territory not inconsistent with such privilege of free navigation and applying equally and without discrimination to the inhabitants, ships, vessels and boats of both countries. Moreover, unless the Lake of the Woods is given the same treatment under Article I as all other boundary waters, it would be impossible to include it among boundary waters under Article III of the treaty, and the advantages to the United States of so doing are obvious, as the outlets are all on the Canadian side.

Furthermore it would seem that there

could be no serious objections to placing the Lake of the Woods in the same category as the Great Lakes System, including Lake Michigan, in which the right of free navigation is given under Article XXVIII of the treaty of 1871, although its waters are wholly within the territory of the United States.

Senator Heyburn's second objection is answered by reference to paragraphs number (1), (2) and (6) above.

Senator Heyburn's third objection raises the point that under the provisions of Article IV the International Commission might undertake to control the use of the waters of the Kootenai or Columbia Rivers as far away as eight hundred miles from the boundary. Reference to the provisions of this article will show that it applies to the construction or maintenance of remedial or protective works or dams or obstructions "*in waters flowing from boundary waters* or in waters at *a lower level than the boundary rivers flowing across the boundary,* the effect of which is to raise the natural level of the waters on the other side of the boundary." It would seem to be clear from this provision that it applies only to cases where the effect of obstructions on one side of the boundary in the waters referred to, would result in overflowing lands on the other side of the boundary. Such obstructions, therefore, would have to be in immediate proximity to the boundary. A particular case in point will be found in the damming of Rosseau River by the Canadians immediately below the point where it crosses the boundary, the result of which has been to raise the natural level of its waters so as to overflow its banks on the American side. It is only in such a case as this that the Commission is given jurisdiction under this article, and it is not believed that any case could possibly arise over which the jurisdiction of the Commission would extend to any obstruction at any great distance from the boundary.

The fourth point raised by Senator Heyburn is that the rules or principles adopted under Article VIII for the regulation of the use of boundary waters are inconsistent with the uses of waters as fixed by the laws and constitution of the State of Idaho. It will be observed, however, that these rules and regulations apply only to the use of waters defined in the treaty as boundary waters, and that there are no waters of that description along the boundary of the State of Idaho. Such rules and regulations, therefore, cannot in their practical application come into conflict with the laws and constitution of the State of Idaho.

The Pollution Clause in Article IV— Objection has been made to this clause on the ground that its enforcement might interfere with the existing drainage systems in the large cities along the boundary lakes and particularly at Lake Champlain. An examination of this clause will show that cases arising under it are not subject to the jurisdiction of the International Commission. Its construction and application therefore rests with the parties themselves. It will be observed that, by the terms of the clause, it applies only to cases involving an injury to health or property on the other side of the boundary, and in the light of scientific knowledge of the present day, there would seem to be only a very remote possibility that any such cases could arise on account of the drainage of sewage systems into any of these lakes. It will be remembered that in the case of the Chicago Drainage Canal, the State of Missouri sought to show that the discharge of the Chicago sewage into the Illinois River rendered the waters of that river and of the Mississippi unfit to drink, but the Supreme Court of the United States held in that case that "it is proved that the great volume of pure water from Lake Michigan which is mixed with the sewage at the start has improved the Illinois River in these respects to a noticeable extent. Formerly it was sluggish and ill-smelling now it is a comparatively clear stream to which edible fish have returned. Its water is drunk by the fishermen, it is said without evil results."

It is a well-known scientific fact that flowing water or large bodies of open waters purify themselves very rapidly, and in view of the situation which the Supreme Court has found to exist in the case of the Illinois River, it seems hardly possible that anywhere along the boundary waters any injury to health or property would result from the discharge of drainage systems into them. The clause under consideration was intended to apply more particularly to the pollution of waters by chemicals or dye stuffs or other poisonous substances used in various manufacturing processes. Such practices are necessarily injurious to health and destructive of food fishes in these waters, and inas-

much as there are many cases of this kind on both sides of the boundary and unless checked by joint action of the two countries will result in great injury to the general interests of both countries along the border. It seemed desirable that some provision should be made for governmental control over them, and it was for this purpose particularly that this clause was inserted in the treaty.

Lake Michigan.—The waters of Lake Michigan do not come within the definition of boundary waters as defined in the preliminary article in the treaty and it will be noted that in Article I of the treaty, the waters of this lake are not included among the boundary waters of the Great Lake system, but are covered by a special provision in the second paragraph of that article. The question has arisen as to the effect upon Lake Michigan of the provisions of Article II which deals with tributary waters or rather with all waters which in their natural channels flow across the boundary or into boundary waters, and the objection is made that if the provisions of this Article apply to Lake Michigan, the right to recover damages for injuries resulting on the other side of the line on account of the diversion of tributary waters might interfere with the diversion of the waters of Lake Michigan for the purposes of the Chicago Canal.

In response to this objection, attention is called to the express provision in this Article that it shall not apply to cases already existing which would seem to cover and was certainly intended to cover the canal system at Chicago. But in any case, an examination of the provisions of the article will show that, as pointed out in paragraph numbered (6) above, the right of action for damages applies to private or individual interests in distinction from public or governmental interests, and such interests are given only the same rights which similar interests on the American side of the line would have in the absence of this treaty.

In effect, this provision brings the Canadian interests within the jurisdiction of the United States for this purpose. The treaty therefore recognizes that the settlement of the question of the use of the waters of Lake Michigan is purely a domestic question and leaves undisturbed the governmental rights of the United States with respect to it. But this is the view of Great Britain and Canada as shown by the last paragraph of the article which reserves to each of the High Contracting Parties any right which it may now have to object to any interference with or diversion of waters on the other side of the boundary, the effect of which would be productive of material injury to the navigation interests on its own side of the boundary. This provision relates to public interests in distinction from private interests, and would be wholly unnecessary if under the preceding provisions of the article any right was given to recover damages for injuries to public interests on the other side of the line.

CHANDLER ANDERSON.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a communication from Mr. Geo. H. Boenig, No. 39 S. La Salle St., protesting against the assembling of house boats in the North Shore Channel at Berteau avenue.

Referred to the Committee on Real Estate Development.

MISCELLANEOUS AND NEW BUSINESS.

Mr. Clark presented the bond of Mr. Walter G. Davis, Manager of the Real Estate Department of the Sanitary District, in the sum of $25,000.00, with the Royal Indemnity Company thereon as surety, given for the faithful performance and discharge of his duties of office, and moved that the bond be approved.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Paullin presented the following ordinance:

AN ORDINANCE

Amending an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on October 28, 1915, "Providing Certain Rules and Regulations and Rules of Order of the Board of Trustees of the Sanitary District of Chicago," as Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago December 23, 1915, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on December 1, 1916, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary Disctrict of Chicago on January 4, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on January 11, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on January 18, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on April 5, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on May 3, 1917, and as Further Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on July 12, 1917.

Be It Ordained by the Board of Trustees of The Sanitary District of Chicago:

SECTION 1. That Section 1 of an ordinance passed by the Board of Trustees of The Sanitary District of Chicago on October 28, 1915, as amended, be, and the same is hereby further amended by adding after the word "sharp" in line 36 of the first column of page 1414 of the proceedings of October 21, 1915, the following words and figures, to-wit:

"Provided that during the months of July, August and September, 1919, and during the months of May, June, July, August and September of each year thereafter, said regular meetings shall be held at 2:00 o'clock P. M. sharp on the first and third Thursdays of each of said months."

SEC. 2. This ordinance shall be in force and effect from and after its passage.

Mr. Paullin moved that the ordinance be referred to the Committee on Rules.

The motion prevailed.

Payroll of The Sanitary District of Chicago for the Month of February, 1919.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING.

THURSDAY, JUNE 12, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were—

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Absent—None.

MINUTES.

Mr. Lawley moved that the minutes of the proceedings of the regular meeting of May 29, 1919, be approved, as printed, without being read.

Mr. Nance moved that the minutes of the proceedings of the regular meeting of May 29, 1919, be amended by striking out the period in line nineteen of the second column on page 642 thereof and inserting in lieu thereof the following: "Inviting the Chicago Bureau of

Public Efficiency to make an investigation of the affairs of The Sanitary District of Chicago," so that the amended sentence will read:

"Mr. Nance presented a resolution inviting the Chicago Bureau of Public Efficiency to make an investigation of the affairs of The Sanitary District of Chicago."

Mr. Lawley moved, as a substitute for the amendment, that it be referred to the Committee on Judiciary.

On roll call the substitute for the amendment was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Messrs. Sergel and Nance—Two.

Mr. Nance moved that the minutes of the Proceedings of the regular meeting of May 29, 1919, be amended by striking out the period in line thirty-six of the second column of page 642 thereof and inserting in lieu thereof the following: "directing the Clerk of the Sanitary District to publish the monthly pay rolls," so that the amended sentence will read:

"Mr. Nance presented an order directing the Clerk of the Sanitary District to publish the monthly pay rolls."

Mr. Lawley moved, as a substitute, for the amendment, that it be referred to the Committee on Finance.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Messrs. Sergel and Nance—Two.

Mr. Lawley renewed his motion to approve the minutes of the proceedings of the regular meeting of May 29, 1919, as printed, without being read.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Messrs. Sergel and Nance—Two.

REPORTS OF OFFICERS.

The Clerk presented his report of money received and deposited with the Treasurer during the month of May, 1919, which was ordered published and filed, as follows:

CHICAGO, June 12, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GEO. M. REYNOLDS,
Treasurer, The Sanitary District of Chicago.

The Clerk presented the following report in regard to the ordinance passed for the levy of taxes for the fiscal year ending December 31, 1919, which was ordered published and filed:

CHICAGO, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—On April 24, 1919 (page 354 of the Proceedings), your Honorable Body passed an ordinance for the levy of taxes for the fiscal year ending December 31, 1919.

By Section 2 of said ordinance, the Clerk was directed to file with the County Clerk of Cook County a certified copy of said ordinance and was also directed to cause said ordinance to be published at least once in a newspaper published within the territorial limits of the Sanitary District and to incur the necessary expense therefor.

I respectfully report that I caused said ordinance to be duly published in the Chicago Evening Post and other daily secular newspapers of general circulation within the limits of the Sanitary District, as is evidenced by a certificate of publication from the said Chicago Evening Post, which is hereto attached.

It was also published in every other Chicago daily printed in the English language.

I further report that I caused a certified copy of said ordinance to be made and filed the same with Robert M. Sweitzer, County Clerk of Cook County, as is shown by his receipt of same hereto attached.

I respectfully suggest that said documents be made a matter of record by the Sanitary District.

Respectfully submitted,

JOHN MCGILLEN,
Clerk.

STATE OF ILLINOIS }
COUNTY OF COOK. } ss.

JOHN E. HOGAN, of the City of Chicago, County of Cook and State of Illinois, being duly sworn, on oath says and certifies that he is Assistant Secretary of the Chicago Evening Post Company, a corporation, and the agent duly authorized to make this affidavit and certificate for the said corporation; that the said corporation is the publisher of the Chicago Evening Post, a daily, secular newspaper regularly issued and of general circulation in said city or county; that the notice of The Sanitary District of Chicago, of which the annexed is a true copy, was printed and published in the regular edition and issue of the Chicago Evening Post for two times, to-wit, April 29 and 30, A. D. 1919.; that the date of the first paper containing the same was the 29th day of April, A. D. 1919; and that the date of the last paper containing the same was the 30th day of April, A. D. 1919, and that said newspaper had been regularly published in the City of Chicago, in the County and State aforesaid, for at least six (6) months prior to the first publication of said notice.

Dated at Chicago, Illinois, this 30th day of April, A. D. 1919.

(Signed) JOHN E. HOGAN.

Subscribed and sworn to before me this 30th day of April, A. D. 1919.

(Signed) TIMOTHY F. RYAN,
(Seal) *Notary Public.*

(Copy of an ordinance for the levy of taxes for the fiscal year ending December 31, 1919, certified by the Clerk of The Sanitary District of Chicago, attached to above certificate.)

Received of The Sanitary District of Chicago this 6th day of May, A. D. 1919, a certified copy of "An Ordinance for the Levying of taxes for the fiscal year ending December 31, A. D. 1919," passed by the Board of Trustees of The Sani-

tary District of Chicago, at a regular meeting held on April 24, A. D. 1919.

(Signed) ROBERT M. SWEITZER,
County Clerk of Cook County.

The Clerk presented the annual report of the Clerical Department for the year 1918, which was ordered published and filed, as follows:

CHICAGO, June 11, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I submit herewith the annual report for the year ended December 31, 1918, together with complete statements of the financial condition of the District.

The amount of cash received, for the year 1918, was $9,482,287.63, included therein, being the proceeds from sale of bonds of the thirteenth issue, with accumulated interest, amount $55,642.60, this issue of bonds being dated April 25, 1917, as authorized by the Board of Trustees on March 22, 1917 (pages 492 to 496 of Proceedings), also the proceeds from the sale of bonds of the thirty-first issue, with accumulated interest, amount $1,939,752.84, dated July 1, 1918, as authorized by the Board of Trustees, on June 25, 1918 (pages 493 to 495 of Proceedings), and also the proceeds from the sale of Anticipation Tax Warrants (issued against tax levy of 1918), in amount of $3,000.000.00, same being dated October 15, 1918, and payable July 15, 1919, these warrants being authorized by the Board of Trustees October 17, 1918 (pages 1973 to 1975 of Proceedings).

In connection with the bonds of the thirtieth and thirty-first issues I beg to report that there still remains unsold $57,000.00 worth of bonds of the thirtieth issue and $41,000.00 worth of bonds of the thirty-first issue, same being in the hands of the Treasurer of The Sanitary District of Chicago. The expenditures for the same period were $10,110,645.23; of this amount $2,542,310.00 was for maturing bonds ($1,916,000.00 and interest ($626,310.00) and $2,571,111.11 for the redemption of the Anticipation Tax Warrants, amount $2,500,000.00, issued in 1917 against the tax levy of 1917 and interest thereon. The excess of expenditures over income received in 1918 was made possible by having a balance on hand January 1, 1918, of $1,782,187.34.

The net receipts from the organization of the District to December 31, 1918, amount to $105,706,600.39 and the net expenditures total $99,267,619.03, the difference $6,438,981.36 being the amount of cash on hand and the amount due from various sources, as shown on statement, "Summary of net receipts and expenditures" attached hereto, the principal amount being the City of Chicago judgment account of $5,030,052.19, for which amount the City of Chicago is issuing bonds to pay the same.

Total bond issued from organization of December 31, 1918, was $46,140,000.00, those redeemed amount to $31,167,000.00, leaving $14,973,000.00 of bonds outstanding. Bond statement showing amount issued from organization to December 31, 1918, and amount outstanding as of January 1, 1919, also amount of principal and interest maturing to January 1, 1920, is attached herewith.

The tax collections for the year 1918 amounted to $3,660,836.65, making an aggregate of taxes collected from organization to December 31, 1918, of $80,563,455.12.

A statement of property valuations, rates and tax collections from organization is transmitted herewith.

Respectfully submitted,
JOHN MCGILLEN,
Clerk.

Correct:
GEORGE J. MILLER,
General Accountant.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received requests from the Illinois Valley Engineer and Real Estate Agent to make transfer of funds from various unexpended accounts to other accounts in order to provide funds for the payment of expenditures for which no appropriation has been made and to increase certain appropriations.

Your Committee having considered the matter, is of the opinion that the requests should be granted and therefore recommends the passage of the following order:

Ordered, That the Clerk be and he is hereby authorized and directed to make

THE SANITARY DISTRICT OF CHICAGO.

Summary of Cash Receipts and Expenditures for the Year ending December 31, 1918.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that the appropriation bill of the Sanitary District for the year 1919 (pages 114-115 of the Proceedings), sets up under Item 4, Record Division of the Engineering Department, one position with a salary attached thereto of $1,560.00, and under Item 5 of said division, four positions with salaries attached thereto totalling the sum of $5,760.00, and under Item 7 of the Sanitary Division, two positions with salaries attached thereto totaling the sum of $4,800.00, and under Item 4, under Channel Construction Division, five positions with salaries attached thereto totaling the sum of $7,800.00, and under Item 5, Outlet and Intercepting Sewer Construction division, four positions with salaries attached thereto totaling the sum of $7,200.00, making a grand total of $27,120.00, which positions and salaries are set forth in the order hereto attached.

Your Committee further reports that the Committee on Employment has requested that the salaries attached to certain of said positions be adjusted and that other positions be created to meet the requirements of the Engineering Department, which can be done without increasing the total sums theretofore appropriated.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Clerk be and he is

hereby authorized and directed to make adjustments of the positions and salaries set up under the items in the divisions of the Engineering Department above specified in the appropriation bill for the year 1919, in accordance with the request of the Committee on Employment as follows:

DEPARTMENT OF ENGINEERING—ACCOUNT NO. II.

	$27,120.00

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has had under consideration the advisability of constructing two new offices in the space on the floor allotted to the Law Department in accordance with certain suggestions made by the Attorney.

The Architect states that the necessary work can be performed by the Superintendent of the Building at an estimated cost of $400.00.

Your Committee having considered the matter, is of the opinion that said work should be done and therefore recommends the passage of the following order:

Ordered, That the Architect be and he is hereby authorized and directed to make the necessary arrangements with the Superintendent of the Building to perform the work specified, provided the cost of the same shall not exceed the sum of $400.00.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that the appropriation bill of the Sanitary District for the year 1919 (page 131 of the Proceedings), sets up under Item 7, Department of Law, as adjusted on May 1, 1919, two positions with salaries attached thereto totaling the sum of $9,600.00 and one position with a salary attached thereto for ten and three-fourths months at $4,300, making a grand total of $13,900.00, which positions and salaries are set forth in the order hereto attached.

Your Committee further reports that the Committee on Employment has requested that the salaries attached to said positions be adjusted and that one other position be created to meet the requirements of the Law Department, which can be done without increasing the total sums heretofore appropriated.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Clerk be and he is hereby authorized and directed to make adjustments of the positions and salaries set up under Item 7 in the Law Department above specified in the appropriation bill for the year 1919, in accordance with the request of the Committee on Employment, as follows:

DEPARTMENT OF LAW—ACCOUNT NO II.

SALARIES AND WAGES OF REGULAR EMPLOYES.

Change from

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 12, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has examined and approved the bond of the F. E. Newbery Electric Company with the Maryland Casualty Company thereon as surety for the faithful performance of its contract for the construction of an underground conduit system for the Sanitary District, and therefore recommends the passage of the following order:

Ordered, That the bond of the F. E. Newbery Electric Company for the construction of an underground conduit system for the Sanitary District, said bond being in the penal sum of $25,000.00, be and the same is hereby approved, and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the contract of the F. E. Newbery Electric Company with The Sanitary District of Chicago:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR UNDERGROUND CONDUIT CONSTRUCTION.

THIS AGREEMENT, Made and entered into this 22d day of May, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and F. E. Newbery Electric Company, a corporation organized under the laws of the State of Illinois, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty expressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances and appurtenances called for by this agreement (free from all claims, liens and charges whatsoever), in the manner and under the conditions hereinafter specified, that are necessary for constructing an underground conduit system as called for under the attached specifications, complete as specified.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Electrical Engineer of the Sanitary District and his properly authorized agents, by whose measurements and calculations the quantities and amounts (including extras) of the several kinds of work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Electrical Engineer or other Engineer designated by the Electrical Engineer of said Sanitary District shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between the said Sanitary District and said Contractor, that said Electrical Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide every question which may arise relative to the execution of the work under this contract on the part of the said Contractor; and his estimate and decision shall be final and conclusive on the parties hereto, and such estimate and decision, in case any question may arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Electrical Engineer" or "Engineer" are used herein they shall be understood to mean the Electrical Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the words "the work" are used herein, they shall be interpreted to mean the work, including all material, labor, tools, and all appliances and appurtenances necessary to perform and complete everything specified or implied in this contract or shown on the drawings, in full compliance with all the terms and conditions hereof.

Wherever under the provisions hereof an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Electrical Engineer of The Sanitary District of Chicago.

SPECIFICATIONS

FOR UNDERGROUND CONDUIT CONSTRUCTION.

Scope.

1. The work to be done under these specifications includes the furnishing of all conduit, material, labor, tools and appliances, and constructing in place, in an approved manner, complete and ready for service, an underground conduit system for electric power cables in streets and parkways in the City of Chicago. The streets and parkways in which the conduit system is to be installed are indicated on drawings forming part of these specifications. The locations of the conduit line and the manholes shown on the drawings are subject to change as conditions may require or justify.

Underground Structures.

2. Various underground structures, such as sewer, water and gas pipes and other conduit systems, are indicated on the drawings. The location and dimension of such structures where given are believed to be reasonably correct, but do not purport to be absolutely so. Such structures are indicated on the drawings for the information of the Contractor, but information so given is not to be construed as a representation that such structures will be found or encountered as plotted. Structures may also be encountered which are not indicated on the drawings. All structures encountered shall be taken care of by the Contractor at his own expense. No extras will be allowed for additional excavation or for additional expense incurred by the Contractor on account of changes made necessary due to obstructions encountered, except at the unit prices stipulated in the contract and only for actual additional conduit installed or additional manholes constructed. No change in location of conduit or manholes from the locations shown on the drawings shall be made without the consent of the Engineer or his representatives on the work.

Conduit.

3. The conduit used shall consist of the best quality, four (4) way, vitrified clay conduit, thoroughly glazed inside and outside and of a brand approved by the Engineer.

4. The ducts or holes shall be square with rounded corners and shall be not less than three and one-half (3½) inches in smallest dimension. All ducts shall be thoroughly and evenly glazed and must be free from projections or irregularities which might injure cable pulled through them.

5. Each section of conduit shall be at least three (3) feet in length except where shorter sections are necessary to fill out the run between manholes or to work around obstructions. Each section shall be free from splits, cracks or other imperfections which would impair its strength or are resisting qualities and shall be straight and true, with ends cut perpendicular to the sides. All duct holes shall be beveled at the ends. Each end of every section shall be provided with at least two (2) dowel pin holes, such holes to be approximately three-eighths (⅜) inch in diameter and located to insure accurate alignment of sections in laying. The outer walls shall be scored transversely for at least two inches at either end. In laying the conduit dowel pins of wrought or cast iron at least three and one-quarter (3¼) inches long shall be used. The dowel pins shall be provided with a shoulder at the center to prevent the pin from slipping entirely into the dowel pin hole of the conduit section.

Concrete Encasement.

6. The conduit shall be laid with a three (3) inch encasement of concrete around same, the concrete to consist of a mixture of one (1) volume of cement, three (3) volumes of sand, and five (5) volumes of crushed stone or washed gravel. The sand and stone or gravel shall be so graded in size that the cement shall more than fill the voids in the sand, and the sand and cement shall more than fill the voids in the stone or gravel. One bag of cement, weighing at least ninety-four (94) pounds net shall be regarded as having a volume of one (1) cubic foot, and the sand and stone or gravel shall be measured loose.

7. The cement shall be first-class Portland cement of a brand approved by the Engineer and shall be delivered in bags and thoroughly protected from dampness until used. No damaged or lumpy cement shall be used, and all cement rejected or unfit for use shall be immediately removed from the work. The cement shall conform to the most recent standard specifications of the Bureau of Standards of the United States Department of Commerce, Washington, D. C., contained in Circular No. 33, issued July 1, 1913.

8. All sand used shall be clean, sharp, "Torpedo," free from soft particles, vegetable matter or other deleterious materials and shall be subject to the approval of the Engineer.

9. The crushed stone or gravel shall consist of clean, hard, durable particles of stone well graded, between one-quarter (¼) inch and three-quarter (¾) inch, and shall be free from loam, clay, organic matter, soft pebbles or other impurities. All dust and particles smaller than one-quarter inch shall be removed before stone is used.

10. All cement, sand, stone and gravel when delivered on the work

shall be deposited on flooring and kept clean until used.

11. The concrete shall be mixed on movable water-tight platforms of proper size to permit thorough manipulation or in a mixing machine of an approved type. If mixed by hand a layer of stone or gravel,, several inches thick, shall be placed on a water-tight platform and a layer of cement and sand added thereto; another layer of stone or gravel shall be added to this quantity and upon same shall be placed another layer of sand and cement, and so on, until the entire batch is deposited on the platform. The mass shall then be thoroughly mixed dry by turning not less than twice with shovels. Water shall then be added and the mass turned with shovels until completely mixed. When a mixing machine is used the material shall be mixed in the machine for least two (2) minutes.

12. The proportion of water used shall be ample to render the concrete sufficiently plastic that it will readily form a dense mass when placed in position without the necessity of tamping except to a very limited extent.

13. All concrete shall be used immediately after mixing.

Excavating.

14. All trenches for conduit shall be run on straight lines between manholes unless otherwise authorized by the Engineer. Trenches shall be of proper depth so that the minimum covering over the concrete encasement shall be not less than twenty-four (24) inches at any point and shall be properly graded to drain conduit to one of the manholes.

15. Before any concrete is placed in the trench all loose earth shall be removed or thoroughly tamped to grade.

16. No tunneling shall be done except under street car tracks and curbs or where other conduits, pipes or other unavoidable constructions are encountered.

17. The Contractor shall properly and securely support all tunneled or excavated areas and all car tracks, water and gas mains and other pipes and conduits, and he shall also do all pumping or bailing necessary to keep the excavations free from water. He shall support and backfill any tunneled or excavated area under or at street car tracks in a manner to meet the written approval of the Chicago Surface Lines or their Assignees.

18. In cutting through paved streets, sidewalks or pavement base the Contractor shall carefully keep all such paving material removed separate from the earth excavations and shall use such paving or sidewalk materials as hereinafter specified.

19. Permits for street or parkway openings will be furnished by the Sanitary District. All other permits required shall be obtained by and at the expense of the Contractor.

Foundations.

20. After all loose earth is removed from the trench or properly tamped a layer of concrete three (3) inches thick shall be laid in the bottom of the trench to form the bottom side of the concrete encasement above specified. The concrete shall be thoroughly rammed and leveled off to proper grade, pitch and working surface.

Laying Tile Ducts.

21. The tile conduit sections shall be laid upon the concrete foundation by competent workmen. The sections shall be carefully laid to proper grade so that there will be no pockets or high spots in the run between manholes and to give a total drop in the run between manholes of not less than six (6) inches so that the conduit will drain to one of the manholes. Care shall be taken to see that dowel pins are properly inserted and that the ends of adjacent sections of conduit butt squarely and form a close joint. A wrapping of burlap consisting of a strip not less than four (4) inches wide and lapping at least four (4) inches after passing around the conduit section, shall be placed to cover each joint. The burlap shall be thoroughly wet before being wrapped around the conduit and after being put in place shall be covered thoroughly with a one-half (½) inch layer of cement mortar composed of Portland cement and sand.

22. A wooden mandrel, to be approved by the Electrical Engineer or his representative, shall be used in laying the conduit in order to insure proper alignment of sections and cleaning of ducts. The mandrel shall be at least five (5) feet in length and shall have a cross-section equal to not less than eighty-six (86) per cent of the cross-section of duct opening. The

mandrel shall be fitted with a ring at the front end for the purpose of drawing it through the duct and with a leather or rubber washer at the rear end. This washer shall be of sufficient size to fit the duct closely so as to scrape away any mortar that may get into the ducts at the joints.

23. After the conduit is in place and all joints properly wrapped the concrete encasement, as above specified, shall be completed around the conduit, care being taken in placing the concrete not to disturb the alignment of the conduit sections or to injure or break same.

Manholes, Frames and Covers.

24. Manholes constructed of concrete in accordance with details shown on drawings shall be installed at points indicated on drawings or at such other points as the Engineer shall direct. The concrete used shall conform in all details to the concrete above specified for concrete encasement around conduit.

25. The reinforcing bars to be used in the construction of the roof of the manholes shall consist of corrugated, twisted or deformed bars of the size called for on the drawings, or of equivalent section, and of a form approved by the Engineer. Bars shall be free from defects, kinks or bends and shall be rolled from open hearth steel billets (not re-rolled material), and shall conform in all respects to "Standard Specifications for Billet Steel Reinforcement Bars" adopted by the American Society for Testing Materials in 1911, and revised in 1912, 1913 and 1914. Deformed bars shall be of the grade therein specified as "Intermediate Grade." All bars shall be new stock, free from rust scale or excessive rust when placed in the work. A thin coating of red rust resulting from short exposure will not be considered objectionable when bars are placed in the work, but any bars having rust scale or a thick rust coat shall be thoroughly cleaned satisfactory to the Engineer, or shall be rejected and removed from the premises upon the order of the Engineer. All bars shall be protected from the weather after delivery at the site of the work.

26. Pulling irons as shown on drawings shall be installed in the wall of the manhole opposite each conduit entrance.

27. A four (4) inch back pressure valve and trap with perforated inlet and guard, subject to the approval of the Engineer, shall be furnished and placed in the side wall near the floor of manholes designated by the Engineer, and the same shall be properly connected by means of four (4) inch tile pipe with the main sewer or with gutter drains or ditches at the nearest practicable point. Such drains shall be installed only as instructed by the Engineer or his representatives.

28. Each manhole shall be equipped with a cast iron frame and cover conforming to details shown on drawings.

29. The frames and covers shall be of tough, gray iron, free from injurious cold-shuts, shrinkage strains, blow holes or other imperfections. They shall be true to dimensions and workmanlike in finish. The covers shall fit the frames properly and shall seat solidly.

30. All patterns required for the manhole frames and covers shall be supplied by the contractor. After completion of the work such patterns shall be delivered, free of cost, to the Storeroom of the Sanitary District at Thirty-first street and Western avenue, Chicago, Illinois, and shall become the property of the Sanitary District.

Backfilling.

31. All back filling shall be done in layers, each layer to be thoroughly tamped dry. Where street openings have been made the back fill shall be brought to proper grade to leave a mound three or four inches above the street grade after temporary paving replacements have been made.

Resodding and Temporary Repaving.

32. In places where conduit, manholes or drain pipes have been installed in sodded parkway, after the back fill has been tamped and brought to proper grade, the black earth and sod shall be carefully replaced and watered.

33. Where street paving has been removed in the work hereunder, after the back fill has been tamped and brought to proper grade, all paving material shall be replaced and the street left in a safe condition suitable for traffic.

Removal of Debris.

34. All surplus earth, paving material and debris shall be removed

daily and the street and site of the work at all times kept as clean and free from obstructions as possible.

Rodding, Cleaning and Wiring.

35. After the completion of each section of the conduit and the manholes at the ends of same, and allowing sufficient time for the concrete to set, the Contractor shall rod each duct and draw through same after the rods, wire brushes and a mandrel, to be approved by the Engineer, to thoroughly clean the ducts and insure proper alignment of the same. If obstructions are encountered which cannot be removed by the brushes so as to pass the specified mandrel, the ducts shall be removed and relaid at the expense of the Contractor. A Number 9 galvanized iron wire shall be furnished by the Contractor, at his expense, and left in one duct of the entire conduit system, the particular duct to be designated by the Engineer. This wire shall extend from manhole to manhole and shall be bent at the ends to prevent it from slipping into the duct.

Plugs.

36. All exposed ends of ducts in manholes shall be plugged with wooden plugs in an approved manner.

Guarantee.

37. All work performed hereunder shall be guaranteed free from defects in material and workmanship, and any work or materials proving defective within a period of one (1) year from the date of completion of the entire work shall be replaced at the expense of the Contractor. A maintenance bond for this purpose is specified in Article 31 of "General Conditions."

Time of Completion.

38. All work included hereunder shall be completed within ninety (90) days after the date of approval by the Board of Trustees of said Sanitary District of the Contractor's bond on this contract.

GENERAL CONDITIONS.

Sanitary District Law.

Article 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove obstructions from the Desplaines and Illinois Rivers," approved May 29th, 1889, in force July 1st, 1889, and all acts amendatory thereof and supplementary thereto.

Omission on Drawings.

Art. 2 The drawings furnished, or to be furnished, form a part of these specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications or drawings.

Approximate Quantities.

Art. 3. It is expressly understood and agreed by the parties hereto that the quantities of the various classes of work to be done and material to be furnished under this contract, which have been estimated as stated in the "Requirements for Bidding and Instructions to Bidders," attached hereto, are only approximate and are to be used solely for the purpose of comparing on a uniform basis the proposals offered for the work under this contract; and the Contractor hereby agrees that the Sanitary District shall not be held responsible if any of said quantities shall be found incorrect; and said Contractor will not make any claim for damages or for loss of profits because of a difference between the quantities of the various classes of work as estimated and the work actually done. If any error, omission or mis-statement shall be discovered in the said estimated quantities, the same shall not invalidate this contract or release the Contractor from the execution and completion of the whole or any part of the work herein specified, to the satisfaction of the Engineer and in accordance with the specifications and the drawings herein mentioned and for the prices herein agreed upon and fixed therefor, or excuse him from any of the obligations or liabilities hereunder, or entitle him to any damages or compensation otherwise than may be provided for in this contract, except for such extra work as may be required, for the performance of which written orders must be given and received, as herein specified.

Examination of Site.

Art. 4. All bidders for the work under this contract are required before submitting proposals to examine the site of the work and adjacent premises, and the various means of approach to the site, and to make all necessary investigations in order to inform themselves thoroughly as to the character and magnitude of all work involved in the complete execution of this contract; also as to the facilities for delivering, handling and installing all materials and the conditions and the difficulties that will be encountered in the performance of the work specified herein. No pleas of ignorance of conditions that exist or that may hereafter exist, or of difficulties that will be encountered in the execution of the work hereunder, as a result of failure to make necessary examinations and investigations will be accepted as a sufficient excuse for any failure or omission on the part of the Contractor to fulfill in every detail all the requirements of this contract, or will be accepted as a basis for any claim whatsoever for extra compensation.

Changes in Drawings.

Art. 5. The Sanitary District reserves the right to make any changes in the specifications and drawings which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby.

If such alterations increase the quantity of work to be done, such increase shall be paid for according to the quantity of work actually done at the unit price specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

Extra Work.

Art. 6. The Contractor shall perform only such extra work as the Engineer may order in writing, provided, however, that no extra work, the total price of cost of which is in excess of $500.00, shall be performed by said Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this contract, and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actual cost of the same can be determined, then the said Contractor shall receive, and the Sanitary District shall pay, in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause whatsoever must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occurs and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform

any extra work herein mentioned and the written notices and statements of claims for extras and of the work performed hereinbefore and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 7. In estimating the cost of extra work, the cost of material shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amount paid for same, as shown by the pay rolls of the Contractor, with cost of indemnity insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, when requested by the Engineer, certify, by his affidavit, the correctness of the amounts paid for material and labor.

It is further agreed that in all cases of question or dispute arising or growing out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision, Materials, Workmanship and Inspection.

Art. 8. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents.

All inspection of any and all material furnished for use in the work to be performed hereunder shall be made at the site of the work after delivery of the material; provided, that, if requested by the Contractor, the Engineer may at his option perform, or have performed, inspection of material at points other than at the site of the work.

All equipment and materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately, and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all equipment and materials and work, which during the progress and before its final acceptance, may become damaged from any cause, or do not for any reason satisfy the requirements of these specifications and drawings, shall be removed and replaced by good and satisfactory materials and work, without extra charge therefor. The Engineer and his assistants shall have at all times free access to every part of the work, and at all places where material to be used in the work is manufactured, or stored, and shall be allowed to examine any material furnished for use in the work under this contract.

Progress Certificates.

Art. 9. It is further expressly agreed that the granting of any progress certificate, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Plant.

Art. 10. The Contractor shall furnish all material and supplies, plant, tools and implements, teams and care; in fact, all material and appliances of every sort or kind that may be necessary for the full and complete carrying out of this contract, and shall furnish and maintain, subject to the approval of the Engineer, all necessary barricades, and other protections, lights and signs, necessary for the proper protection of the public. He shall also furnish a watchman. The cost of all the above shall be covered by the amounts paid at the unit prices herein specified, and no extra charge shall be made therefor.

Night, Sunday and Holiday Work.

Art. 11. Whenever the Contractor shall be permitted or directed to per-

form work at night, or on Sundays or a holiday, or to vary the period of hours during which work is carried on each day, he shall give written notice to the Engineer, so that proper inspection may be provided. Such work shall be done under the regulations to be furnished in writing by the Engineer, and no extra compensation shall be allowed therefor.

Cleaning Site.

Art. 12. The Contractor shall keep the site of the work and adjacent premises as free from material, debris and rubbish as is practicable and shall remove same from any portion of the site, if, in the opinion of the Engineer such material, debris or rubbish constitutes a nuisance or is objectionable in any way to the public. The Contractor further agrees to remove all materials, implements, barricades, debris and rubbish connected with or caused by said work immediately upon the completion of the same, and to leave the premises in perfect condition in so far as affected by the work under this contract.

Precautions.

Art. 13. The Contractor shall take whatever precautions are necessary to render any portion of the work secure in every respect, or to decrease the liability of accident from any cause, or to avoid contingencies which are liable to delay the completion of the work.

Superintendence.

Art. 14. The Contractor shall at all times have a competent foreman, superintendent or other representative on the work who shall have full authority to act for the Contractor and to receive and execute orders from the Engineer, who shall receive shipments of material to the Contractor, and who shall see that the work is executed in accordance with the specifications and drawings and the orders of the Engineer thereunder. The Contractor shall furnish the necessary watchmen to protect all materials, tools and equipment and all work performed by the Contractor until said work has been completed and accepted by the Engineer.

Workmen.

Art. 15. The Contractor shall employ competent foremen and laborers, and shall discharge, at the request of the Engineer, any incompetent or unfaithful men in his employ. None but men expert in their respective branches of work shall be employed where special skill is required.

Sanitation.

Art. 16. In accordance with the rules and regulations for the guidance of Sanitary Inspector, etc., adopted by the Board of Trustees on July 31, 1913, page 997 of the Proceedings for 1913, the Contractor shall introduce and enforce among his employees such regulations in regard to cleanliness and the disposal of garbage and wastes, as shall conduce to their health, and tend to prevent the inception and spread of contagious and infectious diseases among them, and shall take such means as the Engineer may direct to effectually prevent the creation of a nuisance on streets, or on adjacent property. Necessary sanitary conveniences for the use of the laborers on the work, properly secluded from public observation, shall be constructed and maintained by the Contractor in such manner and at such points as shall be approved by the Engineer and their use shall be strictly enforced.

Patents.

Art. 17. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Damages.

Art. 18. If any damage shall be done by the Contractor or by any person or persons in his employ to the owner or occupant of any land

or to any real or personal property adjoining or in the vicinity of the work herein contracted to be done, or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damage, and cause the Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself, or of his employees, that is in the nature of a legal liability, and he hereby agrees to indemnify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such injuries or such damages received or sustained by any person or persons, from said Contractor, his servants, agents or employees, in the execution of said work; or by or in consequence of any negligence in guarding the same; or by or on account of any omission or act of said Contractor, his agents or employees; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employers' Liability Act.

Art. 19. The Contractor further agrees to insure to his employees or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State"; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an act entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10, 1911, in force May 1, 1912"; approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employees in and about the performance of this contract.

Responsibility of Contractor.

Art. 20. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor shall be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it, except as hereinafter specified. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employees.

The Contractor shall not assign by power of attorney or otherwise any portion of the moneys that may become due through the performance of this contract or any part thereof.

Subletting Work.

Art. 21. The Contractor shall not sublet any part of the work herein mentioned to any person or corporation that is not, in the opinion of the Engineer, competent, experienced and financially able to properly carry out and execute the same, and in the event that said Contractor desires to sublet any part of the work he shall, prior to such subletting, submit to the Engineer a statement showing the character of the work and the name of the party or parties to whom it is proposed to sublet the same and his or their experience, financial ability and other qualifications for properly carrying out and completing the same, and the decision of the Engineer as to said qualifications, financial ability, experience and competency shall be final and binding upon both parties hereto. It is further understood and agreed that such subletting, or the approval thereof by the Sanitary District or by said Engineer, shall not directly or indirectly release or mod-

ify the responsibility of the Contractor for the satisfactory and entire completion of said work and each and every part and portion thereof, and that said Sanitary District shall not be liable to any sub-contractor for any claim or damages whatsoever. In case any party or parties, to whom any work under this contract shall have been sublet, shall disregard the directions of the Engineer or his duly authorized representatives, or shall furnish any unsatisfactory work, or shall fail or refuse in any way to conform to any of the conditions of this contract, then, in that case, upon the written order of the Engineer, the Contractor shall require said party or parties to discontinue work under this contract. Said work shall be corrected or made good and shall be completed by the Contractor or by such other party or parties agreed upon who shall be satisfactory to the Engineer.

Liens.

Art. 22. If at any time during the progress of said work the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon, or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor, or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make payment hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporation, for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Time and Progress.

Art. 23. The Contractor agrees to begin the work covered by this contract within ten (10) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor and to complete all of said work within ninety (90) days after the approval of said bond.

It is understood and agreed that TIME is of the essence of this contract, and that a failure on the part of the Contractor to complete the work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 24. It is, therefore, covenanted and agreed that in case the said Contractor shall fail or neglect to complete the work within the time specified in Article 23, then said Contractor shall pay to said Sanitary District the sum of Twenty Dollars ($20.00) for each and every day that said Contractor shall be in default in the completion of said work.

Said sum of Twenty Dollars ($20.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which said Sanitary District will suffer by reason of such default, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the same, then the Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto.

It is further agreed that if said Sanitary District shall accept any work or make any payments, under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to TIME and LIQUIDATED DAMAGES FOR DELAYS.

Extensions or Additions.

Art. 25. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such period of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time, but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provisions of this contract with reference to LIQUIDATED DAMAGES, and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 26. The Contractor shall delay or suspend the progress of the work, or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided that in the event of such delay or delays or of such suspension or suspensions of the progress of the work or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or supensions, shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay or delays, suspension or suspensions.

Unavoidable Delay.

Art. 27. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by any act or delay of the Sanitary District, or by any act or delay on the part of raidroads in furnishing cars or transporting said equipment, material or appurtenances for said work, or by War Boards or Councils of the Federal Government or State Councils of Defense, or by Federal Administrators, or by delays in obtaining priority certificates from the United States Government if such are required, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods, or through any default or delay of other parties, under contract with said Sanitary District, or due to strikes, or to other causes, which causes of delay mentioned in this article (Art. 27), in the opinion of the Engineer are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless at the commencement of the delay the Contractor notify verbally the Engineer or Inspector in direct charge in the field, and unless the Contractor notify the Electrical Engineer in writing before the fifth of each succeeding month of all delays occurring in the preceding month.

It is further expressly agreed that said Contractor shall not be entitled to any damages or compensations from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article (Art. 27), except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond, actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. The Electrical Engineer shall decide the number of days that said Contractor has been so delayed and his decision shall be final and binding upon both parties hereto.

Forfeiture of Contract.

Art. 28. It is further agreed by said Contractor that if the work to be done under this contract shall be abandoned by the Contractor, or if there shall be a failure by said Contractor to perform the work of the character and in the time herein specified; or if said Contractor shall fail

financially or from any other cause whatsoever be unable to carry out said contract and complete the said work; or if the contract shall be assigned by said Contractor except in the manner heretofore specified, or if the Contractor shall lose control of said work for any cause whatsoever except by the act of God, the United States Government or the public enemy; or if the Contractor shall refuse to or neglect to follow the instructions of the Engineer, or if, in the opinion of the Engineer, the Contractor refuses or neglects to use measures to protect the said work from damage; or is, in the opinion of the Engineer, the Contractor is guilty of carelessness or incompetency in the execution of said work; or if, in the opinion of the Engineer, the said work has been or is being delayed by the Contractor; or if, in the opinion of the Engineer, the rate of progress is not such as to insure the completion of the work within the time specified; or if at any time the Engineer shall be of the opinion and so shall certify in writing to said Sanitary District that said work or any part thereof is unnecessarily or unreasonably delayed; or that the Contractor is willfully or persistently violating any of the conditions or covenants of this contract, or is not fulfilling said contract in good faith, said Sanitary District shall have the power and authority, and may then immediately notify said Contractor to discontinue all work or any part thereof, as may be designated by the Engineer of said Sanitary District.

Upon notice being given as aforesaid by the said Sanitary District to the said Contractor, or upon the happening of any of the conditions hereinbefore in this article specified, the said Sanitary District shall have a lien upon all the equipment, material, supplies, machinery, implements and tools of the Contractor then existing on the premises of said Sanitary District or upon the streets for the purpose hereinafter specified; and the said Sanitary District may thereupon immediately take possession of all said equipment, material, supplies, machinery, implements and tools for the uses and purposes hereinafter set forth; thereupon the said Sanitary District shall have the power to, and may at the cost of said Contractor, complete the said work itself or may award a new contract therefor and in completing the said work the Sanitary District or said new contractor may use such equipment, materials, supplies, machinery, implements, tools and plant, as above specified, as may be the property of said original Contractor, and may make the necessary repairs and replacements thereto.

The cost of fully completing all the work provided for under this contract shall include the sum or sums of money paid by the Sanitary District in hiring men and teams, machinery, implements, tools and plants, and any sum or sums of money paid by the Sanitary District for the purchase of equipment, materials, supplies, machinery, implements, tools and plant, and the cost of repairs or replacements thereto; and all cost of repairs and replacements upon machinery, implements, tools and plant, of the Contractor hereunder, used in the completion of said work, and also all sums of money paid for first aid, medical, surgical and hospital attendance, and as compensation for accidental injuries or death suffered by employees in the course of their employment in the performance of said work under the Employers' Liability Act of the State of Illinois, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto.

The cost of fully completing all the work under this contract as aforesaid shall be charged to the said Contractor, and the amount of said cost or expense so charged shall be deducted from and paid by the Sanitary District out of any moneys that may be due or may at any time thereafter become due to the said Contractor under and by virtue of this contract, so far as the same shall suffice therefor.

Should the amount remaining unpaid of the contract price be insufficient to reimburse the Sanitary District for the cost of fully completing all work as aforesaid, then the Sanitary District may sell all materials, supplies, machinery, implements, tools and plant then on hand, whether obtained from the Contractor or by purchase, at public sale on giving said Contractor twenty (20) days' notice of the time and place of such sale, and the net proceeds derived from the sale of the said property at such sale shall be credited to the Contractor, and should the amount received from said sale be then insufficient to pay such deficiency, the Contractor and

his bondsmen shall be liable to pay the amount of said deficiency; and at any such sale of said property as provided hereunder, the Sanitary District may bid and become a purchaser of said property.

Contractor's Bond.

Art. 29. The Contractor shall furnish a bond in the sum of Twenty-five Thousand Dollars ($25,000.00) for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on givng ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such securities thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Maintenance Bond.

Art. 30. The Contractor shall furnish a maintenance bond, as specified in Section 37 of the specifications, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, for the faithful fulfillment of the requirements of that section. The execution of said maintenance bond shall be a condition precedent to the final payment specified in Article 33. The maintenance bond shall be in the amount of two (2) per cent of the amount of this contract for one (1) year only.

Prices.

Art. 31. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the equipment and material, and for doing all the work contemplated and specified in this contract; also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements, or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work and the whole thereof, in full compliance with the drawings and specifications and the requirements of the Engineer under them, to-wit:

For four (4) duct tile conduit installed complete in unpaved streets, the sum of Eighty-nine Cents ($0.89) per trench foot.

For four (4) duct tile conduit installed complete in paved streets, the sum of Two Dollars and Sixty-five Cents ($2.65) per trench foot.

For four (4) duct tile conduit installed complete in unsodded parkways, the sum of Eighty-nine Cents ($0.89) per trench foot.

For four (4) duct tile conduit installed complete in sodded parkways, the sum of One Dollar and Twenty Cents ($1.20) per trench foot.

For manholes constructed complete (exclusive of valve, trap and sewer connections) in unpaved streets, the sum of Ninety-two Dollars ($92.00) each.

For manholes constructed complete (exclusive of valve, trap and sewer connections) in paved streets, the sum of One hundred and fifteen Dollars ($115.00) each.

For manholes constructed complete (exclusive of valve, trap and sewer connections) in unsodded parkways, the sum of Ninety-two Dollars ($92.00) each.

For manholes constructed complete (exclusive of valve, trap and sewer connections) in sodded parkways, the sum of Ninety-six Dollars ($96.00) each.

For each four (4) inch back pressure valve and trap installed complete, the sum of Eleven Dollars ($11.00) each.

For four (4) inch drain tile from manhole installed complete as specified, where drain pipe is run in trench with conduit, the sum of Fifty-five Cents ($0.55) per foot of pipe.

For four (4) inch drain tile from manhole installed complete as specified, where drain pipe is run in separate trench, the sum of Sixty-five Cents ($0.65) per foot of pipe.

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents and patented material, appliances and

processes used in the work described in the specifications and agreements. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

Art. 32. The said Sanitary District agrees to pay said Contractor for the work performed hereunder in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed EIGHTY-SEVEN AND ONE-HALF (87½) PER CENT of the value of the work properly performed under this contract, and that the remaining TWELVE AND ONE-HALF (12½) PER CENT shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and delivery of the final certificate of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract.

Final Payment.

Art. 33. Upon the completion of all the work included under this contract and the execution of the bond called for in Article 30, the Engineer will certify to that effect. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials except in the manner set forth in this agreement; nor until all the stipulations, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificate, pay, and it hereby binds itself to pay the said Contractor in cash the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid, and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the heirs and legal representatives of said Contractor.

In Witness Whereof, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Committee on Finance, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its President to be duly attested and its corporate seal to be hereunto affixed.

The Sanitary District of Chicago.

CONTRACTOR'S BOND.

Know All Men by These Presents, That we F. E. Newbery Electric Company as principal and Maryland Casualty Company as surety are held and firmly bound unto The Sanitary District of Chicago in the penal sum of Twenty-five Thousand Dollars ($25,000.00), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals

and dated this 22nd day of May, A. D., 1919.

The Condition of the Above Obligation Is Such ,That whereas the above bounden F. E. Newbery Electric Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the 22nd day of May, A. D., 1919, for doing all the work, and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the construction of an underground system as specified in the attached contract.

Now, If the said F. E. Newbery Electric Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the drawings accompanying the same, and in the time and manner therein prescribed, and further shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees which may in any wise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said F. E. Newbery Electric Company, agents, employees or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery processes, devices or apparatus used or furnished in the performance of said contract, and moreover shall pay to said The Sanitary District of Chicago any sum or sums for money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including all valid claims and demands for first aid, medical, surgical and hospital services and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled, 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10, 1911; in force May 1, 1912," approved June 28, 1913; in force July 1, 1913, and all Acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said F. E. Newbery Electric Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

And It Is Hereby Expressly Understood and Agreed, And made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suits for damages occasioned by carelessness or neglect of said F. E. Newbery Electric Company or its agents, employes or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28, 1913; in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or death suffered by employees, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said F. E. Newbery Electrical Company shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

F. E. Newbery Electric Co. (Seal)
of Illinois,

By F. E. Newbery,
President.

Maryland Casualty Company, (Seal)
By O. P. Alford,
Attorney-in-fact.

Approved as to form June 7, A. D. 1919:
Chas. E. Anthony,
Asst. Attorney.

C. Arch Williams,
Attorney.

Mr. Lawley presented the following report from the Commitee on Finance:

CHICAGO, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it is advised by the Marshal that owing to an accident it will be necessary to build a new stem in the police boat "White Flyer" and to make certain betterments and changes on said boat, at an estimated cost of $300.00.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Marshal be and he is hereby authorized and directed to have the work above specified performed, provided the cost of the same shall not exceed the sum of $300.00.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance herewith transmits to the Board a grant of easement from Amanda Reifenstuhl and husband, Herman A. Schultz and wife, Fred W. Schultz and wife, Edward E. Schultz and wife, Emma Grablowski, Jennie Weihofen and husband and John B. Schultz and wife, whereby said grantors, for the consideration of $150.00, grant to the Sanitary District a perpetual easement to construct, reconstruct, maintain and operate an intercepting sewer and appurtenances thereto in the Desplaines River district, in, under and through certain real estate owned by them. Said easement is in the usual form in use by the Sanitary District in such cases.

Your Committee further reports that it has examined said grant of easement which has been approved by the Chief Engineer and Attorney, and therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate the said form of easement, which is hereto attached, the same having been duly executed by the grantors above named, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to draw a warrant in the sum of $150.00, payable to the order of Edward Reifenstuhl, Attorney in fact for said grantors, and deliver the same to him in full payment of the consideration for said grant.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 12, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of June payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

General Payroll.

John McGillen, Clerk (general payroll for first half of June, 1919)		$ 27,752.56

Construction Account.

E. H. Hanrahan (cleaning ditches, Calumet-Sag Channel)	$ 492.00	
Star Taxi Service & Garage (taxi service, Blue Island)	74.00	
Goodyear Rubber Company (hip boots)	13.00	
Herman H. Hettler Lumber Company (lumber)	9.08	
Goodyear Rubber Company (sporting boots)	6.50	
		594.58

Maintenance and Operation Account.

John McGillen, Clerk (special payroll, Lawrence Ave. Pumping Station, first half of June, 1919)	$ 153.40	
John McGillen, Clerk (special payroll for last half of April, 1919, Lawrence Ave. Pumping Station)	153.40	
John McGillen, Clerk (railroad tickets, Chicago to Joliet and Lockport)	27.32	
Abe Burrell & Co. (labor, repairing scows)	948.00	
Theo. B. Robertson Products Company (soap powder)	14.11	
Theo. B. Robertson Products Company, Inc. (soap powder, 39th St. Pumping Station)	29.46	
Chicago Surgical & Electrical Company (heating device, 39th St. Pumping Station)	13.75	
Sullivan Oil Company (engine oil, Lawrence Ave. Pumping Station)	21.01	
Thomas F. Ryan Company (lumber in repairing bridges)	255.22	
Argo Summit Lumber Company (lumber repairing bridges)	82.01	
James B. Campbell & Co. (tools and supplies)	73.34	
Miller Hardware Company (supplies)	71.35	
Bentley, Murray & Co. (printing forms)	71.00	
The Thos. F. Ryan Company (lumber)	63.36	
James O. Heyworth (shovel and cement sacks)	23.40	
Robert S. Leete & Co. (bond paper)	20.00	
F. A. Koth (labor and material, repairing Wilmette pumping station)	3.25	
Chas. Novak & Son (sheet glass)	2.30	
Keuffel & Esser Company (triangle)	.61	
		2,026.29

Illinois & Michigan Canal and Illinois River Conditions Department.

Wadsworth-Howland Company (white lead)	$ 20.15	
Joseph Ehrlich (office brooms)	10.00	
George B. Carpenter & Co. (paint)	7.84	
		37.99

Law Department.

John McGillen, Clerk (expenses of employe)		30.52
Amount carried forward		$ 30,441.94

Amount brought forward		$ 30,441.94
Clerical Department.		
John McGillen, Clerk (expenses of employe)	$ 7.96

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANC,
GEO. W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that it will be necessary from time to time to inspect at the mills and test in the shops the reinforcing and structural steel to be used on various structures of the Sanitary District, at an estimated cost of $400.00, and requests authority to expend said sum for said purposes.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized and directed to expend not to exceed the sum of $400.00 for the work above specified.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Electrical Engineer in which he states that the toilet room in the terminal station at 31st street and Western avenue is located in the northwest corner of the station and it is adjacent to a point where a number of cables leave the station and interferes to a considerable extent with the proper training of said cables, and he requests that he may change the location of said toilet room and install the plumbing equipment therein at an estimated cost of three hundred fifty dollars ($350.00).

Your Committee having had the matter under consideration recommends the passage of the following order:

Ordered, That the Electrical Engineer be, and he is hereby authorized and directed to perform the work above specified, provided the cost of the same shall not exceed the sum of three hundred fifty dollars ($350.00).

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that it is necessary to increase the length of the shafts of the four large blowers to be installed in the Desplaines River sewage treatment works and install additional outboard bearings on each of said shafts, due to a change in the layout of the motors and blowers to be installed in said station, and he requests that he may be authorized to order the Stannard Power Equipment Company, the contractors for furnishing and delivering said blowers, to perform said work under the extra work clause of its contract, at an estimated cost of $496.00.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized and directed to order the Stannard Power Equipment Company to perform the work above specified under the extra work clause of its contract for furnishing and delivering the blowers for Desplaines River sewage treatment plant, Division R, provided the cost of the same shall not exceed the sum of $496.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it is advised by the Chief Engineer that in order to repair the walls of the Main Channel in an economical manner it is necessary to purchase a seven cubic foot concrete mixer, which can easily be moved from place to place along said walls; that he has received twelve bids for furnishing mixers of various sizes and capacities, which bids are herewith transmitted to the Board. The lowest of said bids for furnishing a mixer of the size and capacity suitable for the work in question is that of the Koehring Machine Company in the sum of $865.00, F. O. B. Chicago, and he recommends that said bid be accepted.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Electrical Engineer be, and he is hereby authorized and directed to accept the bid of the Koehring Machine Company in the sum of $865.00, F. O. B. Chicago, to furnish the mixer above specified.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Commitee on Engineering:

CHICAGO, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on August 8, 1918 (pages 893-1017 of the Proceedings), entered into a contract with the T. J. Forschner Contracting Company for the work of furnishing, delivering and erecting the building, pumping machinery, electrical equipment, conduit and wiring of the Calumet Sewage Pumping Station as specified under Divisions A, B, C and D of said contract.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that under Subdivision D of Item 16 of said Division A of said contract, there is specified to be furnished by said contractor, one traveling crane of 15 tons rated capacity, with the necessary equipment and appurtenances relating thereto. That the bridge of said crane is to be constructed of a box girder type and that the axles are to run in self-lubricating bronze boxes of the M. C. B. type, or equal, which crane as specified is of the electrically driven type of a special design for hand traveling work. He further states that he has been investigating the crane specified and finds that a satisfactory hand traveling crane can be obtained which will be lighter than the one specified owing to the customary use in hand traveling cranes of single web girders instead of box girders and the use of roller bearings instead of self-lubricating bronze boxes, and recommends that the specifications be changed so as to permit said contractor to furnish a crane of a standard hand traveling type instead of the special type specified, with a consequent saving of a considerable sum to the Sanitary District.

Your Committee having considered the subject matter recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized to modify said contract between the Sanitary District and the T. J. Forschner Contracting Company in the particulars above specified, provided said contractor and the sureties on its bond consent in writing to such modification.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—None.

Passed and not voting—Messrs. Sergel and Nance—Two.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development reports that it has received a communication from the Electrical Engineer in which he states that the following contracts for resi-

dence lighting have been executed by him:

H. C. Frentz, 37 Greenwood avenue;
E. R. Simpson, 488 Elm street;
Mrs. Arthur Engelland, 196 Western avenue;
Aug. Schreiber, 438 Western avenue;
John C. Nehrke, 366 Broadway;
L. J. Lyons, 148 Lewis street;
all in Blue Island Ill.
J. Dubsky, 2611 Ridgeland avenue;
E. J. Riley, 3427 Maple avenue;
L. H. Luther, 3420 Hiawatha avenue;
A. Warndett, 3016 Winfield avenue;
all in Berwyn, Ill.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the action of the Electrical Engineer in executing the contracts for residence lighting with the parties above mentioned be, and the same is hereby ratified and confirmed.

Respectfully submitted,
H. E. Littler,
Chairman.

Wm. J. Healy,
Matt A. Mueller,
Wallace G. Clark,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Littler presented the following report from the Committee on Electrical Development:

Chicago, June 12, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

Gentlemen — Your Committee on Electrical Development herewith presents renewal contract with the Chicago Aluminum Castings Company, 2647 Ogden avenue, and new contract with H. J. Allen, 6735 Stanley avenue, Berwyn, Illinois, wherein the Sanitary District agrees to furnish and said parties agree to take electrical energy for the periods and upon the terms and conditions set forth. Said contracts have been approved by the Electrical Engineer.

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate the attached contracts, which have been properly executed by said above named parties.

Respectfully submitted,
H. E. Littler,
Chairman.

Wm. J. Healy,
Matt A. Mueller,
Wallace G. Clark,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

MISCELLANEOUS AND NEW BUSINESS.

Mr. Clark stated that Mr. J. L. Jacobs, of J. L. Jacobs & Company, which company was employed under a resolution of the Committee on Employment adopted on May 29, 1919, to make a classification of the employes of the Sanitary District, was present in the Board room, and he requested unanimous consent of the Board for permis-

sion for Mr. Jacobs to address the Board and explain the scope of the work to be performed by his company.

Unanimous consent having been obtained, Mr. Jacobs explained to the Board the nature of the work to be performed, which he aimed to have completed prior to the preparation of the appropriation ordinance for the year 1920, and he invited the aid and co-operation of the Trustees, heads of departments and employees in his work.

Mr. Clark stated that he had an answer to the statements made by President Sergel at the meeting of the Board of June 5, 1919, and read his answer, as follows:

TRUSTEE CLARK'S STATEMENT.

Statement of Wallace G. Clark concerning supposed charges made against him by President Charles H. Sergel at the Board meeting of June 5, 1915.

For a number of days prior to the Board meeting of June 5, 1919, President Sergel boasted through the press that he would at this meeting of the Board present charges against me of such a nature that I could not afterward be elected to public office. Persons who read such statements expected on that occasion, by the statements to be made by Sergel, that I would be blown to atoms and never again would I be able to face my friends or official associates.

Sergel had combed my private and public record with a fine-tooth comb to find something therein which would prove discreditable to me. It was only after the business of the Board was completed that I was able after repeated demands upon the President to force him to produce from his vest pocket a typewritten statement he had prior to the Board meeting given to the public press expecting that the press would print the statement without giving me an opportunity to refute the charges made.

What Were the Charges?

They were not that I had been dishonest in the discharge of my public duties or in the conduct of my private affairs, but merely that I, with certain of my business associates, had objected to certain tax levies made by taxing bodies other than the Sanitary District, of which I am a trustee. The charges did not disclose that I had obtained an exemption of taxes with reference to any Sanitary District tax levy.

The Michigan Boulevard Building Association, of which I was a minority stockholder, had filed objections in 1916 as to 1915 tax levies of certain taxing bodies, like the City of Chicago, Cook County and others, but not in relation to the Sanitary District tax levy—although there were upwards of five thousand persons, firms and corporations in the City of Chicago, of great prominence, who had filed objections to tax as of practically all taxing bodies.

All these persons who filed objections to the 1915 Sanitary District tax obtained an order of the County Court exempting a large portion of such tax, and the reason why most people filed objections was to avoid having their property discriminated against and to avoid paying an unjust proportion of the tax levy.

Neither I nor my business associates in the Michigan Boulevard building filed objections to the 1915 Sanitary District tax, and that was the only tax to which objection was ever sustained by anyone.

In 1917, when it came time to file objections to 1916 taxes, I had secured the passage of what is called the Sanitary District Validating Tax Act, which corrected all mistakes that had been made in the making of the 1916 tax levy. (Questions of publication and appropriation).

With Trustees Dailey, Paullin, Carr and Attorneys Adcock, Beebe and

Hall and others, I visited Springfield on many occasions, securing the passage of the Validating Act as an emergency measure by a vote of two-thirds of each house, and thereafter within ten days we obtained the signature of the Governor to the bill. It became a law before it was necessary to file objections to 1916 taxes.

In 1917 the Board of Trustees, with my support, adopted an ordinance, providing for a budget—although there was and is no law requiring a budget in the Sanitary District.

In order that there never could be any possible question raised by anyone as to Sanitary District tax levy, I suggested the employment by the Board of the recognized budgetarian expert of the United States, Mr. J. L. Jacobs, to install the budget system in the Sanitary District.

Upon the passage of the Validating Act and upon the placing of the Sanitary District upon a budget basis, requiring publication of its appropriation and tax levy ordinances, there was never any question as to the validity of Sanitary District taxes, and no one ever seriously urged objections to such taxes; nor has anyone ever received an exemption as to Sanitary District taxes since that time.

When my business associates and I in the Michigan Boulevard building might have obtained a benefit from objecting to Sanitary District tax levy for the year 1915, because I was a trustee of the Sanitary District I prevailed upon them not to file such objections, and none was filed, and no exemption was received.

After the passage of the Validating Act and installation of the budget system, it never occurred to me that there could be any possible objections sustained against Sanitary District taxes, and whether my business associates filed such objections or not was of no consequence.

All these facts were known to President Sergel, as well as the fact that as to one hundred seventy-five parcels of land owned individually by me in the City of Chicago I never filed objections of any kind to any tax of any taxing body, and no exemption was ever obtained by me in favor of such property. That was property over which I had individual and complete control.

In mentioning this fact I do not intend to cast any reflection upon the men of high business standing in the community who have filed objections to tax levies. We find in the list of names of persons, firms and corporations filing objections to taxes trust companies, educational institutions, seminaries, libraries, hotels, theatres, safety deposit companies, various clubs—including the Hamilton Club of Chicago, which has the distinguished honor of numbering among its membership Mr. Charles H. Sergel—large estates in the hands of trustees or executors, public utility corporations, all the great steam railroads having terminals in Chicago, and also many prominent men who are on the directorates of the various national and state banks,—men who have attained prominence in developing the large business enterprises in Chicago; men who have contributed their time and money to the maintenance and work of the great civic bodies of this city, which civic bodies have been largely responsible for the great progress made by Chicago financially, commercially and otherwise.

Without doubt anyone ought to be proud to be on the list containing the names of men of such standing and character.

Many of the objections that were filed by this multitude of business men and corporations were sustained. I had the legal right, as my associates did, to file objections to the 1915 Sani-

tary District tax, and those objections would have been sustained had they been so filed. I did not, however, consider it in keeping with my responsibility to the public to do so, and I did not do it.

Under the law no person is compelled to pay taxes that are not legal and just.

Mr. Lawley moved that the statement be published in the Proceedings.

TEMPORARY CHAIRMAN.

President Sergel called Mr. Healy to the chair and took a place on the floor.

Mr. Sergel moved that the statement, which he read at the meeting of the Board of June 5, 1919, be published in the Proceedings.

PRESIDENT SERGEL'S STATEMENT.

Among the various misdeeds with which Wallace G. Clark, trustee of the Sanitary District has been charged, one of the most discreditable has just come to light, and on account of its bearing on public affairs should be made generally known. As Trustee of the Sanitary District he has levied taxes on property of other citizens of Chicago and the surrounding towns, and then, taking advantage of his own acts, has gone into court to attack on mere technicalities the tax levies of the Sanitary District and other taxing bodies, thus avoiding the payment of taxes that other citizens have had to pay. The Michigan Boulevard Building Company, of which he is and has been President, the property of which is assessed and appears on the records in the name of Jarvis Hunt, J. Milton Trainer and Wallace G. Clark, trustees, went into court against the collection of certain taxes levied in the years 1915, 1916 and 1917, and, as the result of this course, evaded taxes to the amount of $11,045.22. Clark's real estate firm of Clark and Trainer also objected to taxes on twenty-four pieces of real estate and dodged taxes in proportion in 1917.

All this time Wallace G. Clark was trustee of the Sanitary District from which he has drawn a liberal salary for fourteen years. And during this time he is said to have grown rich.

That the people may judge of this matter for themselves the facts in the case are given herewith in detail, practically all statements relating to the taxes being attested under seal of the County Clerk.

The value of the Michigan Boulevard Building was given in a statement, October 30, 1916, over Mr. Clark's signature, as $1,756,417, and the land as $2,341,440, or a total combined value of $4,097,857. Assessed value was and is $549,513, about 13 percent of the real value.

The Sanitary Board on July 29, 1915, made a levy of taxes on all taxable property of the District. Wallace G. Clark voted for this levy.

In 1915 the taxes levied against the Michigan Boulevard Building and land were as follows:

State tax	$ 3,022.33
County tax	3,242.13
South Park tax	2,253.01
City taxes	10,001.14
School tax	9,946.19
Sanitary District tax	2,307.96
Forest Preserve tax	54.96
Total taxes spread	$30,827.72

Against these taxes Mr. Clark's Company through its attorneys, Allen G. Mills and Vail and Vette, filed objections to the levies for the Cook County tax, School tax, City tax and Forest Preserve tax, but, on this occasion, not against the Sanitary District tax. By these objections, he avoided the payment of the following taxes:

County tax	$2,362.91
Sanitary District tax	1,373.77
Forest Preserve tax	54.96
Total taxes evaded	$3,790.64

The record of payment on the taxes for 1915 follows:

May 8, 1916, "Paid on Account"	$26,871.23
Aug. 28, 1917, "Paid Bal. on Account"	164.85
Total paid	$27,036.08

The difference between the $27,036.08 paid and the $30,827.72 spread is $3,790.64, lost to the municipalities affected by the objections of the Company of which Mr. Clark is head, despite the fact that he himself participated in making the levy of the $1,373.77 which he profited by the Supreme court's ruling on the Sanitary District taxes.

The Sanitary District's tax levy ordinance for 1916 was passed Aug. 2, and Wallace G. Clark voted for it. The Michigan Boulevard Building was assessed this year as follows:

State tax	$ 4,396.11
County tax	3,571.84
South Park tax	2,253.01
City taxes	10,825.44
School tax	10,275.90
Forest Preserve tax	109,91
Sanitary District tax	2,088.15
Total taxes spread	$33,520.33

Against these taxes Mr. Clark's company, through its attorneys, Ellis & Lewis, filed objections to the levies for the City of Chicago, Cook County, and the Sanitary District. This is Case "No. 467, General Objections" in the office of the Clerk of the County court, filed in 1917.

Following is a summary of Clark's Company's objections to the Sanitary District tax for 1916:

1. That the District did not specify in detail the objects and purposes for which taxes were required.

2. That the amount levied for the payment of bonds and interest is excessive.

3. That no appropriations were made for the year 1916 upon which to base a valid tax levy.

4. That the tax levy ordinance for the year 1916 was not published according to law.

5. No appropriating ordinance was passed other than the tax levy for the year 1916.

6. That no ordinance was passed designating the purposes for which the money was to be expended prior to the adoption of the tax levy.

7. That no ordinance or resolution passed by the Board of Trustees of the Sanitary District was published in any newspaper.

Other objections go to the legality of past bond issues and in Objection No. 9. it is specifically urged "That said bonds are void." Here we have a trustee attacking the validity of the District's bonds on the market and in the hands of innocent purchasers and for which the District has received value. And many of these bond issues he himself voted for.

By these objections based on technicalities of the law, Mr. Clark's Company dodged the following taxes:

County tax	$ 219.80
City tax	6,704.07
School tax	329.71
Total taxes evaded	$7,253.58

The courts held the Sanitary District levy valid and Mr. Clark's Company, although it exerted every effort, that the law would permit, to do so, failed to evade any of the District taxes Mr. Clark had helped to levy for that year.

On April 1, 1917, Clark's Company "paid on Accout" $23,629.10 and on April 10, 1918, after the Supreme court decision, $2,637.65 was paid which, with the $7,253.58 evaded, made up the company's total taxes of $33,520.33. At the same time Mr. Clark's com-

pany was saving this money thousands of others who scorned to take advantage of a legal loophole were paying the full amount of their taxes as spread on the county treasurer's books.

This same year—1917—Clark and Trainer filed objections similar to those in the Michigan Boulevard Building case and saved money in evaded taxes for the firm on the same items. This is Case No. 466 General Objections for 1917 on file in the Clerk of the County Court's office.

Again in 1918, Mr. Clark's company filed its objections to taxes levied for 1917 for Cook County, City of Chicago and the Sanitary District. Here again Mr. Clark was one of the trustees who fixed the levy for the Sanitary District which he attacked through his attorneys, Vail & Vette, William M. Lawton and Edward M. Liessmann. The total taxes on the Michigan Boulevard Building Property as spread for 1917 were $33,795 09. Of this amount there was paid "On account" $32,476.26, leaving a balance of $1,318.83 unpaid. This amount still is in litigation.

Following is a summary of Clark's company's objections filed against the Sanitary District taxes for 1917:

1. That the amount levied for the payment of bonds and interest is excessive because the District has not appropriated and applied its net earnings from water power and docks to the payment of bonds and interest.

2. That each and all of the items in the annual appropriation bill and the annual tax levy ordinance based thereon are indefinite and not properly itemized.

3. Each of the items in the budget and levy ordinance was not appropriated and levied for the purposes authorized by law.

4. Each and all of the items in the annual appropriation bill for 1917 and the levy ordinance based thereon are unauthorized by law and void.

5. That the amount of $450,000 appropriated and levied for loss and cost of collection of taxes is excessive.

6. That all the items appropriated for "Sewers, tunnels and sewage purification works, amounting to $2,331,900 are void for the reason that the District has no power to levy taxes for such purposes.

If the court had held these objections valid, the Sanitary District would have defaulted on the interest on its bonds, could not have paid the bonds due to the amount of several millions in those years and would have had to stop all progress on the great works of the District which are absolutely necessary to conserve the health of the people.

Now bear this important fact in mind. Each and every year that Wallace G. Clark's Michigan Boulevard Building company and his real estate firm of Clark & Trainer have fought the tax levies or any part of them, he has been a member of the Sanitary District Board, a tax levying body. While he has levied taxes for others to pay, he himself has sought to avoid the payment of his own taxes.

On roll call both statements were ordered published by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

President Sergel then took the chair, and Mr. Healy took his seat.

Mr. Healy presented the following resolution:

WHEREAS, On Tuesday, June 24, 1919, citizens of Swedish ancestry throughout the United States and many foreign countries will celebrate Mid-Summer Day by festivities and exercises in keeping with the holiday occasion; therefore, be it

Ordered, That the heads of all departments of The Sanitary District of

Chicago be, and they hereby are directed to excuse from duty wherever possible any Sanitary District employe of Swedish birth or ancestry who shall request permission to be absent from duty Tuesday, June 24, 1919, for the purpose of observing Swedish Mid-Summer Day.

Mr. Healy moved that the resolution be adopted.

The motion prevailed.

Mr. Carr presented the following resolution:

WHEREAS, Saturday, the 14th day of June, 1919, has been proclaimed Flag Day by the President of the United States, and the Governor of the State of Illinois; and,

WHEREAS, Patriotic meetings and celebrations in honor of the Flag are to be held on said day, therefore, be it

Resolved, That the offices of The Sanitary District of Chicago be closed on that day, and that only such employes as are imperatively necessary for the actual work of the District be required to report for duty on said day.

Mr. Carr moved that the resolution be adopted.

The motion prevailed.

Mr. Lawley read an opinion from Messrs. Wood & Oakley, attorneys, which states that the Sanitary District is justified in accepting bonds at par from the City of Chicago to satisfy judgments held by the Sanitary District against said city.

Ordered placed on file.

Mr. Lawley presented the bond of Mr. Lawrence F. King, Clerk of the Sanitary District, in the sum of $50,000, with the Southern Surety Company thereon as surety, given for the faithful performance and discharge of his duties of office, and moved that the bond be approved.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

ADJOURNMENT.

Mr. Lawley moved that the Board adjourn.

The motion prevailed.

John W. Gillson, Clerk.

C43s

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, JUNE 19, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Absent—None.

MINUTES.

Mr. Lawley moved that the minutes of the regular meeting of June 5, 1919, be approved, as printed, without being read.

The motion prevailed.

SUSPENSION OF REGULAR ORDER OF BUSINESS.

Mr. Lawley moved that the regular order of business be suspended for the purpose of having Judge Anton T. Zeman, of the Circuit Court of Cook

County, administer the oath of office to Mr. Lawrence F. King, the newly elected Clerk of The Sanitary District of Chicago.

The motion prevailed.

Judge Zeman administered the oath to Mr. Lawrence F. King, and the Clerk then assumed the duties of his office.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 19, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that the Clerk of the Sanitary District on June 12, 1919, issued his checks on the Continental & Commercial National Bank to the order of the following named employes of the Sanitary District for services rendered, in the sums stated, as follows:

June 12, 1919, check No. 217, order of P. J. Whalen	$57.50
June 12, 1919, check No. 224, order of J. J. Ryan	57.50
June 12, 1919, check No. 207, order of E. H. Boddy	57.50
June 12, 1919, check No. 221, order of John Witt	57.50
June 12, 1919, check No. 219, order of Thomas Mooney	57.50

which checks were not delivered to said employes, but were stolen from a desk of the resident engineer in the field office of the Sanitary District at the Desplaines River Sewage Treatment Plant.

The payment of said checks has been stopped at the bank and it is necessary to authorize the Clerk to issue new checks in the place of the ones so stolen.

Your Committees having considered the matter, recommends the passage of the following order:

Ordered, That the Clerk of the Sanitary District be and he is hereby authorized and directed to issue new checks in the several sums stated, payable to the persons above named, and deliver the same to them in payment of services rendered.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 19, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received requests from the Electrical Engineer, Attorney, Treasurer and Clerk to make transfers of funds from various unexpended accounts to other accounts in order to provide funds for the payment of expenditures for which no appropriations have been made and to increase certain appropriations.

Your Committee having considered said requests is of the opinion that same should be granted and therefore recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby authorized and directed to make the following transfers in appropriations for the year 1919, in accordance with the several requests of the heads of the departments attached hereto:

Department of Electricity.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 19, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that the appropriation bill of the Sanitary District for the year 1919 (pages 131 and 132 of the Proceedings), sets up in the Department of Law (Item 18) two positions with salaries attached thereto, totaling the sum of $2,640.00 and under the Accounting and Record Division (Item 8) of the Department of the Clerk of the District, one position with the salary attached thereto (page 135 of the Proceedings), the sum of $1,500.00, which positions and salaries are set forth in the order hereto attached.

Your Committee further reports that the Committee on Employment has requested that the salaries attached to certain of said positions be adjusted to meet the requirements of the Department of Law and the Department of the Clerk of the District, which can be done without increasing the respective sums of $2,640.00 and $1,500.00 heretofore appropriated.

Your Committee having considered said request, is of the opinion that same should be granted and therefore recommends the passage of the following order:

Ordered, That the Clerk be and he is hereby authorized and directed to make adjustments of the salaries set up under the Department of Law and Accounting and Record Division of he Department of the Clerk of the District in the Appropriation Bill for the year 1919, in accordance with the requirements of the Committee on Employment, as follows:

Change from:

Department of Law, Account No. II—Salaries and Wages of Regular Employes.

Stenographers, 2 at $1,320.00...$2,640.00

Department of Clerk, Account No. II, Salaries and Wages of Regular Employes Accounting and Record Division.

Stenographer, 1 at $1,500.00....$1,500.00

$4,140.00

to:

Department of Law, Account No. II, Salaries and Wages of Regular Employes.

Stenographer, 1 at $1,320.00....$1,320.00
Stenographer, 5 17-30 months, 1 at $1,320.00 ..... 612.33
Stenographer, 6 13-30 months, 1 at $1,500.00 ..... 804.17

Department of Clerk, Account No. II, Salaries and Wages of Regular Employes Accounting and Record Division.

Stenographer, 5 17-30 months, 1 at $1,500.00 .....$ 695.83
Stenographer, 6 13-30 months, 1 at $1,320.00 ..... 707.67

$4,140.00

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 19, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to report that bonds of The Sanitary District of Chicago to the amount of $150,000.00 will mature July 1, 1919.

Your Committee further reports that the semi-annual interest on the ninth, tenth, twelfth, fourteenth, eighteenth, twenty-fifth, twenty-seventh and thirty-first issues of bonds of The Sanitary District of Chicago, amounting to the sum of $84,060.00, will also fall due July 1, 1919, and recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees and the Clerk be, and they are hereby instructed to draw a warrant payable to the order of the Treasurer of The Sanitary District of Chicago for the sum of $234,060.00, to pay the principal and semi-annual interest due July 1, 1919, on bonds of The Sanitary District of Chicago as follows:

The principal of 50 bonds of the tenth issue	$ 50,000.00
The principal of 75 bonds of the fourteenth issue	75,000.00
The principal of 25 bonds of the twenty-fifth issue	25,000.00
Total bonds	$150,000.00
Six months' interest on $50,000 of the ninth issue at 4 per cent	$ 1,000.00
Six months' interest on $100,000 of the tenth issue at 4 per cent	2,000.00
Six months' interest on $300,000 of the twelfth issue at 4 per cent	6,000.00
Six months' interest on $375,000 of the fourteenth issue at 4 per cent	7,500.00
Six months' interest on $192,000 of the eighteenth issue, at 4 per cent	3,840.00
Six months' interest on $300,000 of the twenty-fifth issue at 4 per cent	6,000.00
Six months' interest on $636,000 of the twenty-seventh issue at 4 per cent	12,720.00
Six months' interest on $2,000,000 of the thirty-first issue at 4½ per cent	45,000.00
Total interest on bonds	$84,060.00
Grand total	$234,060.00

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

GEORGE W. PAULLIN,
MATT. A. MUELLER,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 19, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has had under consideration the advisability of the Sanitary District accepting 4 per cent bonds of the City of Chicago at their face value in payment of the existing judgments due the Sanitary District from said city, on account of work done and labor performed in rehabilitating and extending the street lighting system of said city, and for electrical energy furnished it, which judgments with interest

thereon and taxed costs total the approximate sum of $5,000,000.00.

Your Committee further reports that it is advised by the Attorney that the Sanitary District has the legal right to accept said bonds at their face value in payment of said indebtedness, and your Committee is of the opinion that said bonds should be accepted; and, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District be and he is hereby authorized and directed to accept from the proper authorities of the City of Chicago, 4 per cent bonds of said city at their face value in payment of said judgments, interest thereon and taxed costs and to make such adjustments as may be necessary to equalize the amount of bonds received and the indebtedness due the Sanitary District, and when said bonds are so received, to deliver the same to the Treasurer of the Sanitary District, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Attorney be, and they are hereby authorized and directed to execute and deliver for and on behalf of The Sanitary District of Chicago such receipts, acquittances and releases to the City of Chicago as may be necessary to obtain said bonds and to cancel said judgments of record.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 19, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has had under consideration the sale of $3,000,000.00 face value of 4 per cent bonds of the City of Chicago a part of the issue of $5,000,000.00 to be received by the Sanitary District in payment of certain outstanding judgments, interest thereon and taxed costs and is of the opinion that it is advisable to dispose of said bonds in that amount, the proceeds of which is to be used for the corporate purposes of the Sanitary District.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to advertise said $3,000,000.00 of 4 per cent bonds of the City of Chicago for sale in such daily and financial papers as they may select.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

MATT A. MUELLER,
GEO. W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel *(except as to vouchers to Edmund D. Adcock, for professional services rendered, in writing brief in re Lake Level controversy, for $850.00, and to George F. Mulligan, for legal services, for $960.00, on which Mr. Sergel voted "nay")*, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance *(except as to vouchers to Edmund D. Adcock, for professional services rendered, in writing brief in re Lake Level controversy, for $850.00, and to George F. Mulligan, for legal services, for $960.00, on which Mr. Nance voted "nay")* and Paullin—Seven on all vouchers, and nine on all vouchers with the exceptions above noted.

Nays — None *(except as above shown)*.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 19, 1919.

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to draw a warrant payable to Lawrence F. King, Clerk, in the sum of $20,000.00 to be delivered to him and used by him to meet emergency and force account payrolls and to obtain the benefit of discounts on current vouchers.

Respectfully submitted,

JAS. H. LAWLEY,
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Engineering.

Mr. Clark presented the following report from the Commitee on Engineering.

CHICAGO, June 19, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has on June 5, 1919 (page 713 of the Proceedings) presented a report to the Board setting out the activities of the Sanitary District with reference to the construction of a bridge across the south branch of the Chicago river at Twelfth street and presenting the details of a new layout prepared by the Bureau of Engineering of the City of Chicago for the construction of a single leaf bascule bridge providing a 140-foot navigable channel at said point, which said layout since the adoption of said report has been changed so as to provide for an enlargement of the cross sectional area of the by-pass west of the abutment of said new bridge. Said report of your Committee was accompanied by an order of the Board which was adopted on said date, approving said new layout "provided, however, that the City of Chicago shall make a reasonable showing that the straightening of the south branch of the Chicago River can be brought about within a reasonable time, thereby making said single leaf bascule bridge of temporary use."

Your Committee further reports that a certified copy of said resolution was transmitted to his Honor, the Mayor of said City of Chicago and the City Council and your Committee herewith transmits to the Board a communication from Charles R. Francis, Commissioner of Public Works of said City, acknowledging receipt of said certified copy and stating in reply thereto that "The City

of Chicago has through plans and models shown that a single leaf bascule bridge with a by-pass and 140-foot clear channel for navigation is to be of temporary use until the straightening of the south branch of the Chicago River is finally adopted, in which event the bridge will be modified to meet the new conditions."

Your Committee having considered said communication is of the opinion that under the circumstances the City of Chicago has made a reasonable showing that the straightening of the south branch of the Chicago River can be brought about within a reasonable time, thereby making said single leaf bascule bridge of temporary use and that the new layout for the construction of said bridge should be approved and therefore recommends the passage of the following order:

Ordered, That the Sanitary District hereby approves the new layout prepared by the Bureau of Engineering of the City of Chicago for the construction of a single leaf bascule bridge across the south branch of the Chicago River at Twelfth street, which new layout was described in detail in the report of your Committee approved by the Board on June 5, 1919, except as changed in the particulars above described.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
MATT. A. MUELLER,
PATRICK J. CARR,
JAS H. LAWLEY,
H. E. LITTLER,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, June 19, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that the original plans for the excavation and collateral work on contract section 5 of the Calumet-Sag Channel included the riprapping of Milk Creek for a distance of about 700 feet back on certain real estate owned by Patrick H. Caraher. That the contractor for said work was unable to perform said work due to the fact that it could not obtain the right from the tenant of Mr. Caraher to go upon said land. He further states that on September 20, 1917 (page 1295 of the Proceedings), the Board authorized him to expend the sum of $5,000.00 in doing said work and that about $2,000.00 of said sum was expended in removing stumps and debris and by excavating a clear channel, but it was not possible at that time to perform the riprap work in question.

He further states that when the connection between Milk Creek and the Calumet-Sag Channel is opened up, the water in the creek will be drawn down so rapidly that high velocities will be caused, resulting in the caving and washing of the banks unless some means are taken to prevent this, and he recommends that instead of riprapping the bottom of the creek, a small concrete dam be constructed across the bottom of the creek at the south right of way to prevent the scouring of the bottom and sides at an estimated cost of $500.00. He requests that authority be granted him to order Edward J. Hanrahan, who is now doing work in constructing outfalls along the Calumet-Sag Channel, to do said work.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to order Edward J. Hanrahan to perform the work above specified, provided the cost of the same shall not exceed the sum of $500.00.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
MATT. A. MUELLER,
H. E. LITTLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, June 19, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that the City of Chicago has from time to time considered various plans for the construction of a subway through the downtown district, and if any such subway is constructed it will necessitate remodeling the existing sewer system, which will unavoidably be affected thereby. He further states that the questions involved have been informally discussed with the Engineers of the City Sewer Department in the past, but considerable study should now be undertaken in order to be prepared to make suggestions and recommendations to the Engineers planning said subway and he requests that he be granted authority to undertake said work and co-operate in every way with said Engineers and the officials of said city.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to undertake the work above specified and to co-operate with the Engineers of the Sewer Department of the City of Chicago and officials of said city in solving the sewer problems involved in constructing said subway.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
MATT. A. MUELLER,
JAS. H. LAWLEY,
H. E. LITTLER,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Commitee on Electrical Development:

CHICAGO, June 19, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development reports that it has received a communication from the Electrical Engineer in which he states that by the terms of the existing contract between the Sanitary District and the Chicago & West Towns Railway Company said company is limited in its

use of electrical energy to certain hours of the day and has requested permission to use said electrical energy during other hours when said use will not interfere with the supply of electrical energy to other consumers.

The Electrical Engineer further states that the use of additional electrical energy at the present time will not interfere with the supply to other consumers and will result in an increased income to the Sanitary District.

Your Committee having considered the matter is of the opinion that the request of said company should be granted, and therefore recommends the passage of the following order:

Ordered, That the existing contract between the Sanitary District and the Chicago & West Towns Railway Company be modified to permit said company to use electrical energy during such hours and period of time as shall be authorized by the Electrical Engineer and that whenever he is of the opinion that it is not to the advantage of the Sanitary District to permit said consumer to use such electrical energy he shall notify said company and said company shall thereupon cease to use said additional electrical energy.

Respectfully submitted,

H. E. LITTLER,
Chairman.

MATT. A. MUELLER,
WALLACE G. CLARK.
WM. J. HEALY,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, June 19, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development reports that it has received a communication from the Electrical Engineer in which he states that the following contracts for residence lighting have been executed by him:

Mrs. C. S. Buckley, 177 Oak street.
August Marx, 314 State street.
Mrs. A. Goeing, 663 Western avenue.
C. E. Dagena, 386 Davis street.
All in Blue Island, Ill.
Geo. T. Tucker, 6909 34th street.
W. B. White, 3422 Ivision avenue.
Paul B. Marek, 3430 Elliot avenue.
All in Berwyn, Ill.
M. Povelka, 39th street and Powell avenue.
Louis Arrigoni, Ogden avenue and Barry Point.
All in Lyons, Ill.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the action of the Electrical Engineer in executing the contracts for residence lighting with the parties above mentioned be and the same is hereby ratified and confirmed.

Respectfully submitted

H. E. LITTLER,
Chairman.

MATT A. MUELLER,
WALLACE G. CLARK,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, June 19, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith presents a new contract with the Illinois Packing Company, 938 West 37th place, wherein the Sanitary District agrees to furnish 150 kilowatts of electrical energy on an off peak basis, which said company agrees to take upon the terms and conditions set forth in said contract. Said contract has been approved by the Electrical Engineer.

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate the attached contract with the Illinois Packing Company, the same having been properly executed by it

Respectfully submitted,

H. E. LITTLER,
Chairman.

MATT A. MUELLER,
WALLACE G. CLARK,
WM. J. HEALY,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Employment.

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, June 19, 1919.

To the Honorable, the President and The Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of actions taken:

NEW APPOINTMENTS.

Provided for in 1919 Budget.

Police Department.

George Reichardt, patrolman (vacation period), $100.00 per month.

Electrical Department.

Emil Lind, oiler (vacation period), $125.00 per month.

Andrew McEwan, oiler (vacation period), $125.00 per month.

Engineering Department.

George P. Horn, rodman, $100.00 per month.

Albert J. Clifford, timekeeper, $110.00 per month.

Richard Przybyla, watchman, $110.00 per month.

Harry Lindquist, mechanic, 60c per hour.

Patrick Carlin, well digger, 77½c per hour.

Mike Burke, well digger, 77½c per hour.

Pete Lannon, windlassman, 67½c per hour.

Tom Walsh, windlassman, 67½c per hour.

REINSTATEMENT.

Police Department.

Tony Alessi, patrolman (vacation period), $125.00 per month.

INCREASES.

Engineering Department.

Chas. M. Hopfer, from sub-foreman at 50c per hour to foreman at $5.50 per day.

Edward Welsh, from laborer at $4.00 per day to rough carpenter at $4.50 per day.

Laborers (within Chicago city limits), from 45c per hour to 50c per hour.

Laborers (North Shore Channel, Blue Island and Summit), from $4.00 per day to $4.50 per day.

Laborers (Main Channel south of Willow Springs), from 45c per hour to 50c per hour.

Electrical Department.

Laborers, from 45c per hour to 50c per hour.

REINSTATEMENTS.

Due to Honorable Discharge from U. S. Army Service.

Engineering Department.

J. J. Newman, assistant engineer, $225.00 per month.

Patrick J. McEvoy, rodman, $115.00 per month.

James A. Loftus, laborer, 50c per hour.

Theo. Davidenko, laborer, 50c per hour.

TRANSFERS.

Electrical Department.

Theo Frantz, from fireman at $100.00 per month to laborer at 50c per hour.

Patrick Connors, from fireman at $100.00 per month to laborer at 50c per hour.

T. O'Connell, from fireman at $100.00 per month to laborer at 50c per hour.

Respectfully submitted,

GEORGE W. PAULLIN,
Chairman.
MATT A. MUELLER,
H. E. LITTLER,
JAS. H. LAWLEY,
WALLACE G. CLARK,
Committee on Employment.

Mr. Paullin moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Passed and not voting—Mr. Sergel—One.

Rules.

Mr. Paullin presented the following report from the Committee on Rules:

CHICAGO, June 19, 1919.

To the Honorable, the President and The Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Rules reports that on June 5, 1919 (page 744 of the Proceedings), the Board referred to your Committee an ordinance amending the Rules and Regulations of the Board, so as to provide that during the months of July, August and September of 1919, and during the months of May, June, July, August and September of each year thereafter, the regular meetings of the Board shall be held at 2:00 o'clock P. M. sharp on the first and third Thursday of each of said months.

Your Committee further reports that it has considered said ordinance and is of the opinion that said amendment to the rules should be made.

Your Committee herewith transmits to the Board the ordinance above referred to and recommends the passage of said ordinance.

Respectfully submitted,

GEORGE W. PAULLIN,
Chairman.
WM. J. HEALY,
PATRICK J. CARR,
Committee on Rules.

Mr. Paullin moved that the ordinance be passed.

Mr. Sergel suggested that said ordinance be further amended by inserting the words "unless otherwise ordered by the Board" before the word "regular" in line thirty-three, and by striking out the word "sharp" in line thirty-six of the first column on page 1414 of the Proceedings of October 21, 1915.

The suggestion was accepted and the ordinance was amended accordingly.

On roll call the ordinance, as amended, was passed by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the ordinance as passed:

AN ORDINANCE

Amending an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on October 28, 1915, "Providing Certain Rules and Regulations and Rules of Order of the Board of Trustees of The Sanitary District of Chicago," as Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago December 23, 1915, as Further Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on December 1, 1916, as Further Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on January 4, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on January 11, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on January 18, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on April 5, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on May 3, 1917, and as Further Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on July 12, 1917.

Be It Ordained by the Board of Trustees of The Sanitary District of Chicago:

SECTION 1. That Section 1 of an ordinance passed by the Board of Trustees of The Sanitary District of Chicago on October 28, 1915, as amended, be, and the same is hereby further amended by inserting the words "unless otherwise ordered by the Board" before the word "regular" in line thirty-three, and by striking out the word "sharp" in line thirty-six of the first column of page 1414 of the Proceedings of October 21, 1915, and adding in lieu thereof the following words and figures, to-wit:

"Provided that during the months of July, August and September, 1919, and during the months of May, June, July, August and September of each year thereafter said regular meetings shall be held at 2:00 o'clock P. M. on the first and third Thursdays of each of said months."

SEC. 2. This ordinance shall be in force and effect from and after its passage.

Real Estate Development.

Mr. Carr presented the following report from the Committee on Real Estate Development:

CHICAGO, June 19, 1919.

To the Honorable, the President and The Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Real Estate Development reports that in the year 1917 taxes were spread against the property of the Sanitary District within Cook County outside of the territorial limits of the Sanitary District in the towns of Lyons, Palos and Lemont along the Main Channel of the Sanitary District, and in the towns of Worth, Palos and Lemont along the Calumet-Sag Channel; but thereafter, as a result of a petition filed by the Law Department, all such taxes were marked "exempt" upon the books of the Assessor and Collector. In the year 1918, re-

lying upon the action of the Board of Review, no investigation was made as to such taxes by the Real Estate Department. It appears, however, that either the Board of Assessors or the Board of Review reversed the action of the Board of Review for the year 1917 and in the year 1918 taxes have been levied and spread against each tract and parcel of land along the Main Channel outside of the Sanitary District in the towns of Palos and Lemont and each tract and parcel along the Calumet Sag Channel outside of the Sanitary District in the towns of Worth, Palos and Lemont, and against three lots in the town of Lyons along the Main Channel. In addition, for the year 1918 personal property taxes have been levied and spread against the Sanitary District in School Districts 112, 113 and 180 in the town of Lemont and were also spread in said districts for the years 1916 and 1917 and still remain unpaid.

Your Committee having considered the matter and having taken the advice of the Attorney, is of the opinion that there is at least a legal question as to whether the lands along the Main Channel, including the Main Channel and the right of way outside of the Sanitary District within Cook County, are taxable; and it is of the opinion that the lands included in the Desplaines River in Cook County outside of the Sanitary District are not taxable; and it is of the opinion that the lands included within the right of way, including the channel of the Calumet-Sag Channel, are not taxable, and that no personal property taxes can be collected against the Sanitary District in any school district in Cook County outside of the territorial limits of the Sanitary District where the Sanitary District owns no personal property; and it therefore recommends the passage of the following order:

Ordered, That the Attorney for the District be and he is hereby instructed to resist the payment of such taxes and that he be and is hereby directed to take such legal steps as are necessary to resist the payment of such real estate and personal property taxes for the year 1918 and such personal property taxes for previous years.

Respectfully submitted,
PATRICK J. CARR,
Chairman.
WM. J. HEALY,
MATT A. MUELLER,
Committee on Real Estate Development.

Mr. Carr moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a communication from Francis A. Hardy, referring to the condition of the property of the Sanitary District at the corner of Lawrence avenue and the North Shore Channel, stating that said property opposite the Home for Boys was unsightly and requesting that it be improved.

Referred to the Committee on Engineering.

Mr. Paullin presented a communication from Hon. H. P. Pearsons, Mayor of the City of Evanston, stating that at the meeting of the City Council held on June 17th he was requested to ask a permit from the Sanitary District for the use of its land along the banks of the North Shore Channel from Emerson to Isabella streets, to be used as a municipal golf course for the people of Evanston.

Mr. Paullin moved that the request be granted in such form as the Law Department deems advisable.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark,

Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

MISCELLANEOUS AND NEW BUSINESS.

Mr. Paullin presented the following communication and order:

CHICAGO, June 19, 1919.

To the Honorable, the President and The Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—On the 29th day of March, 1917, the Board of Trustees adopted preambles and a resolution, Proceedings 1917, pages 510-511.

The preambles stated in substance that the officers of the United States army stationed at Chicago had requested the corporate authorities of the Sanitary District to co-operate with the United States army in carrying out orders for safeguarding public works of the Sanitary District as well as other public works at Chicago; that approximately six weeks before that time the Chairman of the Committee on Employment requested the Chief Engineer, Electrical Engineer and Marshal of the District to increase the number of guards upon all public works of the Sanitary District, and to cancel all permits to enter same theretofore issued, and that no one be permitted to enter any pumping station, electrical substation or other works of the Sanitary District without a special permit officially signed, and such action was taken by the Engineers and the Marshal; that in order to make such co-operation legal and effective, it was necessary that someone be duly authorized by the Board of Trustees of the Sanitary District to take full charge of the subject matter and to confer from time to time with such Federal authorities and to formulate plans in conjunction with such Federal authorities for the purpose of safeguarding the public works of the Sanitary District.

It was resolved that Trustee George W. Paullin be authorized and directed to take all necessary steps to fully and completely safeguard the public works of the Sanitary District, and to confer from time to time with officers of the United States army and to formulate plans to bring about and accomplish full and complete co-operation in safeguarding such public works.

Recently a communication was sent to the officers of the United States army stationed at Chicago giving the substance of said preambles and resolution, and stating that they have ever since been carefully adhered to in every sense, but that it seems that present conditions would warrant at least a modification, if not the entire repeal, of said preambles and resolution, but before presenting any order to that effect to the Board the Federal authorities were requested to give their views in the matter so that any proposed order of modification might be presented with their consent. They promptly replied that the action of the Board might well be modified, so long as proper restrictions are enforced to guard against lawless acts. It is, therefore,

Ordered, That the preambles and resolution aforesaid be modified as follows:

That the Chief Engineer of The Sanitary District of Chicago be, and he is hereby authorized to issue permits for boats to pass through the locks of the Sanitary District channels and for fishing at 39th street, and to permit the use of the Sanitary District boats for excursion parties, provided, however, that said Chief Engineer shall not issue any of such permits unless he is satisfied in each and every case that in doing so the property and works of the Sanitary District shall not be thereby endangered.

Respectfully submitted,

GEORGE W. PAULLIN.

Mr. Paullin moved that the order be passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Paullin stated that he desired to address the Board on a matter which he considered important, and, inasmuch as his address would consume more than ten minutes and the Rules of the Board provide that no member without leave of the Board shall speak longer than ten minutes at any time except by consent of the Board, moved that the Rules be suspended for the purpose of permitting him to address the Board for a period of time in excess of ten minutes.

The motion prevailed.

Mr. Paullin stated that he desired to speak to a question of personal privilege.

The Chair recognized Mr. Paullin and requested him to state his question of personal privilege.

Mr. Paullin stated that he desired to talk on the bill introduced in the General Assembly of the State of Illinois by Representative Lee O'Neill Browne inimical to the interests of The Sanitary District of Chicago.

The Chair ruled the question proper. Mr. Paullin then addressed the Board.

ADJOURNMENT.

Mr. Clark moved that the Board adjourn.

The motion prevailed.

L. F. Kaiser

Clerk.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, JUNE 26, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Absent—Mr. Paullin—One.

MINUTES.

Mr. Lawley moved that the minutes of the Proceedings of June 12, 1919, be approved, as printed, without being read.

The motion prevailed.

REPORTS OF OFFICERS.

The Clerk presented the report of the Treasurer for the month of May, 1919, which was ordered published and filed, as follows:

THE SANITARY DISTRICT OF CHICAGO—TREASURER'S REPORT

FOR MAY, 1919.

G. M. REYNOLDS,
Treasurer.

Chicago, June 26, 1919.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 26, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that by the terms of Section 11 of an agreement dated October 27, 1910, page 1115 of the Proceedings, between the Sanitary District and the City of Chicago relating to the rehabilitation, extension and operation of the electric street lighting system of said city and the furnishing of electrical energy therefor, the Sanitary District agreed to construct at least three additional sub-stations to be used in connec-

tion with said electric street lighting system.

Your Committee further reports that in order to carry out the terms of said agreement, the Board on September 1, 1911 (page 929 of the Proceedings) authorized the purchase of the real estate described under (A) of the attached order, and also on December 14, 1911 (page 1453 of the Proceedings) authorized the purchase for a similar purpose the real estate described under (B) of the attached order; that said pieces of real estate were purchased in accordance with the terms of said orders and the fee simple title thereto was taken in the name of the Sanitary District, and the Sanitary District erected on each of said pieces of real estate a sub-station known respectively as the Byron street sub-station and the West 22nd street sub-station.

Your Committee further reports that by the terms of an agreement dated January 1, 1918 (page 609 of the Proceedings for the year 1919) between the Sanitary District and the City of Chicago, the Sanitary District specifically delivered and transferred to said city the possession and use of said sub-stations, together with all the electrical equipment which was installed therein under the terms and conditions of said agreement above referred to, dated October 27, 1910, and four supplementary and amendatory agreements thereto, but the title of record to said pieces of real estate on which said sub-stations were constructed and said electrical equipment installed, still remains in the Sanitary District and the City of Chicago has requested that said legal title be conveyed to it.

Your Committee having considered the matter is of the opinion that said conveyance should be made and, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in the name of and for and on behalf of the Sanitary District warranty deeds conveying to the City of Chicago the following described pieces and parcels of land, to-wit:

(A)

Lots twenty-three (23) and twenty-four (24) in sub-block two (2) in H. C. Buechner's sub-division of block two (2) in the sub-division of section nineteen (19), township forty (40) north, range fourteen (14) east of the third principal meridian; except the southwest quarter (¼) of the northeast quarter (¼) and the southeast quarter (¼) of the northwest quarter (¼) and east half (½) of the southeast quarter (¼) thereof, located in Chicago, Cook County, Illinois.

(B)

Lots nineteen (19) and twenty (20) in the resub-division of block twenty-one (21), Douglas Park Addition to Chicago, in the east half (½) of the southeast quarter (¼) south of Ogden avenue, of section twenty-three (23), and lots four (4) and five (5) of Circuit Court partition of the west half (½) of section twenty-four (24), township thirty-nine (39) north, range thirteen (13) east of the third principal meridian, located in Chicago, Cook County, Illinois,

together with all the electrical equipment which was installed in the sub-stations erected upon said respective pieces and parcels of property under the terms and conditions of said agreement between the Sanitary District and the City of Chicago, dated October 27, 1910, and four supplementary and amendatory agreements thereto.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 26, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that the appropriation bill of the Sanitary District for the year 1919 (page 114 of the Proceedings) sets up in the Department of Engineering (Item 5) one position with a salary of $3,000.00, and under the Outlet and Intercepting Sewer Construction Division (Item 8) of said Department, two positions with salaries attached thereto (page 115 of the Proceedings), totalling the sum of $2,760.00, which positions and salaries are set forth in the order hereto attached.

Your Committee reports further that the Committee on Employment has requested that the salaries attached to said positions be adjusted to meet the requirements of the Department of Engineering, which can be done without increasing the respective sums of $3,000.00 and $2,760.00 heretofore appropriated.

Your Committee having considered said request is of the opinion that same should be granted and, therefore, recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby authorized and directed to make adjustments of the salaries set up under the Department of Engineering in the appropriation bill for the year 1919 in accordance with the requirements of the Committee on Employment as follows:

DEPARTMENT OF ENGINEERING
ACCOUNT NO. II
SALARIES AND WAGES OF REGULAR EMPLOYES

Change from

(*Sanitary Division*)
Assistant Engineer,

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 26, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has agreed with George Koller and Hilda J. Koller, his wife, to purchase from them, for the sum of $2,700.00, the following described real estate, to-wit:

That part of the north sixty (60) feet of the east four hundred sixteen (416) feet, lying east of Thornton road (now Michigan avenue) of block one (1) in Warren's addition to Wildwood, being a sub-division of part of the northeast quarter and part of the southeast quarter of section twenty-eight (28), township thirty-seven (37) north, range fourteen (14) east of the third principal meridian, south of the Indian Boundary line, situated in the City of Chicago, County of Cook and State of Illinois,

to be used as part of the site of the Calumet Sewage Pumping Station.

Your Committee having considered said purchase, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to draw a warrant in the sum of $2,700.00 payable to George Koller and Hilda J. Koller, his wife, and deliver the same to them or to the Registrar of Titles of Cook County for them to be delivered to them upon the delivery to the Sanitary District of a certificate from said Registrar showing the title to said property in fee simple in the Sanitary District under the provisions of the Torrens Act.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
WILLIS O. NANCE,
MATT A. MUELLER,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

SUSPENSION OF REGULAR ORDER OF BUSINESS.

Mr. Clark moved that the regular order of business be suspended to consider a resolution suggesting amendments to a certain ordinance before a sub-committee of the Committee on Railway Terminals of the City Council, which is now in session, defining the future needs of the Sanitary District at the Thirty-ninth St. Pumping Station.

The motion prevailed.

Mr. Clark presented the following resolution:

WHEREAS, A sub-committee of the Committee on Railway Terminals of the City Council of the City of Chicago has now under consideration a proposed ordinance entitled:

"AN ORDINANCE

For the Establishment of Harbor District Number Three; the Construction by the Illinois Central Railroad Company of a New Passenger Station; Electrification of Certain of the Lines of the Illinois Central and Michigan Central Railroad Companies within the City; and the Development of the Lake Front."

AND WHEREAS, Said sub-committee at a hearing on the 24th day of June, A. D. 1919, approved and adopted the following amendments to Section 18 of said proposed ordinance, to-wit:

"Amend Section 18 by striking out all after the word 'shall' at the end of the eleventh line of said section, and insert in lieu thereof the following:

(a) At all times provide a suitable and adequate waterway not less than one hundred (100) feet wide at its narrowest point, to supply water to said pumping station;

(b) Allow the City or The Sanitary District of Chicago under its contract with the City, access, for vehicles and traffic, to said pumping station, over the Oakwood Boulevard viaduct and approaches thereto and across the lands of the Commissioners;

(c) Grant to the City or The Sanitary District of Chicago under its contract with the City, the use of a tract of land described as follows:

Beginning at the intersection of the boundary line between the lands of the Commissioners and the lands of the Central Company with the north line of the land occupied by said pumping station; thence east along said north line a distance of three hundred (300) feet; thence northerly and parallel with said boundary line a distance of two hundred and fifty feet; thence westerly and parallel with said north line to a point one hundred (100) feet easterly from said boundary line; thence northerly and parallel with said boundary line, a distance of one hundred (100) feet; thence westerly and parallel with said north line to a point fifty (50) feet easterly from said boundary line; thence northerly and parallel with said boundary line to the south line of East Thirty-seventh street extended east; thence westerly along said south line of East Thirty-seventh street, a distance of fifty (50) feet, more or less, to said boundary line, and thence southerly along said boundary line to the point of beginning,

for the maintenance of tracks, loading and unloading facilities thereon, and for such other purposes connected with the operation of said pumping station as the City may, from time to time hereafter determine."

AND WHEREAS, In the judgment of

the Board of Trustees of The Sanitary District of Chicago underground works and facilities supplemental to said pumping station will at an early day become necessary;

AND WHEREAS, Such works and facilities can be most advantageously located and efficiently operated immediately south of and adjoining said pumping station;

AND WHEREAS, The construction, maintenance and operation of such works and facilities will in no way restrict, hamper or impair park development or the use of any land adjoining said pumping station for park purposes, nor will the operation of such works and facilities be objectionable in the slightest degree.

AND WHEREAS, The location of such works and facilities contiguous to said pumping station will effect a very considerable saving of public money;

AND WHEREAS, In the opinion of counsel, for adequate legal reasons, the right to locate such works and facilities immediately south of said pumping station should now be reserved to the City of Chicago in said proposed ordinance;

NOW, THEREFORE, BE IT RESOLVED, By the Board of Trustees of The Sanitary District of Chicago that the honorable, the Sub-Committee of the Committee on Railway Terminals of the City Council of the City of Chicago, which now has the proposed ordinance entitled:

"AN ORDINANCE

For the Establishment of Harbor District Number Three; the Construction by the Illinois Central Railroad Company of a New Passenger Station; Electrification of Certain of the Lines of the Illinois Central and Michigan Central Railroad Companies within the City; and the Development of the Lake Front."

under consideration be, and it is hereby respectfully requested further to amend Section 18 of said proposed ordinance by adding thereto an additional paragraph substantially as follows:

"(d) Grant to the City a tract of land, not exceeding five hundred (500) feet in extent from East to West, nor twenty-six hundred (2,600) feet from North to South, immediately South of and contiguous to the land upon which said pumping station is situate, east of and adjoining the boundary line between the lands of the Commissioners and of the Central Company, for such underground works or facilities as the City may hereafter determine; provided, that such works and facilities are constructed and maintained in such a manner that will not restrict or impair park development over the same, nor the use of such tract of land for park purposes, and provided that such underground works and facilities shall be constructed in a manner approved by the Commissioners."

Mr. Clark moved that the resolution be adopted.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler and Mueller—Six.

Nays—Messrs. Sergel and Nance—Two.

The Board resumed the regular order of business.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, June 26, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering, having had under consideration the history of the growth and development of the Sanitary District and its various works, respectfully recommends the adoption of the following preambles and order:

WHEREAS, It appears from the Sanitary District Act passed by the Gen-

eral Assembly of Illinois in 1889, and from the decisions of the Supreme Court of Illinois in regard to said Act and parts thereof, that the boundaries of the Sanitary District are not coterminus with those of the City of Chicago or any other municipality, nor are the persons or property within its limits the same as those within the limits of the City of Chicago, or of any other municipality; that the Sanitary District was organized pursuant to an affirmative vote of the electors within its limits as a municipal corporation for sanitary purposes, entirely distinct from and independent of the government of the City of Chicago, and of that of every other municipal corporation; that it has municipal authorities of its own, elected by the people within the District pursuant to the requirements of its Charter, whose functions are in no wise connected with any other municipal government; that the Sanitary District law was not forced upon an unwilling community;

That the preservation of health is one of the paramount objects of government; that it belongs to the police power, subject to the proper exercise thereof by the State Legislature directly or by public corporations to which the legislature may delegate it, and that every citizen holds his property subject to such police power; that the question of the propriety of the organization of this Sanitary District is one which belongs entirely to the General Assembly which created The Sanitary District of Chicago and invested it with power to levy taxes, to issue bonds and to carry on the objects and purposes of the Act, and to construct the works contemplated by the Act by such means and methods as should from time to time be adopted and used by the Board of Trustees in the exercise of sound judgment and discretion in regard thereto;

That The Sanitary District of Chicago was organized as a municipal corporation to secure, preserve and promote the public health, and any subsidiary measure having a greater or less tendency to promote that object or to advance the general scheme proposed through the agency of such organization to preserve and protect the public health is germane to the general subject of the Sanitary District Act, and the object and purpose of The Sanitary District of Chicago; that it appears as a historical fact and a fact abundantly shown by the terms of the Sanitary District Act itself that the scheme contemplated by the Sanitary District Act was formulated mainly, if not exclusively, with reference to sanitary conditions and the needs of the City of Chicago and its environs; that Chicago at the time of the adoption of the Sanitary District Act was a City of probably a million inhabitants, or more, and now has approximately three times that population, that it was and is bordered on the shores of Lake Michigan, which Lake was and is the source of its water supply; that a few miles west of Chicago, and running in a north and south direction is the Des Plaines River, and at a point opposite the southerly part of Chicago said river turns towards the southwest and runs in that direction to the City of Joliet, below which it is known as the Illinois River; that the territory between Lake Michigan and the DesPlaines River and along the course of that river to Joliet is nearly level, none of it being more than a few feet above the level of the lake, while at Joliet the general surface is quite a number of feet below the level of the lake; that the object of the system of drainage contemplated by the Sanitary District Act was and is to prevent the drainage and sewage of the City of Chicago and its environs from being carried into Lake Michi-

gan, thereby contaminating the waters of that lake; that the Main Channel of the Sanitary District extends from a point just north of Joliet in a general northeasterly direction to the west fork of the South Branch of the Chicago River at or near Robey street, which Channel is approximately 28 miles long, from 160 to 200 feet wide and approximately 26 feet deep throughout its entire length; that the rock section thereof extends from Willow Springs to Lockport, and has a capacity of 14,000 cubic feet of water per second; that the work of constructing the Main Channel was begun immediately upon the organization of the District, and was completed in 1898, and on January 17 1900 was opened and placed in operation by direction of the Governor, as provided in the Sanitary District Act; that since that time it has been continuously operated;

That in order to provide for the operation of the Main Channel it was necessary to deepen and widen the South Branch of the Chicago River and the West Fork of the South Branch; that said rivers were not then large enough to carry the water to be withdrawn from Lake Michigan through the Main Channel without creating a dangerous current in such rivers; that this work was commenced in 1896, pursuant to permit from the War Department, and prior to the opening of the Main Channel, obstructions in the South Branch of the Chicago River and the West Fork of the South Branch were removed, and the channel was widened and deepened to 17 feet throughout the entire stretch; that in 1900 the Sanitary District made plans for further deepening and widening the South Branch of the Chicago River and the West Fork in order to carry an additional amount of water which has been known and called "The Chicago River Improvement Project," which work has gone on from time to time, and it is now rapidly nearing completion; that the permit granted contemplated the widening of such rivers at all points to 200 feet and deepening the same to 26 feet, which work required an immense amount of excavation in the bottoms of said rivers, as well as from the banks the removal of a great many center pier bridges and the installation in their place of bascule bridges of modern type, and in this project the District has expended approximately $12,250,000.00;

That the completion of the Main Channel, and placing of it in operation, prevented the sewage of the Chicago River from flowing into Lake Michigan, but in order to divert the sewage of the sewers emptying directly into the lake it was necessary to construct intercepting sewers in the City of Chicago, north and south along the shore of Lake Michigan; that these intercepting sewers on the south converge at 39th street and the sewage is there pumped together with a certain amount of lake water through the 39th street conduit into the east arm of the South Fork of the South Branch of the Chicago River; that the intercepting sewers on the north converge at Lawrence avenue pumping station; that they intercept the sewers which emptied directly into Lake Michigan on the North Side of the City; that the sewage coming through the intercepting sewers, converging as aforesaid, is pumped together with a certain amount of water from Lake Michigan through the Lawrence avenue conduit to the North Branch of the Chicago River; that the intercepting sewers above mentioned were completed about the same time in the year 1907 and placed in operation; that by the works then constructed practically all the sewage and drainage arising from the original limits of the

Sanitary District was diverted from the water supply into the Main Channel of the District; that in 1903 the territory of the North Shore Suburbs, including Evanston and that in the Calumet District was annexed and power granted to the Sanitary District to construct all drains, ditches, adjuncts and additions to its Main Channel necessary to properly care for the drainage and sewage of this additional territory; that it was necessary to divert the sewage and drainage arising in the territory annexed, as well as that arising from the original limits, in order to prevent pollution of the water supply of the entire population of the Sanitary District, and to carry out that purpose the North Shore Channel was constructed and placed in operation in the year 1910; that this Channel extends from the North Branch of the Chicago River at Lawrence avenue north to Lake Michigan at Wilmette, Illinois; that a lock has been placed at its intersection with the lake so that boats may pass in and out; that the water for dilution purposes is taken from Lake Michigan at the intersection of the North Shore Channel with the shore of Lake Michigan by means of pumps; that subsequently intercepting sewers were constructed to divert the sewage of the North Shore Suburbs so as to carry away from Lake Michigan all the sewage arising from the North Shore towns; that the Sanitary District caused the North Branch of the Chicago River to be deepened and widened so that it is navigable from Lawrence avenue south, which work was completed in 1907;

That it provided an outlet for the sewage and drainage of the Calumet Region of the Sanitary District; that the District laid out a right of way for and entered upon the construction of the Calumet-Sag Channel, which work is now being prosecuted and this channel will be opened in the near future; that the Calumet-Sag Channel extends from the Little Calumet River at or near Blue Island westerly to a point at or near Sag, Illinois, on the Main Channel of the Sanitary District; that connected with the Calumet-Sag Channel there are also in process of construction intercepting sewers converging at the easterly terminus of such Channel; that these intercepting sewers extend through the Calumet District and when completed and placed in operation in connection with the Calumet-Sag Channel will divert all the sewage arising in the Calumet District from Lake Michigan into the Main Channel of the Sanitary District; that the Calumet-Sag Channel will also when it is completed reverse the flow of the Calumet and Little Calumet Rivers at practically all times during the year; that when the Calumet-Sag Channel with its intercepting sewers, and the intercepting sewers connected with the North Shore Channel, are completed and placed in operation all the sewage and drainage which would cause any pollution of the water supply for the population of the entire Sanitary District will be diverted from Lake Michigan through the Main Channel of the District into the DesPlaines and Illinois Rivers, together with such an amount of water as will properly dilute the sewage, oxidize the same, and render it innocuous and inoffensive; that the works of the District completed and now under process of construction constitute a comprehensive method by which the water supply of the inhabitants within the Sanitary District may properly be kept pure and free from pollution; that the result of these works and their operation is indicated by the change in the death rate from typhoid fever and other diseases as compared with the con-

ditions which existed before and after the opening of the Main Channel; and

WHEREAS, The water of the entire lake front at and near Chicago and vicinity prior to the opening of the Main Channel was used as a receiving station for the sewage systems of Chicago and adjoining municipalities, thereby rendering its waters impure and unfit for use, and creating conditions which were harmful and dangerous to the health and welfare of the people of Chicago and adjoining communities, and the water in the Chicago River and its various branches was allowed to remain in even a worse condition than that of the water in Lake Michigan, which conditions have been changed by and through the work of the Sanitary District so that the entire lake front of Chicago and adjoining cities and villages is an asset of which the people can feel justly proud, since it now furnishes opportunities for recreation, pleasure and comfort, a supply of pure water and air, and makes of the cities and towns along the lake real summer resorts instead of disease germ breeding spots to be shunned as they were in former years; and

WHEREAS, By amendment to the Sanitary District Act the Legislature of Illinois authorized and empowered the Board of Trustees of the Sanitary District to utilize the power made available by the works constructed under the provisions providing that it should be converted into electrical energy and transmitted to the various cities, villages and towns within the District and adjacent to the Main Channel, to be used in the lighting of such cities, villages and towns, or parts thereof, or for the operation of pumping plants and machinery used for municipal purposes, and that it might be disposed of to any other persons or corporations upon such terms and conditions as may be agreed upon by the Sanitary District; provided, however, that it shall be the duty of the Sanitary District to utilize so much of said power as may be required for that purpose to operate the pumping stations, bridges and other machinery of said Sanitary District; and that the Board of Trustees of the Sanitary District under such power and authority has developed and improved the amount and quality of such service from time to time, in connection with which it has expended upwards of $4,500,000.00, and from which it has received a revenue of upwards of $8,725,000.00, realizing therefrom a net profit to the Sanitary District after charging off depreciation and interest on the investment of approximately $2,300,000.00, which is directly in the interests of and for the benefit of the taxpayers of and in The Sanitary District of Chicago; also that the District furnishes illumination for Chicago and the Park systems at a saving to the taxpayers of at least two thirds of former cost; that from time to time through lack of information or otherwise statements have appeared in the public press and elsewhere, which would lead the taxpayers to believe that this project maintained and operated by the Sanitary District by and under the direction of the General Assembly of Illinois has not been in the interests of the taxpayers, but has been run for the purpose of profit to the Sanitary District, without thereby correspondingly reducing the taxes to be levied by the District for the construction and conduct of its various works. In this connection the Supreme Court of Illinois only recently held that

> "the Board of Trustees of the Sanitary District are allowed by statute to exercise ordinary business discretion and judgment, and within that discretion and judgment to determine from time to time whether the profits arising from the sale of power and electrical energy

should be applied toward the payment of bonds of the District and interest thereon, or be used for general corporate purposes of the District;"

and regardless of the purpose to which they may be applied within the judgment and discretion of the Trustees, such profits would tend to reduce the taxes to be paid by the taxpayers of the District; furthermore, if such power and authority had not been granted by the General Assembly to the Board of Trustees, the surplus power above mentioned would have been wasted, and such waste would have proportionately increased the amount of taxation to be met by the taxpayers of the Sanitary District; and

WHEREAS, From the beginning of the organization of The Sanitary District of Chicago, the construction of its various channels and intercepting sewers, the deepening and widening of the Chicago River and its branches, and maintaining and operating of pumping stations have involved intricate engineering problems, which have demanded the best thought of minds trained in such technical work, and have involved also the constant care and attention of the various Boards of Trustees which have been elected by the People from time to time, and the cost of such works has involved large sums of money, aggregating approximately $100,000,000; and

WHEREAS, The population of Chicago and the surrounding territory comprised within the limits of The Sanitary District of Chicago is rapidly increasing from year to year, making it necessary to anticipate the future and make adequate preparation now for the proper treatment and disposal of the sewage of such territory during the coming years, which will probably necessitate the erection and operation of plants for the proper treatment of sewage, so that by supplementing the maximum diversion of water from Lake Michigan through the Chicago and Calumet Rivers, and the Channels of the Sanitary District, to the amount required by statute and permitted by the Federal Government, all sewage within such District may be kept out of Lake Michigan and its water maintained in a condition, as now, fit to be used by the people of Chicago and its environs; and

WHEREAS, The Sanitary District of Chicago, comprising its various channels and works hereinbefore mentioned, constitutes an investment and asset of the taxpayers residing within the territorial limits of said District, concerning which they should each and all be fully informed, and it is the duty of such taxpayers to seek information, and inform themselves concerning this great institution and project, which is theirs and theirs alone; and

WHEREAS, Under our system of government, which includes the election of Trustees of the Sanitary District from time to time, questions of partisan politics enter into the discussions on the platform and in the public press in connection with selecting the personnel of the Board of Trustees of the District, the taxpayers of such District should be made to realize that their investment in this project, the expense of construction of its works and the maintaining of the same, are in no sense matters of politics, and that, regardless, of the personnel of the Board of Trustees or its agents and employees from time to time, it is of vital importance to the taxpayers of the Sanitary District that this great institution formulated, organized, constructed and operated for the purpose of preserving the health of the people of this community, should be maintained and its works and facilities improved upon from time to time as

rapidly as local conditions and scientific improvements will permit, and that mere differences of opinion between members of the Board of Trustees which may be expressed from time to time and which have to do with purely their own personal views, should not be allowed to prejudice the minds of the taxpayers of the District against the Sanitary District itself, which is all important to the people; and

WHEREAS, The Board of Trustees of the Sanitary District desire that all of the information possible with reference to the achievements and projects of the Sanitary District, and the means and methods employed in connection therewith, should be given to the taxpayers of the District; and, in order to do so it is necessary to make a systematic examination of the books and files of the various departments of the District, especially those of the Engineering and Electrical Departments, and to have the same assembled in logical order and described in plain language, which may be readily understood by any taxpayer who shall read and examine the same; and

WHEREAS, It is the desire of the Board of Trustees that such information be assembled and promulgated by the Sanitary District at an early date for the benefit and information of the taxpayers, and for the benefit and information of the members of the Constitutional Convention which shall convene in January, 1920; it is, therefore,

Ordered, That the Committee on Employment be, and the same is hereby, authorized and directed to at once ascertain whether there are any persons in the various departments of the Sanitary District who are qualified to do the work above described, and to give the time therefor without interference with the regular business and work of the District, and report the same to the Board of Trustees, and if no such persons or person are or is available for such work, to secure the services of some person not connected with the Sanitary District who is qualified and equipped to perform the services desired as above stated, and to ascertain the amount of compensation which such person shall desire for such services, and to report thereon to the Board of Trustees at its first meeting in August, 1919.

Respectfully Submitted,
WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
PATRICK J. CARR,
JAS. H. LAWLEY,
MATT A. MUELLER,
Committee on Engineering.

Mr. Clark moved that the preamble be adopted and that the order be passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—Mr. Sergel—One.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, June 26, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that by an order of the Board passed June 5, 1919 (page 713 of the Proceedings) the Chief Engineer and Attorney were authorized to negotiate with the City of Chicago for a contract relating to the construction of a single leaf bascule bridge across the south branch of the Chicago River at Twelfth street as described in said report.

Your Committee further reports that the Chief Engineer and Attorney

have negotiated with the City of Chicago for such a contract and have agreed with the officials of said City upon the terms of the same which contract is herewith transmitted to the Board.

Your Committee further reports that by the terms of said contract the City of Chicago agrees to construct a single leaf bascule bridge across the south branch of the Chicago River at Twelfth street according to a new layout therefor which is described in detail in the report of your Committee heretofore adopted by the Board on June 5, 1919 with the exception that the cross sectional area of the by-pass to be constructed, under said contract west of the west abutment of said new bridge has been enlarged and that the Sanitary District agrees to pay to the City of Chicago one-half of the actual cost of said bridge (not including the cost of the by-pass, land to be acquired therefor and for river widening and of the approaches, etc.) a total sum of not to exceed $600,000.00. The contract has been approved by the Chief Engineer and Attorney and your Committee having considered the same, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and Clerk be and they are hereby authorized and directed to execute said form of contract in quadruplicate when the same has been executed by the proper officials of the City of Chicago.

Respectfully Submitted,

WALLACE G. CLARK,
Chairman.

MATT A. MUELLER,
JAS. H. LAWLEY,
H. E. LITTLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

The following is the form of agreement between the City of Chicago and The Sanitary District of Chicago:

THIS AGREEMENT, Made and entered into this day of , A. D. 1919, by and between the City of Chicago, a municipal corporation, party of the first part, hereinafter for convenience designated the "City," and The Sanitary District of Chicago, a municipal corporation, party of the second part, hereinafter for convenience designated the "District," WITNESSETH: THAT

WHEREAS, The parties hereto on October 4, 1915, entered into a certain agreement, by the terms of which said City agreed to construct a new direct lift bridge across the south branch of the Chicago River at Twelfth Street, Chicago, Illinois, in accordance with general drawings which were attached to said agreement, marked "Exhibit A", and specification prepared by said City, and in accordance with detailed drawings and specifications to be prepared by the Strauss Bascule Bridge Company, said bridge being designed so as to provide a navigable channel through the same having a clear width of two hundred (200) feet, and

WHEREAS, Said City agreed to furnish, free of cost to said District, the entire site of said direct lift bridge and to pay all damages to any real estate that might be due to the removal of the existing center pier swing bridge at Twelfth Street and the construction of said new direct lift bridge at said site, and

WHEREAS, Said District agreed to pay the said City at the times and in the manner provided in said agreement, one-half of the cost of constructing the substructure and superstructure only of said new direct lift bridge, including in said cost one-half of the sum of $35,000.00 to be paid to the Strauss Bascule Bridge Com-

pany for preparing the plans and specifications of the work to be done, but not including any part of any sum or sums paid by said City on account of work done by any person in the employ of said City, and further, not including any cost of constructing connecting viaducts or approaches to said new direct lift bridge, and

WHEREAS, Said City further agreed to maintain and operate said new direct lift bridge without expense to said District after said bridge had been completed and after said specified payments had been made by said District to said City, and

WHEREAS, The City Council of said City, on March 23, 1914, page 1414 of Journal of Council Proceedings of said City passed what is known as the "Union Station Ordinance" which provided for the straightening of the Chicago River from a point north of Taylor Street to Eighteenth Street whereby the channel of said river as relocated and straightened will lie almost entirely west of the present location of said river at Twelfth Street and will render useless any new bridge constructed over said river at its present location and will necessitate the construction of another bridge over the relocated and straightened river channel, and

WHEREAS, Said City now desires to construct across said river at Tweltfh Street, a new bridge of the single leaf bascule type in lieu of the direct lift bridge provided to be constructed under said agreement, which said single leaf bascule bridge will provide a clear channel for navigation purposes one hundred forty (140) feet in width and a bypass with a cross sectional area of fourteen hundred (1400) square feet below Chicago City Datum, available for the flow of water through said bypass, said bascule bridge to be so designed and constructed that the single leaf thereof will be carried by an abutment located in the westerly part of said river and close down upon a pier located at the east dock line and also designed so that if the river is straightened and relocated as above described, said leaf can be shortened and rotated on its abutment so as to face in the opposite direction and become the east leaf of a double leaf bascule bridge across said straightened and relocated channel, or, if said river is not hereafter straightened, said leaf can be shortened and become the west leaf of a double leaf bascule bridge across the present river channel which can be widened to afford one hundred seventy (170) feet clear navigable channel by acquiring and dredging out a strip of land behind or east of the east dock line of said one hundred forty (140) foot channel, and

WHEREAS, The cost of constructing said single leaf bascule bridge providing a clear navigable channel of one hundred forty (140) feet in width will be less than the cost of constructing said direct lift bridge, and the movable leaf and abutment of said single leaf bascule bridge will be largely saved if said river is relocated and straightened and a new double leaf bascule bridge constructed over said relocated and straightened channel as aforesaid or if a double leaf bascule bridge is built across the present river channel as aforesaid,

NOW, THEREFORE, In consideration of the foregoing and the mutual covenants hereinafter contained, it is agreed by and between the parties hereto as follows:

1. Said City shall, as soon as practicable, prepare plans and specifications for the substructure and superstructure of a new single leaf deck bascule bridge over the south branch of the Chicago River at Twelfth Street, in the City of Chicago, Illinois, said new bridge to have a roadway approximately fifty-six (56) feet wide between curbs with two sidewalks each approximately seventeen (17) feet wide in the clear, and so constructed as to provide a navigable channel located between the abutment carrying the movable leaf of said new bridge and the east dock line of said channel, that shall have an unobstructed width of at least one hundred forty (140) feet at all points, measured at right angles to the center line of said channel, and a depth of not less than twenty-six and seven tenths (26.7) feet below Chicago City Datum and an unobstructed cross-sectional area available for the flow of water through the same, of not less than thirty-seven hundred and thirty (3730) square feet below Chicago City Datum, it being understood and agreed that no protections or other obstructions shall be placed or permitted to remain in said one hun-

dred forty (140) foot channel. Said City shall also construct a bypass with free unobstructed approaches thereto for the flow of water beneath the said new bridge west of said abutment, said bypass and the approaches thereto each to have an unobstructed cross sectional area below Chicago City Datum available for the flow of water through the same, of not less than fourteen hundred (1400) square feet and a depth below Chicago City Datum of not less than nineteen (19) feet at the dock along the westerly side of same, the bottom of said bypass and of said approaches to slope therefrom towards the east on a grade of one (1) vertical on four (4) horizontal to a depth of twenty-six and seven tenths (26.7) feet below Chicago City Datum, the remainder of said bypass and of said approaches thereto to have a depth at all points of at least twenty-six and seven tenths (26.7) feet below Chicago City Datum. The location of said new single leaf bascule bridge and of said abutment and navigable channel and of said bypass and approaches thereto shall be substantially as shown on the plan hereto attached, marked "Exhibit A" and made a part hereof.

Said plans and specifications of the substructure and the superstructure of said new single leaf bascule bridge shall be subject to the approval of the Chief Engineer of the said District and no contract shall be awarded for and no work done on the construction of said new single leaf bascule bridge or bypass, until said plans and specifications have been approved by said Chief Engineer.

2. Upon the completion of said plans and specifications for said new bridge and bypass and the approval of the same by the said Chief Engineer of said District, said City shall promptly advertise for bids for the construction of the substructure and superstructure of said new single leaf bascule bridge and bypass, and subject to the approval of the Board of Trustees of said District, said City shall award contracts for the performance of said work, but shall not do so without such approval.

3. Prior to the commencement of any other work at the site of said bridge, said City shall acquire the necessary land on the east side of said river and shall lengthen the east arm of the existing center pier swing bridge at Twelfth Street and remove the east end pier of same and construct a new temporary east end pier so as to provide a navigable channel through the east draw of said swing bridge at least ninety-two (92) feet wide in the clear, measured at right angles to the center line of said channel.

4. When the east arm of said swing bridge has been lengthened and said temporary end pier constructed as hereinbefore described, said City shall promptly construct a new permanent dock on the east side of said river across Twelfth Street along the east line of said one hundred forty (140) foot channel beneath said new single leaf bascule bridge and shall dredge said land and said river channel between said new dock and the center pier of said swing bridge to a clear width of not less than ninety-two (92) feet as hereinbefore provided and to the maximum depth possible without endangering said dock or said swing bridge. Said ninety-two (92) foot channel shall have a cross sectional area for the flow of water through the same, of not less than twenty-five hundred (2500) square feet below Chicago City Datum and said City shall thereafter maintain said ninety-two (92) foot channel between said dock and said center pier, free and unobstructed, until said center pier has been removed as hereinafter set forth.

5. Before constructing a cofferdam around the site of the abutment of said new single leaf bascule bridge, said City hereby agrees to acquire the necessary land for said bypass west of said abutment and the necessary land for the approaches to said bypass north and south of the same and shall construct permanent concrete dock walls along the west side of said bypass and of each of said approaches to said bypass on the lines shown on said "Exhibit A" hereto attached, and shall excavate said bypass and the approaches thereto to an average temporary depth of at least nineteen (19) feet below Chicago City Datum. All of that part of said bypass and of the said approaches thereto lying west of the cofferdam to be constructed around the site of the abutment of said new single leaf bascule bridge shall be maintained free

and unobstructed for the flow of water through the same at all times.

It is further understood and agreed by and between the parties hereto that said cofferdam shall be constructed so as to leave open for the flow of water through the bypass west of the same, during the time while said cofferdam is in place, the maximum width and area of cross section of said bypass that is possible without unduly endangering said cofferdam, and a minimum cross sectional area below the Chicago City Datum at all points of not less than six hundred fifty (650) square feet.

6. Said swing bridge may be used for traffic in Twelfth Street across said Chicago river as long as is possible during the construction of the substructure and superstructure of said new single leaf bascule bridge and bypass, but, when no longer required to be used for traffic, said swing bridge and the center pier of the same shall be promptly and completely removed and said channel dredged by said City to a depth of not less than twenty-six and seven tenths (26.7) feet below Chicago City Datum between said new east dock and said cofferdam around the abutment of said new single leaf bascule bridge so as to provide additional cross sectional area in said channel for the flow of water through the same, and said channel shall not be obstructed thereafter.

7. Said City shall also acquire as soon as practicable, a certain triangular piece of land situated on the west side of said river about five hundred (500) feet south of the south line of Twelfth Street, which is shown in red on said "Exhibit A" hereto attached, and shall construct a standard dock along the west side of said piece of land and shall dredge out all material lying east of said dock, to the standard depth in said Chicago river, for the purpose of straightening said river channel through and south of said single leaf bascule bridge.

8. After the abutment of said new single leaf bascule bridge has been completed then said cofferdam shall be promptly removed by said City and said bypass west of said abutment and the approaches to said bypass shall be promptly dredged to a depth of not less than nineteen (19) feet below Chicago City Datum at the docks on the westerly side of said bypass and of said approaches, the bottom of said bypass and of said approaches to slope therefrom towards the east on a grade of one (1) vertical to four (4) horizontal to a depth of twenty-six and seven tenths (26.7) feet below Chicago City Datum, the remainder of said bypass and of said approaches to have a minimum depth at all points of at least twenty-six and seven-tenths (26.7) feet below Chicago City Datum. The minimum cross sectional area of said bypass available for the flow of water through same shall be not less than fourteen hundred (1400) square feet below Chicago City Datum. Said one hundred forty (140) foot navigable channel shall also be promptly dredged over its entire width to the minimum depth of twenty-six and seven tenths (26.7) feet below Chicago City Datum except such slopes adjoining the east dock of said river as are necessary for the safety of said docks, so as to provide a minimum cross sectional area for the flow of water through said navigable channel of not less than thirty-seven hundred thirty (3730) square feet below Chicago City Datum as hereinbefore specified.

Said navigable channel and said bypass and the approaches thereto north and south of each of same shall thereafter be maintained by said City free and unobstructed over the entire width of each and no protections, piles or other obstructions shall be placed in said navigable channel or in said bypass or in the said approaches thereto except by the express permission and subject to the approval of the Chief Engineer of said District.

In case said bypass shall become obstructed by sedimentation or by old timbers, piles or other obstructions, said City, when and as often as directed by the Chief Engineer of said District shall promptly remove such sediment, timber, piles and other obstructions from said bypass and clean said bypass so as to provide the average depth and cross sectional area hereinbefore specified for same, free of cost to said District. In case said City fails, refuses or neglects to perform the work hereinbefore specified in this paragraph of this agreement after sixty (60) days notice from the Chief Engineer of said District so to do, then said District may have said work performed and said

City hereby agrees to pay the cost of the same to said District on demand.

9. It is hereby understood and agreed by and between the parties hereto that said City shall furnish, free of cost to said District, the entire site for said new single leaf bascule bridge and for all approaches and viaducts connecting with the same and for all appurtenances to said bridge, approaches and viaducts, including all land necessary for said bypass and the approaches thereto north and south of Twelfth Street and all land to be used for widening the said river on the east side of same at Twelfth Street and on the west side of the same approximately five hundred (500) feet south of Twelfth Street. Said City also agrees to assume and pay free of cost to the said District all damages of every kind and character to all real estate adjoining, abutting or in the vicinity of said new single leaf bascule bridge for which said City or said District may be or become liable by reason of the removal of the existing center pier swing bridge or its center pier or end piers or any of its approaches or connecting viaducts or any appurtenances to any of same or by reason of the construction of the substructure or superstructure of said new single leaf bascule bridge or of any approaches or viaducts connecting with or adjacent to said new bridge or any appurtenances to said bridge, approaches or viaducts, or by reason of the construction of said bypass or of the widening of said river and the construction of said docks as hereinbefore described. Said City hereby also agrees to save the Sanitary District harmless from and to assume and pay, free of cost to the said District, all damages to persons or property for which said City or said District may be or become liable, due to the performance of any work herein provided to be done by said City or its contractors, including all damages resulting from injury to persons or property that may occur during or due to the use for traffic of said center pier swing bridge or of said new single leaf bascule bridge, or of any part of either of same or of any viaducts connecting with or approaches to said new bridge and from damages sustained by vessels and other water craft and marine equipment arising from or growing out of any work under this agreement.

10. The said District hereby agrees to pay to said City, at the times and in the manner herinafter provided, one-half of the cost of removing the substructure and superstructure of the existing center pier swing bridge, one-half the cost of constructing the abutment, east end pier and protections of the new single leaf bascule bridge including the necessary cofferdam and excavation in same and the necessary dredging in the present river channel within or adjoining Twelfth Street, and also one-half of the cost of the superstructure of said new bridge including only the movable leaf and the stationary parts of the bridge located over and upon the abutment, the electrical equipment, traffic and barrier gates, river signals, sidewalk and roadway lights and signals, machinery houses, operators houses and guard houses and lighting equipment for same; also one-half the cost of such extra work and incidental expenses, as may in the opinion of the Chief Engineer of said District be necessary to fully complete the work hereinabove described in this section of this agreement. No payments shall be made by the said District for the cost of supervising or making by said City or otherwise of any plans for said bridge or bypass or for any of the approaches or viaducts or appurtenances thereto, or for salaries or wages of employees of said City engaged in the direction or supervision of or in the performance of any law, engineering, inspection, excavation, construction or other work provided in this agreement to be performed by said City or by any contractors, and no payment shall be made by said District for the lengthening of or any additions to or alterations of said swing bridge or for any temporary supports thereof or approaches or appurtenances thereto. Said District shall further make no payment for the removal or alteration of or additions to any viaducts or approaches to the center pier swing bridge or for the construction of new approaches or viaducts or additions to or alterations of old or new approaches or viaducts connecting with or in the vicinity of said new bridge, or for any appurtenances to said bridge or approaches or viaducts. Further, said District shall make no payment to said City for the purchase of any land whatsoever or for

the construction of any docks or for dredging the said land acquired for said by-pass and approaches thereto or for dredging said land for widening the said river on the west side of the same approximately five hundred (500) feet south of Twelfth Street, or for any court costs or legal expenses incurred by said City for or on account of anything herein provided to be acquired, furnished or performed by said City, or for any other work performed by said City under this agreement, except as hereinbefore in this section expressly provided to be paid by said District to said City. Provided further, that no payment shall be made by said District on the work done under any contract awarded by said City unless the awarding of said contract shall have been previously approved by said District as provided in the first section of this agreement.

It is hereby expressly understood and agreed by and between the parties hereto, that the total amount to be paid by the said District to said City shall not exceed the sum of six hundred thousand ($600,000.00) dollars.

It is expressly understood and agreed by said City that notwithstanding any provisions hereof to the contrary said District shall not be required to make any payments whatsoever to said City until after said City shall have acquired all of said land herein provided to be acquired by said City for said bypass and for the said approaches thereto and for widening said river on the east side thereof at Twelfth Street and said triangular piece of land on the west side of said river about five hundred (500) feet south of Twelfth Street, and not until said City shall have dredged all of said parcels of land and shall have constructed said docks fronting on each of said parcels of land, as herein provided.

11. It is hereby further understood and agreed by and between the parties hereto that except as hereinbefore provided in the last paragraph of section ten (10) hereof, all payments made by the said District to the said City for any work herein specified shall be made from time to time as the work progresses. The particular amount of any payment to be made by said District to said City shall be determined in accordance with the terms and conditions of each contract for doing said work which may be awarded by the Commissioner of Public Works of said City with the approval of said District, to any contractor, for or on behalf of said City, and the said District on being furnished by said Commissioner of Public Works of said City with certified copies of certificates or vouchers issued to the Contractor for any such work shall within twenty (20) days after the receipt of such certificate or voucher pay to said City a sum equal to one-half of such amount of money as is certified to or vouchered to said Contractor by said Commissioner of Public Works of said City as being due to said Contractor on account of the performance of said work. It is hereby expressly understood and agreed that said District shall not be or become liable to any contractor or contractors, persons or corporations for or on account of the performance of any work mentioned in this agreement or of any work performed in the removal of the said swing bridge and the construction of the new single leaf bascule bridge at Twelfth Street and the approaches, viaducts and appurtenances thereto except the liability of said District to said City hereinbefore set forth.

12. It is hereby further understood and agreed by and between the parties hereto, that said City shall at its sole cost and expense perpetually maintain, repair, operate, alter, renew or rebuild said single leaf bascule bridge including the entire substructure and superstructure of the same and all approaches and viaducts connecting therewith and all appurtenances to said bridge or approaches or viaducts and said City shall also at its sole cost and expense change said new single leaf bascule bridge or replace same with another new bridge, including the entire substructure and superstructure of said second bridge and all approaches and viaducts connecting therewith and appurtenances thereto, over the existing south branch of the Chicago river at Twelfth Street or over the south branch of the Chicago river as the same may be straightened or relocated at Twelfth Street and shall at its sole cost and expense perpetually maintain, operate, alter, renew and rebuild said second new bascule bridge.

13. It is hereby further understood and agreed by and between the par-

ties hereto, that said agreement dated October 4, 1915, between the parties hereto which is printed in the Proceedings of the Board of Trustees of said District on pages 1763 to 1765 inclusive, which provides for the construction of a direct lift bridge across the south branch of the Chicago river at Twelfth Street, shall become null and void upon the complete execution of this agreement by both parties hereto.

IN WITNESS WHEREOF, The City of Chicago, party of the first part has caused this Instrument to be signed by its Commissioner of Public Works, countersigned by its Comptroller, approved by its Mayor and attested by its City Clerk, and The Sanitary District of Chicago, party of the second part, has caused same to be signed by the Chairman of the Committee on Finance of its Board of Trustees and attested by its Clerk, the day and year first above written.

Attorney.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, June 26, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that on June 9, 1919, it considered a communication from the Chief Engineer with reference to the sale of the two old deck plate girder spans carrying the tracks of the Chicago, Rock Island & Pacific Railway Co. over Stony Creek and at that time it was thought advisable to obtain informal bids from junk dealers for the purchase of said spans.

Your Committee is advised by the Chief Engineer that he concluded that a better price could be obtained for said spans by advertising for bids therefor and accordingly, on June 23, 1919, the Clerk of the District inserted advertisements for the sale of said spans in accordance with specifications prepared by the Chief Engineer.

Your Committee having considered the matter, is of the opinion that the action of the Clerk in this respect should be ratified and confirmed and, therefore, recommends the passage of the following order:

Ordered, That the action of the Clerk in advertising for the bids for the sale of the two old deck girder spans above specified, be ratified and confirmed.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

MATT A. MUELLER,
PATRICK J. CARR,
JAS. H. LAWLEY,
H. E. LITTLER,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, June 26, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that on April 2, 1919 (page 603 of the Proceedings) the Sanitary District accepted an ordinance of the City of Chicago granting to the Sanitary District, for a period of fifteen years, the right to maintain and operate, as constructed, a masonry duct or water tunnel five feet in diameter and a return pipe or conduit three feet in diameter in East Thirty-ninth street between South State street and the first north-and-south public alley east of State street connecting the power house and station of the South Side Elevated Railroad Company with the Thirty-ninth street conduit on certain terms and conditions set forth in said ordinance.

Your Committee herewith transmits to the Board a form of agreement between the Sanitary District and said Company, by the terms of which the Sanitary District gives and grants to said Company the right to take through said connection from said Thirty-ninth street conduit, such amount of water as said Company may require for use for cooling and condensing purposes in its power house and station, said water to be returned after such use, to said Thirty-ninth street conduit.

Said Company, on its part, agrees to pay to the Sanitary District for the use of said water for every calendar month or part of a calendar month in which water is actually taken, one twelfth of a sum equal to $1.00 for each rated boiler horse power of the boilers in said power house. The present rated boiler horse power of said Company in said power house is 9800 and it is agreed that according as said rated horse power is increased or decreased, the compensation for the use of said water shall be increased or diminished, provided the minimum payments to be made in each and every calendar year of the term of said agreement shall be not less in the aggregate than $3,000.00.

Said Company also agrees to pay to the City of Chicago the annual sum of $50.00 provided in section 4 of said ordinance of April 2, 1919 and also the sum of $150.00 being the premium on the bond furnished by said Sanitary District under the terms of section 6 of said ordinance.

If said Company shall at any time determine to permanently discontinue the taking of water from said conduit, it may upon giving ninety days notice in writing to the Sanitary District of its desire so to do, cancel said agreement, but agrees to carry out its obligations specified in section one and five of said agreement.

The Company also agrees to fully carry out and perform all the terms, conditions and provisions of sections one to five inclusive of said ordinance of April 2, 1919.

Your committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute

said agreement in quadruplicate when the same has been properly executed by the officials of the South Side Elevated Railway Company.

Respectfully Submitted,

WALLACE G. CLARK,
Chairman.

MATT A. MUELLER,
JAS. H. LAWLEY,
H. E. LITTLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

The following is the form of agreement with the South Side Elevated Railroad Company:

AGREEMENT, Made this day of , A. D. 1919, by and between The Sanitary District of Chicago, a corporation organized under the laws of the State of Illinois, party of the first part, hereinafter called the "Sanitary District," and the South Side Elevated Railroad Company, an Illinois corporation, party of the second part, hereinafter called the "Elevated Company," WITNESSETH:

WHEREAS, On the 6th day of May, 1904, an agreement was entered into between the parties hereto wherein and whereby the Elevated Company, acting for and on behalf of the Sanitary District, and under authority of an ordinance of the City of Chicago to the Sanitary District, passed January 25, 1904, and amended March 29, 1904, constructed and has since maintained an underground masonry duct or water tunnel five (5) feet in diameter connecting the powerhouse and station of the Elevated Company located at State street, between Thirty-ninth and Fortieth streets, with the twenty-foot conduit of the Sanitary District in Thirty-ninth street, also a return pipe from said station to said conduit, for the purpose of conveying from and returning to said twenty-foot conduit water to be used exclusively for cooling and condensing purposes by the Elevated Company; and

WHEREAS, The Elevated Company has been using for said purposes water conveyed by said means under the provisions of said agreement; and

WHEREAS, The said agreement and the said ordinance of January 25, 1904, as amended, both expired by limitation on January 25, 1919; and

WHEREAS, The City of Chicago on the 2nd day of April, 1919, passed another ordinance, a true copy of which is hereto attached and made a part of this agreement, granting to the Sanitary District the right to maintain the said duct or water tunnel and return pipe or conduit for a further period of fifteen (15) years from the 25th day of January, 1919, upon the terms and conditions in said ordinance set forth; and

WHEREAS, The Sanitary District has accepted said ordinance of April 2, 1919, as required by Section 7 thereof, and has filed its bond to the City of Chicago, in the penal sum of ten thousand dollars ($10,000), conditioned as in Section 6 in said ordinance provided, and the parties hereto desire to contract for the continued use of said masonry duct and return pipe, authorized by said ordinance of April 2, 1919, and now being maintained as in said agreement of May 6th, 1904, provided:

NOW, THEREFORE, In consideration of the premises and of the mutual undertakings hereof, it is hereby covenanted and agreed between the parties hereto as follows:

1. The Elevated Company agrees, at its own expense, to maintain said masonry duct and return pipe in good order and condition, and shall at all times keep the surface of the street over the said duct and conduit in a condition satisfactory to the Commissioner of Public Works of the City of Chicago, and safe for public travel, and will save and hold harmless the Sanitary District therefrom, and from all cost, damage or expense arising or to arise out of anything done or omit-

ted in and about the maintenance and use of said duct and return pipe.

The Elevated Company agrees that at the expiration of the privileges granted by said ordinance of April 2, 1919, unless the same shall be renewed, it will, at its own expense and without cost or expense of any kind whatsoever to the Sanitary District or to the City of Chicago remove said duct and return pipe, fill up the space where the same is located and restore the pavement over said space to a condition similar to the balance of the street in the same block, to the satisfaction of the Commissioner of Public Works of the City of Chicago as provided in section three (3) of said ordinance of April 3, 1919. In the event the Elevated Company shall refuse or neglect to perform the work specified in this section 1 of this agreement when ordered so to do by the Commissioner of Public Works of the City of Chicago said work may be done by the Sanitary District and the Elevated Company agrees to repay to the Sanitary District the cost of said work with interest thereon at the rate of 7% per annum from the date said cost is paid until paid by said Elevated Company to said Sanitary District. The Elevated Company shall and it hereby agrees that it will at its own cost and expense upon such termination promptly pay all cost and expense of cutting off the connections with said duct and return pipe to the said twenty-foot conduit, and close the openings, all in a workmanlike manner.

2. The Sanitary District hereby gives and grants unto the Elevated Company, its successors and assigns, the right and privilege of taking through said connections from the said twenty-foot conduit of the Sanitary District in Thirty-ninth street, between Wabash avenue and State street, in the City of Chicago, Illinois, such amounts of water as the Elevated Company may require for use for cooling and condensing purposes (and for no other purpose whatsoever) in the power-house and station of the Elevated Company, located between Wabash avenue and State street and between Thirty-ninth and Fortieth streets, in the City of Chicago.

3. All the water to be taken from said twenty-foot conduit by the Elevated Company for said cooling and condensing purposes shall be by it returned to said conduit after use by it for such cooling purposes, and none of the water so taken from said twenty-foot conduit shall ever be used under boilers, or for any other uses or purposes than that of cooling and condensing at said power-house; and in that behalf the Elevated Company expressly agrees that the amount of water required by it from the water works of the City of Chicago will not be decreased or reduced by reason of its connection with said twenty-foot conduit and the use of water taken by it from said conduit under the terms hereof.

4. The Elevated Company shall and it hereby expressly covenants and agrees that it will, while this agreement remains in force, pay to the Sanitary District for the use of said water under this agreement, for every calendar month or part of a calendar month in which water for said purposes shall actually be taken from said conduit, one-twelfth (1/12th) of a sum which shall equal one dollar ($1.00) for each rated boiler horsepower of the boilers in said power-house. The present rated boiler horse-power of the Elevated Company in its said power-house is 9800, and it is agreed that according as the said rated boiler horse-power of the Elevated Company in its said power-house is increased or decreased, the rental or compensation for the use of said water taken from the said twenty-foot conduit shall be ratably increased or diminished, provided the minimum payments to be made in each and every calendar year of the term of this agreement shall be not less in the aggregate than the sum of three thousand dollars ($3,000). When payment is due under the terms hereof for any calendar month, or part thereof, such payment shall be made by the Elevated Company to the Sanitary District on or before the thirtieth (30th) day of the next succeeding calendar month.

5. The Elevated Company shall and it hereby covenants and agrees that it will promptly and seasonably pay to the City of Chicago and save the Sanitary District harmless from the annual sum of fifty dollars ($50), as in Section 4 of the said ordinance of April 2, 1919, provided. In case

the Elevated Company fails or refuses to pay the compensation of fifty ($50) dollars per annum in the manner specified in section 4 of said ordinance of April 2, 1919, then said Sanitary District may pay said compensation and said Elevated Company agrees to repay the said Sanitary District the amount so paid with interest thereon at 7% per annum from the date of such payment until paid by the said Elevated Company.

The Elevated Company also agrees to pay said Sanitary District the sum of one hundred fifty ($150) dollars, being the premium on the bond to be furnished by the Sanitary District under the terms of Section 6 of said ordinance of the City of Chicago of April 2, 1919.

6. This agreement shall continue and be in force for the period of fifteen (15) years from and after January 25, 1919, but shall be subject to revocation or cancellation by either party hereto, if and when said ordinance of April 2, 1919, shall be revoked or repealed, or shall be amended or modified in such manner as to prevent the Elevated Company from receiving the necessary water, as in Section 2 of said ordinance provided, without the consent of the Sanitary District.

If the Elevated Company shall at any time determine to permanently discontinue the taking of water from said Sanitary District conduit, it may, upon giving ninety days' notice, in writing, to the Sanitary District of its desire so to do, cancel this agreement, provided the Elevated Company shall not then be in default in any of its agreements herein contained by it to be made, kept and performed; and provided, further, that, notwithstanding such cancellation, the obligations of the Elevated Company under paragraphs 1 and 5 of this agreement shall continue until fully satisfied according to the terms of said agreement.

It is further expressly covenanted and agreed between the parties hereto that if the Elevated Company shall, at any time, be in default for the period of ninety (90) days, in any of its payments in this agreement specified to be paid by the Elevated Company, then upon and after sixty days' written notice from the Sanitary District to the Elevated Company of its intention so to do, the Sanitary District may declare this agreement terminated and ended, and may at the end of sixty days' notice, if the default continues during that time, cut off and deprive the Elevated Company of all connection with, and use of water from said conduit in said Thirty-ninth street.

7. This agreement is made subject to all the terms, conditions and provisions of Sections 1, 2, 3, 4 and 5 of said ordinance of April 2, 1919, and the Elevated Company covenants and agrees to be bound by and to carry out all of said provisions, terms and conditions, and to save harmless the Sanitary District therefrom, and from all costs, damage or expense arising or to arise out of the failure, omission or neglect of said Elevated Company to comply with all the terms and conditions of said ordinance of April 2, 1919.

8. The Sanitary District shall be allowed reasonable opportunity to examine the boilers in the said powerhouse, once in each six months in order to determine the rated boiler horse-power of said plant.

9. It is understood and agreed that the Sanitary District shall not be or be taken to be under any obligation, by reason of anything in this agreement contained, to furnish at all times in said conduit in Thirty-ninth street a sufficient quantity of water to enable the Elevated Company to draw therefrom the water required for its condensing purposes, and that the Elevated Company shall have no right or claim for damages against the Sanitary District by reason of the inability of the Elevated Company to procure from said conduit a quantity of water sufficient for its condensing purposes, as above mentioned.

In Witness Whereof, The said Sanitary District has caused this instrument to be executed by the Chairman of its Committee on Finance and attested by its Clerk, with its corporate seal thereto attached, the day and year first above written, authority having been previously given the Chairman of its Committee on Finance and Clerk, respectively, by its Board of Trustees; and the Elevated Company has caused this agreement to be executed by its President and Secretary, respectively, with its corporate seal hereto attached, authority having been previously given to its

President and Secretary, by its Board of Directors.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, June 26, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that he has practically completed the plans and specifications for the following work:

A. The wrecking of that part of the "Union Loop Power House" situated on real estate acquired from the Northwestern Elevated Railroad Company situated on the east side of the Chicago River just south of Van Buren street.

B. The widening of the Chicago River to a uniform width of 200 feet by excavating said real estate.

C. The widening of the Chicago River to a similar width by excavating the real estate adjoining said "Union Loop Power House" which was acquired from the Commonwealth Edison Company.

D. The widening of the Chicago River to a similar width by excavating the real estate situated on the east side of the Chicago River near 16th street, authorized to be acquired from the Chicago, Rock Island & Pacific Railway Company and the New York Central Railroad Company,

and he requests that authority be given the Clerk to advertise for bids for doing said work in accordance with the completed plans and specifications therefor.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby authorized and directed to advertise for bids for doing said work, provided, however, that no contract shall be entered into between the Sanitary District and the successful bidder for said work until said real estate has been acquired from the Railroad Companies mentioned and until said plans and specifications have been approved by the Board.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.

MATT A. MUELLER,
PATRICK J. CARR,
JAS. H. LAWLEY,
H. E. LITTLER,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, June 26, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development reports that it has received a communication from the Electrical Engineer in which he states that the following contracts for residence lighting have been executed by him:

White Paving Company, Fullerton avenue and Chester street,
in Chicago.

Mrs. A. Kuiken, 216 Western avenue,
Mrs. W. F. Mancke, 291 Vernon avenue,
John Malm, 305 Collins street,
Fred Labalm, 8 York street,
Mrs. C. Buckinham, 496 High street,
all in Blue Island, Illinois.

A. Paul Paulte, 6607 31st street,
Esper R. Oven, 6611 31st street,
Mrs. O. A. Graham, 3216 Harold avenue,
J. C. O'Donnell, 3240 Baldwin avenue,
C. Lavahn, 7114 34th street,
J. Vejr, 2841 Ridgeland avenue,
all in Berwyn, Illinois.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the action of the Electrical Engineer in executing the contracts for residence lighting with the parties above mentioned be, and the same is hereby ratified and confirmed.

Respectfully submitted,
H. E. LITTLER,
Chairman.
MATT A. MUELLER,
WM. J. HEALY,
WALLACE G. CLARK,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a communication from Mr. Thos. H. McIntyre, 612 Sheridan Road, Wilmette, requesting permission to build, at his own expense, a stairway from the top of the hill to the pier, on the south side of the bluff at Wilmette, for the use of the general public.

Referred to the Committee on Engineering.

ADJOURNMENT.

Mr. Mueller moved that the Board adjourn.

The motion prevailed.

Clerk.

lation and to the Committee on Engineering for report.

The motion prevailed.

The Clerk opened and read the bids received for the construction of the Morton Grove Sprinkling Filter Plant, as shown in the schedule printed on page 851A of the Proceedings.

Mr. Clark moved that the bids be referred to the Chief Engineer for tabulation and to the Chief Engineer for report.

The motion prevailed.

MINUTES.

Mr. Lawley moved that the minutes of the regular meeting of June 19, 1919, be approved, as printed, without being read.

The motion prevailed.

REPORTS OF OFFICERS.

The Clerk presented the report of the Chief Engineer for the month of January, 1919, which was ordered published and filed, as follows:

CHICAGO, February 1, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I herewith present the report of the Engineering Department for the month of January, 1919, giving the detailed operation of the same.

CONSTRUCTION.

NORTH SHORE CHANNEL.

Spoil Banks.

The National Brick Company removed no material from the spoil bank during the month.

CALUMET-SAG CHANNEL.

Section 1.

James O. Heyworth, Contractor, continued operations throughout the month. All work was carried on in one 10-hour shift per day, except pumping channel which was carried on in two 12-hour shifts at station 28+00 from the 1st to the 31st. Drag line was engaged in backfilling on the south side of the turning basin, between stations 3+00 and 5+00, from the 7th to the 15th. Hoisting concrete for the south wall of the turning basin, between stations 1+00 and 1+50 on the 16th and 17th; excavating glacial drift in turning basin between stations 4+00 and 4+50, on the 10th and 11th, and between stations 6+00 and 6+80 from the 21st to the 25th. Excavating rock, turning basin, between stations 6+60 and 6+80, from the 28th to the 30th. Locomotive crane No. 1 was engaged in cleaning up turning basin on the 2nd and 3rd, hoisting concrete for south wall of turning basin at station 3+00 on the 15th and 16th. Concrete mixer was engaged in mixing concrete for south wall, turning basin, between stations 6+60 and 6+80 on the 10th and 11th and at station 6+80 on the 30th and 31st. Woodford cars and flat cars and buckets were employed in hauling concrete from the mixer to the wall on the 10th, 11th and 30th and 31st. Blasting rock was carried on at station 6+80 in the turning basin on the 27th and 28th. Force account work was carried on as follows: Cleaning ditch on the 17th; cleaning top of wall on the 20th; cleaning drain ditches on the 29th and 30th. An average daily force of 36.7 men was employed. At the end of the month 97.4 per cent of the total estimated value of the contract was completed.

Section No. 13.

A. Guthrie & Co., Contractors, closed down their plant for the winter on December 21, 1918. The following work was carried on during the month:

Pumping Channel at station 782+00 on the 17th and 18th, working one 4-hour shift per day, and at station 749+00 from the 8th to the 31st, working one 7-hour shift per day. An average daily force of 2 men was employed. At the end of the month 58.4 per cent of the total estimated value of the contract was completed.

The Chicago Telephone Co. employed an average daily force of 6.5 men placing poles and stringing wires along the north berm between stations 792+00 and 794+00 on the 3rd and from the 6th to the 11th, working one 8-hour shift per day.

The Public Service Company of Illinois employed an average daily force of 3 men in lowering a 3 inch gas main under the Division street bridge to prevent freezing on the 3rd, and 4th, working one 6-hour shift per day and on the 13th working one 9.5-hour shift.

The C. R. I. & P. Ry. Co. employed a force of 4 men in raising and ballasting their north approach to new west bound track on the 20th.

The B. & O. Railway Company employed a force of 8 men, working one 8-hour shift on the 2nd laying sidewalk on trestle over Stony Creek, and a force of 18 men working one 8-hour shift per day from the 9th to 21st. tearing out old trestle over Stony Creek.

Section 14.

A. Guthrie & Co. Contractors, closed down their plant for the winter on December 21, 1918. They were engaged in pumping channel at station 846+00 from the 21st to the 31st working one 4-hour shift, per day and at station 837+00 from the 1st. to the 31st, working one 6-hour shift per day. An average daily force of 3.5 men was employed. At the end of the month 99.8 per cent of the total estimated value of the contract was completed.

BRIDGES.

B. & O. Railway Bridges.

The B. & O. Railway Co. employed a force of 2 men drilling holes in tie plates from the 2nd to 31st.

CONTROLLING WORKS.

The Sanitary District Organization employed a force of 3 men finishing off machinery house at the S. E. sector gate on the 2nd and 3rd, working one 8-hour shift per day.

SEWERS.

CALUMET INTERCEPTING SEWER.

Contract Section No. 6.

Byrne Brothers Dredging & Engineering Co. carried on a small amount of work throughout the month consisting of general work on maintenance and repairs of plant, etc. An average daily force of 4.5 men was employed.

EVANSTON INTERCEPTING SEWER.

Contract Section No. 1.

Nash-Dowdle Co. Contractors, continued operations throughout the month. Cleaning of the tunnel sections on Elmwood Ave. and Custer Ave. was resumed on the 7th and continued throughout the month. The work of constructing manholes and making sewer connections at various locations was carried on throughout the month. Construction of the 18-inch tile sewer in Davis was begun on the 1st and completed on the 11th. Construction of the 18-inch tile sewer in Chicago avenue near Dempster street was continued and completed on the 11th. Construction of the 18-inch tile sewer in Chicago avenue between Washington and Main streets was completed on the 9th. An average daily force of 47 men was employed. At the end of the month 99 per cent of the work was completed.

TEMPORARY PUMPING PLANT.

Nash-Dowdle Co., Contractors, continued the work of the installation of pumps until the 30th, on which date the pumps were put in operation. An average daily force of 4 men was employed.

DES PLAINES RIVER INTERCEPTING SEWER.

Nash Brothers, Contractors, continued operations throughout the month. The work consisting of excavation of the main line sewer in First avenue, north of 12th street. An average daily force of 64 men was employed. At the end of the month 6.5 per cent of the work was completed.

PUMPING STATIONS.

Calumet Pumping Station.

T. J. Forschner Contracting Company, Contractors, continued operations throughout the month. The work consisting of building column forms and general work on maintenance and repairs to plant. An average daily force of 19 men was employed.

STOCK YARDS TESTING STATION.

The Sanitary District Organization employed a force of 6 men throughout the month in dismantling this station preparatory to moving same to the North Branch of the Chicago River, where it is to be used for testing tannery wastes.

MAINTENANCE AND OPERATION.

MAIN CHANNEL.

BRIDGES.

Summit Road Bridge.

The work of reflooring this bridge was continued during the month and completed on the 29th. The railings on the bridge and fences on the approaches were repaired.

The Romeo Road, Lemont Road and Willow Springs Road bridges were inspected.

Minor repairs were made to the floor of the Lemont Road Bridge.

Repairs were made to the west walk of the Western avenue bridge and new stringers were put in and painted with creosote oil.

A small amount of repairs were done to the sidewalks of the Kedzie avenue bridge.

CONTROLLING WORKS.

The bear trap dam was shut down the entire month. The sluice gates were closed the entire month.

MAIN CHANNEL EXTENSION.

BRIDGES.

9th and 16th Street Bridges.

The circuit breaker on the 16th street bridge was repaired on the 22nd. Two men were on duty on these bridges, working from 7 A. M. to 3 P. M. and from 3 P. M. to 11 P. M.

BUTTERFLY DAM.

This dam was operated on the 12th, 19th and 26th.

DAMS AT THE POWER HOUSE.

The forty-eight foot dam was open some part of two days or a total of one hour and fifty minutes, an average of four minutes for each day of the month. The twelve foot dam some part of two days or a total of seven hours and forty minutes, an average of fifteen minutes for each day of the month.

Heater was installed on the 2nd; Bell was repaired on the 3rd; Heater was repaired on the 16th. The tubes, chains and gauges at the dam house were greased on the 19th.

Samples of canal water were taken every eight hours for the Sanitary Dept.

Three men were on duty working in shifts of 8-hours each.

I. & M. CANAL LOCK AT THE POWER HOUSE.

No boats passed through the lock during the month. The heater was repaired on the 4th, 6th & 7th.

NORTH SHORE CHANNEL.

Bridges.

The Sanitary District Organization made minor repairs to the floor of the Foster avenue bridge; the roadway floor of the Peterson avenue bridge was cleaned.

PUMPING STATIONS.

39th Street Pumping Station.

This station was operated, pumping sewage, throughout the month. Repairs were completed on sewage pump No. 3. The track scale was put in working order. The wiring of the traveling crane was overhauled. In the boiler room, the main steam header was overhauled; the boiler feed pumps were repaired; the house pump was overhauled and the brick work of boiler Nos. 2, 3, 4, and 7 was repaired. The pumps were

operated as follows: Sewer pump No. 1 was operated some part of seventeen days or a total of two hundred and seventy-three hours and forty minutes. Pump No. 2 some part of twenty days or a total of three hundred and ninety-one hours and forty-five minutes. Pump No. 4 some part of four days or a total of eighty-one hours and fifty-five minutes. The three pumps were operated for a grand average of eight hours and nineteen minutes for each day of the month, and pumped an average of seven thousand four hundred and seventy-eight cubic feet of sewage for each minute of the month. Sewer pump No. 3 was shut down the entire month.

Fresh water pumps Nos. 5 and 6 were each operated some part of five days or a total of sixty two hours, an average of two hours for each day of the month, and pumped an average of five thousand six hundred and four cubic feet of water for each minute of the month.

Lawrence Avenue Pumping Station.

This station was operated, pumping sewage, throughout the month. The pumps were operated as follows:

Sewer pump No. 2 was operated some part of seventeen days or a total of three hundred and thirty-three hours and fifteen minutes. Pump No. 3 some part of twenty days or a total of four hundred and twelve hours and five minutes. The two pumps were operated for a grand average of twelve hours and one minutes for each day of the month, and pumped an average of three thousand one hundred and twenty-one cubic feet of sewage for each minute of the month. Sewer pump No. 1 and fresh water pump were shut down the entire month.

A complete overhauling of the station was begun. The boiler feed pumps were overhauled; the water purifier (for feed water) was cleaned; the house pump was overhauled and repaired; the stoker of boiler No. 2 was repaired and the grate shortened two links; the wiring on the switchboard was overhauled; the steam line to the electric lighting engines was overhauled and a new valve put in the line; new fusible plugs and low water alarms were put on both boilers; a new arch was put under boiler No. 2.

Wilmette Pumping Station.

This station was operated, pumping fresh water, throughout the month. The pumps were operated as follows:

Pump No. 1 was operated some part of thirty-one days or a total of five hundred and forty-three hours and nineteen minutes. Pump No. 2 some part of two days or a total of fifteen hours and twenty-five minutes. Pump No. 3 some part of twenty-five days or a total of four hundred and six hours and twenty-two minutes. Pump No. 4 some part of twenty-five days or a total of three hundred and eighty-eight hours and fifteen minutes. All of the four pumps were operated for a grand average of ten hours and fifty-four minutes for each day of the month, and pumped an average of fifteen thousand two hundred and eighty-two cubic feet of water for each minute of the month.

The water glands on the pump shafts were cleaned and repacked.

MISCELLANEOUS EQUIPMENT.

A force of three men was engaged on removing the cement gun plant from scow No. 2 at 31st street and Western avenue working throughout the month, preparatory to repairing the scow.

STRUCTURES AND EQUIPMENT FOR SANITARY AND SPECIAL INVESTIGATIONS.

Morton Grove Sedimentation Plant.

This plant was operated throughout the month and the regular maintenance and operation supervised by the Sanitary Division.

Laboratory at 39th Street.

Chemical analyses were made weekly of samples collected from the Main Channel and the Illinois River at Mor-

ris, Ottawa, Peru, and Chillicothe. Special analyses were made on samples shipped in from Lockport.

Sewer and Rain Gauges.

Rain Gauges were operated at the 39th Street Pumping Station, Stockyards Testing Station, Lockport, Kensington, and at 31st street and Western avenue. The records collected were worked up in the office as time permitted.

Investigation of Water Pollution.

Daily samples were collected from Lake Michigan at 39th street and from the Main Channel at Lockport, weekly samples from Lockport and the Illinois River at Morris, Ottawa, Peru, and Chillicothe.

ENGINEERING.

Drafting Division.

The following work was carried on during the month: Reducing the Stockyards Map. Tracing contract drawings of the Des Plaines Pumping Station. Revising index system. Preparing an Ordinance map for part of Section No. 1 of the Calumet Sewer crossing the Calumet River. Writing monthly reports of the engineering department and reading proof on same. Compiling the Chicago River Atlas was continued. Compiling Calumet-Sag Atlas was continued. Preparing plat proposed easements for section 1 of the Calumet Sewer. Printing index cards. Copying records at the City Map Dept. for the North Branch Survey. Work on the 1919 Budget. Plat for application for permit for water tunnel at South Side Elevated plant at 39th street and State street was prepared and field measurements were taken. Checking right of way lists for Cook County Tax exemption for Real Estate Department. Revising statistics tabulation of Sanitary District. Computing co-ordinates of North Branch Survey. Tinting maps of revised Stock Yards plan. Coloring and posting Main Channel Lease maps for Real Estate Dept. Coloring ordinance maps of Calumet Sedimentation Plant. Preparing Ordinance map for Calumet Pumping Station overflow sewer. Filing warehouse index cards. Preparing ordinance map for the Strand line on Section 1 of the Calumet Sewer. Writing reports of the Calumet-Sag Channel construction and filing reports.

Sanitary Division.

The following work was carried on during the month: Preparation of a report on the testing station work at the Stockyards was continued. Preparation of plans and specifications for the Calumet Sewer was continued. Conferences were held with the Officials of the City of Chicago. Preparations of plans and specifications of the Des Plaines sewage treatment works was continued. The preparation of supplementary plans for the Calumet and Evanston sewage pumping station was continued. Studies were made of the proposed rearrangement of the 95th Street Pumping Station. Preparations where begun on the intercepting sewer in South Chicago. Preparation of plans was begun on the storm overflow to the Calumet River at Wildwood. Studies were begun on an auxiliary generator station at the Calumet Pumping Station, to be run by oil engines. Conferences were held with various parties from the Calumet Region in Indiana over proposed schemes for sewage diversion and treatment.

Hydraulic Measurement Division.

The self-registering gauges on the Main Channel at Willow Springs and Lemont and on the Lake Front at the Coast Guard Station were operated and periodically inspected. Records from these gauges were worked up in the office.

Bridge Division.

Work was continued on the details of the reinforced concrete for the Calumet Pumping Station. Designs for sluice gates were investigated. Design-

ing of roof trusses and other steel work for the Des Plaines Sewage Pumping Station was begun. A design was prepared for timber shoring from the underside of the 48th Avenue Bridge to the temporary dam, to be used instead of the anchor rods originally intended, as drilling in the rock for anchor rods was found impracticable on account of water at the site of the dam.

Channel Maintenance Division.

Party was employed on Chicago River dredging and docking. North Shore Channel sloping, office and field work. Survey North Branch, Chicago River, Foster avenue to Lake street. Setting gauges at Willow Springs. Repair to floating gauge at 39th Street Pumping Station and sub-station Main Channel. Towing supplies for wall repairs Main Channel. Setting gauge North Shore Channel. General office work at Canal street.

The Calumet-Sag Channel Field parties perfomed the usual routine construction duties as follows: The Sag Division on Section 1 and the Blue Island Division on Sections 13 and 14.

The general engineering force and other employes continued superintending engineering, construction and maintenance work, checking estimates, compiling unit construction costs of the Evanston and Calumet sewers and of the Calumet-Sag Channel section, keeping the accounts of the department, preparing vouchers, furnishing information to other departments and performing other duties, etc.

Respectfully submitted,
G. M. WISNER,
Chief Engineer.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 3, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN:—Your Committee on Finance reports that it has had under consideration the advisability of advertising for bids to furnish and deliver lubricating oils and gasoline to supply the needs of the Sanitary District for the remainder of the year 1919 and is of the opinion that such supplies should be advertised for.

Your Committee further reports that the Electrical Engineer has prepared specifications for furnishing and delivering said lubricating oils and gasoline, and has presented the same to your Committee for its approval.

Your Committee further reports that it has considered said specifications prepared by the Electrical Engineer, has approved same, and, therefore, recommends the passage of the following order:

Ordered, That the specifications prepared by the Electrical Engineer for furnishing and delivering said lubricating oils and gasoline be, and the same are hereby approved, and it is further

Ordered, That the Clerk be, and he is hereby authorized and directed to advertise for bids for furnishing and delivering said lubricating oils and gasoline in accordance with the specifications so prepared by the Electrical Engineer.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark,

Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 3, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN:—Your Committee on Finance reports that on March 20, 1919, in accordance with the order of the Board, the Clerk of the Sanitary District issued Warrant No. 100130 for $60.00 on the Treasurer of the Sanitary District, payable at the Continental and Commercial National Bank, to the order of William Sorgenfrei, in payment of the rental due for the office of the Electrical Department in the City of Blue Island. Said warrant was lost in the mail and said bank has stopped payment on said warrant. Mr. Sorgenfrei now requests that a duplicate warrant for said amount be issued to him.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Clerk of The Sanitary District of Chicago be, and he is hereby authorized and directed to issue a duplicate warrant in the sum of $60.00 payable to the order of William Sorgenfrei and deliver the same to him in lieu of the lost warrant above specified.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 3, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Construction Account.

T. J. Forschner Contracting Company (work on Calumet Sewage Pumping Station)	$ 69,244.29
Nash Bros. (work on Contract No. 1, Desplaines River Intercepting Sewer)	39,720.33

Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel *(except as to voucher to the T. J. Forschner Contracting Company, for work on Calumet Sewage Pumping Station, for $69,244.29, on which Mr. Sergel voted "nay")*, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance *(except as to voucher to the T. J. Forschner Contracting Company, for work on Calumet Sewage Pumping Station, for $69,244.29, on which Mr. Nance voted "nay")*—Seven on all vouchers and eight on all not excepted).

Nays—None *(except as above stated)*.

TEMPORARY CHAIRMAN.

President Sergel called Mr. Healy to the chair, requested to be excused and left the Board room.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 3, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN:—Your Committee on Engineering reports that on May 22, 1919, (page 609 of the Proceedings) the Sanitary District entered into an agreement with the City of Chicago covering the furnishing of electrical energy to the City of Chicago for its electric street lighting system and performing certain work in connection with said system.

Your Committee further reports that it has received a communication from the Electrical Engineer in which he states that under the terms of said contract, the Sanitary District agreed to rearrange, change, protect or rebuild all exposed or unprotected transmission lines, lighting circuits, cables or other electrical equipment, under in or on viaducts and elevated structures, subways and on streets, alleys or public places and to paint electric light poles and equipment thereon.

Your Committee further reports that

the Electrical Engineer has prepared specifications for doing said work which have been approved by the Commissioner of Gas and Electricity of said City and has presented the same to your Committee for its approval.

Your Committee further reports that it has considered said specifications, has approved the same and therefore recommends the passage of the following order:

Ordered, That the specifications prepared by the Electrical Engineer for the performance of the work above specified be, and the same are hereby approved, and it is further

Ordered, That the Clerk be, and he is hereby authorized and directed to advertise for bids for the performance of the work above specified in accordance with the specifications so prepared by the Electrical Engineer.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
MATT A. MUELLER,
PATRICK J. CARR,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 3, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering respectfully recommends the adoption of the following preamble and order:

WHEREAS, The General Assembly of Illinois recently passed an Act authorizing The Sanitary District of Chicago, by and through an amendment to the Act creating sanitary districts and to remove obstructions in the Desplaines and Illinois Rivers, to build and maintain highways along canals or channels built by the District or lands owned by the District, and to repair such highways already constructed in order to make accessible dock property owned by the District; and

WHEREAS, It will be advisable before the Board of Trustees defines and adopts any policy in the matter of road building to have the data and information as to the various kinds of roads, methods of construction and maintenance, and the expense in connection therewith, assembled and presented to the Committee on Engineering, with a view to having that Committee formulate and present to this Board for final action a report with reference to the construction of such roads and the expense in connection therewith, together with the recommendation of said Committee in the premises; it is, therefore,

Ordered, That the Chief Engineer be, and he is hereby, authorized, directed and empowered to make a study and investigation of roads and road building, including the various kinds of material available for the same, and of available locations for such roads upon the property of The Sanitary District of Chicago, and report such information, together with his recommendation as to the kind and character of roads to be constructed, where the same shall be located, and also plans and specifications for such roads as he shall recommend, together with estimate of the cost and expense of building the same, and pre-

sent such report to the Committee on Engineering.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
MATT A. MUELLER,
PATRICK J. CARR,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 3, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a final certificate from the Chief Engineer that the work covered by the contract of the Hutchins Lumber & Storage Co., dated May 1, 1919 (page 459 of the Proceedings), for furnishing and delivering Oregon fir timbers for trestles for supporting tracks of the Grand Trunk Western Railway Company at the Calumet-Sag Channel, in the City of Blue Island, Illinois, has been completed in accordance with all the terms and conditions of the contract and to the satisfaction of the Chief Engineer, and your Committee having read said final certificate hereto attached, and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to pay to the Hutchins Lumber & Storage Co., upon the voucher of the Chief Engineer, the total sum of $5,728.86, found to be due under said contract, upon the execution by said Company of a receipt in full of all claims and demands arising out of or resulting from the performance of the work under said contract, and also upon the execution of an affidavit by an officer of said Company that all materialmen, mechanics and workmen employed by said Company have been paid in full; said payment, however, to be made subject to any unaccrued or unmatured obligations imposed by said contract.

WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
MATT. A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

FINAL CERTIFICATE.

June 19, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I transmit herewith final voucher in the amount of $5,728.86 in favor of Hutchins Lumber & Storage Company, on its contract dated May 1, 1919, for furnishing and delivering timbers for trestles for supporting tracks of the Grand Trunk Western Railway Co. at the Calumet-Sag Channel in the City of Blue Island, Illinois.

This contract has been fully completed in accordance with all the terms and conditions thereof.

Very Respectfully,
G. M. WISNER,
Chief Engineer.

Recommended by:
C. R. DART,
Chief Bridge Engineer.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 3, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that on November 2, 1916 (page 1443 of the Proceedings) the Sanitary District entered into an agreement with the Baltimore and Ohio Chicago Terminal Railway Company, the Grand Trunk Western Railway and Jacob M. Dickinson, receiver of the Chicago, Rock Island and Pacific Railway Company, by the terms of which certain filling, track laying and ballasting made necessary by the removal and relocation of certain tracks of said railroad companies at the crossing of said railroads and the Calumet-Sag Channel of the Sanitary District, was to be done at the expense of the Sanitary District.

He further states that in constructing the new bridge across said channel for the Grand Trunk Western Railway it is necessary to divert the present tracks of said railway around the site of the new bridge. This work requires the construction of a trestle under the diverted track nearest the bridge site, the laying of railroad tracks thereon and other work of track diversion which can only be performed by bridge carpenter and track laying gangs. The officials of said company state that at the present time the company would have to organize new gangs in order to do said work and the work would cost the Sanitary District considerably more than if Guthrie & Co., Inc., which is doing similar work in the vicinity, would undertake it. The Chief Engineer therefore requests authority to order A. Guthrie & Co., Inc., to perform said work under the extra work clause of its contract for the excavation of Contract Section 13 of the Calumet-Sag Channel at a cost of not to exceed $15,000.00.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized to order A. Guthrie & Co., Inc., to perform the work above specified under the extra work clause of its contract for the construction of Contract Section 13 of the Calumet-Sag Channel provided the cost of same shall not exceed the sum of $15,000.00.

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler and Mueller—Six.

Nays—None.

Passed and not voting—Mr. Nance—One.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 3, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a

communication from the Chief Engineer, in which he states that on November 2, 1916 (page 1443 of the Proceedings), the Sanitary District entered into an agreement with the Baltimore & Ohio Chicago Terminal Railway Company, the Grand Trunk Western Railway and Jacob M. Dickinson, receiver of the Chicago, Rock Island and Pacific Railway Company, by the terms of which certain filling, track laying and ballasting made necessary by the removal and relocation of certain tracks of said railroad companies at the crossing of said railroads and the Calumet-Sag Channel of the Sanitary District, was to be done at the expense of the Sanitary District.

He further states that in constructing the new bridge across said channel for the Grand Trunk Western Railway it is necessary to divert the present tracks of said railway around the site of the new bridge. This work requires a trestle under the diverted track nearest the bridge site, the piles for which must be driven by a railroad pile driver running on a temporary track. The officials of said company recently stated that said company had a pile driver which would be in Chicago July 7, 1919, which it would furnish for said work if a temporary track and pile points were then ready. He further states that in order to avoid any delay, he ordered A. Guthrie & Co., Inc., to lay said temporary track and furnish said pile points under the extra work clause of its contract for the excavation of Contract Section 13 of the Calumet-Sag Channel at a cost of not to exceed $500.00, and he requests that his action in the premises be ratified and confirmed.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the action of the Chief Engineer in ordering A. Guthrie & Co., Inc., to perform the work above specified and furnish said iron pile points under the extra work clause of its contract for the construction of Contract 13 of the Calumet-Sag Channel be, and the same is hereby ratified and confirmed.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
MATT. A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler and Mueller—Six.

Nays—None.

Passed and not voting—Mr. Nance—One.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, July 3, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development reports that it has received a communication from the Electrical Engineer in which he states that by the terms of the existing contract between the Sanitary District and the International Harvester Company said company is limited in its use of electrical energy to certain hours of the day and has requested permission to use said electrical energy during other hours when said use will not interfere with the supply of electrical energy to other consumers.

The Electrical Engineer further states that the use of additional electrical energy at the present time will not interfere with the supply to other consumers

and will result in an increased income to the Sanitary District.

Your Committee having considered the matter is of the opinion that the request of said company should be granted, and therefore recommends the passage of the following order:

Ordered, That the existing contract between the Sanitary District and the International Harvester Company be modified to permit said company to use electrical energy during such hours and for such a period of time as shall be authorized by the Electrical Engineer, and that whenever he is of the opinion that it is not to the advantage of the Sanitary District to permit such consumer to use such electrical energy he shall notify said company and said company shall thereupon cease to use said additional electrical energy.

Respectfully submitted,
H. E. LITTLER,
Chairman.

MATT A. MUELLER,
WM. J. HEALY,
WALLACE G. CLARK,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, July 3, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development reports that it has received a communication from the Electrical Engineer in which he states that the following contracts for residence lighting have been executed by him:

Mrs. E. F. Beyer, 390 Gregory street.

Mrs. Chas. Woods, 215 Grunewald street.

Walter Stearman, 152 Vermont street.

Ray L. Thornton, 318 Olive street.

John G. Koraleski, 215 Grunewald street.

Ed. Carlson, 195 Cochran street.

Louis Storz, 48 Broadway.

Percival W. Lake, 584 Western avenue.

All in Blue Island, Ill.

H. E. Paulsson, 3121 Winfield avenue.

Samuel Bryant, 6829 Stanley avenue.

J. V. Swanson, 6440 26th place.

Jaroslav Peroutka, 6539 W. 27th place.

Lee L. Emmons, Jr., 6435 Sinclair avenue.

Evan Anderson, 3121 Winfield avenue.

Leon T. Moore, 3322 Berkeley avenue.

F. C. Folts, 3307 Ivison avenue.

John G. Klucke, 3101 Harlem avenue.

A. B. Hagen, 3209 Ivison avenue.

Frank J. Mally, 3334 Hiawatha avenue.

All in Berwyn, Ill.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the action of the Electrical Engineer in executing the contracts for residence lighting with the parties above mentioned be and the same is hereby ratified and confirmed.

Respectfully submitted,
H. E. LITTLER,
Chairman.

MATT A. MUELLER,
WALLACE G. CLARK,
WM. J. HEALY,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, July 3, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith transmits a form of contract to be entered into between The Sanitary District of Chicago and the Chicago and West Towns Railway Company.

By the terms of this contract the Sanitary District agrees to supply said company with 3,000 kilowatts of electrical energy and intermittent demands not to exceed 500 kilowatts during eight months of each year for a period of five years.

To serve said consumer certain line extensions must be made, the estimated cost of which will not exceed $20,000.00 which is to be advanced by said consumer and repaid to it by the Sanitary District by crediting to it the bill for electricity furnished during each alternate month of the term of said contract until the total amount has been paid.

The rates are based on a demand charge of 50 cents per kilowatt per month, on 3,500 kilowatts, known as the "demand charge;" also there is an excess demand charge of $2.50 per kilowatt in excess of 3,500 kilowatts, and a consumption charge for electricity consumed of 9-10 cents per kilowatt hour for the first 100,000 kilowatt hours and 5-10 cent per kilowatt hour for the excess consumed in any one month over 100,000 kilowatt hours.

The other terms of the contract are of the standard form used by the Sanitary District in such cases.

Said contract has been approved by the Electrical Engineer and by the Attorney.

Your Committee having considered said contract, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago, and the Clerk, be, and they are hereby authorized and directed to execute said contract in duplicate when the same has been executed by the properly authorized officials of said Chicago and West Towns Railway Company.

Respectfully submitted,

H. E. LITTLER,
Chairman.
MATT A. MUELLER,
WALLACE G. CLARK,
WILLIAM J. HEALY,
GEORGE W PAULLIN,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Employment

Mr. Clark presented the following report from the Committee on Employment:

CHICAGO, July 3, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of actions taken:

NEW APPOINTMENTS.

Provided for in 1919 Budget.

Engineering Department.

A. J. Canary, Chemical Assistant (temporary), $100.00 per month.

Arthur Anderson, Chemical Assistant (temporary), $100.00 per month.

Thos. P. Bonfield, Rodman, $100.00 per month.

Electrical Department.

Hugo Hinkel, Lineman (temporary), $165.00 per month.

Hugh P. Ward, Chauffeur (vacation period), $125.00 per month.

INCREASES.

Engineering Department.

Walter P. Creech, from Sub-Instrument Man, at $130.00 per month, to Instrument Man at $150.00 per month.

Max Nork, Machinist, from 85 cents per hour to 95 cents per hour.

Electrical Department.

W. O. Wilson, Cable Splicer Foreman, from $200.00 per month to $1.12½ per hour.

A. M. Anderson, Cable Splicer, from 87½ cents per hour to $1.00 per hour.

E. Pearson, Cable Splicer, from 87½ cents per hour to $1.00 per hour.

J. J. Elliott, Cable Splicer, from 87½ cents per hour to $1.00 per hour.

A. J. Peck, Cable Splicer, from 87½ cents per hour to $1.00 per hour.

H. J. Berninger, Cable Splicer Helper, from 62½ cents per hour to 75 cents per hour.

Harry Johnson, Cable Splicer Helper, from 62½ cents per hour to 75 cents per hour.

W. Bunsworth, Cable Splicer Helper, from 62½ cents per hour to 75 cents per hour.

J. E. Regan, Cable Splicer Helper, from 62½ cents per hour to 75 cents per hour.

A. Suffern, Machinist, from 85 cents per hour to 95 cents per hour.

Fred Westerberg, Machinist, from 85 cents per hour to 95 cents per hour.

B. H. Stuber, Machinist, from 85 cents per hour to 95 cents per hour.

Charles Larson, Machinist, from 85 cents per hour to 95 cents per hour.

Edward Held, from Operator at $155.00 per month to Load Dispatcher at $180.00 per month, during vacation period.

Operating Engineers at the Thirty-ninth Street Pumping Station and the Lawrence Avenue Pumping Station of the Engineering Department, the same scale of wage, effective July 1, 1919, as will be paid the Engineers of the City of Chicago doing similar work. Said scale of wage to be decided by the Chief Engineer.

REINSTATEMENTS.

Due to Honorable Discharge from the U. S. Army Service.

Electrical Department.

Fred Henderson, Assistant Repairman, $130.00 per month.

Respectfully submitted,

WALLACE G. CLARK,
Vice-Chairman.

H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Employment.

Mr. Clark moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

RECESS.

Mr. Clark moved that the Board take a recess for five minutes to permit the Committee on Engineering to meet and report back to the Board its recommendations on the bids received today for the purchase of the two old steel railroad bridges.

The motion prevailed.

After the expiration of five minutes the Board reconvened.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 3, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering, to which were referred at today's meeting of the Board (page 850 of the Proceedings), bids for the purchase of two steel deck plate girder railroad bridges from the old Chicago, Rock Island and Pacific Railway Company bridge over Stony Creek in Blue Island, Illinois, having considered all proposals presented and the qualifications of each bidder, together with a report submitted by the Chief Engineer, finds that the highest bid for one of said steel deck plate girder railroad bridges is that of L. Morris & Company in the sum of $14.00 per net ton f. o. b. the site of the work, but that said bid is informal for the reason that it does not comply with the specifications, as a bid was formally submitted for only one bridge and an attached letter offered to bid the same price for the other bridge if the Sanitary District loaded it on cars.

Your Committee further reports that the next highest bid received for said two steel deck plate girder railroad bridges is that of Getz-Mitchell & Company in the sum of $9.48 per net ton actual weight of the steel in one of said bridges, and the sum of $10.15 per net ton actual weight of the steel in the other of said bridges.

Your Committee further reports that it is of the opinion that said bidder, Getz-Mitchell & Company, is competent to comply satisfactorily with the terms and conditions of said contract for the purchase of said two steel deck plate girder railroad bridges, and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the bid of L. Morris & Company herein mentioned be, and the same is hereby rejected for the reason that it does not comply with the specifications; and it is further

Ordered, That the contract for the purchase of said two steel deck plate girder railroad bridges be and the same is hereby awarded to Getz, Mitchell & Company for the prices above specified named in its bid; and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District be and he is hereby authorized and directed to accept said bid of Getz-Mitchell & Company for the purchase of said two steel deck plate girder railroad bridges for the prices specified in said bid.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
MATT A. MUELLER,
PATRICK J. CARR,
H. E. LITTLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

MISCELLANEOUS AND NEW BUSINESS.

Mr. Carr presented the following resolution:

RESOLVED, That The Sanitary District of Chicago be and remain closed on Friday, July 4, and Saturday, July 5, except as to such employes as are necessary for the proper conduct of the business of the District.

Mr. Carr moved that the resolution be adopted.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

ADJOURNMENT TO A SPECIAL TIME.

Mr. Lawley moved that when the Board adjourns, it adjourn to meet on Monday, July 14, 1919, at 2 p. m., for the purpose of receiving bids on bonds taken by the Sanitary District from the City of Chicago in payment of judgments for money owed the Sanitary District for the rehabilitation of the street lighting system of the City of Chicago and for electricity furnished said city, and also for the transaction of such other business as may come before the Board.

ADJOURNMENT.

Mr. Lawley moved that the Board adjourn.

The motion prevailed.

L. E. King

Clerk.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

ADJOURNED MEETING.

MONDAY, JULY 14, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

The roll being called there were:

Present—Messrs. Carr, Clark Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Absent—Mr. Sergel—One.

President Sergel being absent, Mr. Lawley moved that Mr. Paullin act as temporary chairman of the meeting.

The motion prevailed.

MINUTES.

Mr. Lawley moved that the minutes of the Proceedings of the regular meeting of June 26, 1919, be approved, as printed, without being read.

The motion prevailed.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 14, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN:—Your Committee on Finance reports that the Sanitary District in carrying out the terms and conditions of an agreement between the Sanitary District and the City of Chicago, dated October 27, 1910, (page 1115 of the Proceedings) and four supplementary and amendatory agreements thereto all relating to the rehabilitation, extension and operation of the electric street lighting system of said City, constructed four new substations for said City and furnished and installed therein, and also furnished and installed in other substations in said City and in the streets, alleys and public places thereof, certain buildings, transformers, regulators, meters, poles, cables, wires, conduits, appliances and equipment.

Your Committee further reports that it is advised by the Attorney that the officials of said City have requested the Sanitary District to execute and deliver to it such quitclaim deeds, bills of sale and other legal documents as may be necessary to specifically transfer to said City the legal title in and to the property above described in order to make a complete and final settlement between said Sanitary District and said City of all the terms and conditions of said agreements relating to said property.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees and Clerk be, and they are hereby, authorized and directed to execute for and on behalf of the Sanitary District and in its name all such quitclaim deeds, bills of sale and other legal documents as in the opinion of the Attorney may be necessary in order to fully comply with the request of said City above set forth.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 14, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that tax anticipation warrants of the Sanitary District in the sum of $3,000,000.00, the issuance of which was authorized by an ordinance of the Board of Trustees of the Sanitary District passed October 17, 1918 (page 1173 of the Proceedings) will mature on July 15, 1919.

Your Committee further reports that interest on said $3,000,000.00 tax anticipation warrants at the rate of five per cent per annum, amounting to the sum of $112,500.00 will also fall due on July 15, 1919.

Your Committee having considered

the matter, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to draw a warrant payable to the order of the Treasurer of the Sanitary District in the sum of $3,112,500.00 to pay the principal and interest due July 15, 1919, on the tax anticipation warrants of the Sanitary District above referred to as follows:

The principal of 25 tax anticipation warrants, in the sum of $100,000.00 each, numbered consecutively from 1 to 25, both inclusive	$ 2,500,000.00
The principal of 10 tax anticipation warrants, in the sum of $50,000 each, numbered consecutively from 26 to 35, both inclusive	500,000.00
Interest on said tax anticipation warrants at the rate of 5 per cent per annum from October 15, 1918 to July 15, 1919	112,500.00
Total	$ 3,112,500.00

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

WILLIS O. NANCE,
GEORGE W. PAULLIN,
MATT A. MUELLER,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 14, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance respectfully reports that immediately after the adoption of the report and passage of the order of July 3 by the Board of Trustees with reference to the sale of three million dollars' worth of bonds of the City of Chicago, five million dollars' worth of said bonds to be received by the The Sanitary District of Chicago from the City of Chicago in payment of the debt due the Sanitary District from the City of Chicago, the Chairman of the Committee on Finance called upon the Comptroller of the City of Chicago and was informed by the latter that it would be possible to get only three million dollars' worth of said bonds signed up and delivered to the Sanitary District on or before July 15, 1919;

That a special meeting or conference was called on July 9th of all of the Trustees of the Sanitary District then in the City, and said Trustees, after ascertaining the facts, reached the conclusion that the Chairman of the Committee on Finance and the Clerk should be authorized and directed to secure the best bids possible for said three millions dollars' worth of bonds of the City of Chicago and present the result of their efforts at the adjourned meeting of the Board of Trustees to be held on Monday, July 14, at 2 o'clock p. m.;

That they should by circular letter notify every bank and bond house in the City of Chicago and secure such advertising as they deemed expedient and likely to produce the desired results—namely, to get the best bids possible for such bonds.

Your Committee further reports that

a circular letter was prepared and printed on the stationery of the Sanitary District as follows:

"Municipal Bond Sale.

"To Bankers and Bond Buyers:

"Three millions of City of Chicago Judgment Funding 4 per cent Serial Gold Bonds, approved by the voters at a regular election April 1, 1919, in $1,000 denomination. Maturities in years A. D. 1930, 1931, 1936, 1937, 1938 and 1939 in $500,000 amounts respectively. All issued dated July 1, 1919, are now owned and in possession of The Sanitary District of Chicago.

"Proposals for the purchase and sale of these $3,000,000.00 of bonds will be received Monday, July 14, 1919, until 11 o'clock a. m.

"Proposals should be addressed to "Chairman of Committee on Finance, The Sanitary District of Chicago," 910 South Michigan Avenue, Seventh Floor, Chicago, Illinois, and delivered to the Clerk of The Sanitary District before 11 a. m. Monday, July 14, 1919.

"Validity of these bonds have been passed upon by Messrs. Wood and Oakley, Attorneys, and a copy of their favorable opinion will be furnished upon request.

"The City of Chicago has provided by Ordinance, a Sinking Fund to care for these bonds upon maturity.

"These bonds come lawfully into the possession of The Sanitary District of Chicago from the City of Chicago in payment of judgments in favor of The Sanitary District for constructing the Electric Lighting Plant and Equipment for the city.

"The right to reject any and all proposals is reserved.

"The Sanitary District of Chicago.
"L. F. King, *Its Clerk.*

"Chicago, July 9, 1919."

That said letter was mailed on July 9, 1919, to all of the banks in Chicago and to all the leading bond houses of Chicago, the total number of said letters being about 150; that in addition thereto the Clerk by means of telephone calls and personal visits to various banks and bond houses, supplemented said letter for the purpose of getting before all possible purchasers of said bonds the fact that said sale was contemplated and that said bids were desired on or before 11 o'clock a. m., July 14, 1919; that in addition to the foregoing said letter was published as a full page ad on page 56 of the Economist, issued July 12.

Your Committee further reports that every available means was utilized to secure full publicity as to the proposed sale of said bonds of the City of Chicago and as to the time within which bids therefor should be received by The Sanitary District of Chicago.

Your Committee further reports that five bids were received and opened by the chairman of this committee on the afternoon of this, the 14th day of July, which bids are for three million dollars City of Chicago Judgment Funding Bonds to be in coupon form and in denominations of $1,000 each, dated July 1, 1919, due and payable $500,000 each year for the years 1930, 1931, 1936, 1937, 1938 and 1939, and said bonds bearing interest at the rate of 4 per cent per annum, payable semi-annually, which are as follows:

1. Paine-Webber & Company of New York, Chicago and Boston, with offices in the Rookery Building, Chicago, $2,805,000.

2. The Northern Trust Company, Illinois Trust & Savings Bank, William R. Compton Company and the Bankers' Trust Company of New York, jointly bid the sum of $2,837,155.

3. National City Company, E. H. Rollins & Sons, A. D. Leach & Com-

pany and Halsey, Stuart & Company in a joint bid of $2,809,770.

4. James L. Martin & Company for themselves and Esterbrook Company, R. L. Day & Company and Merrill Oldham Company of Boston, $2,825,700.

5. Harris Trust & Savings Bank of Chicago, Continental & Commercial Trust & Savings Bank of Chicago, First Trust & Savings Bank of Chicago and the Merchants' Loan & Trust Company of Chicago, in a joint bid of $2,824,911.

Each of said bids includes accrued interest to date of delivery of bonds.

From the foregoing it appears that the joint bid of the Northern Trust Company, Illinois Trust & Savings Bank of Chicago, William R. Compton Company and the Bankers' Trust Company of New York, for the sum of $2,837,155, is the highest and best bid received for said three million dollars City of Chicago bonds.

Your Committee having considered the matter and being fully advised in the premises, recommends the passage of the following order:

Ordered, That the joint bid of the Northern Trust Company, Illinois Trust & Savings Bank of Chicago, William R. Compton Company and the Bankers' Trust Company of New York, in the sum of $2,837,155 and accrued interest to date of delivery, being the highest and best bid offered for said three million dollars City of Chicago Judgment Funding Bonds, dated July 1, 1919, as hereinbefore set forth and described, be and the same is hereby approved and accepted; and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to deliver said three million dollars City of Chicago Judgment Funding Bonds aforesaid to said Northern Trust Company, Illinois Trust & Savings Bank of Chicago, William R. Compton Company and the Bankers' Trust Company of New York, upon receipt in cash from said purchasers of the said sum of $2,837,155, with accrued interest on said bonds to date of delivery, and to execute and deliver any and all documents, papers or letters which are or may be necessary in connection with the consummation of the sale and delivery of said bonds and receipt of consideration therefor as above stated.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 14, 1917.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for payment of payrolls and recommends that they be approved and ordered paid:

Miscellaneous Accounts.

L. F. King, Clerk (repair to walls, Main Channel bridges and North Shore Channel bridges)—		
Construction Account	$ 919.02	
Maintenance and Operation Account	4,006.85	
		$ 4,925.87
Electrical Department.		
L. F. King, Clerk (semi-monthly payroll)		17,240.17
Grand Total		$ 22,166.04

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

ADJOURNMENT.

Mr. Mueller moved that the Board adjourn.

The motion prevailed.

L. F. King.

Clerk.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, JULY 17, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

The roll being called, there were:

Present—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Absent—Mr. Sergel—One.

President Sergel being absent, Mr. Lawley moved that Mr. Paulin act as temporary chairman of the meeting.

The motion prevailed.

BIDS.

The Clerk opened and read the bids received for lubricating, transformer and other oils, gasoline and kerosene, as shown on page 878A of the Proceedings.

Mr. Clark moved that the bids be referred to the Chief and Electrical Engineers for tabulation and to the Committee on Finance for report.

The motion prevailed.

The Clerk opened and read the bids received for changing the present City of Chicago 5,000 volt aerial construction under subways, to steel pipe, under-

ground armored cable, or standard underground construction, for painting tubular steel poles and equipment thereon, and for painting cast iron lamp posts, as shown on the schedule printed on page 878B of the Proceedings.

Mr. Littler moved that the bids be referred to the Electrical Engineer for tabulation and to the Committee on Electrical Development for report.

The motion prevailed.

MINUTES.

Mr. Lawley moved that the minutes of the Proceedings of the regular meeting of July 3, 1919, be approved as printed, without being read.

The motion prevailed.

REPORTS OF OFFICERS.

The Clerk presented the report of the Treasurer for the month of June, 1919, which was ordered published and filed, as follows:

THE SANITARY DISTRICT OF CHICAGO—TREASURER'S REPORT FOR JUNE, 1919.

Receipts.

Balance on hand at date of last report		$405,522.96

GEORGE M. REYNOLDS,
Treasurer, The Sanitary District of Chicago.

The Clerk presented the following report, which was ordered published and filed, as follows:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—The judgments against the City of Chicago and in favor of The Sanitary District of Chicago for the payment of which bonds of the City of Chicago were to be taken by the Sanitary District were as follows:

Judgment entered December 27, 1916, for	$ 920,882.85
Judgment entered June 20, 1917, for	142,048.17
Judgment entered February 7, 1918, for	1,896,003.51
Judgment entered December 17, 1918, for	2,071,088.41

These judgments include an additional amount of $29.25 court costs.

The total amount of the principal of said judgments, with interest thereon at 5 per cent per annum from the date of entry of said judgments, respectively, to July 1, 1919, plus said court costs amounting to the sum of $29.25, is $5,348,056.99.

Pursuant to the orders of the Board of Trustees heretofore passed, and the authority therein given, the undersigned Clerk of the Sanitary District, in company with Trustee James H. Lawley, Chairman of the Committee on Finance, former Clerk John McGillen and the Attorney for the Board visited the office of the City Comptroller of Chicago on July 15, 1919, and there signed and executed the necessary papers and documents involved in the transaction with the city in regard to said judgments and the payment thereof, and the undersigned Clerk received from said City Controller of Chicago bonds of said City of Chicago of the face value of $3,000,000, also an interim certificate for bonds of said City of Chicago of the face value of $2,347,000, and checks for the additional sum of $1,056.99, making a total of $5,348,056.99, the amount of said judgments, interest and costs as aforesaid, and the Chairman of the Committee on Finance and the Attorney then and there executed and delivered written satisfaction of said judgments.

Said bonds of the City of Chicago of the face value of $3,000,000, were on said day immediately taken by the undersigned Clerk and delivered to the Northern Trust Company for it, and the Illinois Trust & Savings Bank, William R. Compton Company and the Bankers' Trust Company of New York, the joint purchasers of said bonds, said banks having submitted the highest and best bid therefor, said bid being for the sum of $2,837,155, and having been accepted by the Board of Trustees at its meeting on Monday, July 14, 1919, and checks for the aggregate sum of $2,842,155.10, being the amount of their purchase price, plus accrued interest on said bonds earned for the first fifteen days of the current month of July amounting to $5,000.10, were then and there delivered by said Northern Trust Company to the undersigned Clerk, who at once deposited said checks with the Treasurer of The Sanitary District of Chicago.

Said interim certificate for bonds of the City of Chicago of the face value of $2,347,000 was on the same day deposited with the Treasurer of the Sanitary District and is now in his possession.

The assistance of retiring Clerk, Mr. John McGillen, in the matter of securing the widest possible publicity with reference to the proposed sale of said bonds of the City of Chicago by the Sanitary District which resulted in securing the bids received, is very much appreciated.

It is a pleasure to report that Hon. Geo. F. Harding, Comptroller of the City of Chicago, expressed himself to the representatives aforesaid as being much gratified over the bid prices received

by the Sanitary District for the aforesaid bonds of the city, and that George M. Reynolds, Treasurer of the Sanitary District, stated to the representatives of the District that the Board of Trustees are to be congratulated upon their success in securing the price for said bonds which they obtained.

Attached hereto is the receipt of the Northern Trust Company on behalf of it and its associate bidders aforesaid for said bonds of the City of Chicago of the face value of $3,000,000, which said receipt is made a part of this report.

Respectfully submitted,

L. F. KING,
Clerk of The Sanitary District of Chicago.

The Clerk presented the report of the Chief Engineer for the month of February, 1919, which was ordered published and filed, as follows:

CHICAGO, March 1, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I herewith present the report of the Engineering Department for the month of February, 1919, giving the detailed operations of the same.

CONSTRUCTION.

NORTH SHORE CHANNEL.

Spoil Banks.

The National Brick Company removed no material from the spoil banks of this channel during the month.

Sloping Banks.

Byrne Brothers Dredging & Engineering Company, contractors, carried on no work during the month.

CALUMET-SAG CHANNEL.

Section No. 1.

James O. Heyworth, contractor, continued operations throughout the month. Dragline No. 2 was engaged in hoisting and backfilling turning basin at station 6+80 from the 3d to the 6th and between stations 6+50 and 6+80 from the 6th to the 9th. Locomotive crane No. 1 was engaged in cleaning up channel between stations 5+50 and 9+00 from the 26th to the 28th. Blasting was carried on at station 5+00 on the 27th and 28th, removing high spot. All of the aforementioned work was carried on in one 10-hour shift per day. Pumping channel was carried on at station 28+00 from the 1st to the 28th, working two 12-hour shifts per day. One man was engaged in making inspection of outfalls from Sections 1 to 10 on the 1st. One man engaged in watching dam at Archer road on the 1st. One man was engaged in cleaning out holes for blasting on the 7th. Thirty men were engaged in cleaning up the channel on the 17th, and 43 men on the 18th. An average daily force of 42.4 men was employed. At the end of the month 97.4 per cent of the total estimated value of the contract was completed.

Section 13.

A. Guthrie & Co., contractors, closed down all work for the winter on December 21, 1918, and continued pumping channel as follows: At station 782+00 from the 4th to the 7th, 11th to 21st, and 24th to 28th, working one 5-hour shift per day and at station 749+00 from the 3d to the 5th, 10th to 16th, 20th to 23d, 27th and 28th, working one 7-hour shift per day. An average daily force of 2.2 men was employed. At the end of the month 58.4 per cent of the total estimated value of the contract was completed.

The B. & O. Railway Company employed a force of 2 men in drilling holes in plates for interlocking system from the 1st to the 28th, working one 8-hour shift per day. A force of 6 men was engaged in gauging tracks on the P. S. spur track on the 10th, working one 8-hour shift. A force of 6 men in unloading and spreading cinders and grading tracks along north and south approaches to Stony Creek trestle, working one 8-hour shift per day.

The Grand Trunk Western Railway

Company employed a force of 10 men raising telegraph wires on the G. T. W. Right of Way, Broadway to Vermont streets, from the 1st to the 3d, working one 8-hour shift per day.

The C. R. I. & P. Ry. Co. employed an average daily force of 14 men, erecting pile driver on the 24th, driving piles for temporary approach trestle to R. I. bridge from the 25th to the 27th, unloading ties and material for trestle on the 28th, working one 8-hour shift per day.

Section 14.

A. Guthrie & Co., contractors, closed down their plant for the winter on December 21, 1918, and continued pumping channel at station 837+00 throughout the month, working an average of six hours daily.

SEWERS.

CALUMET INTERCEPTING SEWER.

Contract Section No. 6.

Byrne Brothers Dredging & Engineering Company, contractors, carried on a small amount of work throughout the month, consisting of maintenance and repairs on the plant. An average daily force of 3.5 men was employed throughout the month.

Evanston Intercepting Sewer.

Nash-Dowdle Company, contractors, continued operations throughout the month. The work consisting of cleaning the sewer constructed in tunnel in Elmwood avenue and Custer avenue, which work was suspended on the 25th. The construction of manholes and sewer connections at various locations was carried on throughout the month. An average daily force of 32 men was employed. At the end of the month 99.2 per cent of the work was completed.

Temporary Pumping Plant.

Nash-Dowdle Company continued pumping throughout the month. An average daily force of 3 men was employed.

Desplaines River Intercepting Sewer.

Nash Brothers, contractors, continued operations throughout the month. The work consisting of construction of main line sewer in tunnel on First avenue north of 12th street. An average daily force of 64 men was employed.

PUMPING STATIONS.

Calumet Sewage Pumping Station.

T. J. Forschner Contracting Company, contractor, continued operations throughout the month. The work consisted of building floor and wall forms and other miscellaneous items. An average daily force of 25 men was employed.

Evanston Sewage Pumping Station.

Nash-Dowdle Company, contractors, commenced work on the 21st. Excavating was carried on through the balance of the month. An average daily force of 8 men was employed from the 21st to the 28th.

Stock Yards Testing Station.

The Sanitary District Organization employed a force of three men, throughout the month, dismantling this station preparatory to moving same to the North Branch of the Chicago River, where it is to be used for testing tannery wastes.

MAINTENANCE AND OPERATION.

MAIN CHANNEL.

Controlling Works.

The bear trap dam was shut down the entire month. The sluice gates were closed the entire month.

MAIN CHANNEL EXTENSION.

Bridges.

The Sanitary District Organization employed a force of men on rebuilding and painting the fence along the south side of 16th street, Lockport, between Deep Run and the Main Channel. Repairs were made to the floor, indicator machinery and machinery houses of the

9th street bridge and repairs were made to the machinery houses of the 16th street bridge.

Butterfly Dam.

This dam was operated on the 2d, 9th, 16th and 23d. The heater was repaired on the 5th.

Dams at the Power House.

The 48-foot and 12-foot dams were closed the entire month.

The gauges at the dam house were cleaned and repaired on the 6th and 7th. Samples of canal water were taken every eight hours for the Sanitary Division. Three men were on duty working shifts of eight hours each.

I. & M. Canal Lock at the Power House.

No boats passed through the lock during the month. No one was on duty at this lock during the month. The heater was repaired on the 6th.

DESPLAINES RIVER IMPROVEMENT.

BRIDGES.

Sixteenth Street Bridge.

The Sanitary District Organization made repairs to the floor of this bridge. The work was begun on the 3d and completed on the 7th.

PUMPING STATIONS.

39th Street Pumping Station.

This station was operated, pumping sewage throughout the month. The pumps were operated as follows:

Sewer Pump No. 1 was operated some part of six days, or a total of 60 hours and 55 minutes. Pump No. 2 some part of 15 days, or a total of 251 hours and 50 minutes. Pump No. 3 some part of 5 days, or a total of 13 hours and 25 minutes. Pump No. 4 some part of 16 days, or a total of 374 hours. The four pumps were operated for a grand average of 6 hours and 15 minutes for each day of the month, and pumped an average of 8,927 cubic feet of sewage for each minute of the month. Fresh water pumps Nos. 5 and 6 were shut down the entire month.

The blow-off valves on boilers Nos. 7 and 8 were changed. Repairs were made to the ash conveyor, the house pump and to the coal elevator, the latter on account of a break on the 28th.

Lawrence Avenue Pumping Station.

This station was operated, pumping sewage throughout the month. The pumps were operated as follows:

Sewer pump No. 1 was operated some part of five days, or a total of 12 hours and 5 minutes. Pump No. 2 some part of 15 days, or a total of 264 hours and 10 minutes. Pump No. 3 some part of 21 days, or a total of 409 hours and 5 minutes. The three pumps were operated for a grand average of 8 hours and 10 minutes for each day of the month, and pumped an average of 3,692 cubic feet of sewage for each minute of the month. The fresh water pump No. 4 was shut down the entire month.

Boiler No. 1 was thoroughly overhauled between the 17th and 21st. A hydrostatic pressure of 140 pounds was applied on the 21st to test same. Work was begun on the 24th on replacing the arch of boiler No. 1. The overhauling of sewage pumping unit No. 1 was begun on the 17th, but was not completed at the end of the month. Minor repairs were made to pumping engine No. 3. A heavy rain on the 28th taxed the cacapacity of the station, one pump and one boiler being out of service at the time.

Wilmette Pumping Station.

This station was operated, pumping fresh water, throughout the month. The pumps were operated as follows"

Pump No. 1 was operated some part of 27 days, or a total of 427 hours and 30 minutes. Pump No. 2 some part of one day, or a total of 11 hours and 10 minutes. Pump No. 3 some part of 25 days, or a total of 349 hours and 57 minutes. Pump No. 4 some part of 27

days, or a total of 435 hours and 21 minutes. The four pumps were operated for a grand average of 10 hours and 56 minutes for each day of the month, and pumped an average of 14,415 cubic feet of fresh water for each minute of the month.

Miscellaneous Equipment.

The Sanitary District Organization employed a force of three men removing the "cement gun" plant from scow No. 2 at 31st and Western avenue, preparatory to repairing the scow. The plant was all removed at the end of the month.

STRUCTURES AND EQUIPMENT FOR SANITARY AND SPECIAL INVESTIGATIONS.

Morton Grove Sedimendation Plant.

This plant was operated throughout the month and the regular maintenance and operation supervised by the Sanitary Division.

Laboratory at 39th Street.

Chemical analyses were made weekly of samples collected from the Main Channel and the Illinois River at Morris, Ottawa, Peru and Chillicothe. Special analyses were made on the samples sent from Lockport.

Sewer and Rain Gauges.

Rain gauges were operated at the 39th Street Pumping Station, Stock Yards Testing Station, Lockport, Kensington and at 31st street and Western avenue. The records collected were worked up as time permitted.

Investigation of Water Pollution.

Daily samples were collected from Lake Michigan at 39th street and from the Main Channel at Lockport. Weekly samples from Lockport and the Illinois River at Morris, Ottawa, Peru and Chillicothe.

ENGINEERING.

Drafting Division.

The following work was carried on during the month: Tracing contract drawings of the Des Plaines River Sewage Treatment Plant. Preparing roster for Board room. The reducing of Stockyards map was continued. Revising index. Preparing Tax Exemption maps for filing with Cook County Assessor. Indexing committee reports. Work on the Calumet Sag Atlas and Chicago River Atlas was continued. Computing co-ordinates for North Branch Survey. Copying records at the County Building for Chicago River Atlas. Filing warehouse index cards. Preparing lease map for lots 22 to 24, Main Channel. Checking Cook County tax exemption lists. Preparing plat for ordinance section 1, Calumet sewer. Plotting hubs on index map of North Branch Survey. Preparing drawings for gauging weirs for sewer outlets along North Branch. Posting M. C. Lease map to date. Writing index cards.

Sanitary Division.

The preparation of a report on the testing station work at the Stock Yards was continued. The preparation of plans and specifications for the Calumet sewer was continued. Conferences were held with officials of the City of Chicago. Preparation of plans of the Des Plaines River treatment work was continued. The preparation of supplementary plans for the Calumet pumping station was continued. Correspondence was carried on with Consulting Engineer A. B. Wood on all pumping stations. Studies were made of the proposed rearrangement of the 95th Street Pumping Station.

The preparation of plans for the intercepting sewer in South Chicago was continued. The preparation of plans of the storm overflow to the Calumet River at Wildwood was continued. Studies were continued on an auxiliary generator station at the Calumet Pumping Station, to be run by oil engines. Conferences were held with various parties from the Calumet region in Indiana over

proposed schemes for sewage diversion and treatment. An inspection was made of the sewage treatment works at Atlanta, Ga.

Hydraulic Measurement Division.

The self-recording gauges at the Main Channel at Willow Springs and Lemont and on the Lake Front at the U. S. Coast Guard Station were operated and periodically inspected. The records from the gauges were worked up in the office.

Bridge Division.

Work was continued on the details of the reinforced concrete work for the Calumet Sewage Pumping Station and structural steel work for the Des Plaines River Sewage Pumping Station. Details of the structural steel work for the Evanston Sewage Pumping Station were begun. On February 13th the Committee on Engineering recommended the construction of a bascule bridge across the Main Channel at California avenue. Considerable time was spent during the month in making comparative estimates of the cost of different types of bascule bridges.

Field Parties.

Party was employed on Chicago River dredging and docking, rerunning base lines. North Shore Channel sloping office and field work, gauge setting. Survey of the North Branch of the Chicago River on account of sewage disposal plant. Main Channel section "O" survey of lot 4 east of Western avenue. General office work at Canal street office. Sewer department on account of weir construction.

The Calumet-Sag field parties performed the usual routine construction duties as follows: The Sag Division on Section 1, the Blue Island Division on Sections 13 and 14.

The general engineering force and other employes continued superintending engineering, construction and maintenance work, checking estimates, compiling unit construction costs of the Evanston and Calumet sewers and of the Calumet-Sag Channel sections. Keeping the accounts of the department, preparing vouchers, furnishing information for other departments and performing other necessary duties, etc.

Respectfully submitted,

G. M. WISNER,
Chief Engineer.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance, in accordance with Rule 46 of the Rules and Regulations of the Board, herewith presents weekly reports made to your Committee by the Clerk of all purchases made by him for and on account of The Sanitary District of Chicago from March 31 to May 31, 1919, inclusive.

Your Committee further reports that it has examined said reports, found them to be correct, has approved same and recommends that they be accepted and placed on file.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Lawley, Littler, Mueller, Nance and Paullin—Five.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that the Board on June 5, 1919 (page 709 of the Proceedings), awarded a contract to the Hall Truck Sales Co., the agents of the Lewis Hall Iron Works, for furnishing a five-ton auto truck to the Sanitary District for the sum of $4,750; that since said award was made, said Lewis Hall Iron Works has notified the District it would not execute a contract for furnishing said auto truck, alleging as the reason therefor that the employes of the Timken Roller Bearing Company, on which it depended to furnish various parts of said auo truck, were on a strike and said parts could not be obtained.

Your Committee is, therefore, of the opinion that said order of June 5, 1919 (page 709 of the Proceedings) awarding said contract to the Hall Truck Sales Co., the agent of the Lewis Hall Iron Works, should be repealed.

Your Committee further reports that it has again considered the bids for furnishing said auto truck which were referred to your Committee at the meeting of May 8, 1919 (page 469 of the Proceedings), together with report submitted by the Electrical Engineer, and is of the opinion that all bids for furnishing said auto truck should be rejected.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the order of the Board adopted June 5, 1919 (page 709 of the Proceedings), awarding a contract to the Hall Truck Sales Co., the agent of the Lewis Hall Iron Works, for furnishing a five-ton auto truck to the Sanitary District, be, and the same is hereby repealed; and it is further

Ordered, That all bids received for furnishing said five-ton auto truck to the Sanitary District, be, and the same are hereby rejected; and it is further

Ordered, That the checks of the respective bidders for furnishing said auto truck be returned to said bidders; and it is further

Ordered, That the Clerk re-advertise for bids for furnishing said five-ton auto truck.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance herewith transmits to the Board a grant of easement from Bessie C. Johnson and Wendell H. Johnson, her husband, whereby said grantors, for the consideration of $25.00, grant to the Sanitary District a perpetual easement to construct, reconstruct, maintain and operate an intercepting sewer and appurtenances thereto in the Desplaines River District, in, under and through certain real estate owned by them. Said easement is in the usual form in use by the Sanitary District in such cases.

Your Committee further reports that it has examined said grant of easement which has been approved by the Chief

Engineer and Attorney, and therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate the said form of easement which is hereto attached, the same having been duly executed by the grantors above named, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to draw a warrant in the sum of $25.00, payable to the order of Bessie C. Johnson and Wendell H. Johnson and deliver the same to them in full payment of the consideration for said grant.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that the Village of Maywood on June 12, 1919, passed an ordinance granting the Sanitary District the right, permission and authority to enter upon, use and occupy North Second avenue from the North limits of said Village to North Eighth street, also North Eighth street from Second avenue to First avenue and First avenue from North Eighth street to the Southern limits of the Village of Maywood for the purpose of constructing, reconstructing, repairing, maintaining and operating an intercepting sewer, adjunct and addition to its Main Channel.

Your Committee further reports that it has carefully examined said ordinance which has been approved by the Chief Engineer and Attorney and is of the opinion that the rights of the Sanitary District are properly safeguarded therein and said ordinance should be accepted by the Board, and therefore recommends the passage of the following order:

Ordered, That the ordinance of the Village of Maywood above specified, which is herewith transmitted to the Board, be and the same is hereby approved and accepted by The Sanitary District of Chicago, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to file with the Clerk of the said Village of Maywood such documents as may be necessary to make such acceptance effective, and it is further

Ordered, That the form of said ordinance be printed in the Proceedings of the Board.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy,

Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

The following is the ordinance passed by the Board of Trustees of the Village of Maywood:

AN ORDINANCE

Concerning the Right of the Sanitary District of Chicago to Construct, Reconstruct, Maintain and Operate a Certain Intercepting Sewer, Adjunct and Addition to Its Main Channel Within the Village of Maywood.

Be It Ordained by the President and the Board of Trustees of the Village of Maywood:

SECTION 1. The Village of Maywood hereby gives and grants to The Sanitary District of Chicago the perpetual right, permission and authority to enter upon, use and occupy North Second avenue from the North limits of said Village to North Eighth street, also North Eighth street from Second avenue to First avenue and First avenue from North Eighth street to the Southern limits of the Village of Maywood for the purpose of constructing, reconstructing, repairing, maintaining and operating an intercepting sewer, adjunct and addition to its Main Channel. The location, size and manner of construction of said intercepting sewer, adjunct and addition shall be in accordance with such plans and specifications as may adopted by The Sanitary District of Chicago, and

SEC. 2. That whenever or wherever said The Sanitary District of Chicago shall in the construction or reconstruction of said intercepting sewer, adjunct and addition to its Main Channel, intersect or cut, or cause to be intersected or cut any sewers, sewerage pipes, or other pipes or structures through which sewage or drainage may flow, said The Sanitary District of Chicago shall at its sole cost and expense restore said sewers, sewerage pipes or other pipes and structures to their former condition of usefulness or connect the same directly with said intercepting sewer in a manner to be approved by the Chief Engineer of The Sanitary District of Chicago.

SEC. 3. That The Sanitary District of Chicago shall at its own expense make or cause to be made such changes in the location of the water mains and water pipes, police and fire alarm electrical wires and other property and utilities of said Village of Maywood as may be rendered necessary by the construction or reconstruction of said intercepting sewer, adjunct and addition: All such changes shall be made at the places and in the manner designated by the Chief Engineer of The Sanitary District of Chicago; provided that such water main and water pipes, police and fire alarm electrical wires and other property and utilities of said Village of Maywood so changed by The Sanitary District of Chicago in the said construction and reconstruction shall be so restored or placed that they and each of them will perform a service equal to that which they and each of them did perform before they were thus changed by The Sanitary District of Chicago and provided, further, that no liability shall be imposed on the Sanitary District for temporarily interfering with the service of such water mains, water pipes, police and fire alarm electrical wires and other property and utilities of said Village of Maywood.

SEC. 4. The said intercepting sewer, adjunct and addition of The Sanitary District of Chicago, to the said Main Channel to be constructed as provided in this ordinance, shall be constructed, maintained and operated solely by The Sanitary District of Chicago, and the said Village of Maywood shall not be held responsible in any manner for the manner of construction, reconstruction, maintenance or operation for the same; and said The Sanitary District of Chicago shall indemnify and hold harmless the Village of Maywood from any and all claims or damages to real or personal property by reason of the loca-

tion, construction or manner of construction, reconstruction, maintenance or operation of said intercepting sewer, adjunct and addition within the corporate limits of said Village of Maywood.

SEC. 5. That the said intercepting sewer, adjunct and addition to the main channel of The Sanitary District of Chicago shall be constructed, reconstructed, maintained and operated by said The Sanitary District of Chicago at its sole cost and expense.

SEC. 6. That The Sanitary District of Chicago shall restore as soon as practicable to their former state of usefulness, all streets and alleys and all pavements, walks, cross-walks, curbs and other public property upon, under and through which said intercepting sewer, adjunct and appurtenances are constructed and which are damaged thereby, within the corporate limits of said Village of Maywood; except that The Sanitary District of Chicago shall not be held liable for such ordinary wear and tear as may be sustained by hauling material, surplus excavation or equipment in motor trucks, horse drawn wagons or trucks, or other vehicles. All surplus excavation and other spoil shall be removed from the site of the work by The Sanitary District of Chicago as soon as practicable, said Village of Maywood hereby agreeing to permit any surplus soil occasioned by said work to be carried through the streets and alleys within said Village of Maywood, and to be deposited within the corporate limits of said Village at such places as may be agreed upon. The public use of the public property within the said Village of Maywood above specified shall not be unnecessarily interrupted or interfered with.

SEC. 7. That insofar as is practicable, said The Sanitary District of Chicago shall construct and maintain temporary bridges or temporary diversions for both street and foot traffic until the pavement, walks and cross-walks removed or disturbed by reason of said work of excavation shall be restored to their former condition of usefulness.

SEC. 8. The said Village of Maywood does hereby order and direct and shall by ordinance require all persons, partnerships or corporations who shall at the time of the construction or reconstruction of said intercepting sewer, adjunct and addition own, operate or maintain any conduits, wires, poles, pipes, gas mains, manholes, cables, steam and street railway tracks and equipment or other structures within any portion of the streets, public alleys and highways to be excavated in the construction, reconstruction, repair, extension or modification of such intercepting sewer, adjunct and addition at his, its or their own expense to make such changes in the location of such conduits, wires, poles, pipes, gas mains, manholes, cables, steam and street railway tracks and equipment or other structures as may be rendered necessary by the construction, reconstruction, repair, extension or modification of said intercepting sewer, adjunct and addition to said main channel.

The Sanitary District is hereby given and granted the right at its sole expense, to take such steps in the name of the Village of Maywood or otherwise as it may deem necessary for the enforcement of this ordinance or any other ordinance of the Village of Maywood necessary to be enforced to accomplish the purposes herein mentioned; and the said The Sanitary District of Chicago shall indemnify and save harmless the said Village of Maywood from any and all damages or claims that are in the nature of a legal liability that may be sustained by it by reason of the passage or enforcement of this ordinance or any other ordinance of said Village relating to the subject matter herein stated.

SEC. 9. The Village of Maywood further agrees that The Sanitary District

of Chicago and its contractors may transport to the site of said work, all materials, plant and equipment used in the construction and reconstruction of said intercepting sewer, adjunct and addition to said main channel together with the pumping stations and appurtenances connected therewith, on and across the streets and alleys of said Village of Maywood by the use of dinkey engines and cars running on temporary tracks laid on the surface of said streets and alleys or by the use of horses and vehicles or by other means of transportation, and may also use in said construction and reconstruction work such steam shovels, hoisting engines and other plant and equipment as may be necessary and may dispose of all surplus soil and debris excavated in the course of said work in the same manner as hereinabove specified for the transportation of material, plant and equipment.

SEC. 10. That the Village of Maywood further agrees that any system of sewers hereafter installed by it for the disposal and care of domestic sewage and drainage shall be so constructed as to connect with the said intercepting sewer, adjunct or addition aforesaid, to be constructed by the Sanitary District of Chicago, and it is further agreed that said Village of Maywood, before passing any further ordinances for the installation, construction, extension or reconstruction, modification or change of any description of any system of sewers to care for the domestic sewage and drainage within said Village, will first submit to the Chief Engineer of said The Sanitary District of Chicago for his approval, all plans and specifications concerning the construction thereof, the rules and regulations providing for the connection therewith and the maintenance thereof.

SEC. 11. In consideration of the passage of this ordinance and the benefits conferred thereby on the Village of Maywood, said Village of Maywood shall and does hereby give, grant and issue without fees or costs therefor to The Sanitary District of Chicago or to any contractor to whom the work, or any part thereof specified in this ordinance shall be awarded, all permits or licenses required for doing said work; and shall furnish at regular current rates to said The Sanitary District of Chicago or to any contractor to whom the work or any part thereof shall be awarded, at any existing water connection or hydrant, all water needed by it or them in the performance of said work to the extent of the reasonable capacity of the Village's water plant to furnish the same in addition to the Village's own reasonable needs.

Further said Village of Maywood agrees that it will employ and furnish at its own expense any and all engineers or inspectors required by the rules and ordinances of said Village or who may be employed by said Village for any purpose in connection with the construction, maintenance, repair or reconstruction of said intercepting sewer, adjunct and appurtenance.

SEC. 12. This ordinance shall be in force and effect from and after its passage and approval and the acceptance of the same by The Sanitary District of Chicago, within ninety (90) days from the date of the passage hereof, which acceptance shall be evidenced by a certified copy of the order, resolution or ordinance of the Board of Trustees of The Sanitary District of Chicago accepting the same, filed with the Clerk of the Village of Maywood.

HENRY W. TOLSTED,
President of the Village of Maywood.

Attest:

HOWARD A. ULRICH,
Village Clerk Pro Tem.

Passed June 12, A. D. 1919.

Approved June 12, A. D. 1919.

Approved as to form:

JAS. M. SLATTERY,
Assistant Attorney.

C. ARCH WILLIAMS,
Attorney.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that on June 12, 1919 (page 786 of the Proceedings), the Board authorized the Marshal to have a new stem built on the police boat "White Flyer," and to make certain repairs and betterments to said boat, provided the cost of the same should not exceed the sum of $300.00.

Your Committee further reports that it has received a communication from the Marshal in which he states that when said boat was placed in a dry dock, it was discovered that its seams needed caulking, also that the union scale of wages has been raised since the work on said boat was started by reason whereof it will be necessary to expend an additional sum of $125.00 in performing the work on said boat and he requests that he may be authorized to expend said additional sum.

Your Committee having had the matter under consideration, recommends the passage of the following order:

Ordered, That the Marshal be and he is hereby authorized to expand an additional sum of $125.00 in performing the work above specified.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to report that the semi-annual interest on the nineteenth issue of bonds of the Sanitary District, amounting to the sum of Three Thousand Eight Hundred Forty Dollars ($3,840.00) will fall due August 1, 1919, and recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees and the Clerk be and they are hereby authorized to draw a warrant payable to the order of the Treasurer of The Sanitary District of Chicago for the sum of Three Thousand Eight Hundred Forty Dollars ($3,840.00), to pay the semi-annual interest due August 1, 1919, on One Hundred Ninety-two Thousand Dollars ($192,000.00), of the nineteenth issue of bonds at 4 per cent per annum.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received requests from the Chief Engineer, the Clerk, the Manager of the Department of Real Estate and the Marshal to make transfer of funds from various unexpended accounts to other accounts in order to provide funds for the payment of expenditures for which no appropriation has been made and to increase certain appropriations.

Your Committee having considered the matter, is of the opinion that the requests should be granted and therefore recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby, authorized and directed to make the following transfers in appropriations for the year 1919, in accordance with the several requests of the Heads of the Departments attached hereto.

Department of Engineering.

From Account No. 29-64, repair and replacement service for channels, ditches, reservoirs and docks.....$250.00

To the following accounts:

No. 29-526, repair and replacement service for tools	$ 25.00

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
GEORGE W. PAULLIN.
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance *(except as to vouchers to A. Guthrie & Co., Inc., for labor and material for extra work on the Calumet-Sag Channel, for $40.50, and to Edmund D. Adcock, for services rendered in re Lake Level Controversy, for $669.50, on which Mr. Nance voted "nay")* and Paullin—Seven on all vouchers and eight on all vouchers with the exceptions noted.

Nays—None *(except as above stated).*

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that since the drawings were made and the contract entered into with the Leyden-Ortseifen Company for the construction of the Des Plaines River Sewage Treatment Plant, that experiments which have been made in the sewage treatment plant in Milwaukee indicate that a higher degree of efficiency can be attained by constructing the settling basin to a minimum depth of fifteen instead of thirteen feet as specified, which will increase the cost of this particular item $3,500.00, also by increasing the size of

the pipes to furnish the air to the aeration tanks from six to eight inches as specified to eight to ten inches at an additional cost of $3,500.00, and by making certain changes in the nipples, traps, etc., at an additional cost of $1,500.00. Said increases in the various items will be paid for at the unit prices named in said contract, and he requests that he may order said contractor to perform said additional work under the "extra work" clause of its contract for the construction of said plant.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to order the Leyden-Ortseifen Company to perform the work above specified under the "extra work" clause of its contract for the construction of the Des Plaines River Sewage Treatment Plant, provided that the cost of same shall not exceed the sums of $3,500.00, $3,500.00 and $1,500.00 for the respective items of work above stated.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on June 26, 1919 (page 847 of the Proceedings) authorized the Clerk to advertise for bids for wrecking a portion of the "Union Loop Power House" and for widening the South Branch of the Chicago River to a uniform width of 200 feet by dredging three parcels of real estate, provided that no contract for said work should be entered into between the successful bidder for said work until certain real estate was acquired from the Chicago, Rock Island & Pacific Railway Company and the New York Central Railroad Company.

Your Committee further reports that it is advised by the Attorney that said real estate has been acquired, and the Chief Engineer has presented the completed plans and specifications for doing said work to your Committee for its approval.

Your Committee further reports that it has considered said plans and specifications prepared by the Chief Engineer, has approved same, and, therefore, recommends the passage of the following order:

Ordered, That the plans and specifications prepared by the Chief Engineer for doing the work above specified be, and the same are hereby, approved.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
JAS H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that he has practically completed the plans and specifications for the building to be erected on the foundations now under construction for the Des Plaines River Sewage Treatment Plant, and that inasmuch as the Board is now meeting at intervals of two weeks, he requests that authority be given the Clerk to advertise for bids for doing said work in accordance with the completed plans and specifications therefor.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby, authorized and directed to advertise for bids for doing said work, provided, however, that no contract shall be entered into between the Sanitary District and the successful bidder for said work until said plans and specifications have been approved by the Board.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that in order to prepare plans and specifications for the intercepting sewer to be built in Edbrooke avenue and Edbrooke avenue produced from the Calumet sewage pumping station to the center thread of the Calumet River, it will be necessary to make borings to ascertain the nature of the material to be encountered at an estimated cost of $500.00, and he requests that he may be authorized to have said work done.

Your Committee having considered said request, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to expend the sum of not to exceed $500.00 for doing the work above specified.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that in order to make the necessary repairs to the walls along the Main Channel it is necessary to have the use of a heavy motor boat to transport men and materials and to haul scows, from place to place, as needed. He further states that Mr. Stanley Hart, the owner of the "American Eagle," a 44-foot motor boat, has offered to rent said boat to the Sanitary District during the present working season at a rental of $300.00 per month, which sum is to cover the services of Mr. Hart, the cost of gasoline, oil and repairs and for all liability for damages to said boat and to persons and property, occasioned by the operation and use of said boat, and he recommends that said offer be accepted.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to accept the offer of Mr. Stanley Hart to rent said boat on the terms proposed.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering, to which were referred at the meeting of May 1, 1919 (pages 365A and 365B of the Proceedings), bids for furnishing coal screenings for the Thirty-ninth Street and Lawrence Avenue Pumping Stations, having considered all the proposals presented and qualifications of each bidder, together with a report submitted by the Chief Engineer, is of the opinion that the bid of the Sangamon County Coal Co., the lowest bidder, be rejected for the reasons hereafter stated. The Chief Engineer in his report states than when said bids were first canvassed your Committee concurred in his recommendation that the lowest bidder, the Sangamon County Mining Co., be allowed to furnish a number of cars of the grade of coal offered and that said coal be analyzed to determine its proportion of moisture, ash and B. T. U.'s per pound of dry coal. He further states that from analyses of samples selected from sixteen cars of coal, it appears that none of the coal furnished equaled the guarantee specified.

Your Committee having considered the matter, is of the opinion that the Sterling Midland Coal Company, the next lowest bidder, should be allowed to furnish a number of cars of the grade of coal it offers in order that the coal may be analyzed to determine the proportion of moisture, ash and B. T. U.'s per pound of dry coal therein, and if said coal equals the guarantee specified that then a contract be entered into between the Sanitary District and said company for all the coal advertised for and therefore recommends the passage of the following order:

Ordered, That the bids of the Sangamon County Mining Co. for furnishing coal screenings for the Thirty-ninth Street and Lawrence Avenue Pumping Stations, be, and the same is hereby rejected for the reasons stated, and it is further

Ordered, That the Chief Engineer be, and he is hereby authorized and directed to purchase from the Sterling Midland Coal Company a sufficient number of cars of coal of the grade of coal offered in its bid to enable him to determine by analyses whether the proportions of moisture, ash and B. T. U.'s contained therein equal the guarantee specified and report the result of said analyses to the Board for action, and it is further

Ordered, That the checks of all bidders except the Sterling Midland Coal Company and the Bickett Coal & Coke Company be returned to them.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompaying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on March 14, 1918 (page 183 of the Proceedings), authorized the execution of an agreement dated December 5, 1917, between the Chicago Union Station Company, the Sanitary District and the Pennsylvania Company with reference to the construction of a dock wall by the Chicago Union Station Company along the established west dock line of the south branch of the Chicago River between West Madison street and the north line of Van Buren street and the use by the Sanitary District of certain pieces and parcels of land described in said agreement, under the terms and conditions therein set forth.

Your Committee further reports that it has received a communication from the Chicago Union Station Company in which it states that since the execution of said agreement was authorized by the Sanitary District, the Pennsylvania Railroad Company has acquired all the capital stock of the Pennsylvania Company and has succeeded to all its rights under said agreement, and requests that the Pennsylvania Railroad Company may be substituted as a party to said agreement instead of the Pennsylvania Company, and also requests that the date of said agreement be changed and other minor changes made.

Your Committee further reports that the Chief Engineer and Attorney have considered such changes and make no objection thereto, and your Committee is of the opinion that the request of said company should be granted and therefore recommends the passage of the following order:

Ordered, That the agreement above referred to, and the same is hereby, amended in the following particulars, to-wit:

(a) By substituting as a party to said agreement the Pennsylvania Railroad Company in the place of the Pennsylvania Company.

(b) By changing the date of said agreement from the fifth day of De-

cember, 1917, to the fourteenth day of March, 1918

(c) By striking out the word "owned" as printed on the 39th and 43d lines in the first column on page 185 of the Proceedings and inserting in lieu thereof the word "controlled."

(d) By striking out the words "owned by the Pennsylvania Company being" as printed on the 21st and 22d lines of the second column on page 185 of the Proceedings.

(e) By inserting after the word "being" in the third line in the first column on page 186 of the Proceedings, the words "shown in brown on said exhibit 'A'" and by striking out the words: "the part owned by the Pennsylvania Company being shown in brown on said exhibit 'A,'" as printed on the third, fourth and fifth lines in said column and page.

(f) By striking out the words "owned by the Pennsylvania Company being" as printed in the 25th and 26th lines in the second column on page 187 of the Proceedings.

(g) By inserting after the word "shown" in line 61, second column, page 187 of the Proceedings the words: "in brown."

(h) By striking out the words: "the part owned by the Pennsylvania Company being shown in brown," as printed on 1st, 2d and 3d lines in the first column of page 188 of the Proceedings, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute in triplicate the agreement above specified as amended, the same having been duly executed as amended, by said Chicago Union Station Company, and said Pennsylvania Railroad Company and consented to by the Chicago, Pittsburgh & Fort Wayne Railway Company and by the Director General of Railroads.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
MATT. A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering, to which were referred at the meeting held July 3, 1919 (page 851-A of the Proceedings), bids for the construction of the Sprinkling Filter and appurtenances in the Village of Morton Grove, having considered all of the proposals presented and the qualifications of each bidder, together with the report submitted by the Chief Engineer, finds that the lowest responsible bidder is the Ready & Callaghan Coal Company of Chicago, Illinois.

Your Committee further reports that it is of the opinion that said company is competent to comply satisfactorily with the terms and conditions of the contract for doing said work and having had the matter under consideration recommends the passage of the following order:

Ordered, That the contract for the construction of the Sprinkling Filter and appurtenances in the Village of Mor-

ton Grove be and the same is hereby awarded to the said Ready & Callaghan Coal Company for the unit and lump sum prices named in its bid which aggregate the sum of $37,539.75, which is exclusive of the item for seeding and planting, which work is omitted, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute in duplicate said contract in accordance with the plans and specifications of the Sanitary District when the same shall have been executed by the said Ready & Callaghan Coal Company and a bond for the faithful performance of said contract has been approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,
WALLACE G. CLARK.
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary Discrict of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that in the year 1916 the Highway Commissioners of Calumet Township constructed a tile sewer along the east side of Division street, one-half of which street is in the City of Blue Island, which empties sewage on to the north slope of Contract Section 13 of the Calumet-Sag Channel. He further states that this sewer was constructed after the contract for the excavation and collateral work on said Contract Section of said channel had been let to A. Guthrie & Co., Inc., and the work of connecting said sewer to said channel through the retaining wall of the same was not included in said contract, although an outlet was provided in said wall for making said connection. He further states that in order to avoid a local nuisance this connection should be made at an estimated cost of $500.00, and he requests that he may direct A. Guthrie & Co., Inc., to perform said work under the "extra work" clause of its said contract with the Sanitary District.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized to order A. Guthrie & Co., Inc., to perform the work above specified under the "extra work" clause of its said contract, provided the cost of the same shall not exceed the sum of $500.00.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy,

Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on March 20, 1919 (page 278 of the Proceedings), authorized the Chief Engineer to install weirs at the outlets of sewers entering the North Branch of the Chicago River in connection with his study of the proper method of caring for the sewage entering said branch of the river.

Your Committee further states that it has received a communication from the Chief Engineer in which he states that two automatic gauges which he had installed in connection with said work were stolen, and in order to replace said two gauges and procure three additional automatic gauges for keeping an automatic record of the height of the water in said North Branch, he requests authority to purchase five automatic gauges at an estimated cost of $500.00.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to purchase in the open market for the lowest price obtainable five automatic gauges for use in the work above specified, provided the cost of same does not exceed the sum of $500.00.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development reports that it has received a communication from the Electrical Engineer in which he states that the following contracts for residence lighting have been executed by him:

Illinois Packing Co., 37th place and Morgan street, in Chicago.

Mrs. W. Firnhaber, 645 Vermont street.

Rev. M. Einfeldt, 476 Grove street.

Fred Brincken, 513 Elm street.

Mrs. Chas. Ulrich, 496 High street.

Mrs. D. M. Clopp, 244 Western avenue.

Fred W. Steinweg, 312 Olive street.

Mrs. E. Mear, 287 Burr Oak avenue.

All in Blue Island, Ill.

John A. Anderson, 3016 Carol avenue.

Josephine Sverak, 6511 27th street.

Thos. H. Farrell, 3317 Berkeley avenue.

Mrs. A. A. Miller, 6430 33d street.

Jesse R. Dilley, 3227 Maple avenue.

M. C. Lewis, 3224 Ivison avenue.

P. M. Lewis, 3320 Ivison avenue.

All in Berwyn, Ill.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the action of the Electrical Engineer in executing the con-

tracts for residence lighting with the parties above mentioned be, and the same is hereby ratified and confirmed.

Respectfully submitted,
H. E. LITTLER,
Chairman.
MATT A. MUELLER,
WM. J. HEALY,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith presents contracts with the Otley Paint Mfg. Co., 1742 North Winchester avenue, Chicago, and with Harry A. Sellen, 3145 Ivison avenue, Berwyn, wherein the Sanitary District agrees to furnish and said parties agree to take electrical energy for the periods of time and upon the terms and conditions therein set forth. All of said contracts have been approved by the Electrical Engineer.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute in duplicate the attached contracts which have heretofore been executed by said parties.

Respectfully submitted,
H. E. LITTLER,
Chairman.
MATT A. MUELLER,
WM. J. HEALY,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Employment

Mr. Clark presented the following report from the Committee on Employment:

CHICAGO, July 17, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of action taken:

NEW APPOINTMENTS PROVIDED FOR IN *1919* BUDGET.

Engineering Department.

Victor Tortoriello, Rodman, $100 per month.

Jack Wurts, Chemical Assistant, $100 per month.

Horace D. White, Sub-Instrument Man, $130 per month.

Russell S. Smith, Sub-Instrument Man, $130 per month.

Andrea Filpi, Sub-Foreman, $5.50 per day.

Matt Henderson, Laborer, 50 cents per hour.

James Jamb, Laborer, 50 cents per hour.

Tony Rodighiero, Laborer, 50 cents per hour.

E. Tillman, Laborer, $4.50 per day.

Frank Wagner, Laborer, 50 cents per hour.

Jos. Flynn, Laborer, 50 cents per hour.

Patrick McNichols, Laborer, 50 cents per hour.

Leo Quimet, Laborer, 50 cents per hour.

Ollie Ott, Laborer, 50 cents per hour.

Ernest Johnson, Laborer, 50 cents per hour.

Clarence Gerber, Laborer, 50 cents per hour.

John F. Sullivan, Laborer, 50 cents per hour.

Leo Dolan, Laborer, 50 cents per hour.

Ed. Schneider, Laborer, 50 cents per hour.

Joseph Sullivan, Laborer, 50 cents per hour.

O. Bergman, Mechanic, 60 cents per hour.

J. Corso, Laborer, 50 cents per hour.

Electrical Department.

Horace Roberts, Laborer, 50 cents per hour.

Lee H. Wilkison, Lineman (temporary), $165 per month.

Frank Young, Lineman (temporary), $165 per month.

Harry L. Stanley, Lineman (temporary), $165 per month.

Wm. F. Schultz, Lineman (temporary), $165 per month.

Jos. G. Studley, Lineman (temporary), $165 per month.

INCREASES.

Engineering Department.

Charles Loetz, Sub-Foreman, from $5 to $5.50 per day.

Patrick Holland, Steamfitter, from $7 per day to $1 per hour.

Thos. McCarten, Steamfitter, from $7 per day to $1 per hour.

John Cameron, Steamfitter, from $7 per day to $1 per hour.

Patrick Carlin, Well Digger, from 77½ cents per hour to 90 cents per hour.

Mike Burke, Well Digger, from 77½ cents per hour to 90 cents per hour.

Pete Lannon, Windlass Man, from 67½ cents per hour to 82½ cents per hour.

Thos. Walsh, Windlass Man, from 67½ cents per hour to 82½ cents per hour.

REINSTATEMENTS DUE TO HONORABLE DISCHARGE FROM THE *U. S.* ARMY. SERVICE.

Electrical Department.

David W. Geary, Groundman, $115 per month.

Geo. D. Brooks, Cable Splicer Helper, 75 cents per hour.

Transfer.

I. L. Damrow, from Lineman at $165 per month to Foreman at $190 per month (during vacation period).

Respectfully submitted,

GEORGE W. PAULLIN, *Chairman.*
H. E. LITTLER,
JAS. H. LAWLEY,
MATT. A. MUELLER,
WALLACE G. CLARK,
Committee on Employment.

Mr. Clark moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

MISCELLANEOUS AND NEW BUSINESS.

Mr. Lawley presented the following ordinance:

AN ORDINANCE

Of the Board of Trustees of the Sanitary District of Chicago Appropriating Additional Moneys for Its Corporate Purposes to Be Expended During the Fiscal Year Beginning January 1, 1919, and Ending December 31, 1919.

Be It Ordained by the Board of Trustees of the Sanitary District of Chicago:

SECTION 1. That this ordinance be, and the same is hereby, termed an "Additional Appropriation Bill of The Sanitary District of Chicago for the Fiscal Year Beginning January 1, 1919, and Ending December 31, 1919."

SEC. 2. That the following amounts, or so much thereof as may be authorized by law and as may be needed, are hereby appropriated from any receipts of The Sanitary District of Chicago not heretofore appropriated which may be derived from any other source than from annual taxes heretofore levied in accordance with the law for the corporate purposes of The Sanitary District of Chicago for the fiscal year beginning January 1, 1919, and ending December 31, 1919. The Department and the purposes for which appropriations are made and the amounts appropriated for the various purposes are as follows:

3—DEPARTMENT OF ILLINOIS AND MICHIGAN CANAL AND ILLINOIS RIVER CONDITIONS.

1—*Personal Service.*

11. Salaries and Wages of Regular Employes, General Administration:	
Junior Engineers, 2 at $2,100 for 5 months	$ 1,750.00
Rodmen, 12 at $1,200 for 5 months	6,000.00
Launch Engineer, 1 at $1,800 for 5 months	750.00
13. Compensation for Personal Service other than Salaries and Wages	200.00

2—*Contractual and Impersonal Service.*

211. Railroad and Steamship Transportation (other than local) of persons.	1,000.00
213. Railroad and Steamship Transportation of Things	50.00
235. Blue Printing	100.00
262. Taking care and cleaning of motor vehicles	25.00
27. Boarding and Lodging—Includes service in connection with the feeding and housing of persons only when their routine of living is disturbed necessarily in the prosecution of the business of the Sanitary District	5,000.00
289. Impersonal Service, N. O. C.	50.00
29—5271. Repairs and Replacement Service of Motor Vehicle Equipment	100.00
29—5273. Repairs and Replacement Service of Floating Equipment	100.00

3—*Supplies.*

322. Liquid Fuels	250.00
363. Lubricants	125.00

4—*Materials and Parts for Repairs and Replacements.*

452. Motor Vehicle and Motor Boat Parts	250.00

5—*Equipment.*

5271. Motor Vehicle Equipment	1,683.32
542. Life Saving Equipment	25.00
554. Engineering and Drafting Equipment	1,100.00
57. Uniforms and Wearing Apparel	255.00

8—*Fixed Charges.*

815. Fees for Permits and Privileges	6.00
853. Automobile Insurance	78.00

9—*Custom Work and Contingencies.*

99. Contingencies	1,000.00
	$19,897.32

SEC. 3. The appropriation herein of the amounts for the payments of contract liabilities, or to defray the expense of any project or purpose, shall not be construed as an approval by this Board

of any of said contract liabilities, or of any project or purpose mentioned herein, but shall be regarded only as the provision of a fund or funds, for the payment thereof when said contract liabilities have been found to be valid and legal obligations against The Sanitary District of Chicago, and when properly vouchered, audited and approved by the Board of Trustees, or when any project or purpose is approved and authorized by the Board of Trustees of The Sanitary District of Chicago, as the case may be.

SEC. 4. This ordinance shall take effect and be in full force from and after its passage and publication in accordance with the law.

Mr. Lawley moved that the ordinance be passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Committee of the Whole.

Mr. Littler moved that the Board resolve itself into the Committee of the Whole to consider the advisability of the Sanitary District renewing its expired contract for the sale of surplus electricity to the Commonwealth Edison Company.

The motion prevailed.

The Chairman called Mr. Carr to the chair.

The Committee rose and the Board resumed business.

Payroll of The Sanitary District of Chicago for the Month of March, 1919.

ADJOURNMENT.

Mr. Paullin moved that the Board adjourn.

The motion prevailed.

L. P. Kipp.

Clerk.

628.69773
C43S

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, AUGUST 7, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

The roll being called, there were:

Present—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Absent—Messrs. Sergel and Littler—Two.

TEMPORARY CHAIRMAN.

President Sergel being absent, Mr. Healy moved that Mr. Paullin act as Chairman of the meeting.

The motion prevailed and Mr. Paullin occupied the chair

BIDS.

The Clerk opened and read the bids received for wrecking and removing power house and tunnel and widening south branch of the Chicago river near Van Buren street and near Sixteenth street, as shown in the schedule on page 926A of the Proceedings.

Mr. Clark moved that the bids be referred to the Chief Engineer for tabulation and to the Committee on Engineering for report.

The motion prevailed.

MINUTES.

Mr. Lawley moved that the minutes of the Proceedings of the adjourned meeting of July 14 and the regular meeting of July 17, 1919, be approved as printed without being read.

The motion prevailed.

REPORTS OF OFFICERS.

The Clerk presented the report of the Chief Engineer for the month of March, 1919, which was ordered published and filed, as follows:

CHICAGO, April 1, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I herewith present the report of the Engineering Department for the month of March, 1919, giving the detailed operation of the same:

CONSTRUCTION.

NORTH SHORE CHANNEL.

Spoil Banks.

The National Brick Company removed no material from the spoil banks of this channel during the month.

Contract for Sloping of Banks.

Byrne Brothers Dredging and Engineering Company, Contractors, assigned this contract to The Great Lakes Dredge and Dock Co. by consent of the Board, see Proc. 1918 Page 1375. Work deferred till Spring, 1919. See report of Engineering Committee November 14th, 1918.

CALUMET-SAG CHANNEL.

Section 1.

James O. Heyworth, Contractor, continued operations throughout the month. Dragline No. 2 on the south berm, was engaged in cleaning up channel between stations 3+00 and 2+00 from the 1st to the 3rd. Locomotive crane No. 1 was engaged in cleaning up channel between stations 4+00 and 2+00 from the 5th to the 13th, backfilling, north side, between stations 3+50 and 2+00 from the 20th to the 31st. Drills were engaged in drilling rock in turning basin between stations 4+50 and 2+00 from the 5th to the 8th and 11th to the 13th. Blasting high spots between stations 4+50 and 2+00 was carried on from the 5th to the 8th. The dam at the Main Channel was blasted, on the 28th.

All of the above mentioned work was carried on in one 10-hour shift per day. Pumping channel at station 28+00 from the 1st to the 16th, working two 12-hour shifts per day. The following miscellaneous work was carried on: Building dam at station 67+00 on the 18th. Repairing dam at station 42+00 on the 10th. Dismantle mixer from the 1st to the 16th.

Sections 2 to 12, Inclusive. Pumping Contract.

James O. Heyworth, Contractor, continued pumping channel for these sections from the 1st to the 16th, when the work was suspended.

Section 13.

A. Guthrie & Co., Inc., Contractor, carried on operation of pumping channel as follows:

At station 761+50 on the 17th and 18th, working two 12-hour shifts per day. At station 757+50 from the 14th to 21st, working two 10-hour shifts per day and from the 22nd to 31st, working one 5-hour shift per day. At station 782+00 from the 3rd to the 5th, working one 6-hour shift per day; from the 13th to the 20th working one 9-hour shift per day; from the 21st to the 24th, working two 10-hour shifts per day and from the 25th to the 31st, working one 5-hour shift per day. The following hand work was carried on: Building dams along Stony Creek from Ann street to the Rock Island crossing to prevent overflow into channel, due to heavy rains and spring floods, from the 16th to the 20th,

working an average of 12 hours per day. Building dams at Chicago street and Stony Creek to prevent overflow into channel on the 16th and 17th working an average of 10 hours per day. An average daily force of 9 men was employed. At the end of the month 58.5 per cent of the total estimated value of the contract was completed.

Section 14.

A. Guthrie & Co., Inc., Contractor, continued operations as follows: Steam shovel No. 5, on the north berm was engaged in excavating spoil from the spoil bank between stations 825+00 and 840+00 from the 18th to the 22nd and 25th to 31st, spoil was used for backfilling behind North walls. Three dinky engines and 16 dump cars were engaged in hauling spoil from shovel No. 5 to north wall between stations 837+00 and 842+00 from the 18th to 22nd, and 25th to 31st. Pumping channel was carried on at stations 837+00 from the 1st to the 15th, working one 5-hour shift per day. Team was engaged in hauling cinders to the south approach of Ashland avenue bridge from the 3rd to the 7th. All the aforementioned work was carried on in one 10-hour shift per day, except pumping channel as noted. Hand work was carried on as follows: Protecting Morgan Park sewer from the 15th to the 18th, working one 8-hour shift per day. Repairing drain pipes on Stein property south of channel near Portland street on the 27th and 28th, working one 10-hour shift per day. An average daily force of 27.9 men was employed.

The Sanitary District Organization (Electrical Dept.) employed an average daily force of 8 men, placing poles and stringing wires, north and south of the channel at Ashland avenue on the 12th and 13th, working one 4-hour shift per day.

BRIDGES.

Division Street Bridge.

A. Guthrie & Co. employed an average daily force of 5 men scraping and painting bridge steel from the 7th to the 15th and 18th to the 28th, working one 10-hour shift per day.

C. R. I. & P. Ry. (Main Line) Bridge.

A. Guthrie & Co. employed an average daily force of 7 men, excavating for north piers of bridge Nos. 2 and 3 from the 11th to the 15th and 19th to the 24th. Excavating for north abutment of bridges Nos. 2 and 3 from the 25th to the 31st, working one 10-hour shift per day.

The C. R. I. & P. Ry. Company employed an average daily force of 22 men unloading stringers for trestle on the 1st, placing stringers (north approach trestle) on the 3rd and 4th, working one 9-hour shift per day. A force of 15 men was employed in bracing water pipe line at north abutment on the 17th, working one hour. An average daily force of 5.5 men was employed in bracing temporary trestle, north approach, from the 20th to the 22nd and 31st, working one 8-hour shift per day and working one hour on the 26th.

B. & O. G. T. W. Bridges.

A. Guthrie & Co., Inc., resumed work on the 3rd. Steam shovel No. 3 was engaged in excavating for west half of the south abutment from the 5th to the 13th. Two dinky engines and four dump cars were engaged in hauling spoil from shovel No. 3 to spoil area on south berm between B. & O. Ry. and Ann street from the 5th to the 13th.

Four jack hammer drills were engaged in drilling holes in rock between stations 747+25 and 746+90 from the 24th to the 29th, 88 holes were drilled, an average depth of 12.5 feet or 1100 lineal feet of holes. Pumping channel was carried on at station 749+00 from the 1st to the 13th, work-

ing an average of 8 hours per day, from the 14th to the 27th, working an average of 19 hours per day, and from the 28th to the 31st, working an average of 10 hours per day. Hand work was carried on as follows: Bracing temporary trestle due to undermining caused by excavation for west half of south abutment on the 11th, 12th and 17th and 18th. All the aforementioned work was carried on in one 10-hour shift per day, except wherein mentioned.

The B. & O. Ry. Company employed a force of 2 men in drilling holes in the plates, setting pipe rollers and making concrete blocks for new interlocking system from the 1st to the 26th, working one 8-hour shift per day. An average daily force of 7.5 men in bracing temporary trestle at channel due to undermining caused by excavation of the west half of the south abutment from the 17th to the 31st, working one 8-hour shift per day.

Sewers.

CALUMET INTERCEPTING SEWER.

Contract Section No. 6.

Byrne Brothers Dredging and Engineering Co., Contractors, continued the work of repairing the plant throughout the month. The work of backfilling and moving of spoil by shovel and drag line was begun on the 21st and continued through the month. An average daily force of 11 men and 3 teams was employed.

EVANSTON INTERCEPTING SEWER.

Nash-Dowdle Company, Contractors, continued operations throughout the month. The work consisted of construction of manholes and other miscellaneous items. An average daily force of 17 men was employed. The work was 99.5 per cent completed at the end of the month.

TEMPORARY PUMPING PLANT AT EVANSTON.

Nash-Dowdle Company continued the operation of pumping throughout the month. An average daily force of 3 men was employed.

DESPLAINES RIVER INTERCEPTING SEWER.

Nash Brothers, Contractors, continued operations throughout the month. The work consisted of construction of main line sewer, in tunnel, in First avenue. An average daily force of 57 men was employed. The work was 17.3 per cent completed at the end of the month.

Pumping Stations.

Calumet Sewage Pumping Station.

T. J. Forschner Contracting Company continued operations throughout the month. The building of forms and repairing of plant was carried on throughout the month. The placing of concrete in the sub-structure of the station was resumed on the 26th and carried on intermittently through the balance of the month. An average daily force of 43 men was employed.

Evanston Sewage Pumping Station.

Nash-Dowdle Company, Contractors, continued operations throughout the month. Excavation for the station was continued throughout the month. The placing of concrete in the floor and wall at the north end of the station was begun on the 23rd and carried on intermittently through the balance of the month. An average daily force of 23 men was employed. At the end of the month the work was 11.5 per cent completed.

Sewage Treatment Plant, North Branch of the Chicago River.

The Sanitary District Organization employed a force of 3 men, throughout the month, constructing weirs in the sewer outlets at Blackhawk street, Diversey boulevard, Belmont avenue, Irving Park and Montrose boulevard. Considerable difficulty was encountered in this work due to a heavy rain on the 15th washing away some of the weirs and damaging others.

MAINTENANCE AND OPERATION.

MAIN CHANNEL.

Bridges.

The Sanitary District Organization employed a force of men repairing the roadway floors of the Willow Springs, 16th street, Lemont, Romeo, and Summit bridges.

The hand rails and guard rails of the Summit Road bridge were painted.

Controlling Works.

The Bear Trap Dam was open some part of five days or a total of thirty hours and eight minutes, an average of fifty-eight minutes for each day of the month.

MAIN CHANNEL EXTENSION.

Bridges.

The Sanitary District Organization made repairs to the indicator machinery and the floor of the 9th street bridge. Repairs were made to the gears of the 9th street bridge on the 9th. Two men were on duty on the 9th and 16th streets bridges, working from 7 A. M. to 3 P. M. and 3 P. M. to 11 P. M.

Butterfly Dam.

This dam was operated on the 2nd, 9th, 16th, 23rd, and 30th. An arc lamp globe was put in on the 11th.

Dams at the Power House.

The Forty-Eight Foot Dam was open some part of nine days or a total of forty-one hours and ten minutes, an average of one hour and twenty minutes for each day of the month. The Twelve Foot Dam was open some part of one day or a total of three hours and twenty-five minutes, an average of seven minutes for each day of the month.

The switches in the dam house were repaired on the 1st. Three men were on duty working shifts of 8 hours each, throughout the month. Samples of the canal water were taken for the Sanitary Division every eight hours.

I. & M. Canal Lock at the Power House.

No boats passed through the lock during the month and no one was on duty at the lock. The heater was repaired on the 8th, 14th, 17th and 29th.

DESPLAINES RIVER IMPROVEMENT.

Bridges.

The Sanitary District Organization carried on a small amount of repair work on the 9th street bridge during the month.

NORTH SHORE CHANNEL.

Channel.

The Sanitary District Organization employed a force of 5 men on the work of repairs to Outfalls and ditches from the 27th to the end of the month.

PUMPING STATIONS.

39th Street Pumping Station.

This station was operated, pumping sewage, throughout the month. The pumps were operated as follows:

Sewer pump No. 1 was operated some part of eight days or a total of one hundred and twelve hours and thirty minutes. Pump No. 2 some part of four days or a total of thirty-one hours and thirty-five minutes. Pump No. 3 some part of three days or a total of forty-one hours and thirty minutes. Pump No. 4 some part of thirty-one days or a total of six hundred and ninety hours and forty-five minutes. Screw pump No. 5 was operated some part of one day or a total of two hours and fifteen minutes. The five pumps were operated for a grand average of five hours and thirty-nine minutes for each day of the month and pumped an average of ten thousand four hundred and thirty-four cubic feet of sewage for each minute of the month.

Fresh water pump was operated some part of two days or a total of two hours and forty-eight minutes, an average of five minutes for each day of the month, and pumped an average

of one hundred and two cubic feet of water for each minute of the month.

On the fifteenth day of the month during a heavy rain, screw pump No. 5 was operated two hours and fifteen minutes pumping sewage.

The following maintenance work was carried on during the month. The coal conveyor broke on the 1st, repairs were made and it was back in service on the 3rd. The plant was shut down four hours on the 7th on account of trouble with the boiler feed pump. The ash conveyor was overhauled on the 12th. The plant was shut down four hours on the 19th to pack valves and put in new gaskets in main steam line. The gate windlass was overhauled between the 25th and 29th.

Lawrence Avenue Pumping Station.

This station was operated, pumping sewage, throughout the month. The pumps were operated as follows:

Sewer pump No. 1 was operated some part of two days or a total of five hours and forty minutes. Pump No. 2 some part of fifteen days or a total of two hundred and ninety-six hours and twenty-four minutes. Pump No. 3 some part of twenty-four days or a total of four hundred and seventy hours and twenty minutes. Screw pump No. 4 some part of one day or a total of three hours.

The four pumps were operated for a grand average of six hours and fifteen minutes for each day of the month, and pumped an average of five thousand seven hundred and forty-two cubic feet of sewage for each minute of the month.

On the fifteenth day of the month during a heavy rain, screw pump No. 4 was operated three hours pumping sewage.

The following maintenance work was carried on during the month. Boiler No. 1 was turbined on the 7th. Repairs were completed on this boiler and it was inspected by the City Boiler Inspector on the 27th. Boiler No. 2 was inspected by the City Boiler Inspector on the 19th. The overhauling of sewage pumping unit No. 1 begun on February 17th, was completed on the 25th. Repairs to the break on the coal conveyor on the 24th were not completed up to the end of the month. On the 15th a heavy rain taxed the capacity of the station, pump No. 1 being out of service at the time. The other two pumps could not handle all the sewage and the fresh water pump was used for three hours pumping sewage.

Wilmette Pumping Station.

This station was operated, pumping fresh water, throughout the month. The pumps were operated as follows:

Pump No. 1 was operated some part of fifteen days or a total of two hundred and eighty-eight hours and fifty minutes. Pump No. 3 some part of nineteen days or a total of two hundred and ninety-seven hours and fifty-five minutes. Pump No. 4 some part of eighteen days or a total of two hundred and ninety-two hours and forty-eight minutes. The three pumps were operated for a grand average of eight hours and twenty-three minutes for each day of the month, and pumped and average of one thousand three hundred and eighty-three cubic feet of water for each minute of the month. Pump No. 2 was shut down the entire month.

STRUCTURES AND EQUIPMENT FOR SANITARY IMPROVEMENTS AND SPECIAL INVESTIGATIONS.

Morton Grove Sedimentation Plant.

This plant was operated throughout the month and the regular maintenance and operation superintended by the Sanitary Division.

Laboratory at 39th Street.

Chemical analyses were made weekly of samples collected from the Main

Channel and from the Illinois River at Morris, Ottawa, Peru and Chillicothe. Special analyses were made on samples from Lockport.

Laboratory force working up back data on Main Channel and Illinois River.

Sewer and Rain Gages.

A sewer gage was operated on Davis street in Evanston. Rain gages were operated at the 39th street Pumping Station, Stock Yards testing station, Lockport, Kensington and 31st and Western avenue. The records collected were worked up as time permitted.

Investigation of Water Pollution.

Daily samples were collected from Lake Michigan at 39th street and from the Main Channel at Lockport. Weekly samples from the Main Channel at Lockport and the Illinois River at Morris, Ottawa, Peru and Chillicothe.

ENGINEERING.

Drafting Division.

The following work was carried on during the month: The reducing of the Stock Yards map was completed, and a tracing made. Posting dates and document numbers of recorded easements in Calumet Sewer Atlas. Plotting additional notes on section 1 Calumet Intercepting Sewer. Preparing contract drawings for section 1 Calumet Sewer. Work was begun on the Des Plaines River Intercepting Sewer Atlas. Work on Calumet-Sag Atlas and Chicago River Atlas was continued. Revising index system and indexing and filing maps and plans. Checking Cook County Tax Exemption lists. Computing co-ordinates for North Branch Survey. Preparing plat of sewer inlets in Calumet Sewer along Blue Island and Riverdale Road, west of Halsted street. Setting up and printing titles on Des Plaines River Sewage Treatment Plant contract drawings. Copying records at City Hall and County Building. Printing index cards. Tracing subdivision map of part of Joliet, Bannon Overflow case. Checking lists of outstanding field books.

Bridge Division.

Work was continued on detail of reinforced concrete work for the Calumet Sewage Pumping Station and structural steel work for the Des Plaines Sewage Pumping Station and Evanston Sewage Pumping Station. A design was made for a temporary trestle for supporting the Grand Trunk Western Railway tracks at the Calumet-Sag Channel. A preliminary design was made for a bascule bridge across the Main Channel at Crawford avenue. Comparative estimates of the cost of different types of bascule bridges for this site were made.

Sanitary Division.

The preparation of a report on the testing station work at the Stock Yards was continued. The preparation of plans and specifications for the Calumet sewer was continued. Conferences were held with officials of the City of Chicago. Preparation of plans of the Des Plaines River treatment works was continued and conferences held with the village officials. The preparation of supplementary plans for the Calumet pumping station was continued. Correspondence was carried on with Consulting Engineer A. B. Wood on all pumping stations. Studies were made of the proposed re-arrangement of the 95th street pumping station.

The preparation of plans for the storm overflow to the Calumet River at Wildwood was continued. Studies were continued on our auxiliary generator station at the Calumet Sewage Pumping Station, to be run by oil engines. Conferences were held with various parties from the Calumet Region in Indiana over proposed

schemes for sewage diversion and treatment.

An inspection was made of the pumping stations, both water and sewage, the municipal docks and industrial canal at New Orleans, the Imhoff tanks at Dallas. The two activated sludge plants and cement plant with Diesel engines at Houston; The drainage pumps at Memphis and the sewerage of San Antonio.

Hydraulic Measurement Division.

The self-recording gages on the Main Channel at Willow Springs and Lemont and on the Lake Front at the U. S. Coast Guard Station were operated and periodically inspected. The records from the gages were worked up in the office.

Field Parties.

Party was employed on the Chicago River Dredging and Docking. North Shore Channel Sloping. North Shore Channel on account high water. Des Plaines River on account high water. Sewer Department on weir construction. Survey of North Branch. Wall repairs Main Channel.

The Calumet-Sag Field parties performed the usual routine construction duties as follows: The Sag Division on Section 1; the Blue Island Division on Sections 13 and 14.

The general engineering force and other employees continued superintending engineering, construction and maintenance work, checking estimates, compiling unit construction costs of the Evanston and Calumet sewers and of the Calumet-Sag Channel sections. Keeping the accounts of the department, preparing vouchers, furnishing information for other departments, and performing other necessary duties, etc.

Respectfully submitted,

G. M. WISNER,
Chief Engineer.

REPORTS OF COMMITTEES.

Judiciary.

Mr. Healy presented the following report from the Committee on Judiciary:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Judiciary respectfully reports that it has been advised by the Attorney that the suit of John Griffiths, surviving partner of the firm of John Griffiths and Michael McDermott, co-partners doing business as Griffiths & McDermott v. The Sanitary District of Chicago, pending in the Circuit Court of Cook County, Illinois, as Gen. No. 181343, is an action brought by said co-partners to recover for alleged extras in connection with the construction of Section 1 of the Main Channel; that the declaration in said suit was filed on April 7, 1898; that subsequently said declaration was amended; that the total amount claimed was $150,000.00; that said cause was tried before a court and jury in the year 1910, which trial began on May 18th and extended to June 13th of that year and resulted in a judgment for the plaintiffs against the District for $6,000.00; that the plaintiffs appealed from said judgment to the Appellate Court, and the opinion of that court is reported in Volume 174 of the Illinois Appellate Court Reports at pages 100 to 116; that said cause was reversed and remanded for a new trial; that while the bill for extras presented by the plaintiffs amounted to $117,000.00, some of the items were passed upon adversely to the plaintiffs by the Appellate Court; that the items of alleged extras now involved in the pending retrial of this case amount to about $60,000.00; that the testimony at the first trial was voluminous, amounting to 2,300 typewritten pages, exclusive of exhibits; that some of the witnesses are dead; that so much time has elapsed that it will be inadvisable to again try this case before a court and jury and to

rely upon the testimony of former witnesses now living, and that such procedure would involve a very large additional expense, which, in the opinion of the Attorney and your Committee, is not advisable.

Your Committee further reports it is advised by the Attorney that a large amount of time and attention has been given by the Law Department to this case for the purpose of retrying the same upon the former record before the court without a jury, with the privilege extended to the plaintiffs and defendant to introduce certain additional evidence and to interpose additional objections, exceptions and motions with reference to testimony taken at the former trial; that as a result of such study and preparation, a stipulation has been prepared, and signed by the attorneys for the plaintiffs in said cause, which stipulation is set forth in the accompanying order; that the Attorney for the District desires the authority of the Board to sign said stipulation and to proceed in accordance therewith as to the retrial of said cause.

Your Committee having considered the foregoing matters, and being fully advised in the premises, recommends the passage of the following order:

Ordered, That the Attorney be, and he is hereby authorized and directed to sign the following stipulation and agreement in said cause, which stipulation has already been signed by Sims, Welch & Godman, attorneys for said plaintiff:

1. That a jury is hereby waived in the above entitled cause by the parties hereto and that said cause is hereby submitted to the Hon. Oscar E. Heard, Judge of said Court, for trial without the intervention of a jury.

2. That, in order to expedite the trial of said cause, and to avoid needless expense, said cause shall be submitted upon the bill of exceptions filed therein on the 4th day of October, 1910, together with the following:

(a) The letter dated June 27, 1894, written by Isham Randolph, Chief Engineer, to Griffiths & McDermott, a copy of which is hereto attached marked "Exhibit A."

(b) That Chief Engineer Randolph signed all original estimate vouchers, copies of which appear in said bill of exceptions as plaintiff's Exhibits 4 to 81, both inclusive.

(c) Elevations of off-sets in walls at various points as ascertained by William Sullivan.

(d) The number of lineal feet of off-sets constructed in each month prior to September 11, 1896.

(e) A view by the Court of the walls in question, together with the premises and structures adjacent thereto, and such other portions of the Main Channel as the court may desire to view.

(f) Fourteen photographs of portions of the walls of the Main Channel of The Sanitary District of Chicago, all marked on their face "Sep 26, 17" and numbered consecutively on their face from 6212 to 6225, both inclusive.

(g) Eight photographs marked plaintiff's Exhibits A to H, 7/26/19, both inclusive.

3. Each party shall have and hereby reserves, in addition to all the objections and motions made and exceptions taken by such party upon the former trial of said cause, as shown by said bill of exceptions, the right to make such further and other objections to the testimony and exhibits, or any part or parts thereof, contained in said bill of exceptions and to make any and all motions in relation thereto, as such party may hereafter determine, and to take and preserve exception or exceptions to any ruling

thereon by the court upon the retrial of said cause.

Respectfully submitted,
WM. J. HEALY,
Chairman.
GEORGE W. PAULLIN,
PATRICK J. CARR,
Committee on Judiciary.

I recommend the adoption of the foregoing report and passage of the accompanying order.

C. ARCH WILLIAMS,
Attorney.

Mr. Healy moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Healy, Lawley, Mueller, Nance and Paullin—Six.

Nays—None.

Mr. Healy presented the following report from the Committee on Judiciary:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Judiciary respectfully reports that on the 14th day of March, 1900, the then Committee on Engineering presented to the Board a report with reference to, and accompanied by, a voucher in favor of Griffiths & McDermott, contractors for the foundations of the Bear Trap Dam and collateral works near Lockport, Illinois, in the sum of $4,063.65, being for compensation for extra labor and materials furnished in connection with said work, said voucher being accompanied by an itemized statement of claims for extra compensation aggregating said amount. The report recommended that a voucher be authorized in the sum of $4,063.65 to said Griffiths & McDermott on condition that said contractors furnish a receipt and release to the District in full of all claims and demands on account of said work. On roll call the motion was lost, there having been four votes in the affirmative and two votes in the negative. Motion was then and there made that Griffiths & McDermott be paid the amount of the award made by the Chief Engineer, which motion was declared lost, there having been three votes in the affirmative and three votes in the negative. (See Proceedings 1900, pages 6338-6339.)

On July 11, 1900, on motion that the action of the Board at the meeting of March 14, 1900, in reference to this matter of extra compensation to Griffiths & McDermott under the contract for the foundations of the Bear Trap Dam and collateral works near Lockport, Illinois, be rescinded, and that the amount shown to be due said contractors by the Chief Engineer, viz., $4,063.65, be paid, the roll call showed five votes in the affirmative and four votes in the negative, and the President declared the motion carried.

By unanimous consent, the opinion of the Attorney in reference to this matter was printed in the Proceedings. This opinion advised the Board in substance, that by virtue of the authority given the Chief Engineer in the contract between the District and Griffiths & McDermott, dated June 21, 1897 (Proceedings 1897, page 4070), the Chief Engineer made the award or finding in question; that in the absence of fraud or gross mistake, the action of the Chief Engineer, when proceeding under such authority, is final and conclusive upon both parties to the agreement; that there is no language in the contract to the effect that the contractor shall give any receipt whatsoever for moneys due him under and by virtue of the terms and conditions of the contract or award of the Chief Engineer; that the award of the Chief Engineer being binding upon the Board as well as upon the contractor, it necessarily follows that there is due the contractor the sum mentioned by the Chief Engineer, and that no receipt in full of all claims and demands could be required as a con-

dition precedent to the payment of the sum admitted to be due. (Proceedings 1900, pages 6663-6664.)

Your Committee further reports that pursuant to said order, warrant No. 13808 was drawn under date of July 11, 1900, for the sum of $4,063.65 to the order of Griffiths & McDermott, signed by the President of the Board of Trustees, and the Clerk, payable at the Chicago National Bank, countersigned by S. P. Blount, Assistant Treasurer, and that voucher No. 13808 for said sum of money was likewise prepared and approved by the Chief Engineer; that said warrant was never accepted by Griffiths & McDermott, or was said voucher ever signed, and that said warrant and voucher are now in possession of the Clerk of the District.

Your Committee further reports that on March 30, 1900, suit was brought in the Circuit Court of Cook County, Illinois, by the Griffiths & McDermott Construction Company, a corporation, against The Sanitary District of Chicago, to recover for certain extras in connection with the construction of the Bear Trap Dam, the amount sued for being $60,000.00, and that a bill for extras was filed showing a total claimed of $50,083.37, which suit is still pending as Gen. No. 205704.

Your Committee further reports it is advised by the Attorney that the trial of said cause has been postponed pending the final determination of another suit brought by Griffiths & McDermott referred to in a previous report of your Committee this day presented.

Your Committee further reports it is advised by the Attorney that the Law Deparment has been negotiating with the attorneys for the Griffiths & McDermott Construction Company, with a view to finally adjusting and disposing of said case No. 205704, and that the plaintiff is now willing to receive and accept said sum of $4,063.65 in full settlement, satisfaction and discharge of all of its claims and demands, and to dismiss said suit without costs to either party, and that the attorneys for the Griffiths & McDermott Construction Company have signed a stipulation to that effect as shown in the accompanying order.

Your Committee having fully considered the foregoing facts, recommends the passage of the following order:

Ordered, That said warrant No. 13808, dated July 11, 1900, for the sum of $4,063.65, payable to the order of Griffiths & McDermott be, and the same is hereby cancelled, and that, in lieu thereof, the Chairman of the Committee on Finance and the Clerk be, and they are hereby authorized and directed to draw a new warrant No. 13808, for the said sum of $4,063.65 in favor of the Griffiths & McDermott Construction Company, a corporation (with whom the contract for said construction work was made (Proceedings 1897, pages 3992-3993), plaintiff in the case of Griffiths & McDermott Construction Company v. The Sanitary District of Chicago, pending in the Circuit Court of Cook County, Illinois, as Gen. No. 205704, and to deliver said warrant to said Griffiths & McDermott Construction Company in full settlement, satisfaction and discharge of all claims and demands of every character of said Griffiths & McDermott Construction Company, a corporation, including all compensation for extra or additional labor and materials arising out of or by reason of the construction of the foundations of the Bear Trap Dam and collateral works near Lockport, Illinois; and it is further

Ordered, That the estimate voucher No. 13808, for the sum of $4,063.65, on which said warrant No. 13808 was erroneously issued to Griffiths & McDermott, be corrected on its face by the Clerk of the District by substituting the name of Griffith & McDermott Construction Company for the name of Griffiths & McDermott wherever said name ap-

pears on said voucher; and it is further

Ordered, That upon the payment of said sum and the execution and delivery by said Griffiths & McDermott Construction Company to the District of a receipt and release in proper form satisfactory to the Attorney for the District, the Attorney is hereby authorized and directed to sign a stipulation agreeing therein that said suit shall at once be dismissed without costs to either party.

Respectfully submitted,

WM. J. HEALY,
Chairman.
GEORGE W. PAULLIN,
PATRICK J. CARR,
Committee on Judiciary.

I recommend the adoption of the foregoing report and passage of the accompanying orders.

C. ARCH WILLIAMS,
Attorney.

Mr. Healy moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Healy presented the following report from the Committee on Judiciary:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Judiciary respectfully reports that Joseph J. Duffy filed a bill for an accounting against The Sanitary District of Chicago in the Circuit Court of Cook County, Illinois, on January 29, 1908, which suit is still pending and known as General Number 283,054; that after the case was at issue it was referred on July 17, 1908, to a Master in Chancery of that court to take evidence and make report thereon; that later on by order of court the reference was limited to the effect that the Master should hear the evidence and report merely upon the question of whether complainant was entitled to an accounting; that a large amount of testimony was taken and the Master made a report thereon in October, 1912, in which he recommended that among other things a decree be entered directing the Sanitary District to render an account to the complainant; that on November 12, 1912, the Circuit Court entered a decree finding that the Sanitary District must be held to account to the complainant as his Trustee and the case was re-referred to the same Master to state an account; that pursuant to this decree the Sanitary District filed its itemized account on December 23, 1912; that approximately 17,000 pages of testimony were taken before said Master and the exhibits offered in evidence comprised 1,500 pages, and many of these exhibits comprised a large number of separate items; that the taking of this testimony covered the greater part of the time for a period of nearly three years, during which two or more members of the Law Department of the Sanitary District were occupied with this case, and in addition thereto the time of investigators of the Law Department was largely given to this matter; and a very large amount of time of the Engineers of the Sanitary District was also given to this case in appearing as witnesses before the Master; that the proofs were finally closed before the Master on August 16, 1915, and after a lengthy argument the Master prepared his first draft of report, dated December 1, 1915, finding in effect that the Sanitary District was indebted to the complainant for about $1,200,000.00; that said Master prepared another draft of report on January 8, 1916, and the final draft of report was dated March 8, 1916, in which the Master found that the Sanitary District on one theory was indebted to the complainant in the sum of $714,926.50, and on the

other theory in the sum of $500,926.88; that so far as the records of the Circuit Court show this last draft of report has never been filed and said Master's term has expired.

Your Committee further reports that in May, 1916, the complainant, Joseph J. Duffy, departed this life, leaving surviving him his widow, Julia V. Duffy and eight children, six of whom were minors; that thereafter the estate of Joseph J. Duffy, deceased, was admitted to probate in the Probate Court of Cook County, Illinois, and letters of administration were issued from said Court to said Julia V. Duffy as Administratrix of the estate of said Joseph J. Duffy, deceased, which estate is pending and undetermined.

Your Committee further reports that during the past year propositions of settlement have been made to the Sanitary District by the attorneys and representatives of the estate of said Joseph J. Duffy, deceased, to settle said cause; that the first proposition of settlement was for the sum of $497,327.43, which proposition was not entertained by the Trustees or by your Committee; that later on a second proposition was made to settle for $250,000.00, which also was given no consideration. The third proposition was made to settle for $193,500.00, which was likewise declined; that in the month of May, 1918, another proposition was made to your Committee to settle said cause for the sum of $135,000.00, which was not accepted.

Your Committee further reports that a proposition of settlement in writing under date of August 5, 1919, was submitted through your Committee to the Board of Trustees of the Sanitary District signed by Thomas H. Cannon, attorney for the estate of Joseph J. Duffy, deceased, now pending in the Probate Court of Cook County, Illinois, and Edwin Hedrick, the attorney who represented the complainant Duffy in the bringing of said suit and in the conduct of the trial thereof, which written proposition is hereto attached. In this proposition request is made upon the Board of Trustees of the Sanitary District to settle said cause for the sum of $125,000.00, in full payment of all claims and demands on the part of the complainant in said suit and the estate of said Joseph J. Duffy, deceased, and out of said sum all court costs and expenses of said suit, including the Master's fees, and all claims against the estate of Joseph J. Duffy, deceased, are to be paid in full or compromised and settled for such sums as are agreeable to such claimants, so as to absolutely release and absolve the Sanitary District from any and all liability by virtue of any such claims or any claims or demands arising out of the subject matter of said suit.

Your Committee further reports that upon petition of said Administratrix the Probate Court of Cook County has entered an order in the estate of Joseph J. Duffy, deceased, authorizing said Julia V. Duffy as Administratrix of said estate to compromise and settle said suit with the Sanitary District for the sum of $125,000.00 as aforesaid.

Your Committee further reports that at its direction the Law Department of the Sanitary District has prepared and filed with your Committee a full and complete report upon the history of this case, the issues involved, the present status of the case and future procedure, and the expense in connection therewith in the event that said suit shall not be compromised, but shall be prosecuted to a conclusion and finally reviewed by the Supreme Court of Illinois; that your Committee is advised by the Law Department that in view of the fact that the term of the Master in Chancery who heard the testimony in this case has ex-

pired and that his report is not on file, said cause can only be tried to a conclusion by either taking all of said testimony before another Master of said court or by having another Master of said court try said cause upon the testimony already taken, which can only be done by stipulation and agreement of the parties to said suit; that in the event of such procedure the time of at least two members of the Law Department of the Sanitary District will be occupied with this case for many months and the expense in connection therewith would approximate the sum of $50,000.00 even though the ultimate decision of the court should be in favor of the Sanitary District upon all issues involved. The record is so voluminous and the disputed items are so many that it appears from the report of the Law Department that in any event there is a probability that some of the claims involved would be ultimately allowed as against the Sanitary District, so that it appears from the record in this case and from the report made to your Committee by the Law Department that the proposition made to the Sanitary District to settle this cause for the sum of $125,000.00 is fair and reasonable, because it seems probable that if this case be prosecuted to a conclusion, the total future expense to the Sanitary District in connection therewith, plus the claims which may probably be allowed against the Sanitary District, would in the aggregate exceed the amount of this proposed settlement.

Your Committee having duly considered the foregoing proposition of settlement and the report of the Law Department thereon, and the recommendation of the Attorney that said proposition be accepted and that said cause be settled on the terms and conditions aforesaid, respectfully recommends the adoption of the following order:

Ordered, That the proposition of the Administratrix of the estate of Joseph J. Duffy, deceased, to compromise and settle the said suit of Duffy vs. the Sanitary District, now pending in the Circuit Court of Cook County, Illinois, as General Number 283,054, for the sum of $125,000.00 be, and the same is hereby accepted on condition that same is in full settlement of all claims and demands of the complainant in said cause and of the Administratrix of the estate of Joseph J. Duffy, deceased, and of all claims and demands arising out of or pertinent to said suit and said estate, and all mechanic's lien claims and assignments of which notice has been given to the Sanitary District, and provided that out of said sum of money shall be paid all unpaid court costs and Master's fees in said suit; and it is further

Ordered, That the Chairman of the Committee on Finance of the Sanitary District and the Clerk be, and they are hereby authorized and directed to draw a warrant in the sum of $125,000.00, payable to Julia V. Duffy, Administratrix of the estate of Joseph J. Duffy, deceased, and deliver the same to her upon the execution and delivery to the Sanitary District of all releases, waivers of liens, if any, and other documents satisfactory to the Attorney of the Sanitary District, which in his opinion are proper and necessary to completely absolve the Sanitary District from any and all liability to Julia V. Duffy, Administratrix of the estate of Joseph J. Duffy, deceased, who has been substituted as complainant in said suit, and to said estate and to all persons interested therein as claimants or otherwise, and to assignees of complainant, and upon the entry of a final Decree in said suit in form and substance satisfactory to the Attorney of the Sanitary District.

Respectfully submitted,

WM. J. HEALY,
Chairman.

GEORGE W. PAULLIN,
PATRICK J. CARR,
Committee on Judiciary.

Mr. Healy moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that bonds of The Sanitary District of Chicago to the amount of one hundred six thousand ($106,000.00) dollars will mature September 1, 1919.

Your Committee further reports that the semi-annual interest on the twentieth issue of bonds of the Sanitary District, amounting to eight thousand eight hundred ($8,800.00) dollars, will fall due September 1, 1919, and that the semi-annual interest on the twenty-eighth issue of bonds of the Sanitary District, amounting to the sum of thirteen thousand ($13,000.00) dollars, will fall due September 1, 1919.

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees and the Clerk be, and they are hereby authorized to draw a warrant payable to the order of the Treasurer of the Sanitary District for the sum of one hundred twenty-seven thousand eight hundred ($127,800.00) dollars, to pay the principal and semi-annual interest due September 1, 1919, on the bonds of the Sanitary District as follows:

The principal of 56 bonds of the 20th issue numbered 30151 to 30206, both inclusive	$56,000.00	
The principal of 50 bonds of the 28th issue numbered 351 to 400, both inclusive	50,000.00	
Total bonds		$106,000.00
Six months' interest on $440,000.00 of the 20th issue of bonds at 4 per cent per annum.	$ 8,800.00	
Six months' interest on $650,000.00 of the 28th issue of bonds at 4 per cent per annum.	13,000.00	
Total interest		21,800.00
Total principal and interest		$127,800.00

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Lawley, Mueller, Nance and Paullin—Six.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that the appropriation bill of the Sanitary District for the year

1919 (page 141 of the Proceedings), sets up in the Department of Police (Item 2) five positions with salaries attached thereto, aggregating the sum of $8,100.00.

Your Committee further reports that the Committee on Employment has requested that the salaries attached to said positions be adjusted to meet the requirements of the Department of Police, which can be done without increasing said sum of $8,100.00 heretofore appropriated.

Your Committee having considered said request, is of the opinion that same should be granted and, therefore, recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby authorized and directed to make adjustments of the salaries set up under the Department of Police in the Appropriation Bill for the year 1919 in accordance with the requirements of the Committee on Employment as follows:

DEPARTMENT OF POLICE—ACCOUNT No. II.

SALARIES AND WAGES OF REGULAR EMPLOYES.

Change from:	
Sergeants, 5 at $1,620.00	$8,100.00
to	
Sergeants, 3 at $1,680.00	$4,860.00
Sergeants, 2 at rate of $135.00 per month	2,598.87
Engineer (to operate police boat), 5 mo., 4 days, at $125.00 per month	641.13
	$8,100.00

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has had under consideration the question of paying to Byrne Bros. Dredging & Engineering Company current voucher No. 27 in the sum of $1,223.14 for work performed by said company in the construction of the Calumet intercepting sewer contract, Section No. 6, under its contract with the Sanitary District dated June 29, 1916 (page 903 of the Proceedings).

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that by the terms of said contract the entire work should have been completed on or before May 1, 1918, but certain questions relating to delays in the performance of said work have not yet been determined. That the work is completed except as to certain items of repairs and cleaning the site of the work, but the reserve percentage retained by the Sanitary District under said contract is sufficient to protect the rights of the Sanitary District if said payment is made.

Your Committee further reports that said contractor also entered into a contract with the Sanitary District dated June 29, 1916 (page 864 of the Proceedings), for the construction of the Calumet intercepting sewer contract, Section No. 5, and is behind in the progress of said work, and your Committee is of the opinion that said payment of $1,223.14 should only be made to said contractor on condition that the sureties on the bonds of said contractor for the faithful

performance of each of said contracts consent thereto in writing, and your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to draw a warrant in the sum of $1,223.14, payable to the order of Byrne Bros. Dredging & Engineering Company and deliver the same to said company on the receipt of the voucher therefor, provided the United States Fidelity & Guaranty Company, as surety on the bond of said contractor for the faithful performance of its contract for the construction of said contract, Section 6, and also as surety on the bond of said contractor for the faithful performance of its contract for the construction of contract, Section 5, of said intercepting sewer, consents in writing that said payment may be made and that all the conditions and terms of both said contracts shall remain in full force and effect.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received request from the Chief Engineer to make transfer of funds from various unexpended accounts to other accounts in order to provide funds for the payment of expenditures for which no appropriation has been made and to increase certain appropriations.

Your Committee having considered the matter is of the opinion that said request should be granted and, therefore, recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby authorized and directed to make the following transfers in appropriations for the year 1919, in accordance with the request of the head of the Department of Engineering, attached hereto:

DEPARTMENT OF ENGINEERING.

From Account No. 29-64—Repair and replacement service for channels, ditches, reservoirs and docks	$15,700.00
To the following accounts:	
No. 29-529—Repair and replacement service to portable plant equipment, N. O. C.	500.00
No. 29-5273—Repair and replacement service to floating equipment	5,000.00
No. 451—Building and cabinet making parts	500.00
No. 641 H 212—Clearing and doing special work on Calumet-Sag ditches	9,750.00
	$15,700.00
From Account No. 403—Building and street surfacing materials	$18,000.00
To Account No. 404—Lumber	18,000.00
From Account No. 62 H 7—Rock Island connecting track bridge, Calumet-Sag Channel	1,000.00
To Account No. 62 H 10—Western avenue bridge, Calumet-Sag Channel	1,000.00

From Account No. 65 M 2556—
Calumet intercepting sewer,
Contract No. 5..... 1,467.74
To Account No. 65 M 2456—
Calumet intercepting sewer,
Contract No. 4..... 1,467.74

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received request from the Clerk of the District to make transfer of funds from an unexpended account to another account in order to provide funds for the payment of expenditures for which no appropriation has been made.

Your Committee having considered the matter, is of the opinion that said request should be granted and, therefore, recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby authorized and directed to make the following transfer in appropriations for the year 1919, in accordance with the request of the head of the Department of the Clerk of the District, attached hereto:

DEPARTMENT OF CLERK OF THE DISTRICT.

From Account No. 86—Judgments and claims.....$8,000.00
To Account No. 13—Compensation for personal services other than salaries and wages—
"For classification of the employment of all employes of the Sanitary District"... 8,000.00

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
GEO. W. PAULLIN,
MATT A. MUELLER,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a communication from the Chief Engineer transmitting a request from the Schillinger Construction Company, that the penal sum of its bond furnished for the faithful performance of its contract, dated May 17, 1917 (page 774 of the Proceedings), for the construction of concrete slabs for the floors of the Chicago, Rock Island & Pacific Railway bridges across Stony Creek in Blue Island, be reduced from $2,000.00 to $1,200.00. The Chief Engineer states that the work under said contract was to be fully completed in the fall of 1917, but that the erection of the bridges on which said slabs were to be placed was delayed by war conditions to such an extent that the Sanitary District has been unable to accept said slabs from said Schillinger Construction Company, and

because of lack of space the said company has not fully completed said contract. The Chief Engineer further states that this delay on the part of the Sanitary District has resulted in an increased cost to the contractor in keeping said bond in force and he recommends that the request of said contractor be granted and said bond reduced from $2,000.00 to $1,200.00.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the bond of the Schillinger Construction Company, furnished with its contract dated May 17, 1917 (page 774 of the Proceedings), for the construction of concrete slabs for the Chicago, Rock Island & Pacific Railway bridges over Stony Creek in Blue Island be, and the same is hereby reduced from $2,000.00 to $1,200.00, provided the surety on said bond consents in writing to said reduction and that all the other terms and conditions of said bond remain in force and effect.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
GEO. W. PAULLIN,
MATT A. MUELLER,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that the appropriation bill of the Sanitary District for the year 1919 (page 127 of the Proceedings), sets up in the Department of Illinois and Michigan Canal and Illinois River Conditions (Item 8), one position with salary attached thereto in the sum of $1,500.00.

Your Committee further reports that the Committee on Employment has requested that the salary attached to said position be adjusted to meet the requirements of the Department of Illinois and Michigan Canal and Illinois River Conditions, which can be done without increasing said sum of $1,500.00 heretofore appropriated.

Your Committee having considered said request, is of the opinion that same should be granted and, therefore, recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby authorized and directed to make adjustment of the salary set up under the Department of Illinois and Michigan Canal and Illinois River Conditions in the Appropriation Bill for the year 1919 in accordance with the requirements of the Committee on Employment as follows:

DEPARTMENT OF ILLINOIS AND MICHIGAN CANAL AND ILLINOIS RIVER CONDITIONS—ACCOUNT NO. 11.
SALARIES AND WAGES OF REGULAR EMPLOYES.

Change from:

Stenographer, at $1,500.00	$1,500.00
to	
Stenographer, 1 at rate of $125.00 per mo.	$800.81
Photographer, 1 for 4 months, 27 days at rate of $150.00 per month	699.19
	$1,500.00

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
GEO. W. PAULLIN,
MATT A. MUELLER,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 7, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

General Payroll for Last Half of July, 1919.

L. F. King, Clerk (general payroll)		$ 29,797.74

Construction Account.

Yours respectfully,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller and Paullin—Six.

Nays—None.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has had under consideration the adoption by the Sanitary District of a program for the construction and operation of works for the purification of human sewage, trade wastes and other similar matter passing through the Main Channel of the Sanitary District to the Desplaines river to supplement and aid the diversion works constructed or in process of construction to divert sewage and drainage to said Desplaines river.

Your Committee believes that an ordinance should be adopted, laying out such program and, therefore, presents to the Board such an ordinance and recommends the passage of same, including the preambles thereof.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

AN ORDINANCE

Of the Board of Trustees of The Sanitary District of Chicago Laying Out and Adopting a Program for the Construction and Operation of Works for the Purification of or the Removal of Solids and Organic and Inorganic Matter from Sewage, Trade Waste, Offall and Other Organic and Inorganic Matter so That Within the Period of the Next Twenty-five Years Not More Than Fifty Per Cent of the Amount of Said Sewage and Waste That Is Now Passing into the Desplaines River from the Main Channel of the Sanitary District will at the End of Such Period Find Its Way Into said River. Such Works are to Supplement Those Constructed or in Process of Construction for the Diversion of Sewage and Drainage Arising Within the Limits of The Sanitary District of Chicago.

WHEREAS, The Sanitary District of Chicago was organized and now exists under an Act of the General Assembly passed on May 29, 1889, in force July 1, 1889, entitled, "An Act to Create Sanitary Districts and to Remove Obstructions in the Illinois and Desplaines Rivers," and Acts amendatory thereof or supplementary thereto; and,

WHEREAS, The said Act of the General Assembly provided for the construction and operation of the Main Channel of the Sanitary District, including adjuncts and additions thereto whereby the sewage and drainage of the City of Chicago and its environs should be diverted from Lake Michigan to the Desplaines river, together with a certain amount of water from Lake Michigan fixed according to the population of the District as it might exist when such Main Channel should be constructed and as the population might thereafter increase, to-wit: Twenty thousand cubic feet of water per minute for each one hundred thousand of the population; and the Board of Trustees of The Sanitary District of Chicago is directed by said Act of the General Assembly to operate said works specified with such diversion of water; and,

WHEREAS, Said Act of the General Assembly was passed and the works provided therein to be constructed were built in order to relieve the people of Chicago and environs of a serious menace to their health and lives arising by virtue of the pollution of Lake Michigan, the only water supply of Chicago by sewage passing into same by way of the Chicago and Calumet rivers and by way of sewers debauching directly into the lake at various points along Chicago's water front; and the said works were intended also to relieve the Desplaines and Illinois rivers of a serious condition of pollution due to a certain amount of sewage and wastes of Chicago and environs passing into said river through the Illinois and Michigan Canal; and,

WHEREAS, The death rate per year from typhoid fever prior to the operation of the Main Channel of the Sanitary District at times equalled one hundred ninety per one hundred thousand of the population of Chicago, and its environs, which required the immediate construction and operation of works to relieve such condition; and,

WHEREAS, Immediately after the passage of said Act of the General Assembly of May 29, 1889, the Sanitary District was organized and thereafter commenced the construction of the Main Channel of the Sanitary District, extending from Robey street and the West Fork of the South Branch of the Chicago river to the Desplaines river near Lockport, Illinois, a distance of thirty-two miles; and the work of constructing said Main Channel was carried forward with due speed until January 17, 1900, when the said Main Channel was placed in operation pursuant to the permit of the Governor of Illinois, in accordance with said Act, and the permit

and consent of the Secretary of War of the United States; and the said Main Channel of the Sanitary District cost the people of Chicago and its environs many million dollars; and there was required for such construction the use of all the money that could be raised by the Sanitary District from taxation and by the issuance of bonds; and,

WHEREAS, The Sanitary District was compelled to construct and place in operation many adjuncts and additions to the Main Channel of the Sanitary District in order that the said Main Channel might accomplish the purpose for which it was constructed and there would thereby be constructed and placed in operation a complete and comprehensive system for the diversion of the sewage and drainage arising within the limits of the Sanitary District from Lake Michigan to the Desplaines river; and such works included the intercepting sewers and pumping stations on the North Shore and South Shore of Chicago, the Calumet-Sag Channel, with its intercepting sewers, the enlargement of the flowage channel of the South Branch of the Chicago river and the West Fork of said South Branch, the replacing of many old center-pier bridges with bascule bridges of modern type, and they included also many other works of similar character; and the construction of such works has largely engaged the resources of the Sanitary District; and,

WHEREAS, The works so constructed and placed in operation have caused a decrease in the death rate from typhoid fever per year in the City of Chicago and environs from an average rate of over seventy-five per one hundred thousand of the population for the ten years immediately preceding the opening of the drainage channel, so that now the death rate from typhoid fever is less than one-half of one per one hundred thousand of population; and,

WHEREAS, The Board of Trustees of the Sanitary District has recognized that by reason of various conditions existing, such as trade wastes and other materials passing into its channels and the inability to obtain at all points the necessary amount of water to dilute the sewage, thus causing local nuisances, that works should be constructed and operated to remove a material portion of organic and inorganic matter from human sewage, and also to remove and eliminate a material portion of trade wastes and other materials so that the amount of organic and inorganic matter in sewage and the amount of trade wastes and other materials passing through the Main Channel of the Sanitary District into the Desplaines river would be materially diminished; and The Sanitary District of Chicago has for such purposes carried on experiments and investigations to ascertain the best method to accomplish such results; and it has constructed at Morton Grove, Illinois, an Imhoff tank for the removal of a certain portion of the solids from the sewage of the Town of Morton Grove, and is constructing in connection with such Imhoff tank a sprinkling filter to further purify the sewage of said town; and the Sanitary District is constructing an activated sludge plant with necessary intercepting sewers for the collection and purification of the sewage of the Towns of Riverside, Maywood, River Forest and others, the sewage of which towns is now passing into the Desplaines river; and the Sanitary District has authorized the condemnation of one hundred acres of land near the Calumet sewage pumping station at 125th street and Michigan avenue, Chicago, upon which site there is to be constructed an artificial sewage disposal plant for the removal of organic and inorganic matter from human sewage and wastes that may pass into the Calumet intercepting sewer; and the Sanitary District of Chicago has, in the Stock Yards District, to take care of the trade wastes of Packingtown, acquired a site for purification works to be constructed thereon to remove trade

wastes and organic and inorganic matters from human sewage now finding their way from that locality to the Main Channel of the Sanitary District; and the South Park Improvement Project provides for the setting aside of sufficient land for the construction of purification works for the sewage and wastes collected at 39th street and Lake Michigan by the intercepting sewers converging at that point, which intercepting sewers serve a population of approximately five hundred thousand people; and,

WHEREAS, The Chief Engineer of The Sanitary District of Chicago has made investigation of the amount of trade wastes and other wastes requiring pure water to oxidize same, now being discharged through the Main Channel of the Sanitary District into the Desplaines river, and the Chief Engineer has found and the Board of Trustees of the Sanitary District believes that the amount of such wastes is approximately equal, if it does not exceed, the amount of human sewage now passing into said Main Channel and through same to the Desplaines river; and that there is required to oxidize said wastes and render same innocuous and non-putrescible, as much or more water from Lake Michigan than is required to oxidize and render innocuous and non-putrescible the human sewage of the present population within the territorial limits of The Sanitary District of Chicago; and by reason of such wastes passing into said channel and thereby into the Desplaines river, the works of the Sanitary District do not fully accomplish the purpose designed and nuisances are created at various places, which nuisances should be abated; and,

WHEREAS, It is the recommendation of the Chief Engineer of the Sanitary District that works should be constructed and operated to supplement the diversion works of the Sanitary District constructed or in process of construction whereby the amount of human sewage and the amount of trade wastes and other material should be continuously diminished from year to year so that at the end of a period of twenty-five years at least only one-half the amount of sewage, including all wastes that is now passing into the Desplaines river from the Main Channel of the Sanitary District shall enter same by way of said Main Channel; and the Board of Trustees of the Sanitary District believes that within the period of four years works of such character can be constructed and placed in operation to materially diminish the amount of such sewage and wastes passing into the said Desplaines river, as aforesaid; now, therefore,

Be It Ordained by the Board of Trustees of The Sanitary District of Chicago:

SECTION 1. To supplement the works of The Sanitary District of Chicago now constructed or in the process of construction for the diversion of sewage or drainage, and to aid said works in better accomplishing the purpose for which they were constructed, the Sanitary District does hereby lay out and adopt a program for the construction and operation of works for the purification of sewage or the removal of organic or inorganic matter from human sewage and the removal of trade wastes and other wastes and for the carrying on of such work at such a rate as continuously after the lapse of four years to diminish the amount of sewage including all wastes passing into the Desplaines river by way of the Main Channel of The Sanitary District of Chicago, so that within the period of twenty-five years such purification works shall be constructed and in operation, that the amount of such raw sewage and wastes so passing into said Desplaines river shall be at least fifty per cent less than that passing now.

SEC. 2. The Chief Engineer and the Attorney of the Sanitary District are

hereby directed to take such steps as may be necessary to carry forward the foregoing program, and the Chief Engineer is directed to report to such officers of the United States and the State of Illinois as may be interested, the progress made from time to time in carrying out said program.

SEC. 3. The foregoing preamble to this ordinance is hereby adopted and made a part of same.

SEC. 4. This ordinance shall be in full force and effect from and after its passage and adoption.

Mr. Clark moved that the report be adopted and that the ordinance and order, including the preambles, be passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that on April 10, 1919 (page 326 of the Proceedings), Abraham Burrell entered into a contract with the Sanitary District for the repair of two scows, said work to be performed on the basis of eighty cents per hour for wages of mechanics and carpenters and eight dollars per day wages of foremen, and the actual cost of material.

Your Commitaee further reports that it has received a communication from the Chief Engineer in which he states that the work on the first scow was completed, and that shortly after starting work on the second scow it was found to be in such bad condition it could not be repaired for the amount of money remaining in the Budget for repairs to floating equipment; that thereupon he stopped said work pending the transfer of funds to the proper Budget account to provide for said repairs; that then came a general strike of carpenters for higher wages, and when he ordered said contractor to resume work said contraector informed him that the cost of labor had been increased to $1.15 per hour and said contractor claimed that the contract had been terminated.

Your Committee further reports it is advised by the Attorney that said contractor cannot be compelled to make said repairs at the price specified in said contract.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized and directed to employ Abraham Burrell to complete the work of repairing said second scow on the basis of paying said Abraham Burrell the standard wage scale for mechanics and workmen employed on said work, and the actual cost of all material entering into the same; provided that said Chief Engineer reserves unto himself the right to order said work stopped at the end of any day and provided further that the total cost of said work shall not exceed the sum of $5,000.00.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.

JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that on August 1, 1918, Patrick A. Nash and Richard J. Nash, co-partners doing business under the name and style of Nash Bros., entered into a contract with the Sanitary District for the construction of the Des Plaines River Intercepting Sewer, Contract No. 1.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that it is desirable to extend the Lake Street Branch of said sewer eastward for a distance of about 100 feet so that the special manhole giving access to said sewer can be located in Lake street instead of on private property as indicated on the plans of said work. As the manhole is located on said plans, it has been ascertained that it will be difficult of access in times of high water in the Des Plaines River and will also involve considerable expense in flushing said branch of said sewer. Furthermore, that the owners of the property crossed by said branch of said sewer are willing to grant an easement for the construction of the same through their property free of charge, provided said manhole is located in Lake street. He further says that the cost of said branch of said sewer as now shown on said plans is the lump sum price of $15,000.00, and the contractors for said work have agreed to extend said sewer as above stated for the sum of $40.00 per foot, or a total of $4,000.00, and he recommends that he be authorized to order said contractors to perform said work as an extra under the "extra work" clause of said contract.

The Chief Engineer further states that when the contract for said sewer was let, the plans for the Treatment Works had not been fully developed and the plans for said sewer entering the site of said Treatment Works show that the said sewer terminates some distance from tne site of said Works and that it is necessary to extend said sewer on a curve on the point of termination into said Treatment Works, which work is not specified in said contract; that he has negotiated with said contractors for doing said work and has agreed to pay them the sum of $10.00 per lineal foot for doing said work in addition to the amount specified in said contract for the construction of said sewer at said point, the total cost of which will amount to the sum of $800.00, and he likewise requests that he may be authorized to order said contractors to perform said addtional work as an extra under the "extra work" clause of said contract.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to order Patrick A. Nash and Richard J. Nash, co-partners doing business under the name and style of Nash Bros., to perform the two items of work above specified, provided the cost thereof shall not exceed the respective sums of $4,000.00 and $800.00.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.

JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy,

Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering to which were referred at the meeting held July 17, 1919 (page 878B of the Proceedings), bids for changing of present City of Chicago 5,000-volt aerial construction under subways to steel pipe construction, armored cable construction or standard underground construction, and for painting metal poles and equipment of the City of Chicago under Divisions "A" and "B" of the specifications and drawings for said work, having considered all of the proposals presented and the qualifications of each bidder, together with the report submitted by the Electrical Engineer, finds that the lowest responsible bidder is the Freeman-Sweet Company of Chicago, Illinois.

Your Committee further reports that it is of the opinion that said company is competent to comply satisfactorily with the terms and conditions of the contract for doing said work and, having had the matter under consideration, recommends the passage of the following order:

Ordered, That the contract for the work above specified be, and the same is hereby awarded to the Freeman-Sweet Company for the unit prices named in its bid under said Division "A," aggregating the sum of $35,907.69, and for the unit prices named in its bid under said Division "B," aggregating the sum of $60,500.00; and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate said contract in accordance with the specifications and drawings on which proposals were submitted when the same shall have been executed by the said Freeman-Sweet Company and a bond for the faithful performance of said contract has been approved by the Committee on Finance; and it is further

Ordered, That the checks of the respective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Lawley, Mueller, Nance and Paullin—Six.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that in order to relieve back water pressure under emergency conditions, upon the sluice gates in the dry and storm weather discharge chambers of the Calumet Sewage Pumping Station, it is advisable to construct a by-pass around said sluice gates and install on said by-pass two additional sluice gates of heavy construction, and he requests that he may be authorized to direct the T. J. Forschner Contracting Co., which company is now constructing the said Pumping Station,

to furnish and install said sluice gates under the extra work clause of its contract with the Sanitary District, dated June 20, 1918 (page 893 of the Proceedings), at a cost of not to exceed $1,100.00.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized to direct the T. J. Forschner Contracting Co., to furnish and install said sluice gates under the extra work clause of its said contract provided the cost of the same shall not exceed the sum of $1,100.00.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Electrical Engineer in which he states that all the runners on turbine units Nos. 5 and 6 with the exception of one runner on each unit at the Power House near Lockport, Illinois, are badly cracked owing to erosion and should be immediately replaced; that said runners were originally installed by the S. Morgan Smith Company of York, Pennsylvania and are of a patented design. He further states that said Company has offered to furnish ten runners for said units for the sum of $10,250.00 f. o. b. cars York, Pennsylvania, that said price is considerably lower than the Sanitary District paid for the last runners purchased, and he recommends that said offer be accepted.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Electrical Engineer be, and he is hereby, authorized and directed to accept the offer of the S. Morgan Smith Company to furnish the runners above specified for the sum of $10,250.00 f. o. b. cars York, Pennsylvania.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that the Board on August 31, 1916 (page 1096 of the Proceedings), authorized the execution of an agreement between the Sanitary Dis-

trict and Mary Jane Hess, wherein she granted an easement to the Sanitary District to construct the Calumet intercepting sewer in the Blue Island and Riverdale Road between Halsted street and Wentworth avenue; that one of the terms of said agreement was that when said sewer was constructed that the Sanitary District would pave said road between the streets mentioned with a macadam pavement. He further states that said road is now sufficiently settled to allow said pavement to be constructed thereon, and he requests that he be permitted to prepare plans and specifications therefor.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized and directed to prepare plans and specifications for the work above specified and when the same are prepared to present the same to your Committee for its approval.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that the wooden bridge across the north drainage ditch on Contract Section 9 of the Calumet-Sag Channel across Henry Road is in immediate need of repairs, and in order to avoid constant maintenance of said bridge, it is advisable to remove the same and in place of a bridge fill in said ditch at said point after installing therein a 30-inch pipe culvert at an estimated cost of $500.00.

Your Committee having had the matter under consideration, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized and directed to perform the work above specified, provided the cost of the same shall not exceed the sum of $500.00.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that at the last session of the General Assembly of the State of Illinois the Sanitary District was authorized to construct roadways on the right of way of its various channels.

Your Committee further reports that the Chief Engineer has made a study of the location of a proposed driveway along the right of way of the North Shore Channel, and has reported to your Committee that the most feasible plan is to construct said driveway along the east side of the North Shore Channel from Lawrence avenue north to Lincoln avenue, then across the Lincoln avenue bridge to the west side of said North Shore Channel continuing said driveway to some street within the corporate limits of the City of Evanston, and then again across said North Shore Channel to the east side thereof and along said east side connecting finally with Sheridan Road.

Your Committee further reports that it has examined said route for said proposed driveway and has approved the same, and your Committee is of the opinion that the Chief Engineer should be authorized and directed to prepare plans and specifications for said proposed driveway, and therefore recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized and directed to prepare plans asd specifications for the construction of said proposed driveway, and that the Clerk advertise for bids for doing said work in accordance with said plans and specifications so to be prepared by the Chief Engineer; provided, however, that no contract shall be entered into for doing said work until said plans and specifications have been approved by the Board.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that on July 21, 1919, the City Council of the City of Chicago passed an ordinance granting to the Sanitary District a perpetual easement, right and authority to construct, reconstruct, repair, maintain and operate intercepting sewers, drains and outlets, together with all necessary appurtenances thereto, the same to be adjuncts of the Calumet-Sag Channel upon, under and through all streets, public alleys and highways of the City of Chicago within its territorial limits traversed by the right-of-way of said intercepting sewers on the terms and conditions stated in said ordinance. The legal description of the rights-of-way of said intercepting sewers, which are three in number, are set forth in said ordinance under headings "A," "B" and "C," and said sewers are otherwise briefly described as follows:

(A) An intercepting sewer to be built for the purpose of taking care of the domestic sewage arising in the territory lying between 95th street and 114th street on the east side of the Calumet river.

(B) An intercepting sewer to be built for the purpose of taking care of the domestic sewage arising in certain territory lying northeasterly of Harbor avenue and extending from the east line of the Strand to the north line of East 95th street, and an overflow sewer extending from the east line of 95th street to the Calumet river.

(C) An intercepting sewer to be built on Edbrooke avenue and Edbrooke avenue produced from the Calumet sewage pumping station to the center thread of the Calumet river, which is designed as an outlet for the excess water coming into said pumping station in times of flood.

Your Committee further reports that Section 4 of said ordinance provides that said ordinance shall be in force and effect from and after passage and approval, and the acceptance of The Sanitary District of Chicago on or before 60 days thereafter.

Your Committee having examined said ordinance, which is herewith transmitted to the Board, is of the opinion that it is for the best interests of the Sanitary District to accept the same and, therefore, recommends the passage of the following order:

Ordered, That the ordinance above specified, which is hereto attached, passed by the City Council of the City of Chicago on July 21, 1919, be, and the same is hereby accepted, and The Sanitary District of Chicago hereby agrees to fully comply with all the terms and conditions thereof; and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to file with the City Clerk of the City of Chicago in the name and on behalf of The Sanitary District of Chicago a written acceptance of said ordinance and to agree to fully comply with all the terms and conditions thereof, and it is further

Ordered, That the form of said ordinance be printed in the Proceedings of the Board.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
MATT A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Be It Ordained by the City Council of the City of Chicago:

SECTION 1. That subject always to the conditions hereinafter stated, a perpetual easement, right and authority be and the same are hereby granted and given to The Sanitary District of Chicago to construct, reconstruct, repair, maintain and operate intercepting sewers, drains and outlets, together with all necessary appurtenances thereto, hereinafter designated as "Intercepting Sewers," the same to be adjuncts of the Calumet-Sag Channel of The Sanitary District of Chicago upon, under and through all the streets, public alleys and highways of the City of Chicago within the territorial limits of said City of Chicago traversed by the rights of way of said intercepting sewers, which rights of way are described as follows, to-wit:

(A) That part of East Ninety-seventh street lying west of the west line of Avenue N and east of the Calumet River; also a strip of land sixty (60) feet in width extending from a line one hundred twenty-four (124) feet west of the west line of said Avenue N to the south line of East Ninety-sixth street, the center line of said strip being described as follows:

Beginning at a point in the center line of East Ninety-seventh street one hundred twenty-four (124) feet west of the west line of Avenue N, thence westerly to a point twenty-five (25) feet southwesterly measured at right angles from the southwesterly boundary of the right of way of the Pittsburg, Fort Wayne & Chicago Railroad Co. and forty (40) feet easterly measured at right angles from the easterly channel line of the Calumet River, as established by the United States Government; thence westerly approximately three hundred twenty (320) feet along a line at right angles to said easterly channel line to a point in a line thirty (30) feet northeasterly of and parallel to the southwesterly line

of Block 113, in South Chicago Subdivision; thence northwesterly along a line thirty (30) feet northeasterly of and parallel to the southwesterly line of said Block 113 to an intersection with a line four hunded twenty-five (425) feet east of and parallel to the east line of Baltimore avenue; thence north along a line four hundred twenty-five (425) feet east of and parallel to the east line of Baltimore avenue to the south line of East Ninety-sixth street; also that part of East Ninety-sixth street lying between the east line of Baltimore avenue and a line four hundred fifty-five (455) feet east of and parallel to said east line of Baltimore avenue; also that part of Baltimore avenue lying between the south line of East Ninety-sixth street and the north line of East Ninety-fifth street, all of said right of way being situated in Sections five (5) and six (6), Township thirty-seven (37) north, range fifteen (15) East of the third principal meridian in the City of Chicago, County of Cook and State of Illinois.

(B) That part of East Ninety-fifth street lying between the west line of Baltimore avenue produced and the Calumet River, also a strip of land sixty (60) feet in width lying northwesterly of and adjacent to the Indian Boundary line and extending from the north line of East Ninety-fifth street to the southwesterly line of South Chicago avenue; also that part of Harbor avenue extending from the southwesterly line of South Chicago avenue to the east line of The Strand, including all street and alley intersections between said limits, and

(C) A strip of land sixty-six (66) feet in width across Block three (3) in Warren's Addition to Wildwood, the center line of said strip of land being the center line of Edbrooke avenue produced northward; also Edbrooke avenue from the south line of said block three (3) to the south line of East 127th street, including all street and alley intersections; also a strip of land sixty-six (66) feet in width extending from said south line of East 127th street to the center line of the Little Calumet River, the center line of said strip of land being a line extending from the intersection of the center line of Edbrooke avenue with the south line of East 127th street southwesterly parallel with the westerly line of Indiana avenue; all of said land being located in Section twenty-eight (28), township thirty-seven (37) north, range fourteen (14) east of the third principal meridian south of the Indian boundary line, in the City of Chicago, County of Cook and State of Illinois,

said respective rights of way being colored in red on the plats hereto attached, marked Exhibits A, B and C.

SEC. 2. That the City of Chicago shall have the right to connect in a manner to be approved by the Chief Engineer of The Sanitary District of Chicago any new sewer (not including, however, house drains) or system of sewers hereinafter installed by the City of Chicago with the intercepting sewers to be constructed hereunder by The Sanitary District of Chicago.

SEC. 3. That the rights hereby granted to the said The Sanitary District of Chicago are so granted upon the conditions:

(a) That the said The Sanitary District of Chicago shall, at its sole cost and expense, construct in the streets and highways of the City of Chicago, suitable sewer connections for the City of Chicago in said intercepting sewers at such points in said sewers as may be agreed upon by the Chief Engineer of The Sanitary District of Chicago and the Commissioner of Public Works of the City of Chicago.

(b) Whenever or wherever said The Sanitary District of Chicago shall, in the construction of said intercepting sewers, intercept or cut or cause to be inter-

cepted or cut any sewerage pipes or other pipes or conduits through which sewage or drainage may flow, said The Sanitary District of Chicago shall, at its sole cost and expense, restore said pipes and conduits to their former condition of usefulness or connect the same directly with the said intercepting sewers in a manner to be approved by the Commissioner of Public Works of the City of Chicago.

(c) That The Sanitary District of Chicago shall, at its own expense, make such changes in the location of the police and fire alarm electrical wires of the City of Chicago as may be rendered necessary by the construction of the said intercepting sewer, such changes shall be made at the places and in the manner designated by the Commissioner of Public Works of the City of Chicago, and subject to the approval of the Commissioner of Gas and Electricity.

(d) That said intercepting sewers of The Sanitary District of Chicago shall be constructed, reconstructed, repaired and efficiently maintained and operated solely by The Sanitary District of Chicago at its sole cost and expense; and the said City of Chicago shall not be held responsible in any manner for the location or manner of construction, reconstruction, maintenance, repair or operation of the same.

(e) That The Sanitary District of Chicago shall indemnify and hold harmless the City of Chicago from any and all claims for damages to real and personal property and injuries or death suffered by persons by reason of the construction, reconstruction, repair, maintenance or operation of said intercepting sewers within the corporate limits of the said City of Chicago.

(f) That said The Sanitary District of Chicago shall at its sole cost and expense restore, to their former condition of usefulness, pavements of all streets, public alleys and highways disturbed or interfered with by the construction, reconstruction, maintenance, repair or operation of said intercepting sewers, as well as all walks, cross-walks, curbs, gutters, catch basins and other public property of the City of Chicago, as soon as is practicable. All surplus excavation and other spoil shall be removed from the paved streets, public alleys and highways by said The Sanitary District of Chicago within a reasonable time, provided, however, The Sanitary District of Chicago is hereby given the right subject to the approval of the Commissioner of Public Works, to leave upon all unimproved streets, public alleys and highways surplus excavation and other spoil occasioned by the construction of said intercepting sewer, provided that the height to which such surplus excavation and other spoil may be deposited shall not exceed the elevation of the established grade of said streets, public alleys and highways. The public use of said streets, public alleys and highways within the said City of Chicago above specified shall not be unnecessarily interrupted or interfered with.

(g) That insofar as is practicable, said The Sanitary District of Chicago shall construct and maintain temporary bridges for both street and foot traffic until the pavements, walks and cross-walks removed or disturbed by reason of said work of excavation shall be restored to their former condition of usefulness.

(h) The said City of Chicago does hereby order and direct all persons, partnerships or corporations, who shall, at the time of the construction of said intercepting sewers, own, operate or maintain any conduits, wires, poles, pipes, gas mains, cables, steam and street railway tracks and equipment or other structures within any portion of the streets, public alleys and highways to be excavated in the construction of said intercepting sewers at his, its or their own expense to make such changes in the location of such conduits, wires, poles,

pipes, gas mains and cables, steam and street railway tracks and equipment or other structures as may be rendered necessary by the construction of said intercepting sewers.

(i) The Sanitary District of Chicago and its contractors are hereby given and granted the right to use in the construction of said intercepting sewers, dinkey engines and cars running on temporary tracks laid on the surface of said streets, public alleys and highways and may also use in said construction such steam shovels, hoisting engines and other plant and equipment as may be necessary for the complete construction of said work.

(j) That in all cases where it shall become and be necessary to remove, alter or repair water mains in the streets, public alleys and highways of the City of Chicago on account of the construction of said intercepting sewers, the Commissioner of Public Works is hereby authorized and directed to remove, alter or repair such water mains at the cost and expense of the water fund of the City of Chicago. In all cases where it shall become and be necessary that water service pipes be removed, cut off or damaged in any way on account of the construction of said intercepting sewers, The Sanitary District of Chicago is hereby authorized and directed to remove, alter or repair such water service pipes at its own cost and expense.

(k) The City of Chicago will, upon the complete construction of said intercepting sewers, by a proper and appropriate ordinance prohibit the discharge of any and all trade waste and sewage of any kind into the Calumet River, Lake Michigan and into Lake Calumet, wherever it is reasonable to require the discharge of such trade waste and sewage into an existing intercepting sewer system which does not in turn discharge its contents into either the Calumet River, Lake Michigan or Lake Calumet and will in said ordinance prescribe penalties for the violations of such ordinance.

(l) That the Commissioner of Public Works is hereby authorized and directed to issue, without fees or cost therefor, to The Sanitary District of Chicago or to any contractor to whom the work or any part thereof specified in this ordinance shall be awarded, all permits or licenses required for doing said work and shall not require from The Sanitary District of Chicago, the deposit of any sums of money now required under the ordinances of the City of Chicago for similar work and further, shall not require the payment by The Sanitary District of Chicago of any fees or salary for inspectors employed by the City of Chicago on said work.

SEC. 4. This ordinance shall be in force and effect from and after its passage and approval and the acceptance of the same by The Sanitary District of Chicago on or before sixty (60) days thereafter.

Approved as to form:

CHARLES E. ANTHONY,
Assistant Attorney.

C. ARCH WILLIAMS,
Attorney.

Approved as to legal descriptions:

PHILIP HARRINGTON,
Chief Draftsman.

Mr. Clark moved that the report be adopted and the accompanying order passed.

Yeas—Messrs. Carr, Clark, Lawley, Mueller, Nance and Paullin—Six.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a final certificate from the Chief Engineer that the work covered by the contract of the Chicago Bridge and Iron Com-

pany dated December 16, 1915 (page 1821 of the Proceedings) for furnishing fabricating and delivering to the Sanitary District the entire superstructure metal work for the highway bridges crossing the Calumet-Sag Channel on the line of Archer road, Western avenue, Division street, Ann street and Chicago street has been completed in accordance with all the terms and conditions of the contract and to the satisfaction of the Chief Engineer, except as to the time of completion. It appears from said final certificate that there was a default in time of ninety-three calendar days in the completion of said work which at $10.00 per day provided in said contract for each day's delay amounts to $930.00 which should be deducted from the amount of the final voucher.

Your Committee having read the final certificate of the Chief Engineer, hereto attached, and having had the matter under consideration is of the opinion that the sum of $930.00 should be deducted from the final payment due said contractor for the delays in question, and recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to pay to the Chicago Bridge & Iron Company upon the voucher of the Chief Engineer, the total sum of $914.40 now found to be due said Company under its said contract after deducting the said sum of $930.00 as above specified, upon the execution by said Company of a receipt in full of all claims and demands arising out of or resulting from the performance of the work under said contract, except as to said sum of $930.00 deducted from said final voucher and also upon the execution of an affidavit by an officer of said Company that all materialmen, mechanics and workmen employed by said Company have been paid in full; said payment, however, to be made subject to any unaccrued or unmatured obligations imposed by said contract.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

FINAL CERTIFICATE.

May 18, 1918.

Subject: Calumet-Sag Channel, Archer Road, Western Ave., Division St., Chicago St. and Ann St. Bridge Superstructures.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I transmit herewith final voucher in the amount of $914.40 to Chicago Bridge & Iron Company on its contract dated December 16, 1915 (pages 1821-1841 of Proceedings), for the furnishing, fabrication and delivery of metal work for the superstructures of the highway bridges across the Calumet-Sag Channel on the line of Archer Road in the Township of Lemont, and on the line of Western Avenue, on the line of Division Street, on the line of Ann Street and on the line of Chicago Street in the City of Blue Island. All work on this contract has been completed in accordance with all of the terms and conditions of the contract except as to the time of completion of the delivery of Western Avenue bridge.

Article 17 of the contract provides that the contractor shall complete the fabrication and delivery of the metal work for the superstructure of Western Avenue bridge delivered so that the work of erection could have been commenced on November 30, 1916, a default in time of 121 calendar days.

After the contract was executed, certain changes were made in the plans to provide supports for a 16-inch water pipe under the east sidewalk of the bridge, which changes caused additional work by the contractor, requiring some additional time to perform. The amount of the additional time required to do this work is difficult to determine, but I estimate that it did not exceed four weeks or twenty-eight (28) days, which allowance leaves a net default of ninety-three (93) days. The liquidated damages specified in the contract is $10.00 per day, making a total of $930.00.

The total amount due on the contract is $1.844.40, from which has been deducted $930.00 for liquidated damages, making the net amount due the contractor $914.40.

One extra bill is allowed in this contract for changing length of hand rail sections, amounting to $54.05.

Respectfully submitted,

G. M. WISNER,
Chief Engineer.

Recommended by:
C. R. DART,
Chief Bridge Engineer.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on July 17, 1919 (page 903 of the Proceedings), rejected the bid of the Sangamon County Coal Co., for furnishing coal screenings for the Thirty-ninth Street and Lawrence Avenue Pumping Stations for the reason that the coal furnished on trial did not equal the guarantee specified in the proposal of said bidder, and the Chief Engineer was authorized to purchase from the Sterling Midland Coal Company a sufficient number of cars of coal of the grade of coal offered in its bid to enable him to determine whether the proportions of moisture, ash and B. T. U.'s contained therein equaled the guarantee specified.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that said Sterling Midland Coal Company furnished eleven cars of coal for the Thirty-ninth Street Pumping Station but analyses of samples of said coal show that said coal does not equal the guarantee specified and he recommends that the bid for furnishing coal for said Thirty-ninth Street Pumping Station be rejected, but that said company be allowed to furnish another grade of coal for the Lawrence Avenue Pumping Station and have the same analyzed to determine whether said coal will equal the guarantee specified.

The Chief Engineer further recommends that the Bickett Coal & Coke Co., the next lowest bidder for furnishing said coal be allowed to furnish a number of cars of the grade of coal offered for the Thirty-ninth Street Pumping Station and that said coal be analyzed to determine its proportions of moisture, ash and B. T. U's per pound of dry coal and if said coal equals the guarantee specified, then a contract be entered into between the Sanitary District and said Bickett Coal & Coke Co. for all the coal advertised for said Thirty-ninth Street Pumping Station.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the bid of the Sterling Midland Coal Company for furnishing coal for the Thirty-ninth Street Pumping Station be, and the same is hereby, rejected for the reasons stated, and it is further

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to purchase from the Bickett Coal & Coke Co., a sufficient number of cars of coal for the Thirty-ninth Street Pumping Station of the grade of coal offered in its bid to enable him to determine by analyses whether the propor-

tions of moisture, ash and B. T. U.'s contained therein equal the guarantee specified and report the result of said analyses to the Board for action, and it is further

Ordered, That the check of the Sterling Midland Coal Company deposited with its bid for furnishing coal for the Thirty-ninth Street Pumping Station be returned to said company.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Electrical Development.

Mr. Clark presented the following report from the Committee on Electrical Development:

CHICAGO, August 7, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTEMEN—Your Committee on Electrical Development herewith presents contracts with the Indian Refining Company, 3200 South Western avenue, Chicago, Charles Hallenbach, 1317 South Oakley street, Chicago, the Midland Terra Cotta Company, 54th avenue and 16th street, Cicero and Arthur MacNeal, 3287 Oak Park avenue, Berwyn, George Draeger and David G. Boissoneau, Copartners, doing business under the firm name of Draeger and Boissoneau, 438 Western avenue, Blue Island, and Justus Brumer and J. T. Pritchard, doing business under the firm name of Brumer and Pritchard, 311 Western avenue, Blue Island, wherein the Sanitary District agrees to furnish and said parties agree to take electrical energy for the periods of time and upon the terms and conditions therein set forth. All of said contracts have been approved by the Electrical Engineer.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute in duplicate the attached contracts which have heretofore been executed by said parties.

Respectfully submitted,
WALLACE G. CLARK,
Vice-Chairman.
WM. J. HEALY,
MATT A. MUELLER,
Committee on Electrical Development.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

T. J. Mazzola, Rodman, $100.00 per month.

J. J. MacDonald, Rodman, $100.00 per month.

H. C. Mueller, Rodman, $100.00 per month.

A. Gerzen, Rodman, $100.00 per month.

Engineering Department.

J. A. Piersol, Sub-instrument man, $130.00 per month.

Sanford Olson, Chemical Assistant, $100.00 per month.

Thos. F. Kett, Rodman, $100.00 per month.

Chas. Weiland, Laborer, $96.00 per month.

Morgan Donohue, Laborer, 50 cents per hour.

John Mason, Laborer, 50 cents per hour.

George Coyne, Laborer, 50 cents per hour.

William O'Brien, Laborer, 50 cents per hour.

William Farley, Fireman, 60 cents per hour.

Electrical Department.

L. E. Zagers, Carpenter (Vacation period), 80 cents per hour.

Alvin O'Malley, Stenographer (Vacation period), $125.00 per month.

E. H. Barringer, Lineman, $165.00 per month.

John J. Kane, Groundman, $115.00 per month.

Ed. Lynch, Laborer, 50 cents per hour.

INCREASES.

Engineering Department.

D. F. Fleming, Assistant Mechanical Engineer, $175.00 per month to $225.00 per month.

Geo. F. Fitzgerald, Sub-instrument Man, at $130.00 per month to Instrument Man, at $150.00 per month.

Carl Newman, Rough Carpenter, at $4.50 per day, to Carpenter, at 70 cents per hour.

John Lally, Engineer in Charge, 39th St. Station, $250.00 per month to $300.00 per month.

James A. Shay, Engineer in Charge, Lawrence Ave. Station, $200.00 per month to $250.00 per month.

Hugh J. Gleason, Stationary Engineer, $150.00 per month to $205.00 per month.

Chris. J. Heaney, Stationary Engineer, $150.00 per month to $205.00 per month.

Thos. Lawlor, Stationary Engineer, $150.00 per month to $205.00 per month.

John A. Miller, Stationary Engineer, $150.00 per month to $205.00 per month.

Robt. Simpson, Stationary Engineer, $150.00 per month to $205.00 per month.

Dan Gleason, Stationary Engineer, $150.00 per month to $205.00 per month.

Theo. A. Schwartz, Stationary Engineer, $150.00 per month to $205.00 per month.

M. F. Schopf, Stationary Engineer, $150.00 per month to $205.00 per month.

Arthur Mercier, Stationary Engineer, $150.00 per month to $205.00 per month.

Jos. E. Smith, Boiler Washer, $110.00 per month to $140.00 per month.

Gustave Laga, Boiler Washer, $110.00 per month to $140.00 per month.

P. J. Lochner, Oiler, $110.00 per month to $140.00 per month.

Henry Kampf, Oiler, $110.00 per month to $140.00 per month.

John Szummarski, Oiler, $110.00 per month to $140.00 per month.

Matt. O'Connell, Oiler, $110.00 per month to $140.00 per month.

Patrick Coyle, Oiler, $110.00 per month to $140.00 per month.

Stanley Czerwinski, Oiler, $110.00 per month to $140.00 per month.

Andrew Haberzetle, Oiler, $110.00 per month to $140.00 per month.

John Buttny, Oiler, $110.00 per month to $140.00 per month.

Edward Naughton, Oiler, $110.00 per month to $140.00 per month.

C. E. McKeown, Oiler, $110.00 per month to $140.00 per month.

Bruno Salavano, Oiler, $110.00 per month to $140.00 per month.

Frank Dushek, Oiler, $110.00 per month to $140.00 per month.

Sigvard Olsen, Oiler, $110.00 per month to $140.00 per month.

Emil Dahms, Oiler, $110.00 per month to $140.00 per month.

Albert G. Selle, Fireman, $110.00 per month to $140.00 per month.

E. F. Coyne, Fireman, $110.00 per month to $140.00 per month.

George Finch, Fireman, $110.00 per month to $140.00 per month.

Adam Klein, Fireman, $110.00 per month to $140.00 per month.

William Flavin, Fireman, $110.00 per month to $140.00 per month.

Chas. J. Smith, Fireman, $110.00 per month to $140.00 per month.

Louis Bell, Fireman, $110.00 per month to $140.00 per month.

Fred Bergman, Fireman, $110.00 per month to $140.00 per month.

TRANSFER.

Electrical Department.

Daniel McAvoy, from Lineman at $165.00 per month to Lineman Foreman (Temporary), at $190.00 per month.

REINSTATEMENTS.

Due to Honorable Discharge from the U. S. Army Service.

Electrical Department.

Chas. J. Phalen, Lineman, $165.00 per month.

Chas. A. Drury, Meter Inspector, $140.00 per month.

Engineering Department.

Chas. Corso, Laborer, 50 cents per hour.

T. Pasevanto, Laborer, 50 cents per hour.

Harry O'Neil, Laborer, 50 cents per hour.

Harry Giblin, Laborer, 50 cents per hour.

Arthur Hennessey, Laborer, 50 cents per hour.

John Regan, Laborer, 50 cents per hour.

Police Department.

Maurice O'Malley, Patrolman, $115.00 per month.

Respectfully submitted,
GEORGE W. PAULLIN,
Chairman.
WALLACE G. CLARK,
JAS. H. LAWLEY,
Committee on Employment.

Mr. Clark moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

NEW BUSINESS.

Mr. Lawley moved that when this meeting of the Board of Trustees adjourns it adjourn to meet again on Tuesday, August 12, 1919, at 2 o'clock P. M., at its usual place of meeting.

The motion prevailed.

Payroll of The Sanitary District of Chicago for the Month of April, 1919.

BOARD OF TRUSTEES.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

ADJOURNED MEETING.

THURSDAY, AUGUST 14, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

The roll being called there were:

Present—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Absent—Messrs. Sergel and Littler—Two.

Temporary Chairman.

President Sergel being absent, Trustee Lawley moved that Mr. Clark act as Chairman of the meeting.

The motion prevailed, and Mr. Clark took the Chair.

REPORTS OF OFFICERS.

The Clerk presented report of the Attorney as follows:

CHICAGO, August 12, 1919.

To the Honorable the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—On June 19th Trustee Paullin presented a communication from Hon. H. P. Pearsons, Mayor of the City of Evanston, stating that at the meeting of the City Council held on June 17th he was requested to ask a permit from the Sanitary District for the use of its land along the banks of the North Shore Channel from Emerson to Isabella streets, to be used as a municipal golf course for the people of Evanston. Motion was made and carried that the request be granted in such form as the Law Department deemed advisable. Since then the Attorney has had several conferences with the City Attorney of Evanston and other representatives of that municipality, as the result of which an agreement has been prepared in duplicate and executed by the Mayor and Clerk of the City of Evanston, same being herewith transmitted.

I respectfully suggest that the Chairman of the Committee on Finance of the Board of Trustees and the Clerk be authorized and directed to execute said agreement in duplicate.

Respectfully submitted,
(Signed) C. ARCH WILLIAMS,
Attorney.

THIS INDENTURE WITNESSETH, That:

WHEREAS, THE SANITARY DISTRICT OF CHICAGO, a municipal corporation organized and existing under the laws of the State of Illinois (hereinafter referred to as the "Sanitary District") is the owner of a right of way adjacent to its North Shore Channel extending from the north line of Emerson street in the City of Evanston, Cook County, Illinois, to the north limits of said city, and the CITY OF EVANSTON, a municipal corporation organized and existing under the laws of the State of Illinois (hereinafter referred to as the "City") has requested said Sanitary District for the right to use that part of said right of way hereinafter described for the purpose of beautifying and improving the same and using said right of way for a municipal golf course, tennis courts, baseball fields and for other recreation purposes, and said Sanitary District is willing to grant such right on the terms and conditions hereinafter set forth,

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, said Sanitary District hereby gives and grants to said City the permission, right and authority to use, occupy and enjoy that part of its right of way on the east and west banks of said North Shore Channel between the north line of Emerson street in said City, for the period of time and for the uses and purposes herein set forth.

The grant herein contained is made upon the following terms and conditions, to-wit:

1. That said City is hereby given and granted the right to use, occupy and enjoy that part of the right of way of said North Shore Channel on the west bank of said channel lying between the north line of Emerson street and the north city limits of said City until this grant is revoked under the terms and conditions hereinafter set forth.

2. That said City is hereby given and granted the right to use, occupy and enjoy that part of the right of way of said North Shore Channel on the east bank of said channel lying between the north line of Emerson street and the north line of Central street in said City until this grant is revoked under the terms and conditions hereinafter set forth.

3. That said City is hereby given and granted the right to use, occupy and enjoy that part of the right of way of

said North Shore Channel on the east bank of said channel lying between the north line of Central street in said City and the north city limits of said City, beginning December 1, 1920, until this grant is revoked under the terms and conditions hereinafter set forth.

4. It is understood and agreed that the permission hereby granted to said City to use said right of way shall not be construed to be exclusive, but that said right of way shall be open to the free passage of all persons and vehicles over and across the same to the extent that now exists. Said right of way shall also be subject at all times to the use by said Sanitary District and its officers and employees for any of the corporate purposes of said Sanitary District and shall be subject to the police regulations of said Sanitary District.

5. Said City may at its sole cost and expense level off the surface of said right of way, fill all holes and abandoned ditches with material taken from the spoil banks, plant trees, shrubs and flowers at such places as may be acceptable to said Sanitary District, and, in general, may park and beautify said right of way and use the same for the purposes herein set forth and for such other purposes as may not be inconsistent with the use thereof by said Sanitary District.

6. Said City may at its sole cost and expense lay out and construct a municipal golf course, tennis courts, baseball fields and play grounds on said right of way at such places as may be approved by the Chief Engineer of said Sanitary District and place benches and seats upon said right of way, but shall not erect any buildings of a permanent character, nor any fences, sewers or drains upon said right of way.

7. Said City hereby agrees that it will not interfere with or damage in any way any drains or sewer outlets on said right of way and will not damage the sloping banks of said North Shore Channel, and will not use said banks as landing places for watercraft unless express permission so to do is granted by the Chief Engineer of said Sanitary District.

8. Said Sanitary District may revoke the permission, right and authority herein granted to use, occupy and enjoy said right of way of the North Shore Channel herein specified, either in whole or in part, by giving ninety (90) days' notice in writing to said City of its intention so to do, and in the event said grant is revoked, said City hereby agrees to surrender the immediate possession of said right of way to said Sanitary District.

9. Said City hereby agrees to keep and save harmless and indemnify said Sanitary District against any and all claims for damages, liabilities, judgments, costs and expenses which may in any wise directly or indirectly result from any work, installation, operation or maintenance of any kind or nature whatsoever on said right of way of said North Shore Channel.

10. Said City is hereby given and granted the right to enter into any agreement with any voluntary or any other association of its citizens for the purpose of using said right of way of said North Shore Channel, or any part thereof, for the purposes herein set forth, but such grant shall not relieve said City from performing all of the terms and conditions of this indenture, and of its obligation to keep and save harmless and indemnify said Sanitary District against all claims for damages as set forth in the preceding section of this grant.

11. Said City hereby accepts this grant subject to the rights of all tenants, lessees and licensees or other persons occupying any part of said right of way of said North Shore Channel whose occupancy is authorized by lease, agreement, license or permit of said Sanitary District.

In Witness Whereof, said The

SANITARY DISTRICT OF CHICAGO has caused these presents to be signed by the Chairman of its Committee on Finance and to be attested by its Clerk, and said CITY OF EVANSTON has caused these presents to be executed by its duly authorized officers this .... day of July, A. D. 1919.

THE SANITARY DISTRICT OF CHICAGO,
By.....
Chairman of its Committee on Finance.
Attest:
.....,
Clerk.

CITY OF EVANSTON.
By HARRY PEARSONS,
Mayor.
Attest:
.....,
City Clerk.

Mr. Lawley moved that the Chairman of the Committee on Finance and the Clerk be authorized and directed to execute in duplicate said agreement.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

The Clerk presented his report of money received and deposited with the Treasurer during the month of July, 1919, which was ordered published and filed, as follows:

CHICAGO, August 12, 1919.

GEO. M. REYNOLDS,
Treasurer, The Sanitary District of Chicago.

The Clerk presented the report of the Chief Engineer for the month of April, 1919, which was ordered published and filed, as follows:

CHICAGO, May 1, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I herewith present the report of the Engineering Department for the month of April, 1919, giving the detailed operations of the same.

CONSTRUCTION.

NORTH SHORE CHANNEL.

Spoil Banks.

The National Brick Company removed 1073 cubic yards of material from the south spoil banks, from the 28th to the 30th. No material was removed from the 1st to the 28th.

Sloping of Banks.

The Great Lakes Dredge and Dock Company, Contractors, assignment of Byrne Brothers Dredging and Engineering Co. carried on no work on this contract during the month.

CALUMET-SAG CHANNEL.

Section 1.

James O. Heyworth, Contractor, continued operations throughout the month. All work was carried on in one 10-hour shift per day. Drag line on the south berm, was engaged in excavating dam at Main Channel (M. C. Station 975 to 969) from the 1st to the 30th. Locomotive crane on the

north berm was engaged in filling overflow ditch between the Main Channel and the I. & M. Canal from the 7th to the 30th. Miscellaneous work was carried on as follows: Level off south berm from the 3rd to the 12th and 24th to the 30th; Clean up material yard from the 1st to the 30th; Excavating dam at station 42+00 from the 11th to the 22nd; Dismantle electric pumping plant from the 4th to the 30th; Digging outfall ditch station 67+40 from the 15th to the 30th; Backfilling from barge at station 28+00 on the 22nd; Removing trestle at station 23+00 from the 23rd to the 25th. Hoisting pump out of channel at station 20+50 on the 26th, 28th, and 29th. Grading Archer Road at the bridge on the 28th and 29th. Level off south berm at station 13+00 on the 30th. Digging outfall ditch at station 42+50, north side of channel, on the 30th, Patching C. & A. abutments on the 26th and 29th. The following force account work was carried on. Repairing Main Channel Wall at the I. & M. Canal overflow ditch from the 9th to the 12th, 15th, 17th and 18th. An average daily force of 41.6 men was employed. At the end of the month 98.8 per cent of the total estimated value of the contract was completed.

E. A. Hanrahan, contractor for connecting certain farm ditches with the Calumet-Sag Channel, removing two flumes and constructing about 800 yards of rip rap, and certain other minor work on sections 1 to 12 inclusive. Employed a small force in removing flume at station 69+50 from the 29th to the 30th. The work was 10 per cent completed at the end of the month.

Section 13.

A. Guthrie & Co., Inc., Contractors, continued operations throughout the month. Steam shovel No. 2, in channel, was engaged in excavating glacial drift in channel between stations 756+00 and 760+25 on the 18th, 19th, 23rd and 25th, and 28th to 30th. Two dinky engines and 3 dump cars engaged in hauling spoil from shovel No. 2 to backfill south wall between stations 768+00 and 770+00 on the 18th, 19th, 23rd to 25th, and 28th to 30th. Jack hammer drills were engaged in drilling old east retaining wall of the R. I. embankment preparatory to removing same from the 24th to the 30th. All the aforementioned work was carried on in one 10-hour shift per day. Pumping channel was carried on at station 757+50 from the 1st to the 30th, working an average of 4½ hours per day, and at station 782+00, from the 1st to the 19th, working an average of 5 hours per day. Traveler No. 1 was engaged in building forms for north wall between stations 760+25 and 759+75 from the 26th to the 30th, working one 10-hour shift per day. The following hand work was carried on: Cleaning off rock for footing north wall at station 760+50 from the 3rd to the 5th. Leveling backfill behind the south wall between stations 768+00 and 770+00 on the 18th, 19th, 23rd to the 25th and 28th to 30th working one 10-hour shift per day on hand work. An average daily force of 30.9 men was employed.

The City of Blue Island employed a force of 4 men placing pole and stringing wires for electric light, north of channel at Gregory Street foot path on the 22nd.

Section 14.

A. Guthrie & Co., Contractors, continued operations throughout the month. Steam shovel No. 5 on the north berm, engaged in excavating spoil from spoil bank, to be used for backfilling north walls, between stations 834+00 and 835+00 from the 1st to the 7th and stations 829+00 and 814+00 from the 15th to the 30th.

Three dinky engines and 16 dump cars were engaged in hauling spoil from shovel No. 5 to backfill behind north wall between stations 820+00 and 833+00 from the 1st to the 7th and 15th to the 22nd, hauling spoil to north approach of Ashland Avenue bridge from the 23rd to the 30th. Pumping channel was carried on at station 837+00 from the 1st to the 4th and 9th to the 21st, working one 5-hour shift per day. Three teams were engaged in leveling backfill behind walls with slips between stations 821+00 and 839 from the 1st to the 10th and 16th to the 22nd. Three teams were engaged in leveling backfill on Morgan Park Sewer on the 28th. Three teams leveling fill for north approach Ashland Avenue on the 29th and 30th. Hand work was carried on backfilling Morgan Park Sewer from the 27th to the 30th by a force of 4 men. All the above mentioned work was carried on in one 10-hour shift per day. An average daily force of 46 men was employed. At the end of the month 99.8 per cent of the total estimated value of the contract was completed.

BRIDGES.

Chicago Street Bridge.

A. Guthrie & Co. employed an average daily force of 12 men building forms for concrete for north and south abutments from the 1st to the 30th, working one 10-hour shift per day.

Division Street Bridge.

The Kelly Atkinson Construction Co. employed an average daily force of 6 men laying timber floor on this bridge from the 15th to the 28th and painting on the 29th and 30th, working one 8-hour shift per day. One team was employed hauling material on the 15th, 16th, 18th and 21st.

C. R. I. & P. Ry. (Main Line) Bridge.

A. Guthrie & Co. employed an average daily force of 12.5 men on the following work. Excavating for the north pier and East half abutment from the 1st to the 10th. Pouring concrete for cylinders Nos. 2 and 3 on the 11th and 12th, working one 7-hour shift per day and on the 15th, working one 5-hour shift; building forms for footings north abutment from the 16th to the 20th, working one 10-hour shift per day; Concreting footings on the 21st and 22nd, working one 8-hour shift per day. Removing forms on the 24th, working one 10-hour shift. Excavating for cylinder No. 2 on the 25th and 26th, working one 10-hour shift per day. Building forms for north abutment from the 28th to the 30th, working one 10-hour shift per day. Jack hammer drills were engaged in drilling old abutment for new bridge seat from the 1st to the 12th, drilling rock in cylinder No. 2 on the 18th and 19th, working one 10-hour shift per day. One dinky engine and 3 cars were engaged in hauling concrete to bridge cylinders on the 11th, 12th, 15th, 29th and 30th, various shifts; Hauling concrete for north abutment on the 21st, 22nd and 26th, working in 5 and 8 hour shifts. Concrete mixer on north berm at station 766+00 was engaged in mixing concrete for this bridge on the 11th, 12th, working one 7-hour shift per day; on the 15th, working one 8-hour shift; on the 26th, working one 5-hour shift and on the 29th and 30th, working one 3-hour shift per day.

The C. R. I. & P. Ry. Co. employed an average daily force of 5 men bracing temporary trestle bent from the 2nd to the 9th. Placing extra trestle bent on the 18th and 19th, working one 8-hour shift per day.

B. & O.-G. T. W. Railway Bridges.

A. Guthrie & Co., Contractors, continued operations throughout the month. Steam shovel No. 3 excavating rock from channel between stations 746+90 and 747+50 from the

1st to the 8th, syphoning water from West half, south abutment on the 9th. Two dinky engines and 4 dump cars were engaged in hauling spoil from shovel No. 3 to spoil area on the south berm between the B. & O. Ry. and Ann Street from the 1st to the 8th. Four Jackhammer drills were engaged in drilling holes in rock, in channel, between stations 747+00 and 746+90 on the 4th and 5th, drilled 38 holes with an average depth of 11 feet or 418 lineal feet of holes. Air compressor at station 748+00 was engaged in furnishing air for drills at the B. & O. and C. R. I. & P. Ry. Bridges from the 1st to the 12th, 18th, 19th and 24th to 30th. Concrete mixer on south berm, was engaged in mixing concrete for West half of the south abutment on the 9th, working an average of 3⅔-hours; on the 22nd and 23rd, working an average of 4½ hours. Pumping channel was carried on at station 749+00 from the 1st to the 30th. Hand work was carried on as follows: Grading spoil area, south berm between B. & O. Ry. and Ann Street from the 1st to the 8th. Removing concrete forms from West half of the north abutment on the 7th. Building forms for footings West half of south abutment from the 10th to the 23rd, building chutes and cable way for concreting footings on the 8th and 9th. All the above mentioned work was carried on in one 10-hour shift per day, except wherein noted.

Concreting the south abutment was completed on the 24th. This completes the substructure ready for the erection of the remainder of the superstructure. An average daily force of 22.1 men was employed.

The B. & O. Railway Co. employed an average daily force of 6 men on the following work: Raising tracks on the north and south approach trestle to B. & O. (C. C. Div.) Bridge from the 1st to the 3rd. Unloading carload of piles for S. D. of C. for use on the Public Service Spur track, on the 4th and 7th. Bracing trestle, north approach to B. & O. bridge on the 5th, 6th, 8th to 16th. Surfacing tracks between Stony Creek and channel on the 17th. All the aforementioned work was carried on in one 8-hour shift per day. Two watchmen were engaged in watching on the approaches to the B. & O. (C. C. Div.) bridge, working day and night shift of 12-hour each.

CONTROLLING WORKS.

A. Guthrie & Co., Contractors, employed one dinky engine in syphoning water from the west section gates from the 22nd to the 30th, working one-10-hour shift per day.

The Sanitary District Organization employed one man in painting the sector gate machinery houses on the 25th and 29th, working one 8-hour shift per day.

SEWERS.

Calumet Intercepting Sewer.

Contract Section No. 5.

Byrne Brothers Dredging and Engineering Company, Contractors, resumed operations on this section on the 25th and continued through the balance of the month. The work consisted of preliminary work such as laying construction tracks, etc. An average daily force of 4.5 men and 2.5 teams was employed from the 25th to the 30th.

Contract Section No. 6.

Byrne Brothers Dredging and Engineering Company, Contractors, continued operations throughout the month. The work consisted of backfilling, grading of streets, building catch basins, etc., placing of backfill on the property of the Chicago Gun Club was begun on the 24th and continued through the month. An average daily force of 48 men and 2 teams was employed throughout the month.

Evanston Intercepting Sewer.

Nash-Dowdle Company, Contractors, continued operations throughout the month. The work consisting of construction of manholes and sewer connections, etc. An average daily force of 18 men and 2 teams was employed. At the end of the month 99.5 per cent of the work was completed.

Temporary Pumping Plant at Evanston.

Nash-Dowdle Company, Contractor, continued the work of pumping throughout the month. An average daily force of 3 men was employed.

Desplaines River Intercepting Sewer.

Nash Brothers, Contractors, continued operations throughout the month. The work consisted of constructing the main line sewer, in tunnel, in First Avenue near Madison Street and the Madison Street line, in tunnel. An average daily force of 63 men was employed throughout the month. The work was 22.3 per cent completed at the end of the month.

PUMPING STATIONS.

Calumet Sewage Pumping Station.

T. J. Forschner Contracting Company, Contractors, continued operations throughout the month. The work consisting of building forms, placing concrete and reinforcing steel in the substructure of the stations. The placing of electrical conduits in the station was begun on the 24th and continued throughout the month. An average daily force of 68 men was employed. The work was 18.5 per cent completed at the end of the month.

Evanston Sewage Pumping Station.

Nash-Dowdle Company, Contractors, continued operations throughout the month. The work consisted of excavating and placing of concrete in the substructure of the station. The work on the manufacturing of the pumps, electrical equipment, valves and piping was carried on in the shops. An average daily force of 28 men was employed throughout the month. The work was 22.1 per cent completed at the end of the month.

Sewage Treatment Plant on the North Branch of the Chicago River.

The Sanitary District Organization employed a force of 3 men on the work of installing weirs in the sewer outlets at Montrose Avenue, Irving Park Boulevard, Clybourn Avenue, Chicago Avenue and Kinzie Street, throughout the month.

MAINTENANCE AND OPERATION.

MAIN CHANNEL.

Bridges.

The Main Channel repair force was occupied during the month doing work at the controlling works Willow Springs and Summit Road Bridges.

CONTROLLING WORKS.

The Bear Trap Dam was closed the entire month.

MAIN CHANNEL EXTENSION.

BRIDGES.

Ninth and Sixteenth Street Bridges.

Minor repairs were made to the 9th Street bridge over Deep Run by the Main Channel repair force.

Two men were on duty on these bridges, working shifts from 7 A. M. to 3 P. M. and 3 P. M. to 11 P. M.

Butterfly Dam.

This dam was operated on the 6th, 13th, 20th and 27th to ascertain the condition of the same.

Dam at the Power House.

These dams were operated as follows:

The Forty-Eight Foot Dam was operated some part of eight days or a total of twenty-six hours and fifty-five minutes, an average of fifty-four minutes for each day of the month. The Twelve-Foot Dam was closed the entire month.

Samples of canal water were taken

every 8 hours for the Sanitary Division. Three men were on duty working shifts of 8 hours each throughout the month.

I. & M. Canal Lock at the Power House.

One boat passed through the lock during the month. The lights were repaired on the 3rd. The heater was repaired on the 12th and the 14th. The valve shafting was repaired on the 29th and 30th. No one was on duty on the lock during the month, the lock being operated by the dam tender.

Desplaines River Diversion.

The Sanitary District Organization employed a force of 5 men repairing a small leak in the leves on the northwest side of the river, near Summit, from the 2nd to the 8th.

North Shore Channel.

The Sanitary District Organization employed a force of 6 men on the work of repairs to outfalls and ditches along this channel. The work carried on during the month was as follows: Riprapping the west slope at Peterson Avenue from the 9th to the 11th, cleaning ditches around Lincoln Avenue from the 12th to the 21st, and around Touhy Avenue from the 22nd to the 31st.

BRIDGES.

Kenilworth (Touhy) Avenue Bridge.

The work of reflooring and painting this bridge was begun on the 8th. A force of 13 men was employed in removing the floor and sub plank preparatory to putting in a new floor, from the 15th to the 30th, the same force trimmed the slopes of the channel adjacent to the bridges. At the end of the month about half of the subplank for the new floor had been placed.

PUMPING STATIONS.

39th Street Pumping Station.

This station was operated, pumping teen minutes for each day of the sewage, and fresh water, throughout the month. The pumps were operated as follows:

Sewer Pump No. 1 was operated some part of nine days or a total of seventy-two hours and fifty-five minutes. Pump No. 2 some part of five days or a total of thirty-four hours and forty-five minutes. Pump No. 3 some part of eleven days or a total of eighty-eight hours. Pump No. 4 some part of twenty-nine days or a total of six hundred and thirty-two hours and forty-five minutes. The four pumps were operated for a grand average of six hours and fifty minutes for each day of the month and pumped an average of six thousand eight hundred and eleven cubic feet of sewage for each minute of the month.

The Fresh Water Pumps Nos. 5 and 6 were operated some part of five days or a total of sixty-three hours and twenty minutes, an average of two hours and seven minutes for each day of the month, and pumped an average of six thousand and ninety-eight cubic feet of fresh water for each minute of the month.

Sewage Pump No. 2 which was shut down on March 15th on account of a burned-out thrust bearing was put back in service on the 19th. Miscellaneous repair work was carried on throughout the month.

Lawrence Avenue Pumping Station.

This station was operated, pumping sewage, throughout the month. The pumps were operated as follows:

Sewer Pump No. 1 was operated some part of eight days or a total of eighty-three hours and twenty-five minutes. Pump No. 2 some part of eighteen days or a total of two hundred and ninety-seven hours and thirty minutes. Pump No. 3 some part of twenty-one days or a total of three hundred and sixty-four hours. The three pumps were operated for a grand average of eight hours and six-month, and pumped an average of

five thousand six hundred and ninety-one cubic feet of sewage for each minute of the month.

The fresh water pump was operated some part of two days or a total of twenty-two hours and thirty minutes, an average of forty-five minutes for each day of the month and pumped an average of six hundred and fifty-three cubic feet of water for each minute of the month.

Repairs to the coal conveyor which broke down on March 24th were completed and the same put back in service on the 3rd. An auxiliary pump for water service around the station was installed in the engine room on the 11th.

Wilmette Pumping Station.

The station was operated, pumping fresh water, throughout the month. The pumps were operated as follows:

Pump No. 1 was operated some part of thirty days or a total of six hundred and forty-five hours and thirty minutes. Pump No. 2 some part of four days or a total of fifty-nine hours and thirteen minutes. Pump No. 3 some part of thirty days or a total of five hundred and fifty-eight hours and thirteen minutes. Pump No. 4 some part of twenty-nine days or a total of four hundred and ninety-two hours and thirty-three minutes.

The four pumps were operated for a grand average of fourteen hours and fifty-four minutes for each day of the month, and pumped an average of twenty thousand eight hundred and thirty-nine cubic feet of water for each minute of the month.

STRUCTURES AND EQUIPMENT FOR SANITARY AND SPECIAL INVESTIGATION.

Morton Grove Sedimentation Plant.

This plant was operated throughout the month and the regular maintenance and operation supervised by the Sanitary District.

Laboratory at 39th Street.

Chemical analyses were made weekly of samples collected from the Main Channel and the Illinois River at Morris, Ottawa, Peru and Chillicothe. Special analyses were made on the samples sent from Lockport.

The laboratory force worked up data on analyses of Main Channel and Illinois River.

Sewer and Rain Gages.

Rain gages were operated at the 39th Street pumping Station, Stock Yards testing station, Lockport, Kensington, and at 31st Street and Western Avenue. The records collected were worked up as time permitted.

Investigation of Water Pollution.

Daily samples were collected from Lake Michigan at 39th Street and from the Main Channel at Lockport. Weekly samples from Lockport and the Illinois River at Morris, Ottawa, Peru and Chillicothe.

ENGINEERING.

Drafting Division.

The following work was carried on during the month: Work was continued on the Calumet-Sag Atlas, Chicago River Atlas and Desplaines River Sewer Atlas. Revising index, indexing and filing maps. Designing filing cases for vault. Tabulating costs on Calumet-Sag Channel. Preparing exhibits for Zuedema case. Preparing bid sheets for trestle timber G. T. W. R. R. bridge over Calumet-Sag Channel. Preparing bid sheets for coal bids. Copying records at County Building. Checking Cook County Tax Exemption lists. Plat of soundings at Monroe Street bridge. Computing co-ordinates for North Branch Survey. Plotting hubs on index map. N. B. Survey. Indexing records at warehouses. Work on Byrnes Bros. extra claim for Section 9 Calumet-Sag Channel. Printing index cards. Setting type and printing titles on Calumet and Evanston Pumping Station Plans. Tracing plats for use in Roberts case. Preparing plats of N.

Shore Channel showing garden plots for Real Estate Department. Coloring deep waterway maps.

Bridge Division.

Work was continued on the detail drawings for reinforced concrete work of the Calumet Sewage Pumping Station. Considerable time was spent during the month checking and correcting the Contractor's detail drawings of the sluice gates for the Calumet-Sewage Pumping Station.

Detail drawings were made for the steel work of the floor of the laboratory and the roof of the wings of the Desplaines River Sewage Treatment Plant and the detail drawing for the steel work of the main building were partly checked.

Specifications were written for trestle timbers for the temporary diversion of the G. T. W. Ry. tracks at the crossing of the Calumet Channel.

Sanitary Division.

The preparation of a report on the testing station work at the Stock Yards was continued. The preparation of plans and specifications for the Calumet sewer was continued. Conferences were held with officials of the City of Chicago. Preparation of plans of the Des Plaines River treatment works was continued.

Specifications were issued on Divisions A, C, N, O, P, R, V, covering the main plant and substructure, steel work, traveling crane, pumps, blowers, electrical equipment, sluice gates and venturi meters.

The preparation of supplementary plans for the Calumet and Evanston pumping stations was continued. Correspondence was carried on with Consulting Engineer A. B. Wood on all pumping stations. Studies were made of the re-arrangement of the 95th Street pumping station.

Preparation of plans of the storm water overflow to the Calumet River was continued. Studies were continued on an auxiliary generator station at the Calumet Pumping Station to be run by oil engines.

Conferences were held with various parties from the Calumet Region in Indiana over proposed schemes for sewage diversion and treatment. Specifications were issued for Morton Grove Sedimentation Plant.

The Designing Mechanical Engineer visited the shops of the contractors in the East. A report was prepared on the southern trip. Visitors from various cities in Japan and students from the University of Illinois were shown around.

Hydraulic Measurement Division.

The self-recording gages at the Main Channel at Willow Springs and Lemont and on the Lake Front at the U. S. Coast Guard Station were operated and periodically inspected. The records from the gages were worked up in the office.

Field Parties.

Party was employed as follows: Soundings at Sag on the Main Channel account of New Channel. Desplaines River High Water. Setting gages on North Shore Channel. Seting concrete monuments Main Channel section "O"; Sewer department account weir construction. Survey North Branch. Farm land survey at Sag and Argo and 56th Ave. Main Channel for Real Estate Department. Cross sections of ditch over sewer on account of flood from I. & M. Canal.

The Calumet-Sag field parties performed the usual routine construction duties as follows: The Sag Division on Section 1; the Blue Island Division on Sections 13 and 14.

The general engineering force and other employees continued superintending engineering, construction and maintenance work, checking estimates, compiling unit construction costs of the Evanston and Calumet

sewers and of the Calumet-Sag Channel sections. Keeping the accounts of the department, preparing vouchers, furnishing information for other departments, and performing other necessary duties, etc.

Respectfully submitted,
G. M. WISNER,
Chief Engineer.

REPORTS OF COMMITTEES.

Engineering.

Mr. Lawley presented the following report from the Committee on Engineering:

CHICAGO, August 14, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering, to which were referred at the meeting held August 7, 1919 (page 925 of the Proceedings), bids for widening of the South Branch of the Chicago River just South of Van Buren street and also just North of Sixteenth street under division "b" of the specifications, reports that it has considered all the proposals presented and the qualifications of each bidder, together with the report submitted by the Chief Engineer and finds that the lowest responsible bidder is the Great Lakes Dredge & Dock Company.

Your Committee further reports that it is of the opinion that said Company is competent to comply satisfactorily with the terms and conditions of the contract for doing said work and having had the matter under consideration recommends the passage of the following order:

Ordered, That the contract for widening the South Branch of the Chicago River just South of Van Buren street and also just North of Sixteenth street be, and the same is hereby, awarded to the Great Lakes Dredge & Dock Company for the unit prices named in its bid which aggregate the sum of $68,980.00, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute in duplicate said contract in accordance with the specifications of the Sanitary District when the same shall have been executed by said Great Lakes Dredge & Dock Company and a bond for the faithful performance of said contract has been approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Engineering:

CHICAGO, August 14, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering, to which were referred at the meeting held August 7, 1919 (page —of the Proceedings), bids for wrecking and removing the Westerly portion of the power house of the North Western Elevated Railroad Company and adjoining tunnel, under division "A" of the specifications, having con-

sidered all of the proposals presented and the qualifications of each bidder, together with the report submitted by the Chief Engineer, finds that the lowest responsible bidder is the W. J. Newman Wrecking Company of Chicago, Illinois.

Your Committee further reports that it is of the opinion that said Company is competent to comply satisfactorily with the terms and conditions of the contract for doing said work and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the contract for wrecking and removing the Westerly portion of the North Western Elevated Railroad Company and adjoining tunnel under division "A" of the specifications be, and the same is hereby, awarded to the said W. J. Newman Wrecking Company for the lump sum price named in its bid of $17,500.00, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute in duplicate said contract in accordance with the plans and specifications of the Sanitary District when the same shall have been executed by the said W. J. Newman Wrecking Company and a bond for the faithful performance of said contract has been approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
JAS. H. LAWLEY,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 14, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has examined and approved the bond of the W. J. Newman Wrecking Company with the Southern Surety Company thereon as surety for the faithful performance of its contract for wrecking and removing a portion of the power house and adjoining tunnel on the south branch of the Chicago River just south of Van Buren street for the Sanitary District and therefore recommends the passage of the following order:

Ordered, That the bond of the W. J. Newman Wrecking Company for the faithful performance of the above specified contract, said bond being in the penal sum of $25,000.00, be, and the same is hereby, approved, and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying orders passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

The resolution contained in the enclosed extracts with reference to the bond of the W. J. Newman Wrecking Compnny:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR WRECKING AND REMOVING THE WESTERLY PORTION OF THE POWER HOUSE OF THE NORTH WESTERN ELEVATED RAILROAD COMPANY AND ADJOINING TUNNEL JUST SOUTH OF VAN BUREN STREET.

THIS AGREEMENT, Made and entered into this 12th day of August A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the W. J. Newman Wrecking Company, a corporation organized under the laws of the State of Illinois, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as herein provided to the Contractor by the said Sanitary District, and under the penalty expressed in the bond bearing even date herewith, hereto attached, at his proper cost and expense to do all the work and furnish all the materials, tools, labor and all plant, appliances and appurtenances called for bv this agreement (free from all claims, liens and charges whatsoever), in the manner and under the conditions hereinafter specified, that are necessary for wrecking and removing the westerly portion of the power house of the Northwestern Elevated Railroad Company and adjoining tunnel just south of Van Buren street in the City of Chicago, County of Cook, State of Illinois. The work done and materials furnished shall be strictly pursuant to and in conformity with these specifications and the contract drawings, attached hereto, and made a part of this agreement. It is further covenanted and agreed that the work shall be executed under the direction and superyision of the Chief Engineer of the Sanitary District and his properly authorized assistants, by whose measurements and calculations the quantity and amount (including extras) of work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Sanitary District shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation it is further agreed by and between said Sanitary District and said Contractor, that the Chief Engineer of the Sanitary District shall determine all questions in relation to the performance of said work, and shall in all cases decide every question which may arise relative to the execution of the contract on the part of the said Contracor, and his estimate and decision shall be final and conclusive, and such estimate and decision in case any question shall arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this agreement.

Wherever the word "Engineer" is used herein, it shall be understood to mean the Chief Engineer of The Sanitary District of Chicago or other designated Engineer in charge of the work.

Wherever the words "the work" are used herein they shall be interpreted to mean the work, including all material, labor, tools and all appliances and appurtenances, necessary to peform and complete everything specified or implied in the contract or shown on the drawings in full compliance with all the terms and conditions hereof.

Whenever under the provisions hereof an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

WRECKING AND REMOVING THE WESTERLY PORTION OF THE POWER HOUSE OF THE NORTHWESTERN ELEVATED RAILROAD COMPANY AND ADJOINING TUNNEL JUST SOUTH OF VAN BUREN STREET IN THE CITY OF CHICAGO.

SPECIFIC CONDITIONS.

1. *Location.*

The work is located on the easterly side of the south branch of the Chicago River between Van Buren Street and Harrison Street, in the City of Chicago, County of Cook and State of Illinois, as shown on the attached contract drawings.

2. *Description.*

The work to be done under Division "A" consists of the wrecking and removal of the material therein as specified of that portion of the westerly part of the power house recently acquired by The Sanitary District from the Northwestern Elevated Railroad Company above elevation plus (+6.0) Chicago City Datum (with the exception of the concrete engine foundations) as shown on the attached contract drawings. This westerly portion has been abandoned by the said Railroad Company and detached from the remainder of the building, the work to be done under Division "A" shall also include the wrecking and removal of that portion of the tunnel and shaft situated on property recently acquired from the Commonwealth Edison Company adjoining said portion of said power house, above elevation plus six (+6.0) Chicago City Datum, as shown on the said contract drawings.

3. *Wrecking and Removal of Power House, Tunnel and Shaft.*

The Northwestern Elevated Railroad Company has removed its machinery from the portion of the power house which is to be wrecked and removed under this contract, and has constructed a new concrete dock and a new building wall along the line of said new dock, The Commonwealth Edison Company has likewise removed its cables and other appliances from the tunnel and shaft situated just south of and adjoining the above mentioned portion of said power house. The Contractor for the work under Division "A" shall wreck and entirely remove from the site all that portion of said power house, tunnel and shaft, including all material therein, above elevation plus six (+6.0) Chicago City Datum (which is the elevation of the basement floor of said power house) with the exception of the concrete engine foundations. The removal of the concrete engine foundation is to be performed by the Contractor for the work under Division "B."

4. *Material Salvaged from Power Station, Tunnel and Shaft.*

Upon the payment to the Sanitary District by the Contractor of the sum hereinafter specified in Article 31 of the General Conditions, the material contained in the westerly portion of said power house above the elevation of plus six (+6.0) Chicago City Datum with the exception of the concrete engine foundations, also the material in the brick and concrete tunnel and shaft, above the elevation of plus six (+6.0) Chicago City Datum, shall be delivered to said Contractor, the title to the same to remain in the Sanitary District until removed from the site of the work. Plans have been furnished to the Sanitary District by the Northwestern Elevated Railroad Company which purport to show the detailed construction of the power house, the amount, dimensions and sizes of the various materials used in the construction thereof, and the changes and alterations recently made in said power house by said Railroad Company. These plans are on file in the office of the Chief Engineer of said Sanitary District for the inspection of bidders and Contractors, but the completeness and accuracy of the information indicated thereon is not guaranteed by the Sanitary District. The Contractor for the work under Division "A" must satisfy himself, before bidding and by such investigations as he may determine necessary, of the amount and value of such materials, and said Contractor hereby agrees to assume all risk of loss due to a variation between the quantity of material indicated on said plans and the actual amount of material obtained from said power house, and the said Contractor further agrees to assume all responsibility for loss or damage to said material due to careless or improper workmanship, theft, fire, explosion, acts of public authorities, or from any other cause occurring after the said structures have been delivered to said Contractor.

10. *Disposal of Material.*

It is understood that no material shall be dumped in the Chicago River, or in any place other than the designated dumping area, but if in the prosecution of the work under this contract, the Contractor accidentally deposits or otherwise places material in the Chicago River he shall remove such material immediately when ordered by the Engineer, and shall dispose of same in the manner hereinbefore specified for disposal of material, free of charge to the Sanitary District.

12. *Plant.*

The Contractor shall furnish all material, labor and plant required for performing all work hereinbefore specified or collateral thereto. The cost of furnishing all material, labor and plant required, including the cost of moving said plant to any and all parts of the work, and making such changes in wires, poles, etc., as may be necessary shall be included in the unit prices hereinafter specified.

13. *Precautions.*

The Contractor shall take all precautions necessary to protect all vessels or water craft navigating the Chicago River, from any and all obstructions to navigation arising or growing out of the work covered by this contract. He shall display such lights and other danger signals as may be necessary for guiding and warning vessels, and shall furnish watchmen, fences, red lights and other guards that are necessary for the protection of persons and property, and shall be liable for all losses due to delays and damages sustained by vessels or other craft navigating the channel that may be due to or result from the work under this contract. The cost of furnishing all labor and protections as above specified shall be covered by the unit price herein specified for dredging and no claim for damages or extra work on account of such labor and protections will be allowed.

14. *Misplaced Material.*

Should the Contractor, during the progress of the work, lose, dump, throw overboard, sink or misplace any material, plant or machinery which, in the opinion of the Engineer, may be dangerous to or obstruct navigation, he shall recover and remove the same with the utmost dispatch. The Contractor shall give immediate notice, of the description and location of said obstructions, to the Engineer, and when required shall mark or buoy such obstructions until the same are removed. Should he refuse, neglect or delay compliance with the above requirement, such obstructions may be removed by the Sanitary District and the cost of such removal shall be paid by the Contractor or may be deducted by the Sanitary District from any money due or to become due the Contractor under this contract.

15. *Permits.*

The Contractor shall obtain all required licenses and permits and pay all charges and expenses connected therewith. He shall also conform to all municipal and Sanitary District ordinances and all regulations imposed by the United States Government in any manner affecting this work.

16. *Occupation by Sanitary District.*

The Sanitary District hereby reserves the right at any time either by its own employees or by any contractor, to enter upon, use and occupy for its corporate purposes any portion of the sites of the work hereunder or any portion of the right of way of the Sanitary District occupied by the Contractor in performing the work hereunder, provided such use and occupation shall not prevent the work herein specified from being performed by the Contractor.

GENERAL CONDITIONS.

Sanitary District Law.

Article 1. The said contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled ('An Act to Create Sanitary Districts and to Remove Obstructions from the Des Plaines and Illinois Rivers," approved May 29, 1889, in force July 1, 1889, and all acts amendatory thereof and supplementary thereto.

City Ordinances.

Art. 2. The said Contractor also agrees to carry on all work provided for in this contract in strict conformity with all ordinances of the City of Chicago and all Acts of Congress which in any way affect the performance of the work hereunder.

Omissions on Contract Drawings.

Art. 3. The Contract Drawings furnished form a part of these specifica-

tions, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications or contract drawings.

Examination of Site.

Art 4. All bidders for work under this contract are required, before submitting proposals to examine the sites of the work and adjacent premises, the various means of approach to the sites and the plans hereinbefore mentioned as being on file in the office of the Chief Engineer, and to make all necessary investigations in order to inform themselves thoroughly as to the character and magnitude of all work involved in the complete execution of this contract also as to the facilities for delivering and for handling material and plant at the site, and for disposing of material to be removed from the site, and the conditions and difficulties that will be encountered in the performance of the work specified herein. No pleas of ignorance of conditions that exist, or that may hereafter exist, or of difficulties that will be encountered in the execution of the work hereunder, as a result of failure to make the necessary examinations and investigations, will be accepted as a sufficient excuse for any failure or omission on the part of the Contractor to fulfill in every detail all of the requirements of this contract, or will be accepted as a basis for any claims whatsoever for extra compensation or for an extension of time for the performance of the work.

Changes in Contract Drawings.

Art. 6. The Sanitary District reserves the right to make any changes in the specifications and Contract Drawings which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby. If such alterations increase the quantity of the work to be done, such increase shall be paid for according to the quantity of work actually done at the unit prices specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

Extra Work.

Art. 7. The Contractor shall perform only such extra work as the Engineer may order in writing, provided however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified. the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this contract and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actual cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause

whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work performed herein before and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 8. In estimating the cost of extra work, the cost of material shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amounts paid for same as shown by the payrolls of the Contractor, with cost of indemnity insurance added, when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, if requested by the Chief Engineer, verify by his affidavit the correctness of the amounts paid for materials, and labor. It is further agreed that in all cases of question or dispute arising or growing out of this contract in anyway regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of delay or of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision.

Art. 9. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents. The Contractor shall be guided by the lines, stakes, marks and grades given by them, and shall carefully preserve the same as far as possible during the progress of the work, and shall furnish all needed facilities, without extra charge therefor, to enable the Engineer to properly give lines and grades and measure the work from time to time.

Materials, Workmanship and Inspection.

Art. 10. All materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all work which, during the progress and before its final acceptance may become damaged from any cause, shall be removed and replaced by good and satisfactory work, without extra charge therefor. The Engineer and his assistants shall have at all times free access to every part of the work and to all points where material to be used in the work is manufactured, procured, stored or dumped and shall be allowed to examine any material furnished for use in the work under this contract.

All inspection of any and all material furnished for use in the work to be performed under this contract shall be made at the site of the work after the delivery of the material; provided, that, if requested by the Contractor, the Engineer may at his option perform, or have performed, inspection of material at points other than at the site of the work. In any such case the Contractor shall pay the Sanitary District the extra cost of such inspection, including the necessary expenses of the inspector and the salary of the inspector for the extra time expended in performing any such inspection at said other points.

Progress Certificates.

Art. 11. It is further expressly agreed that the granting of any progress certificate, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Cost of Work.

Art 12. All books and accounts kept by the Contractor in connection with this contract shall be open to the inspection of the Chief Engineer of the Sanitary District, or his properly accredited representative.

The Contractor shall furnish the Engineer reasonable facilities for obtaining such information as he may desire respecting the progress and execution of the work and the character of the materials, including all information necessary to determine the cost of the work, such as the number of men employed, their pay, the time during which they have worked on the various classes of construction, the cost of repairs to machinery, and other information required by the Engineer. The Contractor shall, on request, furnish the Engineer with copies of expense bills for transportation charges on all machinery, material and supplies shipped to or from the work under this contract.

Plant.

Art. 13. The Contractor shall furnish all material and supplies, plant, tools and implements, in fact, all material and appliances of every sort or kind that may be necessary for the full and complete carrying out of this contract, and shall furnish and maintain, subject to the approval of the Engineer all barricades and other protections, lights and signs, necessary for the proper protection of the public. He shall also furnish a watchman. The cost of all the above shall be covered by the amounts paid at the rates and prices herein specified, and no extra charge shall be made therefor.

Night, Sunday or Holiday Work.

Art. 14. Whenever the Contractor shall be permitted or directed to perform work at night or on Sundays or holidays, or to vary the period of hours during which work is carried on each day, he shall give written notice to the Engineer, so that proper inspection may be provided. Such work shall be done under the regulations to be furnished in writing by the Engineer and no extra compensation shall be allowed therefor.

Clearing Site.

Art. 15. The Contractor further agrees to remove all materials, implements, barricades, falsework, debris, and rubbish connected with or caused by said work immediately upon completion of the same and to leave the site of the work in perfect condition insofar as affected by the work under this contract.

Precautions.

Art. 16. The Contractor shall take whatever precaution may be necessary to render any portion of the work secure in every respect, or to decrease the liability of accident, from any cause, or to avoid contingencies which are liable to delay the completion of the work.

Workmen.

Art. 17. The Contractor shall employ competent foremen and laborers, and shall discharge at the request of the Engineer, any incompetent or unfaithful men in his employ. None but men expert in their respective branches of work shall be employed where special skill is required.

Sanitation.

Art. 18 In accordance with the Rules and Regulations for the guidance of Sanitary Inspector, etc., adopted by the Board of Trustees on July 31, 1913, page 997 of the Proceedings for 1913, the Contractor shall introduce and enforce among his employees such regulations in regard to cleanliness, and the disposal of garbage and wastes, as shall conduce to their health and tend to prevent the inception and spread of contagious and infectious diseases among them, and shall make provision for an ample supply of suitable drinking water, and shall take such means as the Engineer may direct to effectually prevent the creation of a nuisance on any part of the right of way or property of said Sanitary District, easement, streets, or adjacent property. Necessary sanitary conveniences for the use of the laborers on the work, properly secluded from public observation shall be constructed and maintained by the Contractor in such manner and at such points as shall be approved, and their use shall be strictly enforced.

Patents.

Art. 19. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses that may in anywise come against said Sanitary District, or which may be the result of an infringement of any patent, by reason of the use of any materials, machinery, devices, apparatus or processes fur-

nished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Damages.

Art. 20. The Contractor shall take all necessary precautions for the protection of the building and dock of the Northwestern Elevated Railroad Company, adjoining and adjacent to the work to be performed under this contract. If any damage shall be done by the Contractor or by any person or persons in his employ to said building or dock of the Northwestern Elevated Railroad Company or to the owner or occupants of any land or to any real or personal property adjoining, or in the vicinity of the work herein contracted to be done, the Engineer shall have the right to estimate the amount of said damage, and to cause the Sanitary District to pay the same to said owner or occupant, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to keep and save harmless the Sanitary District from and to assume all liability for any and all damages to the building and dock of said Northwestern Elevated Railroad Company, and to the owners, occupants and lessees of same that may in any way be due to or result from the work performed under this contract. Said Contractor also covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself of his employes, that is in the nature of a legal liability, and he hereby agrees to indemnify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District, for or on account of any such injuries or such damages received or sustained by any person or persons from said Contractor, his servants, agents or employes, in the execution of said work; or by or in consequence of any negligence in guarding the same; or by or on account of any omission or act of said Contractor, his agents or employes, and the said Contractor further agrees that so much of the money due to him under and by virtue of this contract, as shall be considered necessary by The Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the Board of Trustees.

Employers' Liability Act.

Art. 21. The Contractor further agrees to insure to his employes or their beneficiaries the necessary first aid, medical, surgical and hospital service and the compensation provided for in the Act of the General Assembly of the State of Illinois entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State;" providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10, 1911, in force May 1, 1912, approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or deaths suffered by any of his employes in and about the performance of this contract.

Responsibility of Contractor.

Art. 22. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor will be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employes.

The Contractor shall not assign, by power of attorney or otherwise, any portion of the moneys that may become due through the performance of this contract.

Liens.

Art. 23. If at any time during the progress of said work, the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make the payments hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons or corporation, for labor, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon or in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Time.

Art. 24. The Contractor for the work under Division "A" agrees to pay the said Sanitary District the sum of No Dollars ($0.00) as compensation for the material specified in Article 31 of the contract and to begin the work covered by this contract within ten (10) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor, and to prosecute the same with all due diligence and to entirely complete the work under said Division "A" within sixty (60) calendar days from the date of approval of said bond.

It is understood and agreed that Time is of the essence of this contract and that a failure on the part of said Contractor to complete the work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss and damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 25. It is therefore covenanted and agreed that in case the said Contractor shall fail or neglect to complete the work herein specified under Division "A" within the time specified in Article 24, even though he is allowed to complete any one or more of said items of work, then said Contractor shall and will pay the said Sanitary District the sum of Twenty-five Dollars ($25.00) for each and every day the Contractor shall be in default in the time of completion of said work under said Division "A."

Said sum of Twenty-five Dollars ($25.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which the said Sanitary District will suffer by reason of such default and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of said work, the Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto. It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to Time and Liquidated Damages for delays.

Extensions or Additions.

Art. 26. In the event that any material alterations or additions are made as herein specified, which, in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period or periods of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of

such alterations or additions, shall request in writing an extension of time, but no extension of time shall be given for any minor alterations or additions, and the provisions of this paragraph shall not otherwise alter, change or invalidate the provisions of this contract, with reference to "Liquidated Damages" and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 27. The contractor shall delay or suspend the progress of the work or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided, that in event of such delay or delays or of such suspension or suspensions of the progress of the work, or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay, or delays, suspension or suspensions.

Unavoidable Delay.

Art. 28. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by necessary or unavoidable act or delay of the Sanitary District or by riot, insurrection, war, pestilence, strikes, acts of public authorities, fire, lightning, earthquake, cyclone or through any default of other parties under contract with said Sanitary District, then the time herein fixed for the completion of such part hereof said work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowances shall be made unless a claim therefor in writing is presented to the Engineer within four (4) days after the commencement of such delay. And it is further expressly agreed that said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of any delays resulting from any of the causes above specified, except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. Said Engineer shall decide the number of days that said Contractor has been so delayed, and his decision shall be final and binding upon both parties hereto.

Forfeiture of Contract.

Art. 29. It is further agreed by said Contractor that if the work to be done under this contract shall be abandoned by the Contractor, or if there shall be a failure by said Contractor to perform the work of the character, and in the time herein specified; or if said Contractor shall fail financially or from any other cause whatsoever be unable to carry out said contract and complete the said work; or if the contract shall be assigned by the said Contractor; or if the Contractor shall lose control of said work for any cause whatsoever, except by act of God or the public enemy; or if the Contractor shall refuse to or neglect to follow the instructions of the Engineer; or if in the opinion of the Engineer the Contractor refuses or neglects to use measures to protect the said materials, work and adjacent structures from damage; or if in the opinion of the Engineer the Contractor is guilty of carelessness or incompetency in the execution of said work; or in the opinion of the Engineer the said work has been or is being delayed by the Contractor; or if in the opinion of the Engineer the rate of progress is not such as to insure the completion of the work within the time specified, or if at any time the Engineer shall be of the opinion and so shall certify in writing to said Sanitary District that said work or any part thereof is unnecessarily or unreasonably delayed, or that the Contractor is wilfully or persistently violating any of the conditions or covenants of this contract, or is not fulfilling said contract in good faith, said Santary District shall have the power and authority, and may then immediately notify said Contractor to discontinue all work or any part thereof, that may be

designated by the Engineer of said Sanitary District.

Upon notice being given as aforesaid, by the said Sanitary District to the said Contractor, or upon the happening of any of the conditions hereinbefore in this section specified, the said Sanitary District shall have a lien upon all the materials, supplies, machinery, implements and tools of the Contractor for the purpose hereinafter specified; and the said Sanitary District may thereupon immediately take possession of all said materials, supplies, machinery, implements and tools, for the uses and purposes hereinafter set forth; thereupon the said Sanitary District shall have the power to, and may at the cost of said Contractor, complete the said work by letting a new contract, and in completing the said work by contract, said Sanitary District may use such materials, supplies, machinery, implements, tools and plant as may be the property of said Contractor, and may make the necessary repairs and replacements thereto.

The cost of fully completing all the work provided for under this contract shall include the sum or sums of money paid by the Sanitary District to other contractors if all or any part of said work is completed by contract, and any sum or sums of money paid by the Sanitary District for the cost of repairs and replacements upon machinery, implements, tools and plant of the Contractor hereunder, used in the completion of said work, and also all sums of money paid for first aid, medical, surgical and hospital attendance and as compensation for accidental injuries or death suffered by employes in the course of their employment in the performance of said work under the employers' liability act of the State of Illinois in force July 1, 1913, and all acts amendatory thereof and supplementary thereto.

The cost of fully completing all the work under this contract as aforesaid shall be charged to the said Contractor, and the amount of said cost or expense so charged shall be deducted from and paid by the Sanitary District out of any moneys that may be due, or may at any time thereafter become due to said Contractor under and by virtue of this contract, so far as the same shall suffice therefor.

Should the amount remaining unpaid of the contract price be insufficient to reimburse the Sanitary District for the cost of fully completing all work as aforesaid then the Sanitary District may sell all materials, supplies, machinery, implements, tools and plant then on hand, obtained from said Contractor, at public sale on giving said Contractor twenty (20) days' notice of the time and place of such sale, and the net proceeds derived from the sale of said property at such sale shall be credited to said Contractor, and should the amount received from said sale be then insufficient to pay such deficiency, the Contractor and his bondsmen shall be liable to pay the amount of said deficiency, and at any such sale of said property as provided hereunder, the Sanitary District may bid and become a purchaser of said property.

Contractor's Bond.

Art. 30. The Contractor for the work under Division "A" shall furnish a bond for the faithful performance of such contract in the penal sum of twenty-five thousand dollars ($25,000.00). Said Contractor shall furnish bondsmen whose financial standing is satisfactory to the Board of Trustees of said Sanitary District, and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then, in that case, the said Board of Trustees may, on giving ten (10) days notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such sureties thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Prices.

Art. 31. The said Contractor for Division "A" agrees to accept the following price as full compensation for furnishing all the material, and for doing all the work contemplated and specified in this contract, also for all loss or damages arising out of the nature of the work aforesaid or from the action of the elements or from any unforeseen obstructions or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work, and for well and faithfully completing the work, and the whole thereof, in full compliance with the contract drawings and specifications, and the requirements of the Engineer under them, to-wit:

For wrecking and removing power house and tunnel, including the disposal

of the material and clearing the site, as specified, the sum of seventeen thousand five hundred dollars ($17,500.00).

And the said Sanitary District agrees to accept the following as full compensation for the material contained in the westerly portion of the power house recently acquired by the Sanitary District from the Northwestern Elevated Railroad Company, above the elevation of plus six (+6.0) Chicago City Datum, with the exception of the concrete engine foundations, also the material in the brick and concrete tunnel and shaft above the elevation of plus six (+6.0) Chicago City Datum situated on property adjoining said portion of said power house, the sum of No Dollars ($0.00).

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents, and patented material, appliances and processes used in the work described in the specifications. Before final payment is made, the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

Art. 32. The said Sanitary District agrees to pay said Contractor the sums herein specified in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed eighty-seven and one-half (87½) per cent of the value of the work properly performed under this contract, and that the remaining twelve and one-half (12½) per cent shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and delivery of the final certificate of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract.

Final Payment.

Art. 33. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials, except in the manner set forth in this contract, nor until all the stipulations, provisions, and conditions, hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificate pay, and, it hereby binds itself to pay the said Contractor in cash, the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the successors, heirs, and legal representatives of said Contractor.

In Witness Whereof, on the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Committee on Finance, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its President and to be duly attested and its corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

KNOW ALL MEN BY THESE PRESENTS, That we, the W. J. Newman Wrecking Company, a corporation organized under the laws of the State of Illinois, as principal, and as surety are held and firmly bound unto The Sanitary District of Chicago in the penal sum of twenty-five thousand dollars ($25,000.-00), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this 12th day of August, A. D. 1919.

The Conditions of the Above Obligation is Such, That whereas the above bounden W. J. Newman Wrecking Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the 12th day of August, A D. 1919, for doing all the work and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the wrecking and removing portion of power house and tunnel just south of Van Buren Street, in the City of Chicago, County of Cook, State of Illinois, as specified under Division "A" in the foregoing contract.

Now, if the said W. J. Newman Wrecking Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the drawings thereto attached and in the time and manner therein prescribed, and further, shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses, and attorney's fees, which may in anywise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in anywise result from the carelessness or neglect of said W. J. Newman Wrecking Company, its agents, employes, or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, and moreover shall pay to the said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including all valid claims and demands for first aid, medical, surgical and hospital attendance and compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois, entitled, "An Act to promote the general welfare of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or deaths suffered in the course of employment, approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said W. J. Newman Wrecking Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person and shall repay any overpayment, then is this obligation to be null and void, otherwise to remain in full force and effect.

AND IT IS HEREBY EXPRESSLY UNDERSTOOD AND AGREED, And made a condition hereof, that any judgment, rendered against said The Sanitary District of Chicago, as aforesaid, in any suit for damages occasioned by carelessness or neglect of said W. J. Newman Wrecking Company, or its agents, employes or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or deaths suffered by employes, in the course of their employment, when notice of the pendency of such suit, bearing or arbitration shall have been given said W. J. Newman Wrecking Company, shall be conclusive against each

and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 14, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has examined and approved the bond of the Great Lakes Dredge & Dock Company with the Fidelity & Deposit Company of Maryland thereon as surety, for the faithful performance of its contract for widening the south branch of the Chicago River just south of Van Buren street and also just north of Sixteenth street, in the City of Chicago, for the Sanitary District, and therefore recommends the passage of the following order:

Ordered, That the bond of the Great Lakes Dredge & Dock Company for the faithful performance of the above specified contract, said bond being in the penal sum of $25,000.00 be, and the same is hereby approved, and it is further

Ordered, That the form of said contract and bond be printed in the proceedings of the Board.

Respectfully submitted,

JAS. H. LAWLEY, *Chairman.*
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

The following is the contract and bond of the Great Lakes Dredge & Dock Company:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR WIDENING THE SOUTH BRANCH OF THE CHICAGO RIVER JUST SOUTH OF VAN BUREN STREET AND ALSO JUST NORTH OF SIXTEENTH STREET.

THIS AGREEMENT, Made and entered into this 12th day of August, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the Great Lakes Dredge and Dock Company, a corporation organized under the laws of the State of New Jersey, party of the second part, hereinafter designated the Contractor.

WITNESSETH, That the said Contractor has covenanted, contracted and agreed and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as herein provided to the Contractor by the said Sanitary District, and under the penalty expressed in the bond bearing even date herewith, hereto attached, at his proper cost and expense to do all the work and furnish all the materials, tools, labor and all plant, appliances and appurtenances called for by this agreement (free from all claims, liens and charges whatsoever), in the manner and under the conditions hereinafter specified, that are necessary for widening the south branch of the Chicago River just south of Van Buren Street and also just north of Sixteenth Street, in the City of Chicago, County of Cook, State of Illinois.

The work done and materials fur-

nished shall be strictly pursuant to and in conformity with these specifications and the contract drawings, attached hereto, and made a part of this agreement. It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of the Sanitary District and his properly authorized assistants, by whose measurements and calculations the quantity and amount (including extras) of work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Sanitary District shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation it is further agreed by and between said Sanitary District and said Contractor, that the Chief Engineer of the Sanitary District shall determine all questions in relation to the performance of said work, and shall in all cases decide every question which may arise relative to the execution of the contract on the part of the said Contractor, and his estimate and decision shall be final and conclusive, and such estimate and decision in case any question shall arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this agreement.

Wherever the word "Engineer" is used herein, it shall be understood to mean the Chief Engineer of The Sanitary District of Chicago or other designated engineer in charge of the work.

Wherever the words "the work" are used herein they shall be interpreted to mean the work, including all material, labor, tools and all appliances and appurtenances, necessary to perform and complete everything specified or implied in the contract or shown on the drawings in full compliance with all the terms and conditions hereof.

Whenever under the provisions hereof an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

WIDENING THE SOUTH BRANCH OF THE CHICAGO RIVER JUST SOUTH OF VAN BUREN STREET AND JUST NORTH OF SIXTEENTH STREET IN THE CITY OF CHICAGO.

SPECIFIC CONDITIONS.

1. *Location.*

The work is located at two places: on the easterly side of the south branch of the Chicago River between Van Buren Street and Harrison Street; and on the easterly side of said south branch of the Chicago River extending north from Sixteenth Street for a distance of about seven hundred and fifty (750) feet; both in the City of Chicago, County of Cook and State of Illinois, as shown on the attached contract drawings.

2. *Description.*

The work to be done under Division "B" consists of the wrecking and removal of the concrete engine foundations in the abandoned portion of said power house recently acquired by The Sanitary District from the Northwestern Elevated Railroad Company; the wrecking and removal of the walls, foundations and grillage of said portion of said power house below elevation plus six (+6.0) Chicago City Datum; and the wrecking and removal of the old concrete dock; also the wrecking and removal of that portion of the tunnel and shaft situated on property recently acquired from the Commonwealth Edison Company adjoining said portion of said power house below elevation plus six (+6.0) Chicago City Datum. All of said structures are to be removed down to the established grade for the bottom of the improved river, also the pulling down of all foundation and detached piles; also the excavation by dredging of the material in both of the pieces of real estate on which said structures are located above the established grade between the center line of the river and the new dock line as estimated by the Sanitary District; also the removal of the old existing dock extending northerly from Sixteenth Street along the easterly side of said river for a distance of about seven hundred and fifty (750) feet; and the pulling of all detached and foundation piles at said location, the excavation by dredging of the material in the piece of real estate at the site of said work above the established grade between the center line of said river and

the new dock line and all other work necessary to entirely complete the widening of the river at both sides; all as herein specified and as shown on the attached contract drawings.

5. *Removal of Old Concrete Dock, Walls and Foundations.*

The Contractor for the work under Division "B" shall begin work immediately after the completion of work under Division "A" and upon receipt of written notice from the Chief Engineer. Included under this division is the removal of the old existing concrete dock wall; the removal of all other walls, grillage, and foundations below elevation plus six (+6.0) Chicago City Datum, the removal of the entire concrete engine foundations in the portion of the power house, otherwise wrecked by the Contractor for the work under Division "A" and the wrecking and removal of that portion of the brick and concrete tunnel and shaft below elevation plus six (+6.0) Chicago City Datum. Plans are on file in the office of the Chief Engineer which purport to indicate the details of construction of the said dock, walls, grillage, and foundations, but the completeness and accuracy of these plans is not guaranteed by the Sanitary District.

Payment for the above mentioned work of removing old concrete dock, walls, grillage, tunnel and shaft, and foundations shall be made by the Sanitary District to the Contractor at the unit price per cubic yard hereinafter specified, to be paid for dredging. Any salvage which may result from the above mentioned work shall become the property of the said Contractor.

6. *Removal of Old Timber Dock.*

An old timber and pile dock, anchored to anchor piles set back in the original ground, extends from the south to the north limit of the work to be performed near Sixteenth Street. This dock is in bad condition, and is not continuous, having disappeared entirely in several places. The Contractor for the work under Division "B" shall remove the timbers and anchor rods, pull the piles, and perform all other work necessary to entirely remove the dock from the site of the work. Any salvage which may result from the removal of said dock shall become the property of the Contractor. In the event that the owners of the adjacent property refuse the Contractor permission to go upon their property to remove such anchor piles and rods as may be situated thereon, the Contractor hereunder shall cut such anchor rods at the new dock line as established by the Sanitary District. Payment for the actual number of lineal feet of old dock removed will be made by the Sanitary District to the Contractor at the unit price hereinafter specified to be paid for removal of old dock.

7. *Pulling and Removing Piles.*

The Contractor for the work under Division "B" shall pull and entirely remove from both of said sites all foundation and detached piles located within the limits to be dredged under this contract. Payment for this work shall be made by the Sanitary District to the Contractor at the unit price hereinafter specified to be paid for pulling and removing piles, except that no payment shall be made under this item for the work of pulling and removing piles which are part of the existing timber dock near Sixteenth Street and for which payment is to be made under the lineal foot price, hereinafter specified to be paid for removing old timber dock. Any salvage which may result from the above mentioned work shall become the property of the Contractor.

8. *Excavation by Dredging.*

The Contractor for the work under Division "B" shall excavate by dredging and dispose of all remaining material lying between the easterly limits of work under this contract and the center line of the Chicago River as shown on the attached contract drawings. All dredging shall be performed to the clear depths and widths called for on said contract drawings unless otherwise ordered by the Engineer in writing. Payment for the above mentioned work of dredging shall be made by the Sanitary District to the Contractor at the unit price per cubic yard hereinafter specified for dredging. No payment shall be made for dredging, however, until the excavated material has been properly deposited in the designated dumping area. If in the prosecution of the work herein specified the Contractor deposits or otherwise places any material in either completed or uncompleted areas to be dredged hereunder, or in other than the designated dumping area, he shall remove and properly dis-

pose of such material free of any additional charge to the Sanitary District.

Dredging shall be performed in such a manner as not to damage or interfere with the operation of the existing bridges known as the old and new St. Charles Air Line bridges crossing the said Chicago River just north of Sixteenth Street. The Contractor agrees to leave such material within the limits of work under contract as may be necessary to insure the safety of said bridges, and to remove such material when ordered by the Engineer. It is expected that the new bridge now under construction, which is to replace the old bridge, will be completed in the near future. Articles 24 and 25 of General Conditions relating to Time and Liquidated Damages, shall not be considered as relating to the dredging of material so lett unexcavated. The dredging of the thirty (30) foot strip upon which the existing tracks and old bridge of the St. Charles Air Line are located is not included in this contract.

9. *Measurements.*

Payments will be made to the Contractor by the Sanitary District for dredged material measured by the method known as "Place Measurement" based on the measurements soundings and cross-sections of the Engineer. No payment shall be made for any dredging outside of the lines or below the bottom grades designated on the contract drawings unless specifically ordered by the Engineer.

10. *Disposal of Material.*

Dredged material shall be disposed of in Lake Michigan in strict conformity to the Act of Congress, approved June 23rd, 1910, entitled "An Act to prevent the dumping of refuse material in Lake Michigan at or near Chicago" and all amendments thereto, and in accordance with all ordinances of the City of Chicago.

In the event that the Contractor should desire to dispose of the dredged material in any place other than that above specified, the Contractor shall so notify the Chief Engineer and shall obtain said Chief Engineer's permission in writing designating the place where the Contractor will be permitted to deposit said dredged material. The disposal of dredged material shall be at all times subject to the approval of the Engineer.

It is understood that no material shall be dumped in the Chicago River, or in any place other than the designated dumping area, but if in the prosecution of the work under this contract, the Contractor accidently deposits or otherwise places material in the Chicago River he shall remove such material immediately when ordered by the Engineer, and shall dispose of same in the manner hereinbefore specified for disposal of material, free of charge to the Sanitary District.

11. *Cross Section to be Dredged.*

The purpose of this work is to provide a clear channel having a width of two hundred (200) feet between dock lines including a navigable depth of twenty-six (26) feet for a distance of fifty (50) feet on each side of the center line of the river as shown on the contract drawing. To obtain this channel, the Contractor shall remove such material within the limits hereinbefore designated as the Engineer shall determine necessary by his soundings and shall designate by his lines and stakes.

12. *Plant.*

The Contractor shall furnish all material, labor and plant required, including dredging plant and other necessary equipment for dredging and disposing of the dredged material and for performing all other work hereinbefore specified or collateral thereto. The cost of furnishing all material, labor and plant required, including the cost of moving said plant to any and all parts of the work, and making such changes in wires, poles, etc., as may be necessary shall be included in the unit prices hereinafter specified

13. *Precautions.*

The Contractor shall take all precautions necessary to protect all vessels or water craft nagivating the Chicago River, from any and all obstructions to navigation arising or growing out of the work covered by this contract. He shall display such lights and other danger signals as may be necessary for guiding and warning vessels, and shall furnish watchmen, fences, red lights and other guards that are necessary for the protection of persons and property, and shall be liable for all losses due to delays and damages sustained by vessels or other craft navigating the channel that may be due to or result from the work under this contract. The

cost of furnishing all labor and protections as above specified shall be covered by the unit price herein specified for dredging and no claim for damages or extra work on account of such labor and protections will be allowed.

14. *Misplaced Material.*

Should the Contractor, during the progress of the work, lose, dump, throw overboard, sink or misplace any material, plant or machinery which, in the opinion of the Engineer, may be dangerous to or obstruct navigation, he shall recover and remove the same with the utmost dispatch. The Contractor shall give immediate notice of the description and location of said obstructions, to the Engineer, and when required shall mark or buoy such obstructions until the same are removed. Should he refuse, neglect or delay compliance with the above requirement, such obstructions may be removed by the Sanitary District and the cost of such removal shall be paid by the Contractor or may be deducted by the Sanitary District from any money due or to become due the Contractor under this contract.

15. *Permits.*

The Contractor shall obtain all required licenses and permits and pay all charges and expenses connected therewith. He shall also conform to all municipal and Sanitary District ordinances and all regulations imposed by the United States Government in any manner affecting this work.

16. *Occupation by Sanitary District.*

The Sanitary District hereby reserves the right at any time either by its own employees or by any contractor, to enter upon, use and occupy for its corporate purposes any portion of the sites of the work hereunder or any portion of the right of way of the Sanitary District occupied by the Contractor in performing the work hereunder, provided such use and occupation shall not prevent the work herein specified from being performed by the Contractor.

GENERAL CONDITIONS.

Sanitary District Law.

Art. 1. The said contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to Create Sanitary Districts and to Remove Obstructions from the Des Plaines and Illinois Rivers," approved May 29, 1889, in force July 1, 1889, and all acts amendatory thereof and supplementary thereto.

City Ordinances.

Art. 2. The said Contractor also agrees to carry on all work provided for in this contract in strict conformity with all ordinances of the City of Chicago and all Acts of Congress which in any way affect the performance of the work hereunder.

Omissions on Contract Drawings.

Art. 3. The Contract Drawings furnished form a part of these specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications or contract drawings.

Examination of Site.

Art. 4. All bidders for work under this contract are required, before submitting proposals to examine the sites of the work and adjacent premises, the various means of approach to the sites and the plans hereinbefore mentioned as being on file in the office of the Chief Engineer, and to make all necessary investigations in order to inform themselves thoroughly as to the character and magnitude of all work involved in the complete execution of this contract also as to the facilities for delivering and for handling material and plant at the site, and for disposing of material to be removed from the site, and the conditions and difficulties that will be encountered in the performance of the work specified herein. No pleas of ignorance of conditions that exist, or that may hereafter exist, or of difficulties that will be encountered in the execution of the work hereunder, as a result of failure to make the necessary examinations and investigations, will be accepted as a sufficient excuse for any failure or omission on the part of the Contractor to fulfill in every detail all of the requirements of this contract, or will be accepted as a basis for any claims whatsoever for extra compensation or for an extension of time for the performance of the work.

Approximate Quantities.

Art. 5. It is expressly understood and agreed by the parties hereto that the quantities of the various classes work to be done and materials to be furnished under this contract, which have been estimated as stated in the advertisement and in the "Requirements for Bidding and Instructions to Bidders." attached hereto, are only approximate and are to be used solely for the purpose of comparing on a uniform basis, the proposals offered for the work under this contract; and the Contractor further agrees that the Sanitary District will not be held responsible if any of said quantities shall be found incorrect; and said Contractor will not make any claim for damages or for loss of profits because of a difference between the quantities of the various classes of work as estimated and the work actually done or for an extension of time for the performance of the work. If any error, omission, or misstatement shall be discovered in the said estimated quantities, the same shall not invalidate this contract or release the Contractor from the execution and completion of the whole or any part of the work herein specified, to the satisfaction of the Engineer and in accordance with the specifications and the contract drawings herein mentioned, and for the prices herein agreed upon and fixed therefor, or excuse him from any of the obligations or liabilities hereunder or entitle him to any damages or compensation otherwise than may be provided for in this contract, except for such extra work as may be required, for the performance of which written orders must be given and received as herein specified.

Changes in Contract Drawings.

Art. 6. The Sanitary District reserves the right to make any changes in the specifications and Contract Drawings which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby. If such alterations increase the quantity of the work to be done, such increase shall be paid for according to the quantity of work actually done at the unit prices specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

Extra Work.

Art. 7. The Contractor shall perform only such extra work as the Engineer may order in writing, provided however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District ,

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided, he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this contract, and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actual cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra

labor or material furnished by the Contractor or for damages from any cause whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work performed herein before and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 8. In estimating the cost of extra work, the cost of material shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amounts paid for same as shown by the payrolls of the Contractor, with cost of indemnity insurance added, when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, if requested by the Chief Engineer, verify by his affidavit the correctness of the amounts paid for materials and labor. It is further agreed that in all cases of question or dispute arising or growing out of this contract in anyway regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of delay or of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision.

Art. 9. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents. The Contractor shall be guided by the lines, stakes, marks and grades given by them, and shall carefully preserve the same as far as possible during the progress of the work, and shall furnish all needed facilities, without extra charge therefor, to enable the Engineer to properly give lines and grades and measure the work from time to time.

Materials, Workmanship and Inspection.

Art. 10. All materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all work which, during the progress and before its final acceptance may become damaged from any cause, shall be removed and replaced by good and satisfactory work, without extra charge therefor. The Engineer and his assistants shall have at all times free access to every part of the work and to all points where material to be used in the work is manufactured, procured, stored or dumped and shall be allowed to examine any material furnished for use in the work under this contract.

All inspection of any and all material furnished for use in the work to be performed under this contract shall be made at the site of the work after the delivery of the material; provided, that, if requested by the Contractor, the Engineer may at his option perform, or have performed, inspection of material at points other than at the site of the work. In any such case the Contractor shall pay the Sanitary District the extra cost of such inspection, including the necessary expenses of the inspector and the salary of the inspector for the extra time expended in performing any such inspection at said other points.

Progress Certificates.

Art. 11. It is further expressly agreed that the granting of any progress certificate, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress cer-

tificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Cost of Work.

Art. 12. All books and accounts kept by the Contractor in connection with this contract shall be open to the inspection of the Chief Engineer of the Sanitary District, or his properly accredited representative.

The Contractor shall furnish the Engineer reasonable facilities for obtaining such information as he may desire respecting the progress and execution of the work and the character of the materials, including all information necessary to determinne the cost of the work, such as the number of men employed, their pay, the time during which they have worked on the various classes of construction, the cost of repairs to machinery, and other information required by the Engineer. The Contractor shall, on request, furnish the Engineer with copies of expense bills for transportation charges on all machinery, material and supplies shipped to or from the work under this contract.

Plant.

Art. 13. The Contractor shall furnish all material and supplies, plant, tools and implements, in fact, all material and appliances of every sort or kind that may be necessary for the full and complete carrying out of this contract, and shall furnish and maintain, subject to the approval of the Engineer all barricades and other protections, lights and signs, necessary for the proper protection of the public. He shall also furnish a watchman. The cost of all the above shall be covered by the amounts paid at the rates and prices herein specified, and no extra charge shall be made therefor.

Night, Sunday or Holiday Work.

Art. 14. Whenever the Contractor shall be permitted or directed to perform work at night or on Sundays or holidays, or to vary the period of hours during which work is carried on each day, he shall give written notice to the Engineer, so that proper inspection may be provided. Such work shall be done under the regulations to be furnished in writing by the Engineer and no extra compensation shall be allowed therefor.

Clearing Site.

Art 15. The Contractor further agrees to remove all materials, implements, barricades, falsework, debris and rubbish connected with or caused by said work immediately upon completion of the same and to leave the site of the work in perfect condition insofar as affected by the work under this contract.

Precautions.

Art. 16. The Contractor shall take whatever precaution may be necessary to render any portion of the work secure in every respect, or to decrease the liability of accident, from any cause, or to avoid contingencies which are liable to delay the completion of the work.

Workmen.

Art. 17. The Contractor shall employ competent foremen and laborers, and shall discharge at the request of the Engineer, any incompetent or unfaithful men in his employ. None but men expert in their respective branches of work shall be employed where special skill is required.

Sanitation.

Art. 18. In accordance with the Rules and Regulations for the guidance of Sanitary Inspector, etc., adopted by the Board of Trustees on July 31, 1913, page 997 of the Proceedings for 1913, the Contractor shall introduce and enforce among his employes such regulations in regard to cleanliness, and the disposal of garbage and wastes, as shall conduce to their health and tend to prevent the inception and spread of contagious and infectious diseases among them, and shall make provision for an ample supply of suitable drinking water, and shall take such means as the Engineer may direct to effectually prevent the creation of a nuisance on any part of the right of way or property of said Sanitary District, easement, streets, or adjacent property. Necessary sanitary conveniences for the use of the laborers on the work, properly secluded from public observation shall be constructed and maintained by the Contractor in such manner and at such points as shall be approved, and their use shall be strictly enforced.

Patents.

Art. 19. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District

from all liabilities, judgments, costs, damages and expenses that may in anywise come against said Sanitary District, or which may be the result of an infringement of any patent, by reason of the use of any materials, machinery, devices, apparatus or processes furnished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Damages.

Art. 20. The Contractor shall take all necessary precautions for the protection of the building and dock of the Northwestern Elevated Railroad Company and the bridges known as the old and new St. Charles Air Line bridges, adjoining and adjacent to the work to be performed under this contract. If any damage shall be done by the Contractor or by any person or persons in his employ to said building or dock of the Northwestern Elevated Railroad Company or to said bridges or to the owner or occupants of any land or to any personal property adjoining, or in the vicinity of the work herein contracted to be done, the Engineer shall have the right to estimate the amount of said damage, and to cause the Sanitary District to pay the same to the said owner or occupant, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to keep and save harmless the Sanitary District from and to assume all liability for any and all damages to the building and dock of said Northwestern Elevated Railroad Company and the bridges known as the old and new St. Charles Air Line bridges, and to the owners, occupants and lessees of same that may in any way be due to or result from the work performed under this contract. Said Contractor also covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself or of his employes, that is in the nature of a legal liability, and he hereby agrees to indemnify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District, for or on account of any such injuries or such damages received or sustained by any person or persons from said Contractor, his servants, agents or employes, in the execution of said work; or by or in consequence of any negligence in guarding the same; or by or on account of any omission or act of said Contractor, his agents or employes; and the said Contractor further agrees that so much of the money due to him under and by virtue of this contract, as shall be considered necessary by The Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the Board of Trustees.

Employers' Liability Act.

Art. 21. The Contractor further agrees to insure to his employes or their beneficiaries the necessary first aid, medical, surgical and hospital service and the compensation provided for in the Act of the General Assembly of the State of Illinois entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State;" providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10, 1911, in force May 1, 1912, approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in anywise come against said Sanitary District by reason of any accidental injuries or deaths suffered by any of his employes in and about the performance of this contract.

Responsibility of Contractor.

Art. 22. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor will be re-

quired to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employes.

The Contractor shall not assign, by power of attorney or otherwise, any portion of the moneys that may become due through the performance of this contract.

Liens.

Art. 23. If at any time during the progress of said work, the said Contractor shall fail or neglect to pay for any labor performed, material furnished or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make the payments hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any case said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons or corporation, for labor, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon or in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Time.

The Contractor for the work under Division "B" agrees to begin the work covered by this contract immediately after the completion of work under Division "A" and upon receipt of written notice from the Chief Engineer that said work under said Division "A" has been completed, and further agrees to prosecute the same with all due diligence and to entirely complete the work under said Division "B" within sixty (60) working days.

Working days are hereby defined and agreed upon as days on which weather and lake conditions permit the towing of plant from the mouth of the Chicago River to the dumping ground and permit the prosecution of said work during at least eight (8) hours of the day between sunrise and sunset. It is agreed that the decision of the Engineer as to what constitutes a working day shall be final and binding on both of the parties hereto.

It is understood and agreed that Time is of the essence of this contract and that a failure on the part of said Contractor to complete the work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss and damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 25. It is therefore covenanted and agreed that in case the said Contractor shall fail or neglect to complete the work herein specified under Division "B" within the time specified in Article 24, even though he is allowed to complete any one or more of said items of work, then said Contractor shall and will pay the said Sanitary District the sum of Twenty-five Dollars ($25.00) for each and every day the Contractor shall be in default in the time of completion of said work under said Division "B."

Said sum of Twenty-five Dollars ($25.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which the said Sanitary District will suffer by reason of such default and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of said work, the Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto. It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof,

and particularly the provisions in regard to Time and Liquidated Damages for delays.

Extensions or Additions.

Art. 26. In the event that any material alterations or additions are made as herein specified, which, in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case, the time of the completion of the work shall be extended by such a period or periods of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time, but no extension of time shall be given for any minor alterations or additions, and the provisions of this paragraph shall not otherwise alter, change or invalidate the provisions of this contract, with reference to "Liquidated Damages" and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art 27. The Contractor shall delay or suspend the progress of the work or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided, that in event of such delay or delays or of such suspension or suspensions of the progress of the work, or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay, or delays, suspension or suspensions.

Unavoidable Delay.

Art. 28. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by necessary or unavoidable act or delay of the Sanitary District or by riot, insurrection, war, pestilence, strikes, acts of public authorities, fire, lightning, earthquake, cyclone or through any default of other parties under contract with said Sanitary District, then the time herein fixed for the completion of such part of said work, so delayed, shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowances shall be made unless a claim therefor in writing is presented to the Engineer within four (4) days after the commencement of such delay. And it is further expressly agreed that said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of any delays resulting from any of the causes above specified, except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. Said Engineer shall decide the number of days that said Contractor has been so delayed, and his decision shall be final and binding upon both parties hereto.

Forfeiture of Contract.

Art. 29. It is further agreed by said Contractor that if the work to be done under this contract shall be abandoned by the Contractor, or if there shall be a failure by said Contractor to perform the work of the character, and in the time herein specified or if said Contractor shall fail financially or from any other cause whatsoever be unable to carry out said contract and complete the said work; or if the contract shall be assigned by the said Contractor; or if the Contractor shall lose control of said work for any cause whatsoever, except by act of God or the public enemy; or if the Contractor shall refuse to or neglect to follow the instructions of the Engineer; or if in the opinion of the Engineer the Contractor refuses or neglects to use measures to protect the said materials and adjacent structures, work from damages; or if in the opinion of the Engineer the Contractor is guilty of carelessness or incompetency in the execution of said work; or in the opinion

of the Engineer the said work has been or is being delayed by the Contractor; or if in the opinion of the Engineer the rate of progress is not such as to insure the completion of the work within the time specified or if at any time the Engineer shall be of the opinion and so shall certify in writing to said Sanitary District that said work or any part thereof is unnecessarily or unreasonably delayed, or that the Contractor is wilfully or persistently violating any of the conditions or covenants of this contract, or is not fulfilling said contract in good faith, said Sanitary District shall have the power and authority, and may then immediately notify said Contractor to discontinue all work or any part thereof, that may be designated by the Engineer of said Sanitary District.

Upon notice being given as aforesaid, by the said Sanitary District to the said Contractor, or upon the happening of any of the conditions hereinbefore in this section specified, the said Sanitary District shall have a lien upon all the materials, supplies, machinery, implements and tools of the Contractor for the purpose hereinafter specified; and the said Sanitary District may thereupon immediately take possession of all said materials, supplies, machinery, implements and tools, for the uses and purposes hereinafter set forth; thereupon the said Sanitary District shall have the power to, and may at the cost of said Contractor, complete the said work by letting a new contract, and in completing the said work by contract, said Sanitary District may use such materials, supplies, machinery, implements, tools and plant as may be the property of said Contractor, and may make the necessary repairs and replacements thereto.

The cost of fully completing all the work provided for under this contract shall include the sum or sums of money paid by the Sanitary District to other contractors if all or any part of said work is completed by contract, and any sum or sums of money paid by the Sanitary District for the cost of repairs and replacements upon machinery, implements, tools and plant of the Contractor hereunder, used in the completion of said work, and also all sums of money paid for first aid, medical, surgical and hospital attendance and as compensation for accidental injuries or death suffered by employes in the course of their employment in the performance of said work under the employers' liability act of the State of Illinois in force July 1, 1913, and all acts amendatory thereof and supplementary thereto.

The cost of fully completing all the work under this contract as aforesaid shall be charged to the said Contractor, and the amount of said cost or expense so charged shall be deducted from and paid by the Sanitary District out of any moneys that may be due, or may at any time thereafter become due to said Contractor under and by virtue of this contract, so far as the same shall suffice therefor.

Should the amount remaining unpaid of the contract price be insufficient to reimburse the Sanitary District for the cost of fully completing all work as aforesaid then the Sanitary District may sell all materials, supplies, machinery, implements, tools and plant then on hand, obtained from said Contractor, at public sale on giving said Contractor twenty (20) days' notice of the time and place of such sale, and the net proceeds derived from the sale of said property at such sale shall be credited to said Contractor, and should the amount received from said sale be then insufficient to pay such deficiency, the Contractor and his bondsmen shall be liable to pay the amount of said deficiency, and at any such sale of said property as provided hereunder, the Sanitary District may bid and become a purchaser of said property.

Contractor's Bond.

Art. 30. The Contractor for the work under Division "B" shall furnish a bond for the faithful performance of such contract in the penal sum of twenty-five thousand dollars ($25,000.00). Said Contractor shall furnish bondsmen whose financial standing is satisfactory to the Board of Trustees of said Sanitary District, and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then, in that case, the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such sureties thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Prices.

The said Contractor for Division "B" agrees to accept the following prices as full compensation for furnishing all the equipment and materials, and for doing all the work contemplated and specified in this contract, also for all loss or damage arising out of the nature of the work aforesaid or from the action of the elements or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work, and the whole thereof, in full compliance with the contract drawings and specifications, and the requirements of the Engineer under them, to-wit:

For dredging, including the disposal of the excavated material, as specified, the sum of one and ninety-nine one-hundredths dollars ($1.99) per cubic yard, place measurement.

For pulling piles, including the removing of the same from the site of the work, as specified, the sum of eight dollars ($8.00) per pile.

For removing old timber dock, as specified, the sum of eight dollars ($8.00) per lineal foot.

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents, and patented materials, appliances and processes used in the work described in the specifications. Before final payment is made, the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

Art. 32. The said Sanitary District agrees to pay said Contractor the sums herein specified in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed eighty-seven and one-half (87½) per cent of the value of the work properly performed under this contract, and that the remaining twelve and one-half (12½) per cent shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and delivery of the final certificate of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract.

Final Payment.

Art. 33. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials, except in the manner set forth in this contract, nor until all the stipulations, provisions and conditions, hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificate pay, and, it hereby binds itself to pay the said Contractor in cash, the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the successors, heirs, and legal representatives of said Contractor.

In Witness Whereof, on the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Committee on Finance, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its ..... and to be duly attested and its corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

KNOW ALL MEN BY THESE PRESENTS, That we, The Great Lakes Dredge and Dock Company, a corporation organized under the laws of the State of New Jersey, as principal, and..... ..... as surety, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of twenty-five thousand dollars ($25,000.00), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated thtis 12th day of August, A. D. 1919.

THE CONDITIONS OF THE ABOVE OBLIGATION IS SUCH, That whereas the above bounden Great Lakes Dredge and Dock Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the 12th day of August, A. D. 1919, for doing all the work and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the widening of the south branch of the Chicago River just south of Van Buren Street and also just north of Sixteenth Street, in the City of Chicago, County of Cook, State of Illinois, as specified under Division "B" in the foregoing contract.

Now, if the said Great Lakes Dredge and Dock Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the drawings thereto attached and in the time and manner therein prescribed, and further, shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees, which may in anywise come against said The Sanitory District of Chicago in consequence of the awarding of such contract, or which may in anywise result from the carelessness or neglect of said Great Lakes Dredge and Dock Company, its agents, employes or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, and moreover shall pay to the said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including all valid claims and demands for first aid, medical, surgical and hospital attendance and compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois, entitled, "An Act to promote the general welfare of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or deaths suffered in the course of employment, approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said Great Lakes Dredge and Dock Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person and shall repay any overpayment, then is this obligation to be null and void, otherwise to remain in full force and effect.

AND IT IS HEREBY EXPRESSLY UNDERSTOOD AND AGREED, and made a condition hereof, that any judgment, rendered against said The Sanitary District of Chicago, as aforesaid, in any suit for damages occasioned by care-

lessness or neglect of said Great Lakes Dredge and Dock Comapny or its agents, employes or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or deaths suffered by employes, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Great Lakes Dredge and Dock Company, shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

Attorney.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 14, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a communication from the Manager of the Real Estate Department in which he states that in order to facilitate the work of his Department in making an inspection of the real estate of the Sanitary District, which covers many miles of territory along its various channels, to prevent squatters from occupying portions of said real estate, and ascertain if tenants are complying with the terms of their leases, it is necessary that his Department have the use of a Ford automobile which can be purchased for $700.00.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Manager of the Real Estate Department be, and he is hereby, authorized and directed to purchase a Ford automobile for the use of his Department provided the cost of same does not exceed the sum of $700.00.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 14, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a request from the Attorney and the Clerk of the District to make certain transfers of funds from unexpended accounts to other accounts in order to provide funds for the payment of expenditures for which insufficient appropriations were made.

Your Committee having considered the matter, is of the opinion that said requests should be granted, and, therefore recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby, authorized and directed to make the following transfers in ap-

propriations for the year 1919 in accordance with the requests of the Attorney and Clerk attached hereto:

Department of Law

From Account No. 555—
Books, maps and charts.....$400.00
To Account No. 53—
Furniture and office equipment. 400.00

Department of the Clerk of the District

From Account No. 86—
Judgments and Claims.....$360.00
To Account No. 53—
Furniture and office equipment $175.00
To Account No. 289—
Impersonal Service, N. O. C. 185.00
$360.00

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 14, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a request from the Manager of the Real Estate Department to make a transfer of funds from one unexpended account to another in order to provide funds for the payment of expenditures for which no appropriation was made.

Your Committee having considered the matter, is of the opinion that said request should be granted, and, therefore, recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby, authorized and directed to make the following transfer in appropriations for the year 1919 in accordance with the request of the Manager of the Real Estate Department attached hereto:

Department of Real Estate.

From Account No. 13—
Compensation for personal services other than salaries and wages.....$700.00
To Account No. 5271—
Motor vehicle equipment..... 700.00

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 14, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that the appropriation bill of the Sanitary District for the year 1919 (page 113 of the Proceedings), sets up in the Department of Engineering (Sanitary Division) (item 5), one position with salary attached thereto in the sum of $2,100.00.

Your Committee further reports that

the Committee on Employment has requested that the salary attached to said position be adjusted to meet the requirements of the Department of Engineering (Sanitary Division) which can be done without increasing said sum of $2,100.00 heretofore appropriated.

Your Committee having considered said request, is of the opinion that same should be granted and therefore recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby, authorized and directed to make adjustment of the salary set up under the Department of Engineering (Sanitary Division) in the Appropriation Bill for the year 1919 in accordance with the requirements of the Committee on Employment as follows:

Department of Engineering (Sanitary Division) Account No. II. Salaries and Wages of Regular Employes.

Change from Assistant Engineer at rate of $250.00 per month 1	$2,100.00
To Assistant Engineer at rate of $250.00 per month 1	1,850.00
To Chemical Assistant 2½ months, at rate of $100.00 per month 1	250.00

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 14, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance herewith transmits to the Board the following grant of easement from William Bauer and Minnie Bauer, his wife, whereby said grantors, for the nominal consideration of $200.00 grant to The Sanitary District of Chicago a perpetual easement to construct and operate an intercepting sewer, with appurtenances thereto, in the Desplaines River District, in, under and through certain real estate owned by said grantors on certain terms and conditions therein specified.

Your Committee further reports that it has examined said grant of easement which has been approved by the Chief Engineer and Attorney, and therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee of Finance of the Board of Trustees of the Sanitary District and the Clerk, be, and they are hereby, authorized and directed to execute in duplicate said form of easement which is hereto attached, same having been duly executed by said grantors, and it is further

Ordered, That the Chairman of the Committee on Finance and the Clerk, be, and they are hereby, authorized and directed to draw a warrant in the sum of $200.00 payable to the order of William Bauer and Minnie Bauer and deliver the same to them in full payment of the consideration for said grant.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying orders passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 14, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has examined and approved the bond of the Ready & Callaghan Coal Company with the Southern Surety Company thereon as surety, for the faithful performance of its contract for the construction of a sprinkling filter and appurtenances in the Village of Morton Grove for the Sanitary District and therefore recommends the passage of the following order:

Ordered, That the bond of the Ready and Callaghan Coal Company for the faithful performance of the above specified contract, said bond being in the penal sum of $18,769.88, be, and the same is hereby, approved, and it is further

Ordered, That the form of said contract and bond be printed in the proceedings of the Board.

Respectfully Submitted,

JAS. H. LAWLEY,
Chairman.

GEORGE W. PAULLIN,
MATT. A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

The following is the contract and bond of the Ready & Callaghan Coal Co.:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR THE CONSTRUCTION OF A SPRINKLING FILTER WITH APPURTENANCES IN THE VILLAGE OF MORTON GROVE.

THIS AGREEMENT, Made and entered into this 17th day of July, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated The Sanitary District, and Ready & Callaghan Coal Co., a corporation organized under the laws of the State of Illinois, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty expressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances and appurtenances called for by this agreement (free from all claims, liens and charges whatsoever), in the manner and under the conditions hereinafter specified, that are necessary for the construction of a sprinkling filter with appurtenances, in the Village of Morton Grove, Township of Niles, County of Cook, State of Illinois.

The work done and materials furnished shall be strictly pursuant to and in conformity with the specifications and plans, which are signed, attached hereto, and made a part of this agreement. The said specifications and plans are intended to cooperate, and any work appearing upon the plans and not mentioned in the specifications, or mentioned in the

specifications and not appearing upon the plans, shall be executed according to the true intent and meaning of the said specifications and plans, the same as though the said work was contained and described in both.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and his properly authorized agents, by whose measurements and calculations the quantities and amounts (including extras) of the several kinds of work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Chief Engineer of said Sanitary District, shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between the said Sanitary District and said Contractor, that said Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide every question which may arise relative to the execution of the work under this contract on the part of the said Contractor, and his estimate and decision shall be final and conclusive; and such estimate and decision, in case any question shall arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Chief Engineer" or "Engineer" are used herein, they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the words "the work" are used herein, they shall be interpreted to mean the work, including all material, labor, tools, and all appliances and appurtenances, necessary to perform and complete everything specified or implied on the plans or in this contract, in full compliance with all the terms and conditions hereof.

Wherever the word "section" is used herein, it shall be understood to refer to the entire section of the specification following the number referred to in parenthesis.

The sections are numbered consecutively.

Wherever under the provisions hereof an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

Sprinkling Filter with Appurtenances, Morton Grove.

SPECIFICATIONS.

Location.

(1) The sprinkling filter with appurtenances under this contract is to be constructed upon property owned by the Sanitary District, in the Village of Morton Grove, Township of Niles, County of Cook, State of Illinois.

Description.

(2) The work consists of building a sprinkling filter, brick building to cover sprinkling filter and pumps, secondary settling tank, sludge drying beds and cover for existing Imhoff tank. Various appurtenances are to be furnished, including sewer pipe, manholes, manhole frames and covers, ladder rungs, pumping equipment, electrical wiring, and miscellaneous work. The work also includes removing the old bridge abutment, excavating the old roadway on the north end of the property and making an embankment along the bank of the North Branch of the Chicago River, between Dempster Street and the fill of the Chicago, Milwaukee & St. Paul Railway.

The work under this contract includes all the work embraced by these specifications and the accompanying plans, which are made a part hereof. In the event of any discrepancy between the plans and these specifications, the decision of the Engineer shall be decisive thereon. The figured dimensions on the plans are to be taken as correct, but the Contractor is required to carefully check all dimensions of structures before beginning work thereon. Should any errors be discovered, the Engineer's attention shall be called to the same, and

the proper corrections made. All notes on the plans shall be carefully observed by the Contractor, and are made a part of this contract. All elevations shown on the plans or herein specified are referred to Chicago City Datum (C. C. D.).

The Sanitary District will require that the work be prosecuted with all speed, and with the least inconvenience to the public.

Character of Material.

(3) Profiles and contours of the ground are shown on the plans hereto attached. These profiles and contours are believed to be reasonably correct, but do not purport to be absolutely so, and together with any schedule of quantities are presented only as an approximation. It is not expected that rock will be found. The Contractor must satisfy himself regarding the character or amount of peat, clay, sand, quicksand, gravel, glacial drift, rock and all other material to be encountered and work to be performed.

Underground Structures.

(4) Various underground structures are shown on the plans hereto attached, including water pipes, sewers, hydrants, steam railway tracks, piers under elevated tracks and bridges, and manholes for various purposes. The location and dimensions of such structures where given, are believed to be reasonably correct, but do not purport to be absolutely so. All known underground structures are plotted on the plans and profiles for the information of the Contractor, but information so given is not to be construed as a representation that such structures will be found or encountered as plotted. Other structures may also be encountered not shown on the plans. All structures encountered shall be taken care of by the Contractor at his own expense, except such structures as the owners thereof are required to remove or maintain in accordance with existing ordinances of the Village of Morton Grove.

The Sanitary District has obtained the information on underground structures given herein and shown on the plans and profiles from the best available sources, including a survey of the ground, so far as such structures appear at the surface, from the records of the Village of Morton Grove, from various public utility companies, including the Chicago Telephone Co., Western Union Telegraph Co., Postal Telegraph Co., Public Service Company of Northern Illinois, and Chicago, Milwaukee and St. Paul Railway Co.

ITEM 1. EARTH EXCAVATION.

Description.

(5) The Contractor shall make, in open cut, to the width and depth necessary for the proper construction of the sprinkling filter, secondary settling tanks, sludge bed, connecting sewers, etc., according to the plans, all excavations required for the construction of the sprinkling filter and appurtenances, and shall excavate any other material which, in the opinion of the Engineer, is desirable, for any purpose appurtenant to the construction of the work.

Excavation shall include clearing the site of the work, the loosening, loading, removing, transporting, and disposing of all materials, wet or dry, necessary to be removed for purposes of construction, the sheeting and bracing, the draining and backfilling of trenches and pits, the supporting of structures above and below ground, and all incidental work.

Clearing.

(6) The site of all excavations shall be first cleared of all trees, fences (except as specified herein), lumber, walls, stumps brush and rubbish, which shall be removed or disposed of in a satisfactory manner. The removal of the east abutment of the old highway bridge will be paid for by the lump sum specified under Item 16.

Trenching and Trimming.

(7) The trenches between the lines of sheeting must be of sufficient width to permit the work to be constructed in the manner and of the size specified. Wherever the nature of the ground will admit, the bottom of the excavation is to have the shape and dimensions of the outside of the structure. In the excavation of the settling tanks, the bottom is to be trimmed closely to the surface required for the finished bottom, and in order to secure this shape, the Contractor shall provide a form or pattern by which the bottom can be trimmed. The Contractor shall furnish all slope boards, stakes and lines neces-

sary to indicate the finished earth surface in all excavations.

Unauthorized Excavation.

(8) Wherever the excavation is carried beyond or below the lines and grades given by the Engineer, the Contractor shall at his own expense refill all such excavated space with such material and in such manner as may be directed, in order to insure the stability of the various structures. Beneath all structures, space excavated without authority shall be refilled with concrete by the Contractor and at his own expense.

Additional Excavation.

(9) It is expected that satisfactory material for foundation will be found at the elevations shown on the drawings, but in case the materials encountered are not suitable, or in case it is found desirable or necessary to go to an additional depth, the excavation shall be carried to such additional depth as the Engineer may direct. Additional depth of excavation so ordered, and concrete ordered for filling such additional excavation will be paid for at the respective unit prices herein specified for excavation and additional concrete.

Shoring.

(10) All trenches and other excavations shall be properly sheeted and braced, to furnish working conditions acceptable to the Engineer.

Removal of Timbering.

(11) If required, all timbering, including sheeting, bracing or other supports shall be removed and all voids carefully filled as directed. If any timbering is ordered in writing by the Engineer to remain in place, such timber shall be cut off as directed, and that remaining in place will be paid for under Item 23 at the unit price of thirty dollars ($30.00) per thousand feet board measure, as specified therein, but no allowance will be made for loss or waste.

Removal of Water.

(12) The Contractor shall at all times during construction provide and maintain ample means and devices with which to promptly remove and properly dispose of all water or sewage entering the excavations or other parts of the work, and keep said excavations dry until the structures to be built therein are completed. No masonry shall be laid in water nor shall water be allowed to rise over masonry until the concrete or mortar has set at least 24 hours. The Contractor shall, when required by the Engineer, pump out the settling tanks, pump wells and connections so that the same can be inspected before the final acceptance thereof.

Disposal of Material.

(13) Material excavated shall be disposed of in backfilling, as may be directed to the lines and grades given by the Engineer.

Surplus material excavated but not required for backfilling shall be deposited in the embankment to be constructed around the plant. No additional payment will be made for this deposit, other than the price specified to be paid per cubic yard for rolled embankment, complete, under Item 3. All surplus material excavated and not otherwise disposed of in backfilling or in embankments, shall be deposited by the Contractor in the low area on the south end of the property of the Sanitary District, as the Engineer may direct, within the lines and grades given by him.

Backfilling.

(14) Unless otherwise specified, all trenches or excavations around structures shall be backfilled up to the original surface of the ground or to such grades as shall be directed. The backfilling shall be done as compactly as possible, and the material shall be moistened and well tamped in such a manner as to prevent after-settlement. If required, the trenches and excavations shall be flooded with water while the backfilling is being placed. The filling shall be made with the best material available, selected especially for the purpose and free from stones over three (3) inches in diameter, particularly immediately in and around pipe sewers.

Rock.

(15) For all rock excavation, in addition to the price per cubic yard of earth excavation, the Contractor will receive a compensation of THREE DOLLARS ($3.00) per cubic yard, as herein specified under Item 2.

Protection of Streets and Traffic.

(16) The Contractor shall make provisions at all streets for the free

passage of vehicles and foot passengers. The sidewalks must not be obstructed, unless it is necessary for the execution of the work. Neither the materials excavated nor the materials or plants used in the construction of the work shall be so placed as to endanger the work or prevent free access to the existing plant and sewer manholes, fire hydrants or water valves in the vicinity.

Care of Existing Structures.

(17) All existing poles, trees, fences, sewer, water, gas or other pipes or conduits, manholes, buildings, building or tank foundations, bridges, bridge foundations, or other structures along or on the site of the work shall be supported and protected from injury by the Contractor, during the construction and until the completion of said work. The Contractor shall be liable for all damages done to such poles, trees, fences, pipes, buildings, and structures, as above provided, and shall save and keep the said Sanitary District harmless from any liability or expense for injuries, damages or repairs to the same.

For all existing fences taken up by the Contractor and ordered by the Engineer to be replaced in other locations than those from which the fence was taken, the unit price per lineal foot for fence replaced will be paid as specified under Item 15, when ordered by the Engineer. Fences taken up and replaced in the original locations will be at the expense of the Contractor, no payment being made therefor under Item 15.

Measurement.

(18) All earthwork will be measured in excavation and will be measured only once. Excavations for masonry structures will be measured upon vertical planes passing through the outside of the structures and from the surface of the ground to the neat lines of the bottoms of the structures or to such greater depths as the Engineer may order. All excavations for pipe lines shall be measured between vertical planes two (2) feet farther apart than the inside diameter within the barrel of the pipe, and from the surface of the ground to the elevation of the outside invert of the pipe. All other excavation will be measured within the lines and grades actually given by the Engineer.

Payment.

(19) The price specified to be paid per cubic yard for excavation under Item 1 shall include the excavation of all materials in place without classification, other than rock, as specified in Section 15 and under Item 2, and shall include all clearing, backfilling to the original surface of the ground, the disposal of material in embankments, or otherwise, the clearing up of the ground, removal of all water, all pumping, shoring and other expenses incident to the work of earth excavation, and the furnishing of all machinery, tools, labor and appurtenances necessary to complete the work as specified.

ITEM 2. ROCK EXCAVATION.

Description.

(20) It is not expected that any rock or boulders will be encountered in the excavation. If such material is found it will be paid for at the unit price of THREE DOLLARS ($3.00) per cubic yard, under this item, in addition to the payment for earth excavation at the unit price specified to be paid per cubic yard under Item 1.

The Contractor shall excavate within the lines and grades shown on the drawings or given by the Engineer, and shall satisfactorily dispose of, in fills or spoil banks, all ledge rock or boulders wich cannot be handled with picks and shovels with reasonable facility. When placed in fills, the pieces of rock and boulders shall be kept separated so that the earth may fill solidly around them and prevent settlement later. Large stones shall not be placed in rolled embankments unless especially permitted by the Engineer.

All the sections in the preceding item on Earth Excavation shall be considered to apply to Rock Excavation, in particular as regards shoring, removal of water, unauthorized excavation, and disposal of materials.

Measurement.

(21) In estimating the number of cubic yards of rockwork in the excavation for pipes, tanks, or other structures, the measurement will be based on the yardage in place, as determined by the lines and grades of the Engineer; a distance of six (6)

inches, however, being allowed and no more, outside the neat lines of the pipes, tanks or other structure in question when ledge rock is removed from beneath or at the sides of said structures. Boulders four (4) cubic feet and over in size will be measured as rock excavation. Hard pan, boulder clay, shale and similar material shall not be classed as rock, although it may be more economical to remove the same by blasting. The term "rock" is to be interpreted to include only boulders, or solid limestone, or sandstone rock found in its original bed.

No claim for an amount of money beyond the contract price of the work will be entertained or allowed on account of the character of the ground in which the trench or other excavations are made, except for the rock work heretofore specified.

Payment.

(22) For all rock excavation, including the disposal of the same, occurring under this contract as herein specified, the unit price of THREE DOLLARS ($3.00) per cubic yard will be paid, which sum is agreed by the Contractor to be in full compensation for all labor, materials and appurtenances necessary to complete the work as specified.

ITEM 3. ROLLED EMBANKMENT.

Location.

(23) The rolled embankment consists chiefly of the fill above the original ground surface around the sludge bed, settling tanks and sprinkling filters where ordered by the Engineer, and in such other places as may be ordered in writing by the Engineer.

Embankment.

(24) All embankments shall be constructed to the lines and grades given by the Engineer, and the Engineer shall, in giving the lines, take into account the probable settlement of the material therefor. The materials for building the embankments shall be obtained from the excavations made under item 1. The surface on the ground to be covered by an embankment shall first be cleared and grubbed and the loam removed, as specified under Sections 5 to 18, inclusive, and shall then be ploughed, furrowed or picked, so as to make a bond with the embankment, and on sloping ground the surface shall be stepped, if so directed. The materials for the embankments shall be placed in layers not exceeding six (6) inches in thickness, and each layer shall be thoroughly rolled with a grooved or smooth roller weighing not less than one thousand (1,000) pounds per lineal foot of width, and not less than four (4) feet wide. Where the location does not admit of rolling, all layers shall be tamped with heavy rammers, or otherwise thoroughly compacted in a satisfactory manner. The embankments shall be constructed with extreme care and with carefully selected earth and gravel, free from all perishable matter and from stones measuring over three (3) inches in their greatest dimensions. The materials shall be selected and so spread as to make as solid an embankment as possible. The materials shall not be placed in the embankments too wet to allow of proper solidification and rolling, and if too dry they shall be moistened by sprinkling with water. From time to time during the construction of the embankment, and if so required, three (3) times after its completion, the embankment shall be so thoroughly saturated with water that it will stand upon the surface. Embankments shall not be built during freezing weather, nor with frozen material, nor shall they be built when the materials already placed in the embankments are frozen. Top soil or loam may be used for surfacing, as specified in Item 4.

Measurement.

(25) Under this item will be measured, inside the lines and grades given by the Engineer, all embankments which are constructed and rolled as above specified. In order to allow for settlement, embankments will not be measured for final estimate in any case within thirty (30) days from the completion of the embankment.

Payment.

(26) The unit price specified to be paid per cubic yard for rolled embankment shall include the placing and rolling of all materials in embankments above the surface of the ground, and shall include the furnishing of all labor, tools, materials, and appurtenances necessary to complete the work as specified.

ITEM 4. LOAM.

Description.

(27) Under Item 4 the Contractor shall furnish and place loam or top soil as directed by the Engineer. Loam so furnished shall be "black soil" of a quality suitable for use on the surface of the premises for seeding and planting purposes. In general, it will be used for surfacing and dressing slopes to depths of about twelve (12) inches. It shall be placed when and as directed by the Engineer, in thin layers which shall be lightly rolled and brought to the grades and lines directed. The surfaces on which it is to be placed shall be first thoroughly ploughed and all lumps broken up with a disc harrow.

Measurement and Payment.

(28) Loam furnished and placed under this item shall be measured in place within the lines and grades given and paid for at the unit price per cubic yard specified, which price shall include the furnishing of all tools, labor and materials necessary to the performance of the work as specified. In order to allow for settlement, measurements for payment will not be made until at least thirty (30) days have elapsed after the completion of the work. No work done and paid for under Items 1 or 3 shall be paid for again under this item.

ITEM 5. SAND FILL.

Description.

(29) At places designated by the Engineer, principally in fills upon which concrete is to be placed, the use of sand may be required. Sand for this purpose shall be well graded silicious material substantially free from particles larger than one-quarter (¼) inch and shall be free from loam and perishable material. It shall be thoroughly tamped or rammed into place to the grades established by the Engineer to form an unyielding foundation. If required, fills made of sand shall be flooded with water while in the process of making. If required, the fill may be brought above the finished grade and subsequently excavated thereto. Such excavation shall be paid for under Item 1.

Measurement and Payment.

(30) Sand fill furnished and placed under this item shall be measured in place within the lines and grades given by the Engineer and paid for at the unit price per cubic yard specified, which price shall include all labor, tools and material required for doing the work. No material excavated on the site of the work and placed in fill as specified under Items 1, 2 or 3 shall be paid for under this item.

ITEM 6. ROADWAYS AND WALKS.

Description.

(31) The Contractor shall furnish the material for and construct complete the gravel roadway and walks shown on the plans, or ordered.

Foundation.

(32) The excavation for embarkment shall be left at a point slightly above the required subgrade, and then the earth thoroughly compacted by rolling with a roller weighing at least one thousand (1,000) pounds per lineal foot, and not less than three (3) feet long. The earth foundation shall then be trimmed smoothly and evenly to the exact sub-grade. In case soft or spongy earth or other unsuitable materials are encountered in the foundation, they shall be removed and the space filled in with suitable material placed in layers not over four (4) inches in thickness, each layer being thoroughly compacted by rolling or ramming.

Gravel and Rolling.

(33) After the foundation has been suitably prepared, it shall be covered to the required thickness with good, clean graded, broken limestone or gravel, in general from one-quarter (¼) inch to two (2) inches in size, free from stones which will not pass through a two (2) inch ring in any direction, and containing not more than twenty-five (25) per cent of sand, screenings, or other fine material which will pass through a screen having a clear mesh of one-fourth (¼) inch. The gravel shall be placed in two (2) layers of equal thickness. Each layer shall be well moistened with water and rolled with a grooved roller, weighing not less than one thousand (1,000) pounds per lineal foot and not less than three (3) feet long, until the gravel is thoroughly compacted and solid. All stones exceeding one (1) inch in diameter shall be raked from the surface of the upper layer of gravel before and dur-

ing the rolling. Should any depressions appear after the last rolling, they shall be filled with broken stone or gravel of suitable size and then thoroughly compacted by rolling. The roadways and walks when finished shall correspond exactly in grade and and cross-section to the lines and grades given by the Engineer. Crushed stone or gravel used as a foundation for slope paving under Item 17 shall also be included under this item.

Measurement.

(34) Under this item will be measured all broken stone or gravel placed in the roadways and walks inside of the lines and grades given by the Engineer and after it has been rolled and all crushed stone or gravel placed as a foundation for slope paving or elsewhere in the work, if ordered by the Engineer.

Payment.

(35) The unit price specified to be paid per cubic yard for broken stone or gravel roadways and walks and for foundations for paving of slope under Item 6, shall include the preparation of the sub-grade and furnishing and placing of all the broken stone or gravel, and shall include the furnishing of all labor, tools, materials, and appurtenances necessary to complete the work as specified.

ITEM 7. SEEDING AND PLANTING.

General.

(36) The Contractor shall prepare and seed the graded areas covered with loam, as required inside the boundaries indicated on the plans, and plant the shrubbery and trees, as shown on the plans, or ordered by the Engineer.

Preparation of Ground.

(37) Before the top soil is stripped the Contractor shall remove all weeds and rubbish, in a manner satisfactory to the Engineer.

After the top soil is stripped and after the backfill or deposit of surplus excavation has been brought approximately to grade, the Contractor shall work over the said fill to break up all lumps and compact the same, by rolling, ploughing, harrowing, or a combination of all three. After this has been done, the work hereinafter specified shall be performed when ordered by the Engineer.

Before the loam is distributed and graded the Contractor shall grade the surface of the backfill and the surface left bare by stripping the top soil, and thoroughly plow the entire surface, to be seeded and planted, breaking up all lumps with a disc harrow. The loam shall then be distributed and graded. Next, ground limestone shall be scattered evenly and uniformly over the entire surface to be seeded and thoroughly worked in with a harrow or cultivator or other suitable apparatus. The ground limestone shall be clean limestone material, specially ground, so that at least eighty (80) per cent will pass through a screen of two hundred (200) meshes per lineal inch. Two thousand (2,000) pounds of ground limestone shall be added per acre.

Seeding.

(38) The surfaces to be seeded shall be carefully prepared and raked over. All weeds shall be removed. The surfaces shall be seeded with grass seed, at a proper season of the year for growing, approved by the Engineer. The grass seed shall be of the best quality, equal to the best quality furnished by Vaughan's Seed Store of Chicago. On all surfaces, the grass seed shall consist of a mixture of blue grass and red top in equal portions. At least one hundred (100) pounds of grass seed per acre shall be used. In addition to the grass seed, shall be added six (6) pounds of white clover per acre. Immediately after the surfaces have been seeded they shall receive a sufficient amount of raw bone fertilizer, not less than four hundred (400) pounds per acre, and shall be well rolled. Care shall be taken to have all surfaces conform to the proper lines and grades, and any sliding or settling which may occur before the final acceptance of the work shall be repaired by the Contractor.

Planting.

(39) The Contractor shall furnish and plant where shown on the plans or ordered by the Engineer, the following shrubs and trees, of the size or ages shown, or their equivalent as ordered. The planting shall be of the best grade of healthy stock furnished by Vaughan's Seed Store or equal.

Each shrub or tree shall be set in a pocket of loam of a size and depth

approved by the Engineer. In general at least a hole three (3) feet deep, and three (3) feet in diameter shall be dug for every tree and filled with loam. For every shrub a hole two (2) feet deep and two (2) feet in diameter shall be dug. The loam so used will be included for measurement under Item 4, but will be measured only once. No excavation for planting trees or shrubs will be paid for at the unit price specified to be paid under Item 1 for excavation.

Shrubs shall be of healthy stock, three (3) years old, selected and bushy. The Contractor shall furnish the designated number of shrubs of each of the following species:

Number	Species
5	High bush honeysuckle.
5	Mock orange (Philadelphus grandiflorus).
50	Barberry (Berberis Thunbergii).
5	Red Dogwood (Cornus Siberica).
50	Privet (Ligustrum Amurense).
5	Weigelia.
50	Spiraea von Houttei.
5	High bush Cranberry.
5	Lilac (assorted).

The Contractor shall furnish five (5) trees each, of the following species:

Carolina Poplar (6 to 8 ft. high).
Mountain Ash (8 to 10 ft. high).

Maintenance.

(40) All seeded surfaces shall be carefully looked after and tended by the Contractor to produce and maintain grass, shall be watered and the grass cut when necessary, and shall be turned over to the Sanitary District in good condition, with growing grass, after the first cut, on the final acceptance of the work. The grass shall be well rolled after the first cut. Bare spots shall be re-seeded at the expense of the Contractor. The shrubs and trees shall be watered and pruned as required, and turned over to the Sanitary District, growing, in good healthy condition, on the final acceptance of the work. The Contractor shall furnish a maintainance bond for one (1) year from the final acceptance to guarantee living shrubs and trees, and the replacing of all dead, diseased or weak stock by satisfactory stock, at his own expense.

Payment.

(41) The lump sum specified to be paid for seeding and planting under Item 7 shall include the weeding, plowing and preparation of the ground, the furnishing and placing of the limestone, fertilizer, seed, shrubs and trees, the excavation and backfilling for shrubs and trees, the maintenance, and shall include the furnishing and placing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 8. SPRINKLING FILTER AND PUMP WELL.

Work Included.

(42) Under Item 28 the Contractor shall furnish all materials for (except steel reinforcement, pumping equipment and materials in superstructure of filter and pump-house) and construct complete the sprinkling filter and pump well, as shown on the plans and specifications in detail under the following sections of these specifications:

A. Concrete.
B. Steel reinforcement.
C. Underdrainage and floor system.
D. Vent pipes.
E. Cast-iron pipe and specials.
F. Wrought iron pipe, fittings and gate valves.
G. Iron castings.
H. Structural and miscellaneous iron and steel.
I. Filtering material.
J. Splash cups and appurtenances.

A. CONCRETE.

Description.

(43) All the concrete used in the construction of the various structures under Item 8 shall be made and placed in accordance with the following general specifications, supplemented by the specifications given under other headings.

Included under this item are the sprinkling filter substructure, including floor, walls and columns, and the pump pit and foundations, and all concrete shown on the plans or specified to be paid for under the lump sum to be paid for Item 8.

Proportions.

(44) Concrete shall be divided into two (2) classes of mixtures, to be used as herein specified.

Class A concrete shall be composed of substantially one (1) volume of cement, two (2) volumes of sand, and four (4) volumes of gravel or broken stone. This shall be used in thin work,

the floor, walls and columns of the sprinkling filter and pump well, reinforced work, and in all other parts of the work, unless otherwise specified or directed.

Class B concrete shall be composed of one (1) volume of cement, two and one-half (2½) volumes of sand, and five (5) volumes of gravel or broken stone. This shall be used in backing pipes, or otherwise, as specified or directed by the Engineer.

The sand and gravel or broken stone shall be so graded in size that the cement shall more than fill the voids in the sand, and sand and cement shall more than fill the voids in the broken stone or gravel. One bag of cement, weighing at least ninety-four (94) pounds net, shall be regarded as having a volume of one (1) cubic foot, and the sand and gravel shall be measured loose.

If required, the mixture shall be modified as directed by the Engineer, by changing the relative volume of sand and ballast, but keeping the aggregate of the volume of sand and ballast the same. The proportions shall be determined by volume, the sand and ballast when measured being packed not more closely than by throwing them in the usual way into a barrel or box. Suitable measuring devices shall be provided by the Contractor.

Portland Cement.

(45) The cement shall be first-class Portland cement of a reputable brand satisfactory to the Engineer. It shall be delivered in cooperage or in bags and stored in weather-proof buildings having wooden floors raised above the ground, and sufficient stock shall be kept on hand to allow at least twelve (12) days for testing. All necessary facilities shall be provided by the Contractor to permit of the inspection of the individual shipments, each of which shall be kept separate. All unsatisfactory cement shall be promptly removed from the work. The cement shall conform to the most recent standard specifications of the Bureau of Standards of the U. S. Department of Commerce, Washington, D. C., the same being the United States government specifications for Portland cement. Circular No. 33 of the Bureau of Standards, issued July 1, 1913. Tests will be made in general accordance thereto, with limits as follows:

Specific gravity shall be not less than three and one-tenth (3.1).

Fineness shall be such that ninety-two (92) per cent of the cement by weight shall pass through the number one hundred (100) sieve, and seventy-five (75) per cent shall pass through the number two hundred (200) sieve.

Time of setting. The cement shall not acquire its initial set in less than forty-five (45) minutes and must have acquired final set within ten (10) hours.

Tensile strength. Briquettes after being kept the time specified shall develop a tensile strength per square inch as follows:

Age	Neat Cement	1 Cement, 3 Sand
24 hours	175	...
7 days	500	200
28 days	600	275

Soundness. Pats shall be satisfactory for twenty-eight (28) days in air, as well as one (1) day in air and twenty-seven (27) days in cool water, and also in steam for five (5) hours after hard set.

Sand.

(46) Sand for concrete and mortar shall be silicious material, well graded from fine to coarse, and not more than six (6) per cent shall pass through a sieve one hundred (100) meshes per lineal inch, and not more than five (5) per cent shall be retained on a screen having one-quarter (¼) inch holes. Sand used in mortar for brickwork or tile pipe shall not contain particles retained by a screen having four (4) meshes per lineal inch. All sand shall be clean, hard, free from soft particles, vegetable matter or other deleterious material, and shall be subject to the approval of the Engineer. Screenings shall not be used as a substitute for sand in concrete or mortar.

Crushed Stone or Gravel.

(47) Crushed stone or gravel shall consist of clean, hard, durable particles of stone, well graded between the limits of one-quarter (¼) and one and one-quarter (1¼) inch, with the diametrical axes as nearly as possible the same length, with all dust and all particles less than one-quarter (¼) inch removed. It shall be free from loam, clay, organic matter, soft or micaceous pebbles or other impurities. When directed, for thin sections of concrete, a finer stone than specified above shall be used, and for very heavy sections a coarser stone may be permitted.

Water.

(48) Water for mortar, concrete, flooding trenches and for all other purposes shall be provided by and at the expense of the Contractor and shall be free from oil, acid, strong alkalies or vegetable matter.

Forms.

(49) The Contractor shall provide suitable collapsible centers or forms with smooth surfaces of ample strength and rigidly braced. The bracing shall be entirely adequate to prevent deviations from the correct lines. No center or form shall be used which is not clean and of proper shape and strength and in every way suitable. Deformed, broken, or defective centers or forms shall be removed from the work. Before placing concrete, the forms shall be coated with vaseline, form grease or other suitable substance, approved by the Engineer, to prevent adherence of concrete. All forms and form lumber once used shall be thoroughly cleaned and recoated before being used again.

All wooden forms shall be built of clean, sound No. 1 yellow pine lumber, reasonably free from knots, dressed on all sides and neatly fitted. Tongued and grooved material shall be used where required. The form surface shall be watertight, securely fastened by nails, screws or bolts to the ribs or supports.

All forms shall be thoroughly braced to keep them in exact position and alignment during the placing and setting of the concrete. All wall forms shall have their sides tied together by wires or other approved ties, as far as possible.

No centers or forms on any part of the work shall be struck without the consent of the Engineer.

The Contractor shall furnish a sufficient number of centers and forms so that the work can be prosecuted rapidly.

Mixing.

(50) The concrete shall be mixed in an approved machine of the batch type except that when relatively small quantities are to be used, resort may be had to hand mixing, but only by consent of the Engineer. Accurate measuring devices shall be used for proportioning the aggregate, cement and water. The mixing shall last at least one (1) minute and shall be thorough and continued until every particle of ballast is completely covered with mortar. The mixer shall make at least twelve (12) revolutions. The Contractor shall supply a clock or other means for determining the time of mix. When necessary to mix by hand, a water-tight platform shall be used and ingredients shall be turned together at least six times, and until they are homogeneous in appearance and color. No concrete shall be placed after its initial set has occurred, and no retempered concrete will be allowed to be used under any conditions. The mixtures shall be moderately wet, of a consistency to flow into forms and around reinforcement and not to cause a separation of fine from coarse material in transportation from the mixer to the work.

Placing of Concrete.

(51) After mixing, the concrete shall be transported rapidly to the place of deposit. It shall be carried up level along the whole length of the section under construction, and shall be so placed as to avoid rehandling within the forms. It shall be spaded or rammed into place and shall be thoroughly compacted around reinforcement, pipes, or other shapes built into the work. On both surfaces of the walls of the sprinkling filters, pump wells, and settling tank, it shall be thoroughly spaded to bring rich mortar to the face.

Smooth Surfaces.

(52) With the use of moderately wet concrete in the manner above specified, and with smooth watertight forms, satisfactory surfaces should be obtained for the interior surfaces or the sides of walls which will be exposed in the finished work. But if for any reason the surfaces have voids or are unduly rough, the walls shall be plastered with Portland cement mortar, and floated to give a satisfactory appearance, or given a wash of neat Portland cement, applied with a white-wash brush, as the Engineer may direct.

The exposed surface of the coned sumps at the bottom of the settling tanks shall be floated and trowelled or screeded to a hard finish.

The tops of all walls, except those upon which concrete, brick or stone are to be placed and exposed surfaces

of other structures shall be finished with a hard trowelled granolithic finish.

Joints and Bonding.

(53) At joints the concrete last to be laid shall be suitably dovetailed, grooved or stepped, and upon resuming operations the joining surfaces shall be thoroughly cleaned and wetted, a thick bed of bond mortar being used. Joints shall not be made except as the Engineer may direct to preserve the strength, or watertightness of the structures.

Pipe and Steps in Walls.

(54) Pipes, slants, or castings, as shown on the plans or as directed, shall be placed by the Contractor in the concrete. Special care shall be taken to place them to the proper lines and grades and to tamp thoroughly around them to prevent passage of water through the wall. Steps shall be placed before pouring concrete, as far as possible.

Hangers, pipe, pipe supports or fixtures shall be placed in the columns as shown on the plans or as ordered by the Engineer to complete the work.

Care of New Work.

(55) All exposed surfaces in finished and unfinished concrete shall be kept constantly moist by sprinkling with water at short intervals or by covering with moistened burlap or by such other means as may be approved until permanent covering is in place or until, in the opinion of the Engineer, the concrete is sufficiently hardened. No new work shall be laid during rainstorms. Freshly laid concrete shall be protected by canvas during storms to prevent the water from coming in contact with it. Sufficient canvas covering shall be provided and kept ready at hand for this purpose.

Defective Work.

(56) Should any voids or other defects be discovered in any part of the work when the forms are taken down, or otherwise, the defective work shall be removed and the space refilled with suitable material in a proper manner at the expense of the Contractor.

Placing Reinforcing Steel.

(57) The Contractor shall place such reinforcing steel in the concrete as may be ordered by the Engineer, whether shown on the plans or not. The furnishing and placing of the reinforcing steel will be paid for at the unit price specified to be paid for reinforcing steel under Item 20.

Placing Materials Furnished by the District.

(58) The Contractor shall place in the concrete, at points to be indicated by the Engineer, any materials not included in this contract, which may be necessary to complete the work. All materials thus placed will be furnished on the ground at the site of the work by the Sanitary District at its own expense, but the Contractor shall perform such extra work in accordance with the provisions of Article 8. The Contractor shall carefully inspect all materials furnished by the Sanitary District, shall reject and set aside all cracked, broken or otherwise defective pieces discovered by him, and shall notify the Engineer in writing of the same within twenty-four (24) hours after the inspection. The Contractor will be held responsible for all materials furnished by the Sanitary District, after they have passed his inspection as being sound, and until they are accepted in the completed work. Any cracked, broken, or otherwise defective pieces discovered after having been inspected by him shall be replaced at his own expense.

Concreting in Freezing Weather or at Night.

(59) No concrete shall be laid at night or in freezing weather except by permission of the Engineer, and then with special precautions, satisfactory to the Engineer, to avoid the use of materials containing frost, or covered with ice, and to provide means to prevent the concrete from freezing until it has thoroughly set. The cost of all material furnished and labor employed that may be necessary or required by the Engineer to protect against freezing, shall be at the sole expense of the Contractor without extra charge therefor.

Grounds, Holes, Etc.

(60) Where required, wooden grounds shall be set for window and door frames or other carpenter or millwork.

Where required, electrical conduits, piping and other work shall be placed in the concrete.

Watertightness of Concrete Work.

(61) The pump wells, tanks and other work holding sewage shall be constructed with as few joints as possible. Great care shall be taken where joints are necessary to make them watertight, and also at all points where pipes or castings pass through the walls or floors. When the concrete work has attained sufficient strength, all pump wells, tanks, etc., shall be filled with water. The Contractor shall repair any imperfections which cause the water to fall at a rate of more than one-half (½) inch in twenty-four (24) hours.

B. REINFORCING STEEL.

Description.

(62) The Contractor shall furnish and place in the concrete, steel bars or mesh reinforcement of the size called for on the plans, or as ordered by the Engineer, at such points as are shown or as may be required. Corrugated, twisted, or deformed bars may be used, of a form to be approved by the Engineer. Mesh reinforcement, where called for, shall be of approved type.

Placing.

(63) The Contractor shall supply all necessary wiring, supports, and labor to put the reinforcement in place, fasten it securely and keep it in place while concrete is being laid. The bars shall be cut and bent as required, and wired together at intersections as often as necessary. Adjoining bars at splices shall overlap at least forty (40) diameters, and steel rod clamps shall be provided and placed where shown on the drawings or ordered by the Engineer.

Quality.

(64) Steel for reinforcing bars to be imbedded in concrete shall be corrugated, twisted, or deformed bars of the size called for on the plans and of a form approved by the Engineer. Bars shall be free from defects and kinks, and from bends not shown on the plans. Bars shall be rolled from open hearth steel billets (not rerolled material), and shall conform in all respects to "Standard Specifications for Billet Steel Concrete Reinforcement Bars" adopted by the American Society for Testing Materials in 1911, and revised in 1912, 1913 and 1914. Deformed bars shall be of the grade therein specified as "Intermediate Grade." All tests shall be made upon the finished bars as furnished for the work under this contract, and at least one tensile and one bending test shall be made from each melt of steel from which bars are furnished for this work. All bars shall be new stock, free from rust scale or excessive rust when placed in the work. A thin coating of red rust resulting from short exposures will not be considered objectionable when bars are placed in the work, but any bars having rust scale or a thick rust coat shall be thoroughly cleaned satisfactorily to the Engineer, or shall be rejected and removed from the premises upon the order of the Engineer. All bars shall be protected from the weather after delivery at the site of the work.

Mesh reinforcement shall be of a type, grade and weight satisfactory to the Engineer and equivalent in every way to that shown on the plans.

Ordering.

(65) All reinforcing metal shall be furnished by the Contractor only by order of the Engineer, and in such length and quantities as the Engineer shall specify in such order, and the Contractor shall notify the Engineer when he desires such order given to him. The Contractor shall not be entitled to any claim for damages for delays that may result from failure to so notify the Engineer.

C. FLOOR SYSTEM FOR SPRINKLING FILTERS.

Floor.

(66) The concrete used in constructing the floor shall be Class A concrete, in which shall be embedded a steel mesh reinforcement conforming to the section noted on the plans and of a type satisfactory to the Engineer. The concrete shall be carefully placed and thoroughly floated and trowelled to a smooth hard finished surface, true to line and grades.

Manufacture of Blocks.

(67) The concrete blocks shall be cast separately from the floor, in forms of approved design, and so constructed as to produce smooth finished work. The blocks shall be made of cement mortar mixed in the proportions of one (1) part Portland cement and three (3) parts torpedo sand. In removing the forms or molds care shall be taken to prevent cracking or chipping of the blocks. Special care shall be used in making the blocks to avoid cracking or

otherwise impairing their strength. All blocks shall be allowed to cure for at least three (3) weeks, protected from sun and weather, before placing in the work.

Access shall at all times be given to the Engineer to the place where these blocks are manufactured, and the methods and tools used in the manufacture shall at all times be satisfactory to the Engineer. Sample blocks shall be furnished from time to time by and at the expense of the Contractor to be tested by the Engineer to determine whether or not they are of suitable quality.

Placing Blocks.

(68) After the concrete floor has sufficiently hardened it shall be thoroughly cleaned of any foreign material. When ordered by the Engineer, the concrete blocks shall be laid, and evenly bedded in cement mortar to obtain an even bearing. The mortar shall consist of one (1) part Portland cement to three (3) parts sand. Care shall be taken to keep all foreign matter out of the water ways.

Protection of Floor.

(69) The Contractor shall take all precautions necessary or required to protect the floor system from injury, during construction and after completion, not only from the construction operation but also from weather. All injury or damage shall be repaired by and at the expense of the Contractor. The floor system shall be left in a thoroughly clean and first-class condition at the time of the final acceptance of the completed work.

D. VENT PIPES.

Description.

(70) Vent or flushing pipes of cement mortar are to be set at the ends of the filter underdrain channels under this item as shown on the plans.

The pipes shall be made of "Stone-Duct" or other cement mortar pipe of quality satisfactory to the Engineer, and shall be made of materials and in such manner as to secure a strong, smooth, dense, well formed pipe. It shall have an internal diameter of three and one-half (3½) inches and the walls shall be not less than five-eighths (⅝) inches thick. The pipe shall be of the length shown on the plans. Not more than one joint will be allowed in any length, and this shall be of such type as to firmly unite the two ends and hold them in place.

Placing.

(71) The pipe shall be set in a true vertical position on the concrete base blocks shown on the plans and firmly bedded in cement mortar. Care shall be taken to keep the interior of the pipe free from all obstructions. The pipe shall be held in place near the top by a loop of number twelve (12) copper wire set in the concrete and twisted tightly about the pipe. Any metal used in making joints between pieces of pipe shall be given two coats of asphaltum varnish after erection.

E. CAST-IRON PIPES AND SPECIALS.

Description.

(72) Under this item the Contractor shall furnish and place all the cast-iron pipe and specials required for the ten (10) inch influent line through the pump well, and the ten (10) inch connection between the sprinkling filter and the secondary settling tanks, and otherwise, as may be necessary to complete the work. Where shown on the drawings or where directed, the pipes shall be carefully built into and supported on masonry.

All cast-iron pipe and special castings shall conform to the requirements of the most recent edition of the standard specifications of the American Water Works Association, which are hereby made a part of this contract, and are hereafter referred to as the American Water Works specifications.

The pipes and special castings shall be of such class or classes as may be shown on the drawings or specified herein. The thicknesses of the pipes and castings for the several classes shall be the same as those given in the American Water Works specifications.

All hubs shall be of ample size to receive the socket of the adjoining pipe or special and leave proper lead space. Other standard patterns than those of the American Water Works specifications may be used, provided the pipe and specials in all other respects conform to the specifications and provided also that dimension drawings of the same are submitted by the Contractor and approved in writing by the Engineer.

The flange special castings shall meet the requirements for special castings of the American Water Works specifications, insofar as they apply. All flange special castings shall be made to, and all flanges shall be drilled to dimensions furnished by the Engineer. All flanges shall be cast solid, and shall be faced accurately at right angles to the axis of the pipe. All holes for bolts or studs shall be drilled. All flanges shall be coated with white lead immediately after they have been faced and drilled.

The pipes and special castings shall be made at one foundry, unless the Engineer directs otherwise.

Laying.

(73) Suitable tools and appliances for the safe and convenient handling and laying of the pipes and special castings shall be used. Great care shall be taken to prevent the pipe coating from being damaged, particularly on the inside of the pipe and special castings. All pieces shall be carefully examined for defects, and no piece shall be laid that is known to be defective. If any defective piece should be discovered after being laid, it shall be removed and replaced with a sound one in a satisfactory manner by the Contractor at his own expense. The pipes and special castings shall be thoroughly cleaned before they are laid, shall be kept clean until they are accepted in the completed work, and when laid shall conform accurately to the lines and grades given by the Engineer. Care shall be used in removing portions of the existing ten (10) inch tile influent line and replacing with cast iron pipe as shown on the plans. Any tile, aside from those to be replaced with cast iron pipe, which are damaged in the process are to be replaced by the Contractor at his own expense.

Joints and Calkings.

(74) In joining the pipes and special castings the spigot of each piece shall be properly seated in the bell of the next adjoining piece and adjusted so as to give a uniform space for the joint, which shall be made with twisted or braided hemp packing and soft pig lead. The packing shall be thoroughly driven into the bell so that the lead after having been calked shall have a depth of two (2) inches. The melting pot shall be kept near the joint to be poured, and each joint shall be made at one pouring. Dross shall not be allowed to accumulate in the melting pot. Joints between cast iron and tile pipe shall be made with mortar as described under Sections 189 to 195, inclusive.

The joints shall be thoroughly calked by competent mechanics and in such a manner as shall secure a tight joint without overstraining the iron of the bells.

Flange Joints.

(75) All flange joints shall be firmly bolted with either stud or tap bolts of the required size, as may be directed. Gaskets of rainbow rubber, or of approved quality, shall be used in all flange joints. The bolts and nuts shall be of the best quality of American refined bar iron, with good, sound, well fitted threads, the nuts to be cold pressed.

All heads and nuts shall be hexagonal, the nuts to be trimmed and chamfered; all heads, nuts and threads shall be of U. S. standard sizes. After each joint has been made the boltheads and nuts shall be coated with two (2) heavy coats of asphaltum or other approved metal coating.

Cutting Pipes.

(76) Wherever the pipes require cutting to fit in the line, the work shall be done by a machine in a satisfactory manner, so as to leave the smooth ends at right angles to the axis of the pipe, and at the Contractor's expense.

F. WROUGHT IRON PIPE AND FITTINGS, GATE AND CHECK VALVES.

Description.

(77) The Contractor shall furnish and place all the wrought iron pipe, gate and check valves, and fittings, shown on the drawings or which may be necessary to complete the work. This includes the force mains from the sewage pumps, sewage distribution system over the sprinkling filter with gate and check valves, the pipe nipples, set in the concrete columns and used for pipe supports, and the ten (10) inch gate valve on the influent line.

Wrought Iron Pipe and Fittings.

(78) The wrought iron pipe shall be standard weight. All fittings shall

be of malleable iron, standard weight. All pipes and fittings shall have sound, well fitting threads, and all pieces which have defective threads will be rejected. The flange fittings shall be carefully faced and drilled and the Contractor shall furnish and place all bolts, nuts, washers and Rainbow gaskets or equal, for making joints. The bolts and nuts shall be of the best quality American refined bar iron, with sound, well fitting threads, the nuts to be cold pressed. All heads and nuts shall be hexagonal, the nuts to be trimmed and chamfered. All bolt-heads, nuts and threads shall be of the United States standard sizes. The one and one-half (1½) inches valved outlets on the sewage force mains shall be provided with hose threads. All wrought iron pipe, fittings and nipples shal be coated both inside and cut with an approved pipe dip, applied hot. All threads shall be thoroughly cleaned before erection.

Placing.

(79) All pipes shall be carefully placed to the proper lines and grades and shall be supported by approved hangers, or otherwise in a satisfactory manner. The four (4) inch distribution system over the filter shall be set with particular care and supported in the manner shown on the plan. The one (1) inch pipe nipples for holding the pipe supports are to be accurately set to line and grade to secure accurate alignment of the distribution pipes and permit easy placing and removal of the supporting bolts. The one (1) inch pipe nipples shall be cut off flush with the surface of the concrete. Care shall be taken to keep their interior free from concrete or other foreign substances. In general, screw fittings shall be used for connecting up the pipes, but flange fittings shall be used where shown or required to properly connect up the work. Flange or screw unions shall be used as shown, so that the pipes may be readily disconnected. Where required, the pipes shall be bent to make such curves as cannot be made with standard fittings. Screw joints shall be made tight with a paste of red lead or graphite and screwed home. Cast-iron and wrought-iron pipes shall be tapped where necessary to make connections.

Gate Valves.

(80) Gate valves shall be of the doubleseated, single disc or double disc non-rising stem type, with a circular waterway of the full diameter specified. They shall be screwed, or flanged as shown, of proper dimensions to fit the pipe furnished. Handwheels shall be provided for all valves. The bodies, domes, gates and handwheels of all four (4) and ten (10) inch valves shall be of cast iron. Bronze seats shall be inserted in both gate and body, the guides on gate and body shall be bronze lined and the stem, thrust collar, and stuffing box gland made of bronze. Bronze nuts shall be used for all bolts and studs. Valve flanges shall be accurately faced and drilled to the American standard. Gaskets, bolts and nuts as specified in Section 78 shall be used for connecting flanged valves. The one and one-half (1½) inch gate valve shall be of solid bronze. All valves shall be built for one hundred (100) pounds pressure per square inch, and shall be tested at the shop under test pressures as great as the above working pressures. A certificate shall be furnished by the Contractor from the manufacturers, stating that the above tests have been successfully withstood.

All bronze shall be of the best quality, compact and homogenous, of the mixture to produce the best results in each particular part. All workmanship shall be first-class. Cast iron shall be of best quality for the work required.

Check Valves.

(81) The four (4) inch check valves shall be of the vertical swing screwed type having cast iron bodies and bronze discs. The bodies shall be provided with bronze seat rings and hinge shall be of bronze and shall run in bronze bushings. Bronze nuts shall be used on all bolts. Valves shall be built for one hundred (100) pounds pressure per square inch and shall be shop tested to the above pressure and a certificate furnished by the Contractor from the manufacturer stating that the above tests have been made and withstood.

G. IRON CASTINGS.

Description.

(82) The Contractor shall furnish and place all the iron castings required in the sprinkling filter and pump well as specified under Item 8, comprising manhole frames, covers and other miscellaneous work.

All castings shall be of tough, close

grained gray iron, free from blowholes, shrinkage and cold shuts, and sound, smooth, clean and free from blisters and all defects.

All castings shall be made accurately to dimensions to be furnished, and shall be planed where marked or where otherwise necessary to secure perfectly flat and true surfaces. Allowance shall be made in the patterns so that the specified thickness shall not be reduced.

The top of each manhole cover shall be checkered one-eighth (⅛) of an inch deep, as shown on the drawings. Around the outside edge, the top of the cover for a width of one (1) inch shall be left plain and flush with the top of the checkering.

All castings shall be thoroughly cleaned and painted before rusting begins and before leaving the shop with two (2) coats of high grade asphaltum or any other varnish that the Engineer may direct. After the castings have been placed in a satisfactory manner, all foreign adhering substances shall be removed and the castings given one (1) additional coat of asphaltum.

No castings shall be accepted the weight of which shall be less than that due to its dimensions by more than five (5) per cent.

H. STRUCTURAL IRON.

Description.

(83) The Contractor shall furnish and place all structural iron required, including steel checker plate for pump-house flooring, structural shapes for bracing, shafting, supporting floors, pipes, motors, etc., pipe hangers and supports, ladder rungs, manhole steps, anchor bolts, bolts and other structural steel work required to complete the settling tank and appurtenances specified or shown on the plans.

Quality of Steel and Workmanship.

(84) All structural steel shapes shall be of the grade known as "Medium Steel," and all rivet steel shall be of the grade known as "Rivet Steel." The quality of all steel and workmanship shall be in accordance with the most recent Manufacturer's Standard Specifications.

Bolts and Nuts.

(85) All bolts and nuts shall be made from the best quality of American bar refined iron, with good, sound, well fitting threads, the nuts to be cold pressed, trimmed and chamfered. All boltheads, nuts and threads shall be of the United States standard sizes. Bolts shall not be used instead of rivets, unless specially permitted or so directed. When used, they shall be turned to a driving fit and the bolt holes drilled or reamed.

Framing.

(86) The sizes of the principal members will be shown on the detail drawings, but the details of the connections other than those shown or furnished will be left to the Contractor. All connections and fastenings between the different members shall be of ample strength and all details shall be in accordance with the best accepted practice, subject to the approval of the Engineer.

Placing.

(87) Care shall be taken in placing the work to have the several parts assembled accurately to the proper lines and elevations and so that all holes will correspond. No drifting will be allowed, but if the holes do not match exactly they may be reamed slightly by a taper reamer, so as to permit the rivets or bolts to be inserted. In case the eccentricity is too great for good work, or the strength of the joint is liable to be weakened by reaming, the piece will be rejected and a new and satisfactory one shall be provided by the Contractor at his own expense. The rivets shall be driven in a workmanlike manner, preferably with pneumatic or other approved machinery. All loose or poorly driven rivets shall be cut and replaced with satisfactory ones. Before ordering the steel floor plates for the pump house floor, a drawing shall be submitted showing the proposed layout for approval by the Engineer.

Painting.

(88) All metal work before leaving the rolling mill or stockyard and before being exposed to the weather shall be thoroughly cleaned from all loose black scale and rust and given two (2) coats of high grade asphaltum or other varnish that the Engineer may direct. In riveted work the surfaces coming in contact shall be painted before being riveted together, with the asphaltum or other varnish. After the steel work has been erected, all foreign adhering substances shall be removed and the steel work given two (2) additional coats of asphaltum or other approved varnish. All parts

which will not be accessible for painting in the completed work shall have two (2) coats of asphaltum varnish just before erection.

I. FILTERING MATERIAL.

Quality and Sizes.

(89) The broken stone for the sprinkling filters shall be sound, hard limestone rock, free from seams and porous spots, satisfactory in all respects to the Engineer. This limestone shall be broken to such sizes as will be retained on a screen having circular holes one (1) inch in diameter, and will pass through a screen having circular holes two (2) inches in diameter. The stone shall be from a quarry where the limestone crushes in pieces with all three diametrical axes as nearly the same length as practicable.

Pieces of one (1) to two (2) inch stone having a single dimension longer than three (3) inches shall be removed.

The bottom of the filter shall be brought to a horizontal surface with stone screened between two (2) and four (4) inches in diameter as described above, placed in a layer with minimum thickness of six (6) inches at the sides of the filter.

All stone shall be clean and free from dust, screenings, fine stone, dirt or other foreign substances, and shall be thoroughly washed before being placed in the filters. When the washed stone is shaken with clean water in a suitable vessel, the water shall remain substantially clear and clean. If necessary the stone shall be rescreened before placing in the filters.

Placing.

(90) The stone shall be placed in the filters as soon after the completion of the floor system as the Engineer may permit, in a manner to avoid injury to the floor system. The Contractor shall submit to the Engineer the method by which he proposes to handle the crushed stone, for his approval. The Contractor shall be responsible for any damage done to any, portions of the sprinkling filters or other structures in placing the stone. After the stone has been placed, dirt or other foreign material shall be prevented from entering the stone, and if for any reason any portion of the stone in the filter is found to be dirty, it shall be removed, satisfactorily cleaned and replaced by and at the expense of the Contractor.

J. NOZZLES, SPLASH CUPS AND SUPPORTS

Description.

(91) Eighteen (18) sets of nozzles, splash cups, and supports complete, are to be furnished and set, as shown on the plans and specified herein.

Saddles and Bolts.

(92) The cast iron saddles for supporting the splash cup hangers shall be of the best quality tough, close grained, gray iron, free from blowholes, cracks and other defects, shall be smooth and shall conform closely to the dimensions shown on the plans. Bearing surfaces under nuts are to be spot-faced. Holes shall be drilled one-eighth (⅛) inch larger than the bolts that are to occupy them. The U-bolts for attaching the saddles to the piping are to be of best quality American refined bar iron bent to accurately conform to the outline of the pipe fitting. Bronze nuts are to be used and nuts and threads are to be of U. S. standard sizes. Sheet lead, weighing four (4) pounds to the square foot, is to be used between the saddle and the pipe fitting to secure an even bearing.

Splash Cups and Supports.

(93) Splash cups are to be of smooth grained cast brass accurately turned to the dimensions shown. The inside of the cup and the lip are to be finished to a very smooth surface. The bottom of the cup is to be finished to a plane surface exactly perpendicular to the vertical axis of the cup. A hole is to be tapped in the bottom for a one-half (½) inch set screw.

The base plate and adjusting washer are to be of soft brass of the sizes shown on the plans. A one-half (½) inch brass thumb screw of the form shown on the plans is to be provided. Holes for the supporting rods are to be accurately spaced and drilled one-eighth (⅛) inch larger than the rods. The supporting rods are to be of three-eighths (⅜) inch brass rod threaded at one end and provided with two (2) brass hexagon nuts each. The portion immediately above the splash cup is to be flattened and bevelled as shown on the plan. This

Wooden Cover.

(105) Under this item wooden covers are to be furnished for the secondary settling tanks as shown on the plans.

All lumber is to be No. 1 sound southern yellow pine dressed all over. Sheathing is to be of one (1) by six (6) inch tongued and grooved dressed lumber. All pieces are to be of sizes shown on the plans.

The supporting framework is to be carefully fitted and firmly spiked together and accurately bevelled as shown for uniform bearing of the cover. The removable covers are to be accurately made and carefully fitted and are to be attached to the cleats with one and one-half (1½) inch wood screws, two (2) screws being allowed to each cleat for each piece of sheathing. The edge shall be carefully trimmed to a true circle. A hole shall be left in the center of the cover for the insertion of a key or wrench for operating the eight (8) inch mud valves. After completion all wood work is to be given two (2) coats of linseed oil thoroughly worked in.

Payment.

(106) The lump sum specified to be paid for the two (2) secondary settling tanks with adjacent manhole under Item 10 shall include the furnishing and placing of all concrete, cast iron pipe and specials, miscellaneous iron and steel, six (6) inch shear gates, eight (8) inch mud valves, and the wooden covers, and shall include the furnishing of all labor, tools, materials and appurtenances necessary to complete the work as specified. Excavation and refill, rolled embankment, reinforcing steel and the ten (10) inch tile effluent and sludge drain lines will be paid for in addition at the unit prices specified under the respective items.

ITEM 10. SLUDGE BED.

Description.

(107) Under Item 10, the Contractor shall furnish and place all materials (except rolled embankment and reinforcing steel) for and construct complete the sludge bed, and shall remodel the sludge pump piping and do other miscellaneous work, as shown on the plans and specifications in detail under the following sections of these specifications:

Concrete and Reinforcing Steel.
Underdrains and Tile Pipe.
Filtering Material.
Shear Gates.
Dismantling Present Sludge Bed, Cutting Into Imhoff Tank, etc.
Stop Planks.
Wire Basket and Miscellaneous Metal.
Cast Iron Pipe and Specials.
Wrought Iron Pipe and Gate Valves.

Concrete and Reinforcement.

(108) The Contractor shall furnish and place the concrete required to construct the curb, manhole, and slab bottom for the sludge bed, as shown on the plans. This shall be Class A concrete, made of the materials, mixed and placed as specified in Sections 44 to 61, inclusive.

The exposed faces on all vertical walls shall be carefully smoothed and the surfaces of the manhole floor and slab shall be trowelled smooth to a hard finish. Mesh reinforcement as shown shall be placed in the slab bottom of the bed.

Underdrains and Tile Pipe.

(109) A ten (10) inch split tile underdrain lightly bedded in mortar after the bottom of the bed has been placed shall be laid down the center of the bed. The pipe shall be laid with open joints, the distance of one-half (½) inch being left between the bottom of the bell socket and the spigot end of the abutting pipe. The elbow and stack at the upper end of the drain shall be carefully placed and the former filled with concrete up to the floor level of the bed. The underdrains shall be surrounded with large gravel or clean, crushed stone, as hereinafter specified. This shall be placed carefully to prevent stoppage of the bells. The tile pipe and specials shall be of the quality and strength specified in Sections 189 to 195, inclusive.

Filtering Material, Gravel and Sand.

(110) The filtering material, comprising sand, gravel, and stone, shall be furnished and placed as herein specified.

The sand shall be clean lake or river sand, thoroughly washed, of the grade known as torpedo sand, with sizes well graded from fine to coarse. This shall contain no particles over one-quarter (¼) inch in any dimension. The size and general specifi-

cations shall be as noted in Section 46.

The gravel shall be clean lake or river gravel, thoroughly washed, of the grade known in the Chicago market as fine roofing gravel. The particles shall substantially all pass a sieve having holes 0.45 inch diameter and be retained on a sieve having ten (10) meshes per lineal inch, the major portion of the particles being between 0.30 and 0.10 inch diameter.

The coarse material in the underdrains shall be placed of a size graded between the limits of one-quarter (¼) and one and one-half (1½) inches, being either lake or river gravel or clean hard crushed limestone, with the axes of the particles as nearly as possible of the same length. This material shall be washed, clean gravel or stone, with all dust and all particles less than one-quarter (¼) inch removed. It shall be free from loam, clay, organic matter, soft or micaceous pebbles, or other impurities.

Shear Gates.

(111) The Contractor shall furnish and place in the present sludge pump pit on the sludge drain from the secondary settling tanks one (1) ten (10) inch circular shear gate with flanged end. This shall be of the kind and quality specified in Section 103, so far as the same shall apply.

Dismantling Old Sludge Bed.

(112) Under this item the concrete distributing manhole and posts, cast iron piping, and tile pipe underdrains forming part of the old sludge bed shall be removed insofar as necessary for the prosecution of the new work. The six (6) inch sludge return line from the present sludge distribution manhole shall be removed, plugged where it enters the Imhoff tank, and capped with a cast iron cap or otherwise closed in a manner satisfactory to the Engineer. Excavation will be paid for under Items 1 and 2, but all other work necessary to dismantle the sludge bed shall be considered as included in the price bid under Item 10. Cast iron and tile pipe and shear gates removed may be used in other portions of the work if in good condition and approved by the Engineer, otherwise they shall become the property of the Contractor.

Holes shall be cut through the walls of the present Imhoff tank for the reception of the four (4) inch branches from the sludge pump as shown on the plans. In cutting the holes care shall be taken to avoid shattering or otherwise damaging the adjacent concrete, and all loose material shall be removed. After the pipes are set in place, the holes are to be tightly plugged with Class A concrete. A neat smooth surface flush with the old concrete shall be left on the exposed faces of the work.

A hole shall also be cut through the west side of the sludge pump pit and baffle wall for the reception of the ten (10) inch sludge drain from the secondary settling tank. The work shall be carefully done as described above and closed with Class A concrete after the pipe is in place as shown on the plans.

Stop Planks.

(113) The Contractor shall furnish and place the wooden stop plank shown on the plan. This shall be made of two (2) inch stock of clear sound No. 1 sound southern yellow pine, dressed to one and three-quarters (1¾) inches thick, finished all over, and fastened to the cleats with two and one-half (2½) inch wood screws. It shall be well oiled with raw linseed oil.

Wire Basket in Underdrain and Miscellaneous Metal.

(114) The Contractor shall furnish and place a neat galvanized iron wire basket in the ten (10) inch riser of the collector underdrain tile of the sludge bed, at the surface of the same. This shall be made up like the galvanized iron wire baskets used in leader pipes and shall be securely wired to the tile riser. Wrought iron or mild steel supports for the four (4) inch cast iron sludge line and the ten (10) inch stock on the sludge drain shall be furnished and placed as shown on the plans.

Cast Iron Pipe.

(115) Included under this item is the furnishing and placing of the four (4) inch sludge discharge line and the ten (10) inch special and blank flange at the end of the secondary settling basin sludge drain. The material furnished and work done shall be in accordance with Sections 72 to 76, inculsive, so far as they apply.

Wrought Iron Pipe.

(116) Under this item the sludge pump piping inside the pump well shall be remodelled and four (4) inch gate valves furnished and set as shown on the plans. The materials furnished and work done shall be in accordance with Sections 77 to 78, inclusive. Gate valves shall be of the type described in Section 80. After erection all wrought iron pipe and fittings shall be given two (2) coats of asphaltum varnish.

Payment.

(117) The lump sum specified to be paid under Item 10 shall include the furnishing and placing of all concrete placed in the sludge bed and used in plugging holes, sludge bed underdrain (but not connection to the sewage pump well), filtering material, stop planks, cast iron and wrought iron pipe and fittings, gate valves and shear gates, miscellaneous metal work, and all work of dismantling the present sludge bed (except excavation) and cutting and plugging holes, and shall include all labor, tools, materials and appurtenances necessary to complete the work as specified. Excavation and refill, rolled embankment, reinforcing steel, and the tile pipe connection between the sludge bed and sewage pump well to be paid for, in addition, at the respective unit prices specified herein.

ITEM 11. PUMP HOUSE.

Description.

(118) Under Item 11 the Contractor shall furnish all the materials for and construct, complete, the brick house, over the sprinkling filter and pumping equipment, as shown on the drawings, and specified in detail under the following heads:

Brick Masonry.
Mortar.
Stone Work.
Structural Steel.
Flashings, Gutters, and Rainwater Conductors.
Roof Framing and Sheathing.
Creosoting.
Roofing.
Doors and Door Frames.
Window Frames and Sash.
Interior Finish.
Carpentry and Joinery.
Hardware.
Glazing.
Painting.
Electric Light and Power Wiring.
Ventilators.

Common Brick Work.

(119) All work so indicated on the plans or herein specified as being of hard-burned brick or common brick shall be of first quality, thoroughly hard-burned brick, straight and true and uniform in size. All hard-burned brick shall be laid in bond with the face brick, but no hard-burned or common brick shall appear in the outside face of the wall. These brick are to be laid in place with all joints and spaces in the walls filled solidly with mortar. All joints shall be uniform in width not exceeding ⅜ inch. The walls are to be built straight, true and plumb and the joints outside are to be neatly struck. All brick shall be well wet before laying. Mortar for common brick shall be as specified in Section 121.

Face Brick Work.

(120) All the face brick shall be the Continental No. 1 brick sold by the Kimball Brick Company, or equal, or as selected by the Engineer. The Contractor shall receive in the lump sum specified to be paid for the pump house and sprinkling filter house the sum of Twenty-two dollars ($22.00) per thousand for standard size face brick, delivered f. o. b. railroad cars, the C. M. & St. P. Ry., Morton Grove, Ill. The Contractor shall unload the brick and transport them to the site of the work at his own expense.

The pressed brick shall be of an even color, laid in the walls with a uniform joint not less than one-quarter (¼) or more than three-eighths (⅜) inch thick, neatly struck with fluted joints and bonded to the common brick by laying two headers and two stretchers alternately in every seventh course, by the clipping mode or other approved system of bonding.

Mortar.

(121) All mortar shall be mixed with clear fresh water in clean mortar boxes. No mortar shall be mixed on the ground or floors. The mortar for all brickwork shall be properly made of lime, cement, sand and clean water, as follows: to one (1) part of lime paste, three (3) equal parts of sand shall be added, and to six (6) parts of this mixture one (1) equal part of Portland cement shall be in-

corporated by a thorough mixing. The addition of cement to the lime mortar shall not be made until immediately before the mortar is needed for brickwork. The mortar for face brick shall be tinted as ordered. The lime used shall be furnished in hard lumps, with but little dust, and be slaked in a watertight box with a sufficient amount of clean water. The lime must be allowed to slake at least one day before it is incorporated with the sand. The sand shall be of a quality specified under Section 46. The mortar for copings and sills shall be composed of Portland cement and sand in the proportion of one (1) to three (3).

Exterior Walls Above Grade.

(122) All exterior walls above grade shall be constructed of common brick work as specified under Section 119, and faced on the outside with face brick work as specified under Section 120. All door and window frames shall be built into the exterior walls with proper anchors.

Recesses, Setting and Walling-In Work.

(123) The Contractor shall attend to the setting and walling in of wooden grounds, wall-plates, steel lintels, window and door frames, anchors, cut-out boxes, electric conduits, etc., and shall form all recesses and openings in the walls for the complete performance of other branches of work. He shall also do all mending and patching where required.

Cleaning Walls.

(124) After completion of mason work, plastering and painting, the outside of walls of the buildings shall be cleaned with a muriatic acid solution, or any other equally good, and all defective joints in the brick work are to be neatly pointed with mortar. The spaces between window and door frames and the masonry are to be pointed neatly after driving mortar in the joints to fill up the entire space solidly.

Cut Stone, Sills, Lintels, Etc.

(125) The sills of windows, doors, coping etc., as shown on the drawings, shall be of the best quality Buff Bedford limestone, free from defects, and smoothly tooled with a tooth chisel. They shall be carefully laid in cement mortar and well pointed up, so as to make the joints weatherproof. The brick over all squarehead openings in exterior walls shall be supported on angle iron lintels of ample strength.

Structural Steel.

(126) The Contractor shall furnish and place structural steel shapes for the lintels over the windows and doors as shown on the plans. All the structural steel shapes shall be of the grade known as "Medium Steel," and rivet steel shall be of the grade known as "Rivet Steel," the quality of steel and workmanship being in accordance with the most recent Manufacturers' Standard Specifications. All bolts and nuts shall be made from the best quality American bar refined iron with good, sound, well fitting threads, the nuts to be cold pressed, trimmed and chamfered. Bolts used and placed and rivets shall be turned to a driving fit and the bolt holes drilled or reamed. The steel work shall be thoroughly cleaned before erection and shall be given two coats of asphaltum or other metal varnish before being put in place.

Flashings and Conductor Pipes.

(127) All plies of the roofing felt are to be turned up against the brick walls a distance of not less than nine (9) inches after mapping the parapet walls with a heavy coat of hot pitch from roof line to bottom of stone coping.

Over this turned-up roofing felt a metal flashing extending into joints of brickwork one and one-half (1½) inches and extending down over roofing not less than six (6) inches shall be placed.

The flashing is to be placed on all of the parapet walls of building and shall be of No. 24 B. W. G. gauge Merchants' 1 X, Toncan, or equal brand galvanized sheet metal. This flashing is to be properly lapped and soldered at all joints making the roof perfectly watertight. Where the metal is let into the walls a raggle is to be cut one and one-half inches deep and after placing the flashing therein it must be cemented carefully in place with elastic cement and also secured with galvanized iron hook spikes driven into the mortar joints of brick work.

The gutters on roof are to be formed by preparing saddles over roof joists as indicated on the plans.

The rain water conductor pipes are to be four (4) inches, inside diameter,

extra heavy cast iron soil pipe, secured to walls with galvanized iron hooks about four (4) feet apart. All special fittings shall be furnished and placed, including "Holt" type No. 1, or equal, roof connections with cast iron strainers for each conductor head. All conductor pipe joints are to be caulked with oakum and molten lead perfectly watertight.

Roof Framing and Sheathing.

(128) The roof framing is to be of No. 1 sound, Southern yellow pine lumber, dressed all over, well spiked together. Suitable saddles shall be built upon the rafters to slope the roof to the conductors as shown on the plans.

The sheathing on the roof is to be No. 1 yellow pine flooring one (1) inch by six (6) inches, dressed and matched, laid with close joints, and well nailed to the rafters at every bearing.

All lumber exposed on the interior of the filter house is to be creosoted as described in Sections 129 to 131, inclusive.

All anchors, anchor plates, bolts, spikes or other iron or steel fastenings or appurtenances required to complete the roof shall be furnished and placed by the Contractor.

Creosoting Lumber.

(129) All lumber to be creosoted shall preferably be air-seasoned before treatment. If not air-seasoned, it shall be seasoned by long steaming during one (1) to five (5) hours at a pressure of not more than twenty (20) pounds per square inch, or in a hot creosote oil within safe temperature, in accordance with specifications recommended in 1915 by the American Railway Engineering Association, and shall then be subjected to a vacuum of at least twenty-four (24) inches of mercury maintained at least one-half hour. At the expiration of this period a preservative shall be admitted, as hereinafter specified, without otherwise breaking the vacuum. Green lumber and seasoned lumber shall not be treated together in the same charge.

Before any timber or lumber is creosoted it shall be surfaced to final dimensions, framed and sawed square at the ends to exact lengths as required for use in the work, as far as is practicable, in order to reduce to a minimum any necessary cutting of timber after treatment.

Creosote.

(130) The preservative to be used shall be a coal-tar creosote of the best grade commercially obtainable in accordance with the most recent specifications recommended by the American Railway Engineering Association.

The creosote used may be sampled by the Engineer. Upon request therefor, the Contractor shall furnish the Engineer with every facility for sampling the creosote and inspecting the method of treatment.

Any creosote not conforming to the specifications will be rejected and shall be promptly replaced by the Contractor at his own expense.

Method of Creosoting.

(131) The lumber shall be placed in cylinders and the temperature raised by steam in coils to from 180° to 220° Fahr. A vacuum of at least 24 inches of mercury shall be produced and maintained for at least twenty (20) and not to exceed thirty (30) minutes, at the expiration of which period the creosote shall be admitted without otherwise breaking the vacuum.

The retort shall be filled with the creosote hereinbefore specified, previously treated to 160° F., which temperature shall be maintained during treatment. At no time during the process of treatment shall the temperature in the cylinder be allowed to rise above 220° F. Pressure shall then be applied and continued until the best practicable impregnation of the timber is secured. A vacuum of twenty-four (24) inches of mercury shall be applied for fifteen (15) minutes after the pressure is removed to prevent bleeding after treatment. The amount of creosote remaining in the timber after the specified treatment shall be at least twelve (12) pounds creosote per cubic foot of timber.

All surfaces of creosoted timber, when cut after treatment, shall receive two thorough applications of creosote oil before the timber is placed in the structure, the oil to be heated to a liquid condition and applied while hot.

Roofing.

(132) On the sheathing shall be laid a roofing of the Barrett specification or equal as follows: On the board sheathing shall be laid one (1) thickness of sheathing paper or unsaturated felt weighing not less than five (5) pounds per one hundred (100) square feet, lapping the sheets at least one (1) inch. Over the entire surface shall be laid two (2) plies of specification tarred felt, lapping each sheet seventeen (17) inches over the preceding one, fastening with as many nails as are needed to hold in place until remaining felt is laid. The entire surface shall then be uniformly coated with specification pitch. Over the entire surface shall be laid three (3) plies of specification tarred felt, lapping each sheet twenty-two (22) inches over the preceding one. and mopping with specification pitch the full twenty-two (22) inches on each sheet, so that in no place shall felt touch felt. Such nailing as is necessary shall be done so that all nails will be covered by not less than two (2) plies of felt. Over the entire surface shall then be spread a uniform coating of specification pitch, into which, while hot, is embedded not less than four hundred (400) pounds of gravel or three hundred (300) pounds of slag to each one hundred (100) square feet. The gravel or slag shall be from one-quarter (¼) to five-eighths (⅝) inch in size, dry and free from dirt, organic material or other foreign material.

Not less than one hundred and fifty (150) pounds of pitch shall be used for constructing each one hundred square feet of completed roof. The pitch shall not be heated above 400 deg. Fahr.

Immediately prior to the application of the gravel or slag, the Contractor shall permit the Engineer to inspect the condition of the same by cutting a slit not less than three (3) feet long at right angles to the way the felt is laid, if the Engineer so orders. All felt and pitch delivered and used on the work shall bear the label of the manufacturer.

The Contractor shall furnish a maintenance bond from an approved surety company, in the total sum based on the unit rate of three dollars ($3.00) per hundred square feet of actual roof surface. The Contractor shall guarantee in said bond for five (5) years to maintain at his own expense the roof and flashing in a watertight condition, injury from any cause other than ordinary wear and tear of the elements excepted. For the method of flashing see Section 127.

Doors and Frames.

(133) The exterior doors shall be of the size indicated on the plans. The exterior door of the pump room shall be a No. 1 quality door with stiles of Michigan stock pine or cypress one and three-quarters (1¾) inches thick, paneled and molded. The panels shall be of Georgia pine and the upper panel shall be glazed with glass as indicated on drawings. The stiles and rails shall be mortised, tenoned and securely wedged and glued. A transom sash glazed shall be supplied as indicated on the plans. The door frame shall be rebated to the full thickness of the door, the frame being one and seven-eighths (1⅞) inches thick, of clear white pine or cypress. Brick molds shall be provided. The frame shall be set plumb and well braced, being secured to the brick work on concrete with three anchor bolts on each jamb. A satisfactory threshhold of steel three-eighths (⅜) by three and one-half (3½) inches (beveled) shall be furnished, securely fastened to the concrete floor or stone by expansion bolts.

The exterior doors of the sprinkling filter house and the interior door between the filter and the pump room shall be batten doors built up of one (1) by four (4) inch double beaded clear yellow pine ceiling nailed vertically on the outside of a batten framing, braced in both diagonal directions, built up of one and one-half (1½) inch No. 1 yellow pine stock dressed all over, of the dimensions shown on the plans. The battens, rails and diagonal bracing of the interior door shall be five and one-half (5½) inches wide.

Window Frames and Sash.

(134) All windows shall be of sizes indicated on the drawings, and shall have neat frames and sliding sash, as shown on the plans. The boxes, sills, yokes, outside head and brick mold shall be of clear white pine or cypress, as shown on the details in the plans. The parting strips and stop beads shall be of the best quality long-leaf yellow pine. Parting strips shall be secured with countersunk brass screws. Frames shall be set plumb and well

braced and each frame shall be secured to the brickwork or concrete by two heavy iron anchors in each side. All window sash shall be one and three-quarters (1¾) inches thick, of clear white pine or cypress, mortised, tenoned and pinned in a first-class manner and with meeting rails beveled. Each sash shall be divided into two lights, except where otherwise shown on drawings.

The window frames and sash shall be made in a suitable manner to operate successfully with a moist atmosphere on the inside of the building at all times.

Interior Finish.

(135) All interior finish shall be of first quality long-leaf yellow pine or cypress, free from knots or sap, thoroughly seasoned and kiln-dried. Doors and windows shall have plain casings of satisfactory pattern with mitered corners. Windows shall have plain stools and aprons. All details shall be as shown on the plans.

Hardware.

(136) All sash shall be trimmed with cast bronze sash locks and galvanized spring pin catches to hold the windows open. Each leaf of each exterior door shall be hung with three loose-pin ball-tipped, cast bronze tee hinges, with the long leg at least twelve (12) inches. Locks for exterior doors shall be extra heavy Yale type mortise looks, cast bronze, with night latch attachment, and have five tumblers. Front, strikers, bolts, knobs, and escutcheons shall be cast bronze, and each lock shall be furnished with three keys. The interior door shall be hung on two (2) 4½ by 4½ inch loose-pin ball-tipped, cast bronze butts. All hardware shall be subject to the approval of the Engineer. A solid bronze tablet of satisfactory design twenty-four (24) by thirty-six (36) inches in size and having on it in suitable neat raised letters the names of the Trustees of the Sanitary District, Contractor and Engineers, and the words, "Morton Grove Sewage Treatment Plant, of The Sanitary District of Chicago," and the date of completion, shall be furnished and installed by the Contractor at the side of the door.

Glazing.

(137) The glass in all windows shall be of first quality, ribbed wire glass, one-quarter (¼) inch thick, the Mississippi Wire Glass Co. make or equal. All windows shall have two lights in each sash except where otherwise shown, and the upper panels and transom of the exterior door shall be glazed with a single light of clear wire glass. Glass shall be secured in doors by suitable moldings. In windows it shall be bedded in putty and secured by beads. On completion of the building, all lights shall be left sound, clean and free from paint, scratches, etc.

Painting.

(138) All structural steel and other exposed iron work shall receive a coat of metallic paint at the shops. After erection, they shall be carefully cleaned and given two coats of approved asphalt varnish or graphite paint. All exterior woodwork, including door and window frames, doors and windows sashes, shall receive three (3) coats of strictly pure zinc white and white lead and linseed oil paint of color to be approved by the Engineer, containing not over fifty (50) per cent white lead, in addition to the priming coat, which priming coat shall be applied before or immediately after erection. Runners of window frames shall have two coats of best boiled linseed oil. All interior woodwork and the back and sides of all window and door frames shall be painted with three (3) coats of heavy creosote stain of Cabot make or equal, of color to be approved by the Engineer. Before painting, all woodwork shall be carefully stopped with putty and have all pitch and knots killed with a heavy coat of shellac. All zinc white paint shall be composed of strictly pure highest grade French zinc white, and pure linseed oil, equal to those supplied by the Sherwin-Williams Co. All white lead shall be strictly pure lead, equal to Carter's. The zinc white and oil is to be mixed in proper proportion with the addition of a very small amount of pure turpentine. In interior paint no white lead shall be used. Paint, oil, varnish, and other materials used in painting shall be of the best quality, and the color of all paint, as well as the brands of all materials, shall be satisfactory to the Engineer. All material used in painting or varnishing shall be delivered at the building in the original unbroken containers, bearing the manufacturer's stamp thereon, and shall be mixed under the supervision of the Engineer. All paint shall be properly stirred before

using to secure thorough incorporation of the pigments and must be well brushed out in applying to secure a first-class job. Painting and varnishing shall be performed only by skilled workmen, and care shall be taken to protect all work against dust, water or other harmful agency. After completion of the painting or varnishing work, all paint and varnish spots are to be removed from the floors, walls, glass, etc.

Electric Lighting and Power.

(139) A complete electric lighting and power system shall be furnished and installed in the buiding. Wiring shall be run in suitable loricated tubing or galvaduct neatly and securely supported and where possible placed in concrete floors or walls or otherwise concealed. All necessary outlet boxes and cabinets shall be furnished and properly placed, and the lighting wires shall be split into convenient separate circuits, as directed.

In the new pump room, the Contractor shall furnish one fifty (50) watt lamp in a "Watight" fixture, or equal, attached to the tubing or galvaduct, placed in the center of the room. He shall furnish a receptacle at the base board, into which can be plugged a portable with a fifty (50) watt lamp. He shall provide a neat waterproof portable with wire guard, handle and waterproof cord twenty-five (25) feet long. All the exposed tubing and fixtures of iron shall be painted black with at least three (3) coats of a suitable metal coating.

In the srinkling filter house the Contractor shall furnish two (2) enclosed wall fixtures of watertight construction with reflectors, each containing two (2) fifty (50) watt lamps. He shall also furnish three (3) receptacles on the walls, as indicated, into which can be plugged a portable with a fifty (50) watt lamp.

The Contractor shall furnish the wiring and connect up complete, ready to run, to the motors and starting switches of the sewage pumps furnished and installed under Item 12. This shall be carried in loricated tubbing or galvaduct, the outlets at the motors being supplied with neat condulet outlets.

The Contractor shall connect up to the existing watt meter, in the existing sludge pumphouse, and in said existing pumphouse he shall place a main cabinet of steel containing a main switch fused, with separate fused switches of ample size for the new and old power and for the lighting circuits. The Contractor shall connect up the switch of the existing sludge pump motor, through the new main switch, so that all circuits may be on one main switch.

In the new pumphouse the Contractor shall install suitable fused switches for each new pump and for the lighting circuit, enclosed in a steel cabinet. Suitable connections shall be made for the wiring to the pump motors.

The current will be 220 volts, single phase alternating current from the lines of the Public Service Company of Northern Illinois in the Village of Morton Grove.

Detail plans of arrangements with specifications of all fixtures, switches and all details shall be submitted for the approval of the Engineer. All electrical works shall conform to the requirements of the National Board of Fire Underwriters.

The Contractor shall furnish on the completion of the work two (2) extra fifty (50) watt Edison "Mazda" lamps, or equal, in addition to those required for all fixtures, and also a complete set of fuses, in duplicate.

Ventilators and Scuttles.

(140) The Contractor shall furnish and place four (4) ventilators of the Arex make or equal, built up of No. 24 gauge galvanized sheet iron, neatly formed and framed strongly together. The ventilators shall be thoroughly flashed under the roofing. A wooden curb shal be made as required. The ventilator shall be equipped with dampers, controlled by bronzed chains from the filter level.

The Contractor shall also frame and place two (2) scuttle frames and covers in the roof over the pump well house centered over the pumps. The scuttle openings shall be two (2) feet square in the clear. The scuttle covers shall be covered with No. 24 galvanized wrought iron sheet, securely fastened on. The cover shall be made with a rim to be weatherproof. Suitable heavy steel hooks and eyes shall be provided to fasten the lids down.

Steps.

(141) A concrete landing and steps shall be built to the door of the pump room as shown on the plans. Concrete

shall be Class A, furnished and placed as specified in Sections 43 to 61, inclusive. A granolithic finish one (1) inch thick composed of one (1) part of Portland cement and one (1) part of sand is to be applied to the exposed surfaces of the landing and steps before the concrete has hardened. The granolithic finish shall be troweled to a smooth, hard finish.

Payment.

(142) The lump sum specified to be paid for the filter and pump well house under Item 11 shall include the furnishing and placing of the filter and pump well house, complete, as specified, and the furnishing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 12. PUMPING MACHINERY.

Description.

(143) The Contractor shall furnish and place complete two complete pumping units, each comprising a suitable centrifugal pump, single phase motor, float control switch, and appurtenances in the dry well provided for the purpose, as shown on the plans, complete, ready to run.

The lump sum specified to be paid under Item 12 shall include the furnishing and placing of the two units, including vertical pump, motor, shafting, flexible coupling, lubricating devices, bearings (both steady and ball-bearing for thrust), float control switches, switchboard, cut-out, floor plate, shaft pipe, and necessary bolts, structural shapes, brackets, wooden blocking shims, and other material to install the pumping units, complete, ready to run. All piping, valves and concrete shall be included in the lump sum specified to be paid for Item 8.

Each unit with appurtenances shall be substantially made throughout to stand up on a 24-hour service 365 days a year, starting and stopping every five to ten minutes. The sewage to be pumped will have passed through a settling tank.

Pumps.

(144) Each pump and motor shall be of sufficient capacity to pump one hundred and twenty (120) gallons per minute of settled sewage against a static head of twenty-eight (28) feet. The Contractor shall allow at least two (2) feet additional for friction in pipe and bends.

The pumps shall be of the vertical shaft type, with single or double suctions, as may be desired, direct connected to the motor shaft by suitable flexible couplings. The pumps shall be designed to permit easy access to and easy removal of the shaft, impeller and bearings. The impeller shall be of cast-iron firmly keyed to the shafts. The shafts shall be of cold-rolled steel of ample size. The weight of the shafts and impellers shall be carried on suitable roller or ball bearings securely bolted to the cast-iron floor plates to which the feet of the motors are secured. Steady bearings shall be provided as required, spaced not over six (6) feet apart. Flanged couplings shall also be provided on the shaft, at the lower end to connect to the pump shaft, and elsewhere if required. The shafts and steady bearings are to be enclosed in pipe hangers with hand holes at bearings, which are to be bolted to the pump shells and cast-iron floor plates. The pipe hangers are to be braced as shown and midway between the pump casing and floor. The wooden blocking shall be accurately fitted to the pipes and supports and U-bolts are to be drawn up to a tight bearing. If necessary, steel shims shall be inserted between the blocking and support. The bearings shall be fitted with removable bronze or babbitt-lined boxes. It is desirable that the bearings be outside of and distinct from the stuffing boxes. Suitable provision shall be made for any unbalanced thrust, as well as for adjustment and alignment. Flanges shall be provided to connect to the piping. These shall be faced and drilled to Crane Standard drilling. Feet shall be cast on the pump shells to be secured to the concrete blocks underneath by anchor bolts. Flexible couplings of approved type shall be furnished to connect the pumps and motor shafts above the floor plate. Ample provision shall be made for continuous automatic lubrication.

Motors.

(145) The motors shall be of the open repulsion slow speed type, the General Electric Co. make or equal, to operate on two hundred and twenty (220) volt alternating current, single phase. The motor shall be of ample capacity for the work required, and shall be provided with suitable self-oiling bearings to take the weight of the moving parts and to steady them. The motors shall be guaranteed to carry the rated load continuously with a temperature rise

above the surrounding air not exceeding those specified in the most recent standardization rules of the American Institute of Electrical Engineers for the character of equipment and insulation furnished.

Tripods and Floor Plates.

(146) Neat cast-iron floor plates of rectangular shape shall be provided, with faced boxes to receive the roller or ball bearing flanges and the feet of the motor tripods. Cast-iron tripods shall be furnished to hold each motor, with feet bolted to the floor plate. Before erection all iron work shall be given one (1) coat of black asphaltum paint, and after erection all exposed iron work shall receive two (2) coats.

Float Switches.

(147) Suitable automatic float switches of the enclosed butt contact type shall be installed for the automatic operation of the motors. All floats, rods, guides, float tubes and other necessary appurtenances shall be furnished. The floats shall be of ample size, substantially built of heavy copper or other approved material, suitably connected to the controlling devices by heavy brass rods or tubes carried in suitable guides. The float tubes shall be of cast-iron, of weight Class B, American Water Works specifications, neatly and strongly supported, held in place by cast-iron or steel brackets or clamps in a manner approved by the Engineer. All float tubes and brackets shall be thoroughly painted after erection with two (2) coats of an approved asphaltum varnish.

The float regulators shall be so arranged that either motor can be set to pick up the load first. Should the water level continue to rise, the second float shall then be ready to start the second motor. The float switches shall be mounted on neat pipe stands immediately above the float tubes.

The entire apparatus shall be of substantial construction, designed to afford accurate self-starting and stopping, and installed in a manner equal to the equipment furnished by Yeomans Brothers Co. The Contractor shall submit blue prints showing the proposed layout, with details and specifications for apparatus, for the approval of the Engineer. After installation the starting floats shall be set to start the pumps at levels designated by the Engineer and each pump shall be thoroughly tested by admitting sewage to the wet well to see that starting and stopping take place at the predetermined elevations. Any adjustments necessary to secure these results are to be made by the Contractor, before acceptance of the work, and, if necessary, the tests are to be repeated until satisfactory adjustment is secured. The pumps shall be operated satisfactorily under actual service conditions for one (1) week before final acceptance.

Payment.

(148) The lump sum specified to be paid for the pumping machinery under Item 12 shall include the furnishing and placing complete, ready to run, of two (2) complete pumping units, equipped with floats, float tubes, float switches, wiring, and all appurtenances, complete, as specified, and the furnishing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 13. BUILDING AND REMODELING MISCELLANEOUS MANHOLES.

Work Included.

(149) Under Item 13 the Contractor shall furnish all materials (except reinforcing steel paid for under Item 20) and do all work (except excavation paid for under Items 1 and 2) involved in remodeling the existing inlet and outlet manholes and existing manhole B, and building the outlet regulating manhole as shown on the plans and described in detail under the following heads:

A. Remodeling existing inlet manhole.
B. Remodeling existing outlet manhole.
C. Remodeling existing manhole B.
D. Oulet regulating manhole.
E. Shut-off valves and appurtenances.
F. Ten-inch sluice gates.

Remodeling Existing Inlet Manhole.

(150) This work includes cutting out and replacing the bottom of the existing manhole, furnishing and setting the shut-off valve and appurtenances, removing the present ten (10) inch shear gate and furnishing and setting a ten (10) inch sluice gate.

Cutting Out Manhole Bottom.

(151) The bottom of the present manhole shall be cut away to the lines shown on the plans. In doing this work, great care shall be used to prevent cracking or shattering of the remaining concrete. Adequate means shall be pro-

vided to prevent any damage by settlement of the remaining portion of the manhole walls, adjacent sewer, and ten (10) inch outlet pipe. Brickwork will be permitted to a limited extent to support the manhole walls during the replacement of the bottom and may be incorporated within the structure.

Replacing Manhole Bottom.

(152) The bottom of the manhole shall be replaced to the lines and grades shown on the plans after the necessary excavation is made. All concrete is to be Class A. The work is to be done in accordance with Sections 43 to 61, inclusive, in so far as they apply. Before placing concrete against old work, the surface of the latter shall be thoroughly cleaned and coated with mortar. Great care shall be used to thoroughly ram the concrete into place under the existing manhole walls to secure a tight joint and a neat flush joint shall be made with the old work. Any excavation outside the neat lines of the concrete as shown on the plans shall be solidly filled with concrete. No filling of earth will be allowed. If necessary in the opinion of the Engineer to excavate to a greater depth than shown on the plans, concrete required to fill this additional excavation will be paid for under Item 22.

Setting Shut-Off Valve and Appurtenances.

(153) The shut-off valve shall be set as shown on the plans. The anchor bolts shall be carefully set to bring the end of the cast-iron tee in accurate alignment with the ten (10) inch outlet pipe and the axis of the outstanding leg in truly vertical position. A lead gasket weighing four (4) pounds to the square foot shall be inserted between the end of the tee and the concrete and the anchor nuts shall be tighly drawn up to make a water tight joint. The supporting rod and turn buckle at the forward end of the valve shall be carefully adjusted to support the valve in the desired position without putting any undue strain on the anchor bolts. The tee shall not be attached till the new concrete has thoroughly set. The guide angles and channels shall be attached with anchor bolts grouted into holes drilled in the concrete and care shall be used to see that they are truly vertical and that the required clearances are maintained throughout. The movable portion of the valve shall be carefully assembled in position and adjusted to the shut-off height determined by the Engineer. The operation of the valve shall be tested by closing the inlet sluice gate to the manhole and the outlet shear gates on the Imhoff tanks and filling the manhole with water till the valve seats. If necessary, the test shall be repeated till the valve is accurately adjusted. Anchor bolts and nuts shall be of quality specified in Section 85.

Removing Shear Gate and Setting Sluice Gate.

(154) The ten (10) inch shear at the manhole entrance is to be removed and a ten (10) inch sluice gate with operating mechanism installed. The gate and operating mechanism shall be accurately set and aligned. Any necessary chipping of existing concrete shall be carefully done and rough surfaces left shall be plastered with cement mortar to a smooth surface. Holes for necessary anchors and guide bolts shall be carefully drilled and bolts firmly secured in place by tighly calking lead around the bolts.

Baffle.

(155) The wooden baffle shown on the plans shall be made of two (2) inch by six (6) inch No. 1 yellow pine tongue and groove lumber dressed all over and carefully fitted. Wooden cleats of size indicated attached by wooden screws, two and one-half (2½) inches long, of heavy wire, shall be used to hold the baffle together. Two (2) screws shall be used on each cleat for each piece. The baffle shall be secured in place against flotation by wooden wedges driven inside the baffle grooves in such manner as to be easily knocked out for removing the baffle. After erection all surfaces shall be given two (2) coats of boiled linseed oil well worked in.

B. REMODELING EXISTING OUTLET MANHOLE.

Description.

(156) This work includes raising the existing manhole walls to the elevation shown and furnished and placing a standard manhole cover and frame.

Materials, Placing, Etc.

(157) All concrete is to be Class A, furnished and placed as specified in Sections 43 to 61, inclusive, in so far as they apply. The existing manhole cover is to be removed but the frame may be left in place. A key-way one (1) inch deep by three (3) inches wide is to be

chipped in the top of the existing manhole and the surface carefully cleaned and given a thick mortar coat before placing new concrete. A neat flush joint between old and new work shall be made inside the manhole. A standard cast-iron manhole cover and frame, described under Section 82, shall be furnished and placed as shown and manhole steps shall be furnished and set as indicated in the new work only. A wooden plug ten (10) inches in diameter and six (6) inches thick, slightly tapered, shall be furnished for the ten (10) inch outlet spillway.

C. REMODELING EXISTING MANHOLE B.

Description

(158) This work includes furnishing and setting a ten (10) inch sluice gate and plugging an existing eight (8) inch inlet with concrete. The sluice gate is to be of the quality specified in Section 168 and set in the manner described in Section 153 and is to be provided with an extension stem of suitable length. The existing eight (8) inch inlet designated on the plans is to be plugged with Class A concrete firmly rammed in place and carefully finished inside the manhole.

D. OUTLET REGULATING MANHOLE.

Description.

(159) This work includes building the manhole and furnishing and setting the shut-off valve and appurtenances, ten (10) inch sluice gate, and manhole cover, frame and steps.

Materials, Placing, Etc.

(160) All concrete is to be Class A, placed in accordance with Sections 43 to 61, inclusive, in so far as they apply, and the manhole is to be built to the lines and grades shown on the plans. If in the opinions of the Engineer it is necessary to excavate to greater depth than shown on the plans, the additional excavation shall be filled with concrete which will be paid for under Item 22. Care shall be taken in excavating for this manhole to avoid disturbing the existing ten (10) inch outlet pipe shown on the plans and any pipe broken in the process shall be replaced by the Contractor. Any earth disturbed underneath the pipe shall be replaced with Class B concrete. The channel across the manhole shall be lined with ten (10) inch split tile. A standard cast-iron manhole cover and frame and standard manhole steps shall be furnished and placed as shown on the plans and specified herein in Sections 82 to 88, inclusive, so far as they may apply.

Setting Shut-off Valve.

(161) The shut-off valve shall be set as shown on the plans and specified herein and shall be tested as described under Section 153.

Setting Sluice Gate.

(162) A ten (10) inch sluice gate shall be furnished and set as shown on the plans and specified in Section 154, except that all necessary anchor bolts shall be built in place when the concrete is poured.

E. SHUT-OFF VALVES AND APPURTENANCES

Description.

(163) This work includes the furnishing, fabricating and placing of two (2) shut-off valves complete as shown on the plans, together with all appurtenances shown thereon.

Castings and Anchor Bolts.

(164) The fixed portion of the valve shall be made of a standard cast-iron flanged tee with dimensions following the American standard and drilled as shown on the plans. The flanges shall be faced and bearing surfaces under nuts spot faced. The outstanding leg of the tee may be cast without the flange, as shown, or it may be made from a finished casting by cutting away the flange. In either case the outstanding edge shall be carefully machined to the form shown on the plans so that all horizontal planes passed through it shall cut concentric circles on the inside. A standard blank flange, drilled as shown, shall be bolted to the outer end of the tee and sheet lead gaskets weighing four (4) pounds to the square foot shall be used between the tee and concrete and between the tee and blank flange. The castings shall be thoroughly cleaned and given two (2) coats of asphaltum or other approved varnish before erection. An additional coat shall be applied after erection. Bolts and nuts shall be of the quality specified in Section 85. Bronze nuts shall be used for the blank flange.

Brass Works.

(165) The floats, cone, buffer clips, float connecting arms and cone supports are to be made of soft sheet brass. The

floats, cone and buffer clips are to be of number sixteen (16) B. and S. gauge; the float connecting arms and cone supports of number eight (8) B. and S. gauge. The connecting rods are to be of three-eighths (⅜) inch round brass rod threaded at one end and provided with two (2) brass hexagon nuts. The adjusting sleeves are to be cut from one (1) inch brass rod, drilled out to the size shown and tapped for one-fourth (¼) inch set screws. The set screws are to be of brass with square heads. Threads and nuts are to be of U. S. standard sizes. All parts of the floats, cone and connecting arms are to be accurately formed to the dimensions shown on the drawings. The floats are to have riveted and soldered or brazed joints and are to be absolutely watertight. A one-half (½) inch drain with tight screw cap is to be soldered to the top of each float. The connecting arms are to be riveted to the floats and to each other to form a rigid framework, and holes for the connecting rods are to be drilled to secure accurate alignment. The cone is to be formed with a butt joint riveted to a number sixteen (16) gauge splice plate on the under side and soldered. Care shall be taken in forming it so that it shall seat properly at all points against the valve seat. All rivets under the gasket are to be countersunk or flattened to leave no projections. The cone is to be riveted to the supporting bars underneath. The upper buffer clips are to be riveted to the cone; the lower ones are to be attached with one-fourth (¼) inch brass bolts.

Miscellaneous.

(166) A canvas insertion rubber buffer of the dimensions shown is to be attached to the cone. This buffer is to be so formed as to lay flat against the surface of the cone and seat against the tee forming a substantially watertight joint. The ends are to be carefully joined.

A connecting rod (and anchorage) of American refined bar iron, provided with a turnbuckle of approved type, is to be provided and placed as shown on the plans. It is to be coated with asphaltum after final adjustment is made.

Float guides of structural shapes are to be provided as shown on the plans and are to be properly attached with anchor bolts and coated with two coats asphaltum varnish after placing.

Float stops for each valve consisting of sufficient length of Stebbins Hardware Co. No. 62 bronze link chain or equal, adjustable clamps of approved design, and chain supports set in the concrete as shown on the plans are to be provided.

F. TEN-INCH SLUICE GATES.

Description.

(167) Ten (10) inch circular sluice gates are to be provided for the present inlet manhole, the outlet regulating manhole and existing manhole B.

Materials and Manufacture.

(168) The sluice gates shall be of approved standard manufacture and of the circular non-rising stem type, having the thrust collar supported by the gate frame. The gate frame, guides and plug shall be of best quality of cast iron. Bronze seats shall be inserted in both frame and plug and satisfactory bronze wedges provided for forcing the gate to its seat when closed. The guides on the gate shall be bronze lined, stem and thrust collar shall be of bronze, and all bolts shall have bronze nuts. The gates shall have flanged ends to bolt directly to the concrete, drilled for twelve (12) three-quarter (¾) inch bolts on a fourteen and one-quarter (14¼) inch bolt circle. The stems shall be finished with a square nut to receive the extension stem. The gates shall be tight under a maximum head of eight (8) feet with the pressure tending to push the plug away from the seat.

Operating Mechanism.

(169) Extension stems of cold rolled steel properly connected to the gate stems shall be provided as shown on the plans. For the inlet manhole a set of cast-iron mitre gears with machine cut teeth properly keyed to the extension stems is required, and a handwheel of standard size with locknut is to be provided. For the outlet manhole and existing manhole B a square stem nut is to be left and a suitable wrench provided for operating the gate. Anchor bolts and stem guides of American refined bar iron are to be provided and accurately set as required. Those for the inlet manhole and existing manhole B are to be set in holes drilled in the concrete and grouted in place; those in the outlet regulating manhole are to be set in place when the concrete is poured. Special care shall be taken to secure accurate alignment of the gate stems and mitre gears for operating the valve in

the inlet manhole. Bronze hexagon nuts shall be used for attaching the gates and a lead gasket weighing four (4) pounds to the square foot shall be used for securing a watertight joint between the gate frame and concrete. After erection all parts except those of bronze and which are in rubbing contact shall be given two (2) coats of asphaltum varnish.

Payment.

(170) The lump sum specified to be paid for building and remodeling miscellaneous manholes under Item 13 shall include the furnishing and placing of all materials and appurtenances, complete, as specified, and the furnishing of all labor, tools, material and appurtenances necessary to complete the work as specified.

ITEM 14. WIRE FENCING.

Description.

(171) The Contractor shall furnish and place under Item 14 neat steel wire fencing and steel fence posts around the sedimentation plant as shown on the plans, or as ordered in writing by the Engineer, other than the fencing taken up and replaced as specified under Item 15.

Wire Fencing.

(172) The wire fencing shall be heavy galvanized lawn fencing, with four (4) inch mesh, the American Steel & Wire Co. make or equal, fifty-eight (58) inches wide, built up of two (2) strand No. 12½ cables with No. 12½ cross wires.

Posts and Placing.

(173) The wire fencing shall be tightly stretched between and suitably supported on galvanized steel fence posts of the American Steel & Wire Co. make or equal. All line posts shall be No. 13 gauge, neatly capped, spaced not over eight (8) feet on centers. All corners or end posts, as well as special line posts shown on the plans, shall be No. 10 gauge, strongly braced with galvanized iron braces either cornerwise or along the line. The line posts shall be set to a depth of at least two and one-half (2½) feet in the ground, and the corner, end or special line posts shall be set as deep and bedded in a block of concrete at least one (1) foot square. All braces shall also be suitably anchored. All concrete ordered by the Engineer for this purpose will be paid for at the unit price specified to be paid per cubic yard under Item 22. Care shall be taken to have good alignment throughout. All necessary fittings, braces, posts, caps and other appurtenances shall be furnished to make a complete fence, secure and strong.

Gate.

(174) A gate shall be furnished and placed at a point shown on the plans or directed by the Engineer, to match the wire fencing, built up on a pipe frame, all galvanized, of the American Steel & Wire Co. make or equal. The gate shall be of the "double drive" pattern, fifty-eight (58) inches high, with a width of opening ten (10) feet. It shall be hung on neat hinges secured to steel posts and furnished with a catch and padlock hasp, provided with a stout Yale lock or equal and four (4) keys.

Measurement.

(175) The wire fencing will be measured on the basis of the actual lineal feet of fencing built as ordered, no additional allowance being made for gate, end, corner and line posts. No. measurement will be given under this item for existing fencing taken up and replaced.

Payment.

(176) The unit price specified to be paid per lineal foot for wire fencing under Item 14 shall include furnishing and placing of the fencing, posts, braces, gate and all material, as specified, and shall include the furnishing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 15. REPLACING FENCES.

Description.

(177) Under Item 15, the Contractor shall take up and replace, either in the old position or elsewhere, the present steel wire fencing and steel fence posts (around the sedimentation plant and tank), as shown on the plans or as ordered by the Engineer.

The Contractor shall take up the old fence with as much care as possible, and replace as ordered by the Engineer in accordance with the specifications in Section 173, so far as they may apply. Only new fittings, bolts, caps, posts or other appurtenances required shall be furnished by the Contractor at his expense to complete the setting of the fence in a secure manner.

Measurement.

(178) The wire fencing replaced will be measured on the basis of the actual lineal feet of fencing replaced as ordered, no additional allowance being made for gate, end, corner and line posts. No measurements will be given under this item for building new fencing under Item 19.

Payment.

(179) The unit price specified to be paid per lineal foot for replacing fencing under Item 15 shall include the taking up and replacing of the existing wire fencing when and where ordered by the Engineer, and shall include the moving and placing of the fencing, posts, braces, gate and all material, as specified, and shall include the furnishing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 16. REMOVAL OF BRIDGE ABUTMENT.

Description.

(180) The Village of Morton Grove will remove the old existing steel truss highway bridge, crossing the north branch of the Chicago river at the north end of the property of the Sanitary District. The Contractor shall remove the easterly abutment.

The stone abutment shall be torn down and removed. Care shall be taken to salvage undamaged as much material as possible. Salvaged stone shall be used for paving slopes of the embankment as directed by the Engineer, and no further payment will be made therefor other than the unit price specified per square foot for slope paving under Item 17.

The stone abutment shall be stripped down to the earth footing, or at least to elevation twenty-eight (28) C. C. D. All debris caused by work under this item shall be removed from the river.

The lump sum specified to be paid under this item shall include all the work required to wreck and salvage the abutment. No additional payment will be made at the unit price specified under Items 1 or 2 for work done under this item. The removal of the old embankment behind the east abutment will, however, be paid for at the unit price specified per cubic yard for excavation under Item 1.

Payment.

(181) The lump sum specified to be paid for the removal of bridge abutment under Item 16 shall include the wrecking and salving of the east abutment, complete, as specified, and the furnishing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 17. SLOPE PAVING.

Description.

(182) Under Item 17, stone removed from the bridge abutment under Item 16 shall be used for paving slopes so far as suitable and as ordered by the Engineer. Additional paving stone required, if and as ordered by the Engineer, will be furnished to the Contractor, f. o. b. cars, Morton Grove, Ill., by the Sanitary District.

Placing.

(183) Stone may be laid directly on the slope or on a layer of crushed stone to be paid for under Item 6 as directed by the Engineer, with the flat side up, and shall be firmly bedded and placed as closely together as possible. The largest and heaviest stones shall be placed along the bottom of the slope to form a firm footing for the remainder of the paving. A minimum thickness of eight (8) inches shall be maintained and no pieces with their least dimension less than this shall be used except for fillers, and when completed the paving shall present a uniformly smooth surface.

Payment.

(184) The unit price per square foot specified to be paid under Item 17 shall be for the paving measured in place and shall include all tools, materials (except crushed stone), labor and appurtenances required for performing the work as specified.

ITEM 18. COVER FOR IMHOFF TANKS.

Description.

(185) Under this item are included the furnishing and placing of wooden covers and cutting notches in the outlet troughs for the present Imhoff tanks.

Material.

(186) All lumber is to be No. 1 yellow pine dressed all over and of the dimensions shown on the plan. Sheathing is to be tongue and groove lumber. Hardware is to be of best quality and hinges and lifting rings are to be galvanized.

Fabrication.

(187) The framing for the tank covers is to be accurately fitted and thoroughly spiked together to form a rigid frame work as shown on the plans. The stringers are to be carefully beveled as shown. Sheathing is to be nailed in position, and lap and ridge boards, trap doors and framing, and drainage gutters, shall be neatly and accurately fitted. Drainage holes are to be bored as shown. Trap doors are to be cleated with wood screws of proper size. After fabrication all surfaces are to be treated with two (2) coats of linseed oil. If not fabricated in position the covers shall be placed over the tanks and any defects in fitting corrected before acceptance.

The wooden outlet troughs in the present tanks are to be notched as shown on the plans. This work is to be carefully and accurately done.

Payment.

(188) The lump sum specified to be paid under Item 18 shall include furnishing and placing of all materials complete to build the cover and cut the notches as shown and shall include all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 19. VITRIFIED TILE PIPE AND SPECIALS.

Description.

(189) Under Item 19 shall be furnished and placed all the vitrified tile sewer pipe and specials shown on the plans and specified as included under this item. This includes the ten (10) inch tile pipes forming the sludge drain from the secondary settling tanks to the sluge pump pit, the effluent drain from the sludge bed to the sewage pump well, and the effluent line from the secondary settling tanks to the outlet regulating manhole.

The Contractor shall furnish and lay the vitrified sewer pipe with such bends, branches, or other specials as may be necessary to complete the work as specified.

Quality.

(190) All sewer pipe shall be of standard quality, made of the best material, thoroughly and perfectly burned, of homogeneous texture, without cracks or imperfections, well glazed, so that their inner and outer surfaces shall be smooth, hard, and even.

Dimensions.

(191) The pipes shall be at least two (2) feet in length. Shorter or cut lengths shall be used where necessary to make closures. Branches, bends, and other specials, where so shown or required, shall be made to dimensions furnished by the Engineer. All pipes shall be straight, true in form, of full diameter throughout, and shall have socket joints. The thickness of the pipe and the dimensions of the socket shall be at least equal to those of single strength deep and wide socket, standard sewer pipe of the same diameter.

Laying.

(192)) All pipes before being laid, or lowered into the trench, shall be fitted together dry and matched so that when laid or joined in the trench they shall form a smooth and true line. All pipes shall be laid to the lines and grades given by the Engineer. The ends or shoulders of each pipe shall abut against the next adjacent pipes in such a manner that there will be no unevenness of any kind along the bottom half of the pipes.

Joints.

(193) The space between the pipe and socket shall be as uniform as possible, and shall be made watertight by first using a small jute gasket thoroughly saturated with neat Portland cement carefully coiled and placed in the bell of the pipe. The joints shall then be thoroughly filled with Portland cement mortar, made of equal volumes of cement and clean, sharp screened sand, thoroughly mixed dry, the cement and sand to be of the quality specified in Sections 45 and 46, water enough afterwards being added in small quantities to give it the proper consistency. It shall be used as soon as made. The mortar shall be solidly rammed into the joints, after which the joints shall be carefully wiped inside and out. Joints between cast-iron and tile pipe shall also be made in the above manner.

Interior of Pipe.

(194) The interior of the pipe shall be carefully freed from all dirt, cement or superfluous materials of every description as the work proceeds, for

which purpose a disc mold or swab filling the entire bore of the pipe, and attached to a rod sufficiently long to pass two (2) joints from the end of the pipe last laid shall be continuously worked through as the laying of pipe proceeds. In all cases, the open ends of pipes and branches shall be temporarily and securely closed with carefully fitted boards or stoppers to prevent any earth or other substance from entering. The Contractor shall make good all defects and remove any foreign matter which may haven been left or otherwise introduced into the pipe before the final acceptance of the work.

Future Inlets and Lampholes.

(195) At points for future connections the bell end of the tile shall be blanked off with brick or a thin concrete slab, cast outside and seasoned. The blanks shall fit neatly in the open bell of the pipe and shall be made tight with a suitable asphalt or composition joint filler applied hot. The cost of making such joints, cutting and placing the brick or castings, and placing a concrete slab shall be included in the price specified to be paid under items wherein specified.

Payment.

(196) The unit price specified to be paid per lineal foot under Item 18 shall include furnishing and laying the ten (10) inch tile pipe and specials and shall include all labor, tools, materials and appurtenances necessary to perform this work as specified. Excavation and refill and concrete backing, if required, will be paid for under the respective items of the contract.

ITEM 20. REINFORCING STEEL.

Description.

(197) The Contractor shall furnish and place in the concrete specified under Items 8, 9, 10 and 13, steel bars and mesh for reinforcement of the sizes called for on the plans or as ordered by the Engineer, at such points as are shown or as may be required. Corrugated, twisted or deformed bars may be used, of a form to be approved by the Engineer. Mesh reinforcement ordered shall be approved by the Engineer.

All material shall be furnished and placed as specified in Sections 62 to 65, inclusive.

Payment.

(198) The unit price specified to be paid per pound under Item 20 shall include all labor, tools, materials and appurtenances necessary to furnish and place all reinforcing steel. The weight paid for shall be scale weight for all steel actually placed in the work, no allowance being made, however, for wire, ties, slips or other devices used to tie pieces together for support during construction.

ITEM 21. ADDITIONAL CONCRETE, CLASS A.

Description.

(199) Under this item the Contractor shall furnish and place any additional concrete, or proportion of one (1) part Portland cement, two (2) parts sand, and four (4) parts gravel or broken stone, which is not included for payment under Items 8, 9, 10 and 13.

The general specification for concrete given in Sections 43 to 61, inclusive, shall apply to all work in this item.

Measurement.

(200) The amount of additional concrete placed will be measured by the lines and grades actually given by the Engineer.

Payment.

(201) For all additional concrete, Class A, put in place by order of the Engineer in writing, the sum of Ten Dollars ($10.00) per cubic yard will be paid, which sum is agreed by the Contractor to be full compensation for all labor, materials, tools, and appurtenances necessary to complete the work as specified.

ITEM 22. ADDITIONAL CONCRETE, CLASS B.

Description.

(202) Under this item the Contractor shall furnish and place any additional concrete required in the proportion of one (1) part Portland cement, two and one-half (2½) parts sand and five (5) parts gravel or broken stone, which is not included for payment under Items 8, 9, 10 and 13. The general specifications for concrete given in Sections 43 to 61, inclusive, shall apply to all work given in this item.

Measurement.

(203) The amount of additional concrete placed will be measured by

the lines and grades actually given by the Engineer.

Payment.

(204) For all additional concrete, Class B, put in place by order of the Engineer in writing, the sum of Nine Dollars ($9.00) per cubic yard will be paid, which sum is agreed by the Contractor to be full compensation for all labor, materials, tools and appurtenances necessary to complete the work as specified

ITEM 23. TIMBERING LEFT IN PLACE.

Description.

(205) The Contractor shall leave in place such timbering, sheeting and shoring as the Engineer may order in writing, cut off as directed, as specified herein.

Payment.

(206) For all lumber used for timbering, sheeting and shoring which is left in place by order of the Engineer, the unit price of Thirty Dollars ($30.00) per thousand feet, board measure, will be paid, which sum is agreed by the Contractor to be in full compensation for all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 24. ADDITIONAL LABOR.

Description.

(207) If the splash cup tests described in Section 93 do not show a uniformity of distribution satisfactory to the Engineer, adjustment of the distribution piping and splash plates by changing their elevation, with additional distribution tests as described under Section 96 may be required by the Engineer under this item. Suitable devices and tools for raising or lowering the distribution piping shall be provided by the Contractor, so that the work may be done without injury to the work. Any damage caused by the Contractor's operations shall be made good at his own expense. If additional pipe or fittings are required for doing the work, the same will be provided by the Sanitary District of Chicago, but all other materials shall be furnished by the Contractor. After adjusting the piping and splash plates to the new grades established by the Engineer, an additional distribution test or tests, as described under Section 96 shall be run.

Payment.

(208) The unit price to be paid per man-hour under Item 24 shall include the actual number of man-hours of labor, exclusive of superintendence, office, and overhead expense, actually employed in any adjustments to the distribution system and in the performance of any tests after the work has been originally completed and tested as specified under Sections 91 to 96, inclusive. The price to be paid shall include all labor, materials (except pipe and fittings), tools and appurtenances necessary to complete the work as specified.

GENERAL CONDITIONS.

Sanitary District Law.

hereby agrees to carry on all the work

Article 1. The said Contractor provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove obstructions from the Desplaines and Illinois Rivers," approved May 29th, 1889, in force July 1st, 1889, and all acts amendatory thereof and supplementary thereto.

Village Ordinances.

Art. 2. The said Contractor agrees to carry on all work provided for in this contract in strict conformity with the ordinances and rules passed by the Village of Morton Grove, covering the construction of said work, and to conform to all other regulations or ordinances of said village.

Omission on Plans.

Art. 3. The plans furnished form a part of these specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications or drawings.

Approximate Quantities.

Art. 4. It is expressly understood and agreed by the parties hereto that the quantities of the various classes of work to be done and material to be furnished under this contract, which

have been estimated as stated in the "Requirements for Bidding and Instructions to Bidders," attached hereto, are only approximate and are to be used solely for the purpose of comparing on a uniform basis, the proposals offered for the work under this contract; and the Contractor further agrees that the Sanitary District will not be held responsible if any of said quantities shall be found incorrect; and said Contractor will not make any claim for damages or for loss of profits because of a difference between the quantities of the various classes of work as estimated and the work actually done. If any error, omission, or mis-statement shall be discovered in the said estimated quantities, the same shall not invalidate this contract or release the Contractor from the execution and completion of the whole or any part of the work herein specified, to the satisfaction of the Engineer and in accordance with the specifications and the plans herein mentioned and for the prices herein agreed upon and fixed therefor, or excuse him from any of the obligations or liabilities hereunder, or entitle him to any damages or compensation otherwise than may be provided for in this contract, except for such extra work as may be required, for the performance of which written orders must be given and received as herein specified.

Examination of Site.

Art. 5. All bidders for the work under this contract are required before submitting proposals to examine the site of the work and adjacent premises, and the various means of approach to the site, and to make all necessary investigations in order to inform themselves thoroughly as to the character and magnitude of all work involved in the complete execution of this contract; also as to the facilities for delivering, handling and installing the construction plant and other equipment and the conditions and the difficulties that will be encountered in the performance of the work specified herein. No pleas of ignorance of conditions that exist or that may hereafter exist, or of difficulties that will be encountered in the execution of the work hereunder, as a result of failure to make necessary examinations and investigations, will be accepted as a sufficient excuse for any failure or omission on the part of the Contractor to fulfill in every detail all the requirements of this contract, or will be accepted as a basis for any claim whatsoever for extra compensation.

Field Office.

Art. 6. The Contractor will be permitted to establish and maintain, at his own expense, during the life of this contract, an office upon the station grounds. This office shall, however, be located and constructed as approved by the Engineer. The disposal of tools, material, machinery, and other supplies and appurtenances during storage and erection on the property of the Sanitary District shall be subject to the approval of the Engineer The Contractor shall assume all responsibility for the security of everything he may have in said office, or on the property of the Sanitary District.

Changes in Plans.

Art. 7. The Sanitary District reserves the right to make any changes in the specifications and plans which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby.

If such alterations increase the quantity of work to be done, where unit prices are specified, such increase shall be paid for according to the quantity of work actually done at the unit price specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done, where unit prices are specified, they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

If such alterations increase the amount of work to be done, where lump sum prices are specified, such increase shall be paid for as an extra as provided in Articles 8 and 9. If such alterations or omissions diminish the amount of work to be done, where lump sum prices are specified, such alterations or omissions shall not constitute a claim for damages or for loss of profits on the work that may

be dispensed with, and the Sanitary District shall not be required to pay for work or material omitted. The Contractor shall allow a credit for all such work or material omitted, the amount of the credit to be fixed by the Chief Engineer on the basis of the estimated cost of the labor and materials omitted.

Extra Work.

Art. 8. The Contractor shall perform only such extra work as the Engineer may order in writing, provided, however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided, he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this agreement, and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actual cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work performed herein before and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 9. In estimating the cost of extra work, the cost of material and equipment shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amount paid for same as shown by the pay rolls of the Contractor, with cost of indemnity insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, when requested by the Chief Engineer, certify, by his affidavit, the correctness of the amounts paid for material, equipment and labor.

It is further agreed that in all cases of question or dispute arising or growing out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision, Materials, Workmanship and Inspection.

Art. 10. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents.

All inspection of any and all material furnished for use in the work shall be made at the site of the work after delivery of the material; provided, that, if requested by the Contractor, the Engineer may at his option perform, or have performed, inspection of material at points other than at the site of the work. In any such case the Contractor shall pay the Sanitary District the extra cost of such inspection, including the necessary expenses of the inspector and the salary of the inspector for the extra time expended in performing any such inspection at such other points.

All equipment and materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately, and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all equipment and materials and work, which during the progress and before its final acceptance, may become damaged from any cause, or do not for any reason satisfy the requirements of these specifications, shall be removed and replaced by good and satisfactory equipment, materials and work, without extra charge therefor. The Engineer and his assistants shall have at all times free access to every part of the work, and to all places where equipment or material to be used in the work is manufactured, or stored, and shall be allowed to examine any equipment or material furnished for use in the work under this contract.

If any defects or omissions in said work are hidden or concealed, so that a reasonably careful inspection at the time of acceptance of said work would not have disclosed them, and such defects or omissions appear or are disclosed within one (1) year after the final acceptance of said work, then said Contractor agrees, on notice given him in writing by the Chief Engineer that such defects or omissions exist, to immediately correct and make good the same, and in the event that he fails, refuses or neglects so to do, then said Sanitary District may correct and make good the same and said Contractor hereby agrees to pay on demand the cost and expense of doing such work.

The Contractor shall be guided by the lines, stakes, marks and grades given by the Engineer and shall carefully preserve the same as far as possible during the progress of the work, and shall furnish all needed facilities, without extra charge therefor, to enable the Engineer to properly give lines and grades and measure the work from time to time.

Progress Certificates.

Art. 11. It is further expressly agreed that the granting of any progress certificates, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective equipment, material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Cost of Work.

Art. 12. All books and accounts kept by the Contractor in connection with this contract shall be open to the inspection of the Chief Engineer of the Sanitary District, or his properly accredited representative.

The Contractor shall furnish the Engineer reasonable facilities for obtaining such information as he may desire respecting the progress and execution of the work and the character of the materials, including all information necessary to determine the cost of the work, such as the number of men employed, their pay, the time during which they have worked on the various classes of construction, the cost of repairs to machinery, and other information required by the Engineer. The Contractor shall, on request, furnish the Engineer with copies of expense bills for transportation charges

on all machinery, material and supplies shipped to or from the work under this contract.

Plant.

Art. 13. The Contractor shall furnish all material and supplies, plant, staging and falsework, tools and implements, teams, cars and tracks; in fact, all material and appliances of every sort or kind that may be necessary for the full and complete carrying out of this contract, and shall furnish and maintain, subject to the approval of the Engineer, all necessary barricades, and other protections, lights and signs, necessary for the proper protection of the public. He shall also furnish watchmen. The cost of all the above shall be covered by the amounts paid at the lump sum or unit prices herein specified, and no extra charge shall be made therefor.

Night, Sunday or Holiday Work.

Art. 14. Whenever the Contractor shall be permitted or directed to perform work at night, or on Sundays or a holiday, or to vary the period of hours during which work is carried on each day, he shall give written notice to the Engineer, so that proper inspection may be provided. Such work shall be done under the regulations to be furnished in writing by the Engineer, and no extra compensation shall be allowed therefor.

Cleaning Site.

Art. 15. The Contractor shall keep the site of the work and adjacent premises as free from material, debris and rubbish as is practicable and shall remove same from any portion of the site, if, in the opinion of the Engineer such material, debris or rubbish constitutes a nuisance or is objectionable in any way to the public. The Contractor further agrees to remove all materials, implements, barricades, staging, falsework, debris and rubbish connected with or caused by said work immediately upon the completion of the same, and to leave the premises in perfect condition in so far as affected by the work under this contract.

Precautions.

Art. 16. The Contractor shall take whatever precaution that may be necessary to render any portion of the work secure in every respect, or to decrease the liability of accident from any cause, or to avoid contingencies which are liable to delay the completion of the work.

The Contractor will be required to conduct his work so as not to obstruct or render dangerous public highways, bridges or ditches.

Superintendence.

Art. 17. The Contractor shall at all times have a competent foreman, superintendent or other representative on the work who shall have full authority to act for the Contractor and to receive and execute orders from the Engineer, who shall receive shipments of material to the Contractor, and who shall see that the work is executed in accordance with the specifications and plans and the orders of the Engineer thereunder. The Contractor shall furnish the necessary watchmen to protect all materials, tools and equipment and all work performed by the Contractor until said work has been completed and accepted by the Engineer.

Workmen.

Art. 18. The Contractor shall employ competent foremen and laborers, and shall discharge, at the request of the Engineer, any incompetent or unfaithful men in his employ. None but men expert in their respective branches of work shall be employed where special skill is required.

Sanitation.

Art. 19. In accordance with the rules and regulations for the guidance of Sanitary Inspector, etc., adopted by the Board of Trustees on July 31, 1913, page 997 of the Proceedings for 1913, the Contractor shall introduce and enforce among his employes such regulations in regard to cleanliness and the disposal of garbage and wastes, as shall conduce to their health, and tend to prevent the inception and spread of contagious and infectious diseases among them, and shall take such means as the Engineer may direct to effectualy prevent the creation of a nuisance on any part of the property of said Sanitary District, streets, or adjacent property. Necessary sanitary conveniences for the use of the laborers on the work, properly secluded from public observation, shall be constructed and maintained by the Contractor in such manner and at such points as shall be approved, and their use shall be strictly enforced.

Patents.

Art. 20. It is further agreed that the Contractor shall indemnify, keep and

save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Damages.

Art. 21. If any damage shall be done by the Contractor or by any person or persons in his employ to the owner or occupants of any land or to any real or personal property adjoining, or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damage, and cause the Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself, or of his employes, that is in the nature of a legal liability, and he hereby agrees to indemnify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such injuries or such damages received or sustained by any person or persons, from said Contractor, his servants, agents or employes, in the execution of said work; or by or in consequence of any negligence in guarding the same or by or on account of any omission or act of said Contractor, his agents or employes; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employers' Liability Act.

Art. 22. The Contractor further agrees to insure to his employes or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this state;" providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an act entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10, 1911, in force May 1, 1912;" approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employes in and about the performance of this contract.

Responsibility of Contractor.

Art. 23. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor shall be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it, except as hereinafter specified. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employes.

The Contractor shall not assign by power of attorney or otherwise any portion of the money that may become due through the performance of any of this contract.

Subletting Work.

Art. 24. The Contractor shall not sublet any part of the work herein mentioned to any person or corporation that is not, in the opinion of the Engineer,

competent, experienced and financially able to properly carry out and execute the same, and in the event that said Contractor desires to sublet any part of the work he shall, prior to such subletting, submit to the Engineer a statement showing the character of the work and the party or parties to whom it is proposed to sublet the same and his or their experience, financial ability and other qualifications for properly carrying out and completing the same, and the decision of the Engineer as to said qualifications, financial ability, experience and competency shall be final and binding upon both parties hereto. It is further understood and agreed that such subletting, or the approval thereof by the Sanitary District or by said Engineer, shall not directly or indirectly release or modify the responsibility of the Contractor for the satisfactory and entire completion of said work at each and every part and portion thereof, and that said Sanitary District shall not be liable to any sub-contractor for any claim or damages whatsoever. In case any party or parties, to whom any work under this contract shall have been sublet, shall disregard the directions of the Engineer or his duly authorized representatives, or shall furnish any unsatisfactory work, or shall fail or refuse in any way to conform to any of the conditions of this contract, then, in that case, under the written order of the Engineer, the Contractor shall require said party or parties in default to discontinue work under this contract. Said work shall be corrected or made good and shall be completed by the Contractor or by such other party or parties agreed upon who shall be satisfactory to the Engineer.

It is distinctly understood and agreed that the subletting of the work covered by this contract or any part thereof, except as herein above provided, shall after twenty (20) days' notice to said Contractor, work a forfeiture of this contract at the option of the Sanitary District.

Liens.

Art. 25. If at any time during the progress of said work the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies or any sort or kind used or consumed in, upon, or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor, or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make payment hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporation, for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Time.

Art. 26. The Contractor agrees to begin the work covered by this contract within thirty (30) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor, and to prosecute the same with all due diligence and to entirely complete the work on or before December 31, 1919.

It is understood and agreed that Time is of the essence of this contract, and that a failure on the part of said Contractor to complete the work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 27. It is therefore covenanted and agreed that in case the said Contractor shall fail or neglect to complete the work herein specified on or before the date hereinbefore fixed for completion, the said Contractor shall and will pay the said Sanitary District the sum of Ten Dollars ($10.00) for each and every day the Contractor shall be in default in the time of completion of this contract.

Said sum of Ten Dollars ($10.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the

liquidated damages which said Sanitary District will suffer by reason of such defaults, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the said work, the Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto. It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to Time and Liquidated Damages for delays.

Extensions or Additions.

Art. 28. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provisions of this contract with reference to Liquidated Damages, and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 29. The Contractor shall delay, or suspend the progress of the work, or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, providing that in the event of such delay or delays or of such suspension or suspensions of the progress of the work or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions, shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay or delays, suspension or suspensions.

Unavoidable Delay.

Art. 30. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by any act or delay on the part of railroads in furnishing cars or transporting said equipment, material or appurtenances for said work, or by War Boards or Councils of the Federal Government or State Councils of Defense, or by Federal administrators, or by delays in obtaining priority certificates from the United States government if such are required, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods, or through any default or delay of other parties under contract with said Sanitary District, or due to strikes, or to other causes, which causes of delay mentioned in this article (Art. 30), in the opinion of the Chief Engineer are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless at the commencement of the delay the Contractor notify verbally the Engineer in direct charge in the field, and unless the Contractor notify the Chief Engineer in writing before the fifth of each succeeding month of all delays occurring in the preceding month.

It is further expressly agreed that said Contractor shall not be entitled to any damages or compensations from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article (Art. 30) except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond, actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. The Chief

Engineer shall decide the number of days that said Contractor has been so delayed and his decision shall be final and binding upon both parties hereto.

Forfeiture of Contract.

Art. 31. It is further agreed by said Contractor that if the work to be done under this contract shall be abandoned by the Contractor, or if there shall be a failure by said Contractor to perform the work of the character and in the time herein specified; or if said Contractor shall fail financially or from any other cause whatsoever be unable to carry out said contract and complete the said work; or if the contract shall be assigned by said Contractor; or if the Contractor shall lose control of said work for any cause whatsoever except by the act of God, the United States Government or the public enemy; or if the Contractor shall refuse to or neglect to follow the instructions of the Engineer; or if, in the opinion of the Engineer, the Contractor refuses or neglects to use measures to protect the said work from damage; or if, in the opinion of the Engineer, the Contractor is guilty of carelessness or incompetency in the execution of said work; or if, in the opinion of the Engineer, the said work has been or is being delayed by the Contractor; or if, in the opinion of the Engineer, the rate of progress is not such as to insure the completion of the work within the time specified; or if at any time the Engineer shall be of the opinion and so shall certify in writing to said Sanitary District that said work or any part thereof is unnecessarily or unreasonably delayed; or that the Contractor is wilfully or persistently violating any of the conditions or covenants of this contract, or is not fulfilling said contract in good faith, said Sanitary District shall have the power and authority, and may then immediately notify said Contractor to discontinue all work or any part thereof, as may be designated by the Engineer of said Sanitary District.

Upon notice being given as aforesaid by the said Sanitary District to the said Contractor, or upon the happening of any of the conditions hereinbefore in this article specified, the said Sanitary District shall have a lien upon all the equipment, material, supplies, machinery, implements and tools of the Contractor then existing on the premises of said Sanitary District for the purposes hereinafter specified; and the said Sanitary District may thereupon immediately take possession of all said equipment, materials, supplies, machinery, implements and tools for the uses and purposes hereinafter set forth; thereupon the said Sanitary District shall have the power to, and may at the cost of said Contractor, complete the said work by letting a new contract, and in completing the said work by contract the Sanitary District may use such equipment, materials, supplies, machinery, implements, tools and plant, as above specified, as may be the property of said Contractor, and may make the necessary repairs and replacements thereto.

The cost of fully completing all the work provided for under this contract shall include the sum or sums of money paid by the Sanitary District to other contractors if all or any part of said work is completed by contract, and any sum or sums of money paid by the Sanitary District in hiring men and teams, machinery, implements, tools and plant, and any sum or sums of money paid by the Sanitary District for the purchase of equipment, materials, supplies, machinery, implements, tools, and plant, and the cost of repairs or replacements thereto; and all cost, of repairs and replacements upon machinery, implements, tools and plant, of the Contractor hereunder, used in the completion of said work, and also all sums of money paid for first aid, medical, surgical and hospital attendance, and as compensation for accidental injuries or death suffered by employes in the course of their employment in the performance of said work under the Employers' Liability Act of the State of Illinois, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto.

The cost of fully completing all the work under this contract as aforesaid shall be charged to the said Contractor, and the amount of said cost or expense so charged shall be deducted from and paid by the said Sanitary District out of any moneys that may be due or may at any time thereafter become due to the said Contractor under and by virtue of this contract, so far as the same shall suffice therefor.

Should the amount remaining unpaid of the contract price be insufficient to reimburse the Sanitary District for the cost of fully completing all work as aforesaid, then the Sanitary District may sell all materials, supplies, machin-

ery, implements, tools and plant then on hand, whether obtained from the Contractor or by purchase, at public sale on giving said Contractor twenty (20) days' notice of the time and place of such sale, and the net proceeds derived from the sale of the said property at such sale shall be credited to the Contractor, and should the amount received from said sale be then insufficient to pay such deficiency, the Contractor and his bondsmen shall be liable to pay the amount of said deficiency; and at any such sale of said property as provided hereunder, the Sanitary District may bid and become a purchaser of said property.

Contractor's Bond.

Art. 32. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the amount of this contract for the performance of the work under this contract, with good and sufficient securities, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the securities on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such securities thereon as shall be satisfactory to the Board of Trustes of said Sanitary District.

Progress.

Art. 33. The Contractor hereby agrees that the progress of the work under this contract shall be such that, on the respective dates shown in the following tabulation, the total amount of work completed (expressed in percentage, in value, of the whole of said work) will be not less than that shown in said tabulation:

Tabulation Showing Total Amount of Work (expressed in percentage, in value, of the whole of said work), to Be Completed on Dates Shown:

Year	Date	Per Cent Completed
1919	September 1	10
	October 1	40
	November 1	75
	December 31	100

The assumed value of the whole of said work shall be based on the approximate quantities of work set forth in the proposal of the Contractor hereto attached, at the unit prices herein specified.

If the rate of progress be such that the total amount of work accomplished by the Contractor on any date mentioned in the foregoing tabulation is less than the amount therein specified to be completed on such date, then the Sanitary District may withhold the monthly payments herein specified, until such time as the total amount of work performed by the Contractor shall equal the requirements of the work to be performed as hereinabove specified.

Prices.

Art. 34. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the labor, tools, materals and appurtenances necessary to complete the work specified, and for doing all the work contemplated and specified in this contract, also for all loss or damage arising out of the nature of the work aforesaid or from the action of the elements or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work, and the whole thereof, in full compliance with the plans and specifications, and the requirements of the Engineer under them, to-wit:

(1) For earth excavation, including the disposal of excavated material, as specified, the sum of one dollar sixty-five cents ($1.65) per cubic yard.

(2) For rock excavation, including the disposal of excavated material, as specified, the sum of three dollars ($3.00) per cubic yard.

(3) For rolled embankment, complete, in place, as specified the sum of seventy-five cents ($0.75) per cubic yard.

(4) For the loam, complete, in place, as specified, the sum of two dollars and fifty cents ($2.50) per cubic yard.

(5) For sand fill, complete, in place, as specified, the sum of three dollars ($3.00) per cubic yard.

(6) For roadways and walks, complete, in place, as specified, the sum of four dollars ($4.00) per cubic yard.

(8) For the sprinkling filter and pump well with appurtenances, complete, as specified, the lump sum of

thirteen thousand six hundred fourteen dollars ($13,614.00).

(9) For the two secondary settling tanks with appurtenances, complete, as specified, the lump sum of twenty-three hundred thirty-nine dollars ($2,339.00).

(10) For the sludge bed with appurtenances, complete, as specified, the lump sum of fifteen hundred dollars ($1,500.00).

(11) For the filter and pump well house and appurtenances, as specified, the lump sum of sixty-two hundred sixty-three dollars ($6,263.00).

(12) For the pumping machinery and appurtenances, complete, in place, as specified, the lump sum of twenty-two hundred dollars ($2,200.00).

(13) For building and remodeling miscellaneous manholes, complete, as specified, the lump sum of sixteen hundred ten dollars ($1,610.00).

(14) For wire fencing, in place, as specified, the sum of one dollar and fifty cents ($1.50) per lineal foot.

(15) For removing and replacing wire fencing, complete, in place, as specified, the sum of fifty cents ($0.50) per lineal foot.

(16) for removal of the east abutment of the old bridge across the north branch of the Chicago river, complete, as specified, the lump sum of one hundred dollars ($100.00).

(17) For slope paving, complete, in place, as specified, the sum of forty cents ($0.40) per square foot.

(18) For covers for Imhoff tanks, in place, complete, as specified, the lump sum of two hundred eighty dollars ($280.00).

(19) For laying ten (10) inch vitrified tile pipe, in place, as specified, the sum of one dollar and seventy-five cents ($1.75) per lineal foot.

(20) For reinforcing steel, in place, as specified, the sum of five cents ($0.05) per pound.

(21) For additional concrete, Class A, complete, in place, as specified, when ordered in writing by the Engineer, the sum of ten dollars ($10.00) per cubic yard.

(22) For additional concrete, Class B, complete, in place, as specified, when ordered in writing by the Engineer, the sum of nine dollars ($9.00) per cubic yard.

(23) For shoring and timbering left in place by order of the Engineer, as specified, the sum of thirty dollars ($30.00) per thousand feet, board measure.

(24) For furnishing additional labor, as specified, the sum of one dollar and twenty-five cents ($1.25) per man-hour.

The foregoing prices shall cover the cost of all plant and tools and of all work and material of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents, and patented material, appliances and processes used in the work described in the specifications and agreements. Before final payment is made, the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

Art. 35. The said Sanitary District agrees to pay said Contractor the sums herein specified in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed eighty-seven and one-half (87½) per cent of the value of the work properly performed under this contract, and that the remaining twelve and one-half (12½) per cent shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and delivery of the final certificate of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract.

Final Payment.

Art. 36. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials, except in the manner set forth in this agreement, nor until all the stipulations, provisions, and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will,

at the expiration of thirty (30) days after such completion and delivery of such certificates pay, and it hereby binds itself to pay the said Contractor in cash, the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the successors, heirs, legal representatives, administrators and executers of said Contractor.

In Witness Whereof, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of the Committee on Finance of its Board of Trustees, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its President and to be duly attested and its corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

Know All Men by These Presents, That we, Ready & Callaghan Coal Co. as principal and Southern Surety Company as surety are held and firmly bound unto The Sanitary District of Chicago in the penal sum of eighteen thousand seven hundred sixty-nine dollars and eighty-eight cents ($18,769.88) lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this 17th day of July A. D. 1919.

The Condition of the Above Obligation Is Such, That whereas the above bounden Ready & Callaghan Coal Co. has entered into a certain contract with The Sanitary District of Chicago, bearing date the 17th day of July, A. D. 1919, for doing all the work and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the Construction of a Sprinkling Filter and Appurtenances in the Village of Morton Grove, Township of Niles, County of Cook, State of Illinois, as specified in the foregoing contract.

Now, If the said Ready & Callaghan Coal Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the plans accompanying the same, and in the time and manner therein prescribed, and further, shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses, and attorney's fees, which may in anywise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in anywise result from the carelessness or neglect of said Ready & Callaghan Coal Co., its agents, employes or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including repayment of overpayments and including also all valid claims and demands for first aid, medical, surgical and hospital services and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illi-

nois, entitled, "An Act to promote the general welfare of the people of this state by providing compensation for accidental injuries or deaths suffered in the course of employment within this state; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled, 'An Act to promote the general welfare of the people of this state by providing compensation for accidental injuries or deaths suffered in the course of employment,' approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said Ready & Callaghan Coal Co. in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

And It Is Hereby Expressly Understood and Agreed, and made a condition hereof, that any judgment, rendered against said The Sanitary District of Chicago, as aforesaid, in any suit for damages occasioned by carelessness or neglect of said Ready & Callaghan Coal Co., or its agents, employes or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation, or accidental injuries or deaths suffered by employes, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Ready & Callaghan Coal Company, shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

Ready and Callaghan Coal Co.

Mr. Lawley presented the following report from the Committee on Finance:

Chicago, August 14, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

Gentlemen—Your Committee on Finance reports that it has examined and approved the bond of the Freeman-Sweet Company with the Southern Surety Company thereon as surety for the faithful performance of its contract for changing present 5000 volt aerial construction under subways to steel pipe construction, underground armored cable or underground construction and painting poles and equipment thereon and therefore recommends the passage of the following order:

Ordered, That the bond of the Freeman-Sweet Company for the faithful performance of the above specified contract, said bond being in the penal sum of $50,000.00, be, and the same is hereby, approved, and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
Jas. H. Lawley,
Chairman.
George W. Paullin,
Matt A. Mueller,
Willis O. Nance,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

The following is the contract and bond of the Freeman-Sweet Company:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR WORK ON STREET LIGHTING CIRCUITS.

THIS AGREEMENT, Made and entered into this 7th day of August, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the Freeman-Sweet Company, a corporation organized under the laws of the State of Illinois, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty expressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools and labor and all appliances and appurtenances called for by this agreement (free from all claims, liens and charges whatsoever), in the manner and under the conditions hereinafter specified, that are necessary for changing present 5000 volt aerial construction under subways to steel pipe construction, underground armored cable or underground construction and painting metal poles and equipment thereon as called for under Divisions A and B of the attached specifications, complete, as specified.

The work done and equipment furnished shall be strictly pursuant to and in conformity with the specfications, plans and drawings. The said specifications, plans and drawings are intended to co-operate, and any work appearing in or upon the one and not mentioned in the others, shall be executed according to the true intent and meaning of the said specifications, plans and drawings, the same as though the said work was contained and described in all.

It is further covenanted and agreed that the work specified herein shall be executed under the general direction and supervision of the Electrical Engineer of The Sanitary District of Chicago and his properly authorized agents. The Commissioner of Gas and Electricity of the City of Chicago and his duly authorized agents shall inspect all work performed hereunder and all materials,, supplies and electrical equipment used in such work and shall have full power to reject or condemn any and all work performed under this contract and all such materials, supplies and electrical equipment which in his opinion do not conform to the spirit, terms and conditions herein expressed. The Commissioner of Gas and Electricity shall calculate and determine the quantities and amounts of the work performed under this contract and shall certify in writing to the Electrical Engineer of Said Sanitary District the several amounts to be paid said Contractor as the work progresses, provided that all sums due said Contractor for performing "extra work" shall be determined jointly by the Electrical Engineer of the Sanitary District and the Commissioner of Gas and Electricity of the City of Chicago.

To prevent all disputes and ligitation, it is further agreed by and between the said Sanitary District and said Contractor that said Electrical Engineer and said Commissioner of Gas and Electricity shall jointly determine all questions in relation to said work and the construction thereof, and they shall in all cases decide all questions which may arise relative to the execution of the work under this contract on the part of the said Contractor and their estimate and decision shall be final and conclusive; and such estimate and decision, in case any question may arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Electrical Engineer" or "Engineer" are used herein, they shall be understood to mean Electrical Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the words "Commissioner" or "Commissioner of Gas and Electricity" are used herein, they shall be understood to mean the Commissioner of Gas and Electricity of the City of Chicago.

Wherever the words "the work" are used herein they shall be interpreted

to mean the complete work, including all material, labor, tools and appliances necessary to perform and complete everything specified or implied in the contract or shown on the specifications, plans and drawings, in full compliance with the terms and conditions hereof.

Whenever, under the provisions hereof, an order from the Engineer, or the Commissioner, to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Electrical Engineer of The Sanitary District of Chicago, or the Commissioner of Gas and Electricity of the City of Chicago.

SPECIFICATIONS.

DIVISION A.

CHANGING OF PRESENT 5000 VOLT AERIAL CONSTRUCTION UNDER SUBWAYS TO STEEL PIPE CONSTRUCTION, ARMORED CABLE CONSTRUCTION OR STANDARD UNDERGROUND CONSTRUCTION.

General.

(1) These specifications cover the dismantling and removal of the present 5000 volt lighting circuits of the City of Chicago at various steam railroad and elevated railroad subways in the City of Chicago, and re-constructing said circuits at these points as hereinafter specified and as shown on City of Chicago plans and drawings hereinafter referred to and made a part hereof. The Commissioner of Gas and Electricity will furnish to the Contractor all permits that may be necessary to perform the work specified herein.

(2) It is the intent of these specifications, plans and drawings to provide for the work in a complete and satisfactory manner, and the prices bid on the work include the furnishing of all materials, except materials which are specified to be furnished by the City of Chicago, and the furnishing of all labor, tools, appliances and appurtenances that may be necessary to complete the work in the manner contemplated.

Steel Pipe Construction.

(3) At approximately twenty-five (25) subways to be hereafter designated the present aerial construction shall be replaced by what may be termed "steel pipe construction." This will consist in general of installing 5000 volt lead covered cable in steel pipe supported under the subway structure installing potheads at the ends of the pipe and connecting the new cable through the potheads to the existing overhead street lighting circuits. The details of the method to be followed for this class of construction are shown on City of Chicago drawing No. 7601, dated March 27, 1916.

(4) In cases where the existing poles of the aerial street lighting circuits are too great a distance from the subway entrance to permit connections between the new cable and the existing overhead circuits, additional poles shall be set and cross arms, pins and insulators placed thereon and the existing overhead circuits shall be terminated on these new cross arms and connection made to the new cable under the subway. All such new poles that may be required will be furnished by the City of Chicago and delivered to the Contractor at the Storeyard of the City of Chicago, located at 712 S. Halsted street.

(5) A typical example of the method of construction to be employed is shown on City of Chicago drawing No. M-2441, dated May 9, 1919.

Armored Cable Construction.

(6) At approximately forty (40) subways to be hereafter designated the present aerial construction will be replaced with what may be termed "armored cable construction." This will consist in general of installing steel pipe laterals up existing poles or on new poles to be installed, and of installing 5000 volt lead covered, armored cable in a trench in the parkway and through the laterals above mentioned and installing necessary potheads and connecting the new cable to the existing aerial circuit. An example of this last construction is shown on City of Chicago drawing No. M2441, dated May 9, 1919.

Standard Underground Construction.

(7) At approximately twenty (20) subways the present aerial construction will be replaced with standard underground construction. This will consist in general of the installation of manholes at either end of the subway, the construction of a one (1), two (2) or three (3) duct conduit line connecting these manholes, installing

steel pipe laterals from said manholes up existing poles or new poles to be installed, and installing 5000 volt lead covered cable in such conduit line and laterals connecting said cables with the existing aerial circuits.

(8) All manholes shall be constructed in accordance with City of Chicago drawing No. 7663 and shall be furnished with standard frames and covers in accordance with City of Chicago drawings No. 7223 and No. 7660. Conduit lines connecting manholes shall be of either fibre or tile as ordered and shall be constructed in accordance with standard City of Chicago methods as shown on City of Chicago drawing No. 7653.

(9) Steel pipe laterals required from the manhole up the pole shall be in accordance with standard City of Chicago methods as shown on City of Chicago drawing No. 7657.

(10) Single conductor potheads equal in every respect to G. & W. No. 10 type S vertical pothead shall be installed at the end of cable.

(11) At the point where the cable leaves the steel pipe lateral a wooden plug shall be fitted into the pipe. This plug being designated to closely fit the cable and hold same in place. After installation the plug shall be thoroughly coated with P. & B. paint or equal to prevent moisture getting into the lateral.

(12) Where it is necessary to install new poles, such poles will be either of the tubular type as shown on City of Chicago drawing No. 7909 or a thirty (30) foot Bates expanded steel pole. The Contractor will be responsible for all poles delivered to him by the City of Chicago until same have been erected and inspected. He will be required to replace all poles which are bent or otherwise damaged on account of mishandling either in the hauling or removal from their present location in the storeyard of the City of Chicago.

(13) The price for setting tubular steel poles shall include the digging of a 12″ diameter hole and installing a concrete envelope 12″ in diameter around the pole extending from the bottom of the pole to a point 3″ below the curb line grade. Where the poles are set in concrete sidewalks, the concrete envelope around the pole shall extend to the surface of the sidewalk and the sidewalk shall be repaired in a satisfactory manner.

(14) The price for setting each expanded steel pole shall include the digging of the proper size hole to contain a form shown on page 28 of the 1918 Edition of Bates Steel Pole Treatise, for use in connection with a 5″ section pole and the supplying of a concrete envelope of the shape provided by the form extending from the bottom of the pole to a height 3″ above grade on the sidewalk and rounded to shed water. Wherever the poles are set in sidewalks, the sidewalks shall be repaired in a satisfactory manner.

Unless otherwise ordered, all poles shall be set to the following depth:

Sand	5 feet
Clay	4 ft. 6 inches
Loose rock or rubble	4 feet
Solid rock	3 feet

Guying.

(15) Where necessary, poles shall be guyed either to other poles or to railroad structures. The guy wire used shall consist of three-eights (3/8) inch seven (7) strand galvanized cable, having a tensile strength of 4,700 pounds. Galvanized wrought iron thimbles and three bolt galvanized guy clamps shall be used for fastening the guys. Where the guys fasten to the pole, pole bands of approved type shall be used. The guy wire shall in all cases be continuous throughout its length. All guys where the distance between the pole to be guyed and the point at which the guy wire is anchored is less than forty (40) feet shall be considered as standard guys.

(16) The Contractor shall remove all surplus debris from the street within 24 hours after the poles are set and shall clean all concrete from the surface of the streets or sidewalks before same has had time to set and shall leave the street in a condition satisfactory to the Commissioner.

(17) At the base of tubular steel poles which are erected under this contract, the Contractor shall at the time of setting construct a cement mortar base not less than one and three-fourths (1¾) inches thick as measured from the outside surface of the pole. This base shall totally surround the pole and shall extend from the top of the concrete envelope above mentioned to a point three (3) inches above grade and shall be rounded off at this point to shed water. This base

shall be constructed of cement mortar, containing one part of Portland cement mixed with an approved waterproofing composition and with two parts of clean torpedo sand. The base must be troweled and finished and make a firm bond with the top of the concrete envelope and with the pole.

(18) The bottom of each steel pole shall be closed with a wooden plug through the center of which a 1″ hole has been drilled. This plug must be driven tight into the pole, leaving not more than ⅛″ of wood extending beyond the bottom of the pole.

(19) At the top of each tubular steel pole or pole extension there shall be placed as ordered, either a 4″ cast iron acorn pole top as shown on City of Chicago drawing No. 7184, or a malleable iron or steel pole top to be used as a single insulator pin as shown on City of Chicago drawing No. 7702.

(20) Where required, and as ordered, the Contractor shall install cross arms, pins and insulators conforming to City of Chicago standards.

(21) Dead end steel or malleable iron pins must be used to conform to details shown on City of Chicago drawing No. 7652.

Standard Underground Construction with One Manhole.

(22) At approximately four (4) subways, the new construction shall consist of building one manhole conforming to City of Chicago standards, and installing one pipe lateral from said manhole up existing poles or new poles which are to be set and of installing through said laterals and manholes 5000 volt lead covered cable. The work will also include the furnishing and installing of the necessary potheads and connecting the new cable to the existing aerial circuits. The general method used on this type of construction is shown on City of Chicago drawing A-2260, dated April 18, 1919.

(23) The details of the manhole and of the steel pipe laterals and potheads will be the same as specified for the standard underground construction.

Underground Construction with Handhole.

(24) This class of construction shall be identical with the construction above mentioned in Standard Underground Construction with Manhole, except that in place of the manhole a standard City of Chicago handhole shall be used. There will be approximately five (5) subways where this type of construction will be required. The general character of this construction is shown on City of Chicago drawing M-2447, dated May 26, 1919.

Cable.

(25) Whenever lead covered cable or armored cable is specified herein and necessary to be used, the same shall be No. 6, single conductor, solid, lead covered or lead covered and steel armored cable with varnished cambric insulation for 5000 volts working pressure.

Concrete.

(26) Whenever concrete is specified or is necessary for the work covered in these specifications same shall consist of a mixture of cement, sand and stone of the following proportion:

Cement .....1 part
Sand .....3 parts
Stone or washed gravel..6 parts

The cement used shall be Portland cement of an approved brand subject to City of Chicago test. No damaged or lumpy cement shall be allowed on any part of the work. The cement may be taken by weight on the basis of 95 pounds per cubic foot. Sand and stone shall be taken by volume. The sand used shall be clean, dry torpedo sand, free from dust, loam or dirt. The stone or washed gravel shall be of such size as will pass through a ¾″ ring and will not pass through a ¼″ ring. It shall be of a hard close grain quality, free from dust, organic matter, dirt or foreign substance.

(27) The cement, sand and stone or washed gravel shall be thoroughly mixed by hand or in an approved machine. When mixed by hand the ingredients shall be turned by shovels not less than two times, water shall be gradually added and the mass turned with shovels not less than three times and as many more times as will insure thorough mixing.

If mixed in a machine the mixture shall remain in the machine at least two minutes. The proportion of water employed in concrete mixing shall be sufficient to render the concrete plastic enough so that it will readily form a dense mass. The concrete

shall be used immediately after mixing and shall be thoroughly tamped if deemed necessary by the Inspector on the work.

Insulators.

(28) Where insulators are required to be furnished the same shall be of porcelain, conforming to standards used by the City of Chicago and having a rating of not less than 10,000 volts.

Painting.

(29) All steel poles, steel pipe laterals and steel pipe installed under subways, where exposed, shall after installation be thoroughly painted with one coat of a high grade steel paint equal in every respect to "Diamonnette" brand paint manufactured by the Diamond Red Paint Company of Chicago.

Samples of Materials.

(30) Samples of all materials to be used on the work covered by these specifications shall be submitted to the Commissioner of Gas and Electricity of the City of Chicago and his approval obtained before such materials are used in any part of the work.

Underground Structures.

(31) All underground structures, such as sewer, water or gas pipes, conduits and cables, and other obstructures that may be encountered, shall be taken care of by the Contractor at his own expense. No extras will be allowed for additional excavation or other expense made necessary due to any underground obstructions encountered, except at the unit prices stipulated herein and only for actual material furnished or work performed.

Pavement Repairs.

(32) The Contractor shall make temporary repairs to the satisfaction of the Engineer and the Commisioner to any pavements removed or disturbed by reason of the work hereunder. The Contractor shall also make or cause to be made at his own expense and in a manner satisfactory to the Engineer and the Commissioner, permanent repairs to all pavements disturbed by the work hereunder; provided, however, that the Contractor shall not make or cause to be made permanent repairs to any pavements which by reason of ordinances, existing contracts or for any other reason, are required to be kept in repair or to be repaired only by the City of Chicago, by railroad or public service corporations or by contractors who have agreed to maintain streets under the terms of paving contracts. No amounts will be paid to said Contractor by said Sanitary District for permanent repairs made to pavements under reserve or required to be repaired by others.

Caution.

(33) All wires constituting part of the City lighting system of the City of Chicago must at all times be considered as carrying electric current at a dangerous voltage and the Contractor shall under no circumstances permit his men to work on such circuits until he has ascertained from the Inspector on the work each day that such circuits are not alive, and as to the time when such circuits will be made alive on that day, and the Contractor shall further stop all such work and require his men to get clear of such circuits at least one hour prior to the time such circuit or circuits are to be made alive and he shall inform the Inspector on the work that all men under his employ and that all materials under his supervision are clear and will remain clear of said circuit or circuits during the time that such circuits are alive. No work shall at any time be done on any poles or equipment during the time that the circuits on such poles are carrying electric current.

DIVISION B.

PAINTING METAL POLES AND EQUIPMENT.

General.

1. These specifications include furnishing of all material, labor, tools and appurtenances for painting tubular steel poles and equipment thereon, and cast iron lamp posts now in place and being part of the existing street lighting system of the City of Chicago.

2. There will be approximately 40,000 of the tubular steel poles and 5,000 of the cast iron posts to be painted. These quantities will be used for the purpose of comparing bids on the work. The Sanitary District may increase the quantities herein stated to 60,000 tubular steel poles and 10,000 cast iron posts if it so desires. .

3. It is the intent of these specifications to provide for the work in a

complete, thorough workmanlike manner.

Paint.

4. The paint to be used on the work shall be a high grade black, steel paint, equal in every respect to "Diamonnette" brand manufactured by the Diamond Red Paint Company of Chicago.

Warning Signs.

5. "Fresh Paint" warning signs must be displayed in such manner as will show a timely warning to all concerned.

Cleaning Poles.

6. Before painting all poles shall be thoroughly cleaned by wire brushes, scrapers, benzine or other means for removing blisters, rust, millscale, grease, acids, dust, dirt or other foreign matter. Present paint which is in good condition and adheres to the iron shall not be removed but shall be brushed clean of dirt and dust before the paint is applied.

Painting.

7. After being cleaned, all abrased, bare or other spots shall be painted by brush or other approved methods with paint above specified so that an even surface shall be offered before the application of the final coat. After the poles and equipment have been cleaned and bare or other spots have been painted as above specified, there shall be applied over the entire surface one coat of paint. This coat shall be worked out so as to give a uniform and even surface.

8. No painting shall be done in wet or freezing weather and all surfaces must be perfectly clean and dry when the paint is applied.

Caution.

9. All wires constituting part of the City lighting system of the City of Chicago must at all times be considered as carrying electric current at a dangerous voltage and the Contractor shall under no circumstances permit his men to work on such circuits until he has ascertained from the Inspector on the work each day that such circuits are not alive and as to the time when such circuits will be made alive on that day, and the Contractor shall further stop all such work and require his men to get clear of such circuits at least one hour prior to the time such circuit or circuits are to be made alive, and he shall inform the Inspector on the work that all men under his employ and that all materials under his supervision, are clear and will remain clear of said ciricuit or circuits during the time that such circuits are alive. No work shall at any time be done on any poles or equipment during the time that the circuits on such are carrying electric current.

GENERAL CONDITIONS.

Sanitary District Law.

Article 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove obstructions from the Desplaines and Illinois River," approved May 29th, 1889, in force July 1st, 1889, and all amendments and acts supplementary thereto.

Chicago City Ordinances.

Art. 2. The said Contractor agrees to carry on all work provided for in this contract in strict conformity with the ordinances and rules passed by the City of Chicago covering the construction of said work, and to conform to all other regulations or ordinances of the City of Chicago.

Omission on Plans.

Art. 3. The plans and drawings furnished, or to be furnished, form a part of these specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications, plans or drawings.

Approximate Quantities.

Art. 4. It is expressly understood and agreed by the parties hereto that the quantities of the various classes of work to be done and material to be furnished under this contract, which have been estimated as stated in the "Requirements for Bidding and Instructions to Bidders," attached hereto, are only approximate and are to be used solely for the purpose of comparing on a uniform basis the proposals offered for the work under this contract; and the Contractor further agrees that the Sanitary District

will not be held responsible if any of said quantities shall be found incorrect; and said Contractor will not make any claim for damages or for loss of profits because of a difference between the quantities of the various classes of work as estimated and the work actually done. If any error, omission, or mis-statement shall be discovered in the said estimated quantities, the same shall not invalidate this contract or release the Contractor from the execution and completion of the whole or any part of the work herein specified, to the satisfaction of the Engineer and the Commissioner, and in accordance with the specifications, plans and drawings herein mentioned and for the prices herein agreed upon and fixed therefor, or excuse him from any of the obligations or liabilities hereunder, or entitle him to any damages or compensation otherwise than may be provided for in this contract, except for such extra work as may be required, for the performance of which written orders must be given and received as herein specified.

Examination of Site.

Art. 5. All bidders for the work under this contract are required before submitting proposals to examine the sites of the work and adjacent premises, and the various means of approach to the sites, and to make necessary investigations in order to inform themselves thoroughly as to the character and magnitude of all work involved in the complete execution of this contract; also as to the facilities for delivering, handling and installing the equipment at said sites and the conditions and the difficulties that will be encountered in the performance of the work specified herein. No pleas of ignorance of conditions that exist or that may hereafter exist, or of difficulties that will be encountered in the execution of the work hereunder, as a result of failure to make necessary examinations and investigations, will be accepted as a sufficient excuse for any failure or omission on the part of the Contractor to fulfill in every detail all the requirements of this contract, or will be accepted as a basis for any claim whatsoever for extra compensation.

Interference.

Art. 6. The Contractor shall so conduct the work of installation that there shall be no interference with work which may be in progress under contracts with other contractors.

The Contractor shall, at his own expense, repair any damage to any real or personal property occasioned by the Contractor in the execution of this contract.

Changes in Drawings.

Art. 7. The Sanitary District reserves the right to make any changes in the specifications, plans and drawings which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby.

If such alterations increase the quantity of work to be done, where unit prices are specified, such increase shall be paid for according to the quantity of work actually done at the unit price specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done, where unit prices are specified, they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

Extra Work.

Art. 8. The Contractor shall perform only such extra work as the Engineer and Commissioner may direct in their written order, provided however, that no extra work, the total price or cost of which is in excess of $500.00 shall be performed by the Contractor until the Engineer and Commissioner are authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done, which is not contemplated or covered by the prices herein specified, the Engineer and Commissioner shall fix such prices for the work as they shall consider just and equitable, and the Contractor shall abide by such prices provided he enters upon such work with a full knowledge of the prices so fixed by said Engineer and Commissioner; but if the Contractor declines to execute said work at the prices so fixed by said Engineer and Commissioner, then the Sanitary District may contract with any person

or persons for its execution, the same as if this contract had never existed; and if extra work, or work not provided for in this contract is performed by the Contractor before prices have been fixed for such work, then the Engineer and Commissioner shall estimate the same at such prices as they shall consider just and reasonable, and their decision shall be final and binding on both parties hereto and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided that if the extra work done under this contract is of such a nature, being distinct from other work being done by said Contractor, that in the opinion of the Engineer and Commissioner the actual cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work, as determined by the Engineer and Commissioner, with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer and Commissioner for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor, or for damages from any cause whatsoever must be reported to the Engineer and Commissioner in writing at the time such labor or material is furnished or such damages occur, and they must also be presented in writing to them and to the Committee on Engineering of the Board of Trustees of said Sanitary District within ten (10) days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer and Commissioner each day a signed statement of the extra labor and material furnished during that day. The joint written orders of the Engineer and the Commissioner to the Contractor to perform any extra work therein mentioned, and the written notices and statements of the work performed, hereinabove and hereinafter required from said Contractor, are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 9. It is further agreed that in all cases of question or dispute arising or growing out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of the violation of any of the provisions of this contract, the decision of the Engineer and Commissioner shall be final and binding on both parties hereto. In estimating the cost of extra work, the cost of material and equipment shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amount paid for same, as shown by the payrolls of the Contractor, with cost of indemnity insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowanve of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, when requested by the Engineer, certify, by his affidavit, the correctness of the amounts paid for material, equipment and labor.

Supervision, Materials, Workmanship and Inspection.

Art. 10. All work provided for under this contract shall be done under the direction and supervision of the Engineer and the Commissioner and their properly authorized agents.

An inspection of any and all material furnished for use in work shall be made at the site of the work after delivery of the material; provided that the Engineer or Commissioner may at their option perform, or have performed, inspection of material at points other than the site of the work.

All equipment and materials of whatsoever kind to be used in the work shall be subject to inspection and approval of the Engineer and the Commissioner and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately, and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer or the Commissioner. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all equipment and materials and work, which during the

progress and before its final acceptance, may become damaged from any cause, or do not for any reason satisfy the requirements of these specifications, shall be removed and replaced by good and satisfactory equipment, materials and work, without extra charge therefor. The Engineer and the Commissioner and their representatives shall have at all times free access to every part of the work, and to all places where equipment or material to be used in the work is manufactured, or stored, and shall be allowed to examine any equipment or material furnished for use in the work under this contract.

Progress Certificates.

Art. 11. It is further expressly agreed that the granting of any progress certificates, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective equipment, material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Plant.

Art. 12. The Contractor shall furnish all material and supplies, plant, staging and falsework, tools and implements, and teams; in fact, all material and appliances of every sort or kind that may be necessary for the full and complete carrying out of this contract, and shall furnish and maintain, subject to the approval of the Engineer and the Commissioner, all necessary barricades, and other protections, lights and signs, necessary for the proper protection of the public. The cost of all the above shall be covered by the amounts paid at the lump sum or unit prices herein specified, and no extra charge shall be made therefor.

Night, Sunday and Holiday Work.

Art. 13. Whenever the Contractor shall be permitted or directed to perform work on Sundays or a holiday, he shall give written notice to the Engineer and the Commissioner so that proper inspection may be provided. Such work shall be done under the regulations to be furnished in writing by the Engineer, and the Commissioner, and no extra compensation shall be allowed therefor.

Cleaning Site.

Art. 14. The Contractor shall keep the site of the work and adjacent premises as free from material, debris and rubbish as is practicable and shall remove same from any portion of the site, if, in the opinion of the Engineer or the Commissioner such material, debris or rubbish constitutes a nuisance or is objectionable in any way to the public. The Contractor further agrees to remove all materials, implements, barricades, staging, falsework, debris and rubbish connected with or caused by said work immediately upon the completion of the same, and to leave the premises in perfect condition in so far as affected by the work under this contract.

Precautions.

Art. 15. The Contractor shall take whatever precaution that may be necessary to render any portion of the work secure in every respect, or to decrease the liability of accident from any cause, or to avoid contingencies which are liable to delay the completion of the work.

Superintendence.

Art. 16. The Contractor shall at all times have a competent foreman, superintendent or other representative on the work who shall have full authority to act for the Contractor and to receive and execute orders from the Engineer or the Commissioner who shall receive shipments of material to the Contractor, and who shall see that the work is executed in accordance with the specifications and plans and drawings and the orders of the Engineer or the Commissioner thereunder. The Contractor shall furnish the necessary watchmen to protect all materials, tools, and equipment and all work performed by the Contractor until said work has been completed and accepted by the Engineer and the Commissioner.

Workmen.

Art. 17. The Contractor shall employ competent foremen and laborers, and shall discharge, at the request of the Engineer or the Commissioner, any incompetent or unfaithful men in his employ. None but men expert in their respective branches of work

shall be employed where special skill is required.

Patents.

Art. 18.. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Damages.

Art. 19. If any damage shall be done by the Contractor or by any person or persons in his employ to the owner or occupants of any land or to any real or personal property adjoining or in the vicinity of the work herein contracted to be done, or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damages, and cause the Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for injury to real or personal property and for any personal injury sustained by any person growing out of any act or doing of himself, or of his employees, that is in the nature of a legal liability, and he hereby agrees to indemnify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such injuries to real or personal property or injuries received or sustained by any person or persons, from said Contractor, her servants, agents or employees, in the execution of said work; or by or in consequence of any negligence in guarding the same; or by or on account of any omission or act of said Contractor, his agents or employees; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employer's Liability Act.

Art. 20. The Contractor further agrees to insure to his employees or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled "An act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State," providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an act entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10th, 1911, in force May 1st, 1912," approved June 28th, 1913, in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employees in and about the performance of this contract.

Responsibility of Contractor.

Art. 21. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor shall be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it, except as hereinafter specified. The

Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employees.

The Contractor shall not assign by power of attorney or otherwise any portion of the moneys that may become due through the performance of any of this contract.

Subletting Work.

Art. 22. The Contractor shall not sublet any part of the work herein mentioned to any person or corporation that is not in the opinion of the Engineer and the Commissioner, competent, experienced and financially able to properly carry out and execute the same, and in the event that said Contractor desires to sublet any part of the work he shall, prior to such subletting, submit to the Engineer and the Commissioner a statement showing the character of the work and the party or parties to whom it is proposed to sublet the same and his or their experience, financial ability and other qualifications for properly carrying out and completing the same and the decision of the Engineer and the Commissioner as to said qualifications, financial ability, experience and competency shall be final and binding upon both parties hereto. It is further understood and agreed that such subletting, or the approval thereof by the said Engineer, and the Commissioner shall not directly or indirectly release or modify the responsibility of the Contractor for the satisfactory and entire completion of said work and each and every part and portion thereof, and that said Sanitary District shall not be liable to any sub-contractor for any claim or damages whatsoever. In case any party or parties to whom any work under this contract shall have been sublet, shall disregard the directions of the Engineer or Commissioner or their duly authorized representatives, or shall furnish any unsatisfactory work, or shall fail or refuse in any way to conform to any of the conditions of this contract, then, in that case, upon the written order of the Engineer or Commissioner, the Contractor shall require said party or parties in default to discontinue work under this contract. Said work shall be corrected or made good and shall be completed by the Contractor or by such other party or parties agreed upon who shall be satisfactory to the Engineer and the Commissioner.

It is distinctly understood and agreed that the subletting of the work covered by this contract or any part thereof, except as herein above provided shall, after twenty (20) days' notice to said Contractor, work a forfeiture of this contract at the option of the Sanitary District.

Liens.

Art. 23. If at any time during the progress of said work the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies or any sort or kind used or consumed in, upon or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor, or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make payment hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer and the Commissioner the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporation, for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer and Commissioner deem sufficient.

Time and Progress.

Art. 24. The Contractor agrees to begin the work covered by this contract within ten (10) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor and to complete all work within ninety (90) days from the date of approval of said bond.

It is understood and agreed that time is of the essence of this con-

tract, and that a failure on the part of the Contractor to complete the work herein specified within the time will result in loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 25. It is, therefore, covenanted and agreed that in case the said Contractor shall fail or neglect to complete the work under Divisions A and B within the time specified in Article 24, then said Contractor shall pay to said Sanitary District the sum of ten dollars ($10.00) for each and every day that said Contractor shall be in default in the completion of said work.

Said sum of ten dollars ($10.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which said Sanitary District will suffer by reason of such default, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the same, the Engineer and Commissioner shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto.

It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to time and liquidated damages for delays.

Extensions or Additions.

Art. 26. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer and Commissioner will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period of time as may be fixed by said Engineer and Commissioner, and their decision shall be final and binding upon both parties hereto, provided that in such case the Contractor within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provision of this contract with reference to liquidated damages, and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 27. The Contractor shall delay or suspend the progress of the work, or any part thereof, whenever he shall be so required by written order of the Engineer and Commissioner, and for such periods of time as the Engineer and Commissioner may order, provided that in the event of such delay or delays or of such suspension or suspensions, of the progress of the work or any part thereof, the time for the completion of the work so suspended or of the work delayed by such suspension or suspensions, shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer and Commissioner shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay or delays, suspension or suspensions.

Unavoidable Delay.

Art. 28. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by any act or delay of the Sanitary District or of the City of Chicago, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods, or through any default of other parties under contract with said Sanitary District, or due to strikes, or to other causes, which causes of delay mentioned in this article, in the opinion of the Engineer and Commissioner are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed

shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless at the commencement of the delay the Contractor notify the Engineer and Commissioner in writing within four (4) days after the beginning of such delay.

It is further expressliy agreed that said Contractor shall not be entitled to any damages or compensations from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article, except for extra premiums on his bond, actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or the City of Chicago or by other parties under contract with said Sanitary District. The Engineer and Commissioner shall decide the number of days that said Contractor has been so delayed and their decision shall be final and binding upon both parties hereto.

Forfeiture of Contract.

Art. 29. It is further agreed by and between the parties hereto that if said Contractor abandons this contract or fails financially or from any other cause whatsoever is unable to carry out the terms and conditions of this contract and complete the said work; or if this contract shall be assigned by said Contractor without the consent of the Engineer and Commissioner; or if the Contractor shall refuse to or neglect to follow the instructions of the Engineer or the Commissioner; or if, in the opinion of the Engineer and the Commissioner the said work has been or is being delayed by the Contractor; then said Sanitary District may declare this contract forfeited either as to a portion of the work or the whole thereof; and thereupon the said Sanitary District shall have the power to, and may at the cost of said Contractor, complete the said work by letting a new contract.

The cost of fully completing all the work provided for under this contract shall include the sum or sums of money paid by the Sanitary District to other Contractors if all or any part of said work is completed by a new contract or contracts.

The cost of fully completing all the work under this contract as aforesaid by a new contract or contracts shall be charged to the said Contractor, and the amount of said cost or expense so charged shall be deducted from and paid by the said Sanitary District out of any moneys that may be due or may at any time thereafter become due to the said Contractor under and by virtue of this contract, so far as the same shall suffice therefor.

Should the amount remaining unpaid of the contract price be insufficient to reimburse the Sanitary District for the cost of fully completing all work as aforesaid, then the Contractor and his bondsmen shall be liable to pay the amount of said deficiency.

Contractor's Bond.

Art. 30. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the full amount of this contract for the performance of the work hereunder, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such sureties thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Prices.

Art. 31. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the equipment and materials, and for doing all the work contemplated and specified in this contract; also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements, or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work and the whole thereof in full compliance with the drawings, plans and specifications and the requirements of the Engineer and the Commissioner under them, to-wit:

DIVISION A.

(1) For 3'-6"x6'-0"x5'-0" manholes in street, complete as specified, exclusive of valve, trap and sewer connection and exclusive of cost of removing or replacing street pavement, one hundred and forty-three dollars and no cents ($143.00) each.

(2) For 3'-6"x6'-0"x5'-0" manholes in parkway, complete as specified, exclusive of valve, trap and sewer connection, one hundred and forty dollars and no cents ($140.00) each.

(3) For sewer connections from manholes to sewer, including four (4) inch back pressure valve and trap and six (6) feet or less of pipe and connection at sewer, complete as specified, twenty-one dollars and no cents ($21.00) for each connection.

(4) For additional pipe for sewer connections in excess of six (6) feet, furnished and installed complete as specified, ninety-five cents ($0.95) per foot.

(5) For 3'x3'x4' hand hole, complete as specified, exclusive of cost of removing and replacing pavement, seventy dollars and no cents ($70.00) each.

(6) For one (1) three inch (3") single duct conduit installed in street complete as specified, exclusive of cost of removing and replacing pavement: Tile duct, ninety cents ($0.90) per trench foot. Fibre duct, eighty-five cents ($0.85) per trench foot.

(7) For two (2) three inch (3") single duct conduits installed in street complete as specified, exclusive of cost of removing and replacing pavement: Tile duct, one dollar and twenty cents ($1.20) per trench foot. Fibre duct, one dollar and fifteen cents ($1.15) per trench foot.

(8) For three (3) three inch (3") single duct conduits installed in street complete as specified, exclusive of cost of removing and replacing pavement: Tile duct, one dollar and fifty cents ($1.50) per trench foot. Fibre duct, one dollar and forty-five cents ($1.45) per trench foot.

(9) For one (1) three inch (3") single duct conduit installed in parkway complete as specified: Tile duct, eighty-eight cents ($0.88) per trench foot. Fibre duct, eighty-three cents ($0.83) per trench foot.

(10) For two (2) three inch (3") single duct conduits installed in parkway complete as specified: Tile duct, one dollar and fifteen cents ($1.15) per trench foot. Fibre duct, one dollar and seven cents ($1.07) per trench foot.

(11) For one (1) two and one-half inch (2½") steel pipe lateral installed in street complete as specified, exclusive of cost of removing and replacing pavement, ninety cents ($0.90) per trench foot.

(12) For one (1) two and one-half inch (2½") steel pipe lateral installed in parkway complete as specified, ninety cents ($0.90) per trench foot.

(13) For two (2) two and one-half inch (2½") steel pipe laterals installed in street complete as specified, exclusive of removing and replacing pavement, one dollar and seventy cents ($1.70) per trench foot.

(14) For two (2) two and one-half inch (2½") steel pipe laterals installed in parkway complete as specified, one dollar and seventy cents ($1.70) per trench foot.

(15) For one (1) two and one-half inch (2½") steel pipe lateral driven under pavement, installed complete as specified, one dollar and forty cents ($1.40) per foot of pipe.

(16) For two (2) two and one-half inch (2½") steel pipe laterals driven under pavement, complete as specified. one dollar and forty cents ($1.40) per foot of pipe.

(17) For two and one-half inch (2½") steel pipe bends, installed complete as specified, three dollars and fourteen cents ($3.14) each.

(18) For three inch (3") steel pipe bends, installed complete as specified, five dollars and twenty-five cents ($5.25) each.

(19) For two and one-half inch (2½") steel pipe laterals fastened to pole, installed complete as specified, eighty cents ($0.80) per foot of pipe.

(20) For cutting and removing street pavement, all types, one dollar and twenty cents ($1.20) per sq. yd.

(21) For temporary street repaving, all types, seventy cents ($0.70) per sq. yd.

(22) For permanent street repaving, all types, three dollars and eighty cents ($3.80) per sq. yd.

(23) For cutting and removing sidewalk and making permanent repairs to same, one dollar and eighty-two cents ($1.82) per sq. yd.

(24) For furnishing all material and installing complete as specified the construction at each end of subways as shown on drawing No. 7601, revised March 27, 1916, using single conductor potheads, price for each end of subway, thirty-five dollars and no cents ($35.00).

(25) For furnishing all material and installing complete as specified the construction at each end of subways as shown on drawing No. 7601, revised March 27, 1916, using two conductor pothead, price for each end of subway, forty-nine dollars and no cents ($49.00).

(26) For furnishing and installing steel pipe and one (1) No. 6, 5000-volt lead covered cable therein to connect the two ends of the subway construction, complete as specified and as shown on drawing No. 7601, revised March 27, 1916, one dollar and twenty-five cents ($1.25) per foot of pipe.

(27) For furnishing and installing steel pipe and two (2) No. 6, 5000-volt lead covered cables therein to connect the two ends of the subway construction, complete as specified and as shown on drawing No. 7601, revised March 27, 1916, one dollar and forty-five cents ($1.45) per foot of pipe.

(28) For furnishing and installing one (1) No. 6, 5000-volt single conductor, lead covered cable in conduit or in lateral, complete as specified, twenty-two cents ($0.22) per foot of cable.

(29) For furnishing and installing two (2) No. 6, 5000-volt, single conductor, lead covered cables in conduit or in lateral, complete as specified, twenty-one cents ($0.21) per foot of cable.

(30) For furnishing and installing three (3) No. 6, 5000-volt, single conductor, lead covered cables in conduit or in lateral, complete as specified, twenty cents ($0.20) per foot of cable.

(32) For furnishing and installing one (1) No. 6, 5000-volt, single conductor, lead covered cable in trench in parkway, complete as specified, thirty-seven cents ($0.37) per foot of cable.

(33) For furnishing and installing two (2) No. 6, 5000-volt, single conductor, lead covered cables in trench in parkway, complete as specified, twenty-nine cents ($0.29) per foot of cable.

(34) For furnishing and installing three (3) No. 6, 5000-volt, single conductor, lead covered cables in trench in parkway, complete as specified, twenty-six cents ($0.26) per foot of cable.

(35) For furnishing and installing four (4) No. 6, 5000-volt, single conductor, lead covered cables in trench in parkway, complete as specified, twenty-five cents ($0.25) per foot of cable.

(36) For furnishing and installing five (5) No. 6, 5000-volt, single conductor, lead covered cables in trench in parkway, complete as specified, twenty-four cents ($0.24) per foot of cable.

(37) For furnishing and installing one (1) No. 6, 5000-volt, single conductor, armored cable in lateral, complete as specified, forty-two cents ($0.42) per foot of cable.

(38) For furnishing and installing two (2) No. 6, 5000-volt, single conductor, armored cable in lateral, complete as specified, forty cents ($0.40) per foot of cable.

(39) For furnishing and installing three (3) No. 6, 5000-volt, single conductor, armored cable in lateral, complete as specified, forty cents ($0.40) per foot of cable.

(40) For furnishing and installing four (4) No. 6, 5000-volt, single conductor, armored cable in lateral, complete as specified, forty cents ($0.40) per foot of cable.

(41) For furnishing all material and making splice on No. 6, 5000-volt, single conductor lead covered cable, complete as specified, six dollars and forty cents ($6.40) per splice.

(42) For furnishing all material and making splice on No. 6, 5000-volt, single conductor, armored cable, complete as specified, six dollars and ninety cents ($6.90) per cplice.

(43) For furnishing, installing and connecting single conductor standard pothead, complete as specified, ten dollars and ninety cents ($10.90) each.

(44) For furnishing, installing and connecting single conductor pole top pothead, complete as specified, twelve dollars and eighty cents ($12.80) each.

(45) For furnishing, installing and connecting two (2) conductor pole top pothead, complete as specified, twenty-four dollars and no cents ($24.00) each

(46) For furnishing, installing and connecting three (3) conductor pole top pothead, complete as specified, thirty-one dollars and no cents ($31.00) each.

(47) For furnishing, installing and connecting four (4) conductor pole top pothead, complete as specified, thirty-six dollars and no cents ($36.00) each.

(48) For furnishing all material (except poles) and all labor for setting 30 ft. steel poles in 12-inch concrete envelop, including delivery of pole, complete as specified, eighteen dollars and no cents ($18.00) per pole.

(49) For furnishing all material (except poles) and all labor for setting 30 ft. wood poles in 12-inch concrete envelop, including delivery of pole, complete as specified, fourteen dollars and no cents ($14.00) per pole.

(50) For removing present steel

poles and delivering same to storeroom of City of Chicago, ten dollars and no cents ($10.00) per pole.

(51) For removing present wood poles and delivering same to storeroom of City of Chicago, ten dollars and no cents ($10.00) per pole.

(52) For furnishing and installing two (2) pin malleable iron cross arms complete with wood pins and insulators, as specified, three dollars and forty cents ($3.40) per arm.

(53) For furnishing and installing four (4) pin malleable iron cross arms complete with wood pins and insulators, as specified, five dollars and fifty cents ($5.50) per arm.

(54) For furnishing and installing six (6) pin malleable iron cross arms complete with wood pins and insulators, as specified, ten dollars and no cents ($10.00) per arm.

(55) For furnishing and installing two (2) pin wood cross arms complete with wood pins and insulators, as specified, one dollar and sixty cents ($1.60) per arm.

(56) For furnishing and installing four (4) pin wood cross arms complete with wood pins and insulators, as specified, two dollars and no cents ($2.00) per arm.

(57) For furnishing and installing six (6) pin wood cross arms complete with wood pins and insulators, as specified, two dollars and seventy-five cents ($2.75) per arm.

(58) For furnishing and installing iron insulator pins, as specified, ninety cents ($0.90) each.

(59) For furnishing all material and installing forty (40) foot guys where required, complete as specified, five dollars and no cents ($5.00) per guy complete.

(60) For each additional five (5) feet of guy wire in excess of forty (40) feet for each guy, furnished and installed complete, as specified, twenty-five cents ($0.25).

(61) For furnishing and installing each 4"x3' pole extension, including pole collars, adapters and acorn tops, complete as specified, seventeen dollars and eighty-five cents ($17.85).

(62) For furnishing and installing each 4"x5' pole extension, including pole collars, adapters and acorn tops, complete as specified, twenty-one dollars and twenty-five cents ($21.25).

(63) For furnishing and installing single malleable iron pole steps and bands, complete as specified, ninety-eight cents ($0.98) each.

(64) For furnishing and installing double malleable iron pole steps and bands, complete as specified, one dollar and thirty-two cents ($1.32) each.

(65) For furnishing and installing one (1) No. 6 W.P. aerial wire and tieing same in on insulators, complete as specified, five cents ($0.05) per foot of wire.

(66) For furnishing and installing two (2) No. 6 W.P. aerial wires and tieing same in on insulators, complete as specified, five cents ($0.05) per foot of wire.

(67) For removing No. 6 aerial wire and delivering same to storeyard of City of Chicago, one cent ($0.01) per foot of wire.

(68) For removing fixtures from subway structures and delivering same at storeyard of City of Chicago, one dollar and twenty-five cents ($1.25) each.

(69) For removing cross arms and delivering same to storeyard of City of Chicago, twenty-five cents ($0.25) each.

(70) For additional labor of foreman and lineman, one dollar and forty cents ($1.40) per hour.

(71) For additional labor of each lineman, one dollar and twenty-five cents ($1.25) per hour.

(72) For additional labor of each groundman or lineman's helper, one dollar and no cents ($1.00) per hour.

(73) For additional charge for truck or team, including driver, one dollar and sixty cents ($1.60) per hour.

DIVISION B.

For painting tubular steel poles and equipment thereon, complete as specified, one dollar and forty-five cents ($1.45) each.

For painting cast iron lamp posts, complete as specified, fifty cents ($0.50) each.

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents and patented material, appliances and processes used in the work hereunder. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, pat-

ented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

Art. 32. The said Sanitary District agrees to pay said Contractor the sums herein specified in monthly installments as the work progresses upon certificates signed by said Engineer and Commissioner, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed eighty-seven and one half (87½) per cent of the value of the work properly performed under this contract, and that the remaining twelve and one half (12½) per cent shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and the delivery of the final certificates of said Engineer and Commissioner, and payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract.

Final Payment.

Art. 33. Upon the completion of all the work included under this contract, the said Engineer and Commissioner shall give their certificate to that effect, whereupon the said Sanitary District will at the expiration of thirty (30) days after such completion and delivery of such certificates pay, and it hereby binds itself to pay to said Contractor in cash, the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have already been paid, and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the heirs and legal representatives of said Contractor

In Witness Whereof, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Committee on Finance, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its president and to be duly attested and its corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

Know All Men by These Presents, That we, the Freeman-Sweet Company, a corporation organized under the laws of the State of Illinois, as principal and as surety, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of fifty thousand dollars and no one-hundredths ($50,000.00) lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administractors, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this 7th day of August, A. D. 1919.

The Condition of the Above Obligation Is Such, That whereas the above bounden Freeman-Sweet Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the 7th day of August, A. D 1919, for doing all the work, and furnishing all the materials, tools, labor, appliances and appurtenances necessary for changing present 5000 volt aerial construction under subways to steel pipe construction, underground armored cable or underground construction and painting metal poles and equipment thereon.

Now, If the said Freeman-Sweet

Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the plans and drawings accompanying the same, and in the time and manner therein prescribed, and further shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees which in any wise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said Freeman-Sweet Company, its agents, employees or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, and moreover shall pay to said The Sanitary District of Chicago, any sum or sums of money determined by the Engineer and the Commissioner to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including all valid claims for first aid, medical, surgical and hospital services and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 28th, 1913; in force July 1st, 1913, and all Acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said Freeman-Sweet Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, and shall repay any overpayment, then is this obligation to be null and void, otherwise to remain in full force and effect.

And It Is Hereby Expressly Understood and Agreed, And made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suits for damages occasioned by carelessness or neglect of said Freeman-Sweet Company, or agents, employees or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28th, 1913; in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or death suffered by employees, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Freeman-Sweet Company shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 12, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

General Payroll First Half of August, 1919.

L. F. King, Clerk (general payroll)		$ 32,250.71

Construction Account.

L. F. King, Clerk (expenses of employes)	$ 144.61	
Jas. O. Heyworth (labor and material for hand railing, I. & M.)	994.26	
Nash-Dowdle Company (labor and material, temporary pumping service at Evanston, Ill.)	775.00	
Carl John Stein Company (plumbing service, etc., Calumet Sewage Pumping Station)	612.50	
Nash Bros. (moving office)	75.69	
The Kellogg-Mackay Company (pipe fittings)	26.64	
Public Service Company of Northern Illinois (electrical energy)	.50	
		2,629.20

Maintenance and Operation Account.

L. F. King, Clerk (expenses of employes)	$ 90.42	
L. F. King, Clerk (special roll, Lawrence Ave. Pumping Station)	198.40	
L. F. King, Clerk (freight charges on fuel, 39th St. Pumping Station)	203.69	
L. F. King, Clerk (freight charges on fuel, 39th St. Pumping Station)	140.41	
L. F. King, Clerk (freight on fuel, 39th St. Pumping Station)	54.54	
H. W. Johns-Manville Company (cement, etc., 39th St. Pumping Station)	48.50	
American Supply Company (white waste, 39th St. Pumping Station)	50.22	
Wadsworth-Howland Company (paint, 39th St. Pumping Station)	48.52	
Wilbur J. Connell (screws, etc., 39th St. Pumping Station)	42.78	
United Asbestos & Packing Company (valve steam packing, 39th St. Pumping Station)	16.80	
Standard Oil Company (kerosene and gasoline, 39th St. Pumping Station)	15.75	
Weil Bros. (pipe fittings, 39th St. Pumping Station)	13.24	
Hinckley & Schmitt, Inc. (drinking water, 39th St. Pumping Station)	8.50	
Wilbur J. Connell (galvanized pails, 39th St. Pumping Station)	6.50	
Chicago Chemical & Polish Company (metal polish, 39th St. Pumping Station)	5.56	
Geo. Corbett Boiler & Tank Company (repairs, Lawrence Ave. Pumping Station)	486.15	
Anderson Oil Company (engine and cylinder oil, Lawrence Ave. Pumping Station)	121.55	
Thos. B. Banner (beam clamps, Lawrence Ave. Pumping Station)	40.70	
Amounts carried forward	$ 1,592.23	$ 34,879.91

Amounts brought forward	$ 1,592.23	$ 34,879.91
Jos. T. Ryerson & Son (beams, bars steel and chain, Lawrence Ave. Pumping Station)	36.83	
Geo. B. Carpenter & Co. (load chain and load hook, Lawrence Ave. Pumping Station)	16.80	
Stebbins Hardware Company (stocks and dies, Lawrence Ave. Pumping Station)	13.39	
Stebbins Hardware Company (galvanized sash cord, Lawrence Ave. Pumping Station)	8.75	
Kirby Motor Trucking Company (cartage charges, Lawrence Ave. Pumping Station)	8.24	
Geo. B. Carpenter & Co. (paper mill hooks, Lawrence Ave. Pumping Station)	4.09	
Stebbins Hardware Company (fuse wire and friction tape, Lawrence Ave. Pumping Station)	3.40	
H. M. Hooker Company (oil, Lawrence Ave. Pumping Station)	2.92	
Wire Wheel Corporation of America (new wire wheel)	25.03	
Dan Smith Motor Company (piston, etc.)	26.00	
Vesta Accumulator Company (head lamp)	12.69	
Auto Radiator Mfg. Company (radiator repaired)	7.50	
Consumers Company (bags medusa)	7.25	
General Electric Company (fusible links)	4.05	
Stewart-Warner Speedometer Corporation (pinion with nut)	.70	
Jos. Sandeen (teaming)	79.60	
Green Engineering Company (drive links and clips)	23.60	
Wilbur J. Connell (floor brushes)	10.39	
		1,884.46

I. and M. Canal and Illinois River Conditions Department.

E. H. Heilbron (expenses of employes)	$ 130.91	
E. H. Heilbron (expenses of employes)	93.12	
Elliott & Harman Engineering Company (one plant table outfit)	175.00	
Hotel Commercial (boarding and lodging of survey party)	128.75

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller and Paullin—Six.

Nays—None.

MISCELLANEOUS AND NEW BUSINESS.

Mr. Lawley presented the following ordinance:

Be It Ordained by the Board of Trustees of the Sanitary District of Chicago.

SECTION 1. That there be, and is hereby laid out, located and established a right-of-way for an intercepting sewer and drain and outlet, together with all necessary appurtenances thereto, the same to constitute an adjunct and addition to the Calumet-Sag Channel and of the Main Channel of The Sanitary District of Chicago, upon, under and through the following described real estate situated in the City of Chicago, to-wit:

A strip of land sixty-six (66) feet in width extending from the west line of Section twenty-seven (27), Township thirty-seven (37) north, Range fourteen (14) east of the Third Principal Meridan south of the Indian Boundary Line to the easterly boundary line of the right of way of the Chicago & Western Indiana Railroad, the center line of said strip of land being the east and west center line of said Section twenty-seven (27).

SEC. 2. That there be, and is hereby laid out, located and established the site of an intercepting sewer, sewage treatment plant, pumping station and outlet, with all necessary appurtenances thereto, the same to constitute an adjunct and addititon to the Calumet-Sag Channel and of the Main Channel of The Sanitary District of Chicago to remove from said sewage garbage, dead animals and parts thereof and other solids upon, under and through the following described real estate situated in the City of Chicago, to-wit:

That part of Section twenty-seven (27) Township thirty-seven (37) north, Range fourteen (14) east of the Third Principal Meridian south of the Indian Boundary Line lying north of a line thirty-three (33) feet south of and parallel to the east and west center line of said Section twenty-seven (27), east of the Chicago and Western Indiana Railroad right of way and east and south of the property of the American Malting Company and south and west of the Michigan Central Railroad property.

SEC. 3. Attached hereto and made a part of this ordinance is a plat or map entitled "Ordinance Map for Right of Way of an Intercepting Sewer and Drain and Site of Intercepting Sewer Sewage Treatment Plant and Outlet, the same to be Adjuncts and Additions to the Calumet-Sag Channel and the Main Channel of The Sanitary District of Chicago August 14, 1919, on which said plat or map is indicated in red said right-of-way and site.

SEC. 4. That the construction of the works, structures and improvements above described is hereby provided for, and there shall be constructed, maintained and operated upon, under and through the right of way described in Section 1 of this ordinance a sewer and drain, together with all necessary appurtenances thereto, the same to constitute an adjunct and addition to the Calumet-Sag Channel and of the Main Channel of The Sanitary District of Chicago and there shall be constructed, maintained and operated upon, under and through the real estate described in Section 2 of this ordinance an intercepting sewer, sewage treatment plant and outlet, with all necessary appurtenances thereto, the same to constitute

an adjunct and addition to the Calumet-Sag Channel and the Main Channel of The Sanitary District of Chicago.

SEC. 5. That the construction, maintenance and operation of the works, structures and improvements described in this ordinance is necessary in order to remove and take from the sewage discharged into the Calumet-Sag Channel and the Main Channel of The Sanitary District of Chicago from said works, structures and improvements, all garbage, dead animals and parts thereof and other solids, and in order to keep and maintain the water of the said Calumet-Sag Channel and of the Main Channel and of the Desplaines and Illinois Rivers in such condition that said water shall be neither offensive or injurious to the health of any of the people of the State of Illinois.

SEC. 6. That the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago is hereby authorized and directed to negotiate for, and to purchase for and on behalf of The Sanitary District of Chicago, upon such terms as said Committee on Finance may deem just and reasonable, not to exceed, however, the fair cash market price of the same, the pieces or parcels of land described in Sections 1 and 2 of this ordinance or any interest or right therein or pertaining thereto, and in the event that said Committee on Finance is unable to agree with any of the owners or parties in interest for, or in respect to, the compensation to be paid to any of said owners or parties in interest for any of said pieces or parcels of land, or for any interest or right therein, or pertaining thereto, then the Attorney of the District shall institute proceedings on behalf of The Sanitary District of Chicago in such court as he may deem proper to acquire said pieces or parcels of land, or any interest or right therein, or pertaining thereto, under and by virtue of the Eminent Domain Laws of the State of Illinois.

SEC. 7. This ordinance shall be in force and become effective from and after its passage.

JAS. H. LAWLEY.

Mr. Lawley moved that the ordinance be passed.

Mr. Nance moved as a substitute for the ordinance that the Chicago Real Estate Board be directed to make a valuation of the property outlined in said ordinance, and to report back to the Board at the very earliest moment.

Mr. Lawley moved that the substitute of Mr. Nance be laid on the table.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller and Paullin—Six.

Nays—Mr. Nance—One.

The question recurring on the motion to pass said ordinance, was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller and Paullin—Six.

Nays—Mr. Nance—One.

ADJOURNMENT.

Mr. Lawley moved that the Board adjourn.

The motion prevailed.

L. E. King

Clerk.

C43c

NOV 10 1919

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, AUGUST 21, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the Chair, and the roll being called, there were:

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley and Paullin—Six.

Absent—Messrs. Littler, Mueller and Nance—Three.

Bids.

The Clerk opened and read the bids received for paving the Blue Island and Riverdale road, as shown in the following schedule of bids on page 1112A.

Mr. Clark moved that the bids be referred to the Chief Engineer for tabulation and to the Committee on Engineering for report.

The motion prevailed.

The Clerk transmitted receipt of the Treasurer dated August 15, 1919, for $20,000.00 from John McGillen, retiring Clerk of the Sanitary District, being the return of the emergency fund of the Clerk created by order of the Board December 13, 1912, which said amount has been deposited to the credit of the Sanitary District, G. M. Reynolds, Treasurer, which was ordered published and filed, as follows:

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Herewith is transmitted receipt of the Treasurer, dated August 15th instant, for twenty thousand dollars ($20,000.00) in favor of John McGillen, retiring Clerk of the District, same being in return of Clerk's Emergency Fund created by order of the Board of Trustees December 13, 1912.

Said amount has been deposited to the credit of The Sanitary District of Chicago, G. M. Reynolds, Treasurer.

Respectfully submitted,

L. F. KING,
Clerk.

CHICAGO, August 15, 1919.

Received of John McGillen, retiring Clerk of The Sanitary District of Chicago, twenty thousand ($20,000.00) dollars, same being amount of Clerk's Emergency Fund created by order of the Board of Trustees of The Sanitary District of Chicago December 13, 1912 (page 1471 of the Proceedings).

G. M. REYNOLDS,
Treasurer.
J. R. WASHBURN,

REPORTS OF COMMITTEES.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, August 21, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that coal screenings when stored in piles are likely to catch fire spontaneously and it is necessary to have on hand at the Thirty-ninth Street and Lawrence Avenue Pumping Stations during the coming winter a supply of coal which can be used in case screenings cannot be delivered on account of strikes, delays in shipments or other contingencies, and he requests that he be authorized to prepare specifications for furnishing said coal on a British thermal unit basis.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to prepare specifications for the purchase of lump coal to supply the 39th Street and Lawrence Avenue Pumping Stations during the coming winter to be used for the purposes stated on the British thermal unit basis and that the Clerk advertise for bids therefor in accordance with the specifications to be prepared by the Chief Engineer.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Finance.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley and Paullin—Six.

Nays—None.

Mr. Clark presented the following re-

port from the Committee on Engineering:

CHICAGO, August 21, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on August 7, 1919 (page 961 of the Proceedings) authorized the Chief Engineer to prepare plans and specifications for constructing a macadam pavement on the Blue Island and Riverdale Road between Halsted street and Wentworth avenue and to present the same to your Committee for its approval.

Your Committee further reports that it has considered plans and specifications for said macadam pavement prepared by the Chief Engineer, has approved same and recommends the passage of the following order:

Ordered, That the plans and specifications prepared by the Chief Engineer for doing the work above specified be, and the same are hereby approved.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley and Paullin—Six.

Nays—None.

Real Estate Development.

Mr. Carr presented the following report from the Committee on Real Estate Development:

CHICAGO, August 21, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Real Estate Development transmits herewith forms of leases to be entered into between the Sanitary District and the following parties:

1. Gust Blasing of lot 223 in Sanitary District Trustees' Subdivision of the right of way from north and south center line of Section 30, Township 39 North, Range 14 East of the 3rd Principal meridian to the Will County line, containing 25.80 acres of land more or less, of which ten acres are available for pasture from July 1, 1919 to June 30, 1922, at an annual rental of $25.00.

2. L. I. Conrad of lots 121, 123, 125, 127, 129 and 131 of said Trustees' Subdivision (except five acres of said lot 131 adjacent to the Canal under lease to Joseph Brabec) containing 105.23 acres of land more or less, from Sept. 1, 1919, to Aug. 31, 1922, at an annual rental of $263.00.

3. Francis F. Lukas of lots 167, 169, 171, 175, 178, 181, 183, and 10 acres of lot 186 of said Trustees' Subdivision, containing 71.9 acres of land more or less, from June 1, 1919 to May 31, 1922, at an annual rental of $150.00.

4. E. A. Preller, tracts 21A, 22A and 25A, part of the right of way of the Calumet-Sag Channel containing seven acres of land from August 1, 1919, to July 31, 1922, at an annual rental of $35.00.

5. Mike Chejlava, tracts 145, 146, 150, 151 and 155 of the right of way of the Calumet-Sag Channel containing about 9 acres of arable land and 77 acres of poor pasture land from January 1, 1919 to December 31, 1921, at an annual rental of $150.00.

Your Committee reports that said leases are in the usual form, and provide that the Sanitary District may

terminate the same by giving 90 days' notice in writing to said tenants of its intention so to do, in the event that it desires to use said land for any of its corporate purposes.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees and the Clerk be, and they are hereby, authorized and directed to execute, in duplicate the forms of leases herewith submitted, the same having been executed by said lessees.

Respectfully submitted,
PATRICK J. CARR,
Chairman.
WM. J. HEALY,
WALLACE G. CLARK,
Committee on Real Estate Development.

Mr. Carr moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley and Paullin—Six.

Nays—None.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a communication from Col. W. V. Judson.

WAR DEPARTMENT
UNITED STATES ENGINEERS OFFICE
508 Federal Bldg.,
Chicago, Ill.

August 15, 1919.

From the District Engineer to Mr. C. Arch Williams, 910 S. Michigan Ave., Chicago, Ill.

DEAR SIR—Receipt is acknowledged of your letter of August 14, 1919, calling to my attention certain details in connection with the acquisition of land by the Sanitary District. The same will be given due consideration, and I thank you for advising me so fully. This is very gratifying.

Very respectfully,
W. V. JUDSON,
Colonel, Corps of Engineers.

Referred to the Committee on Engineering.

Committee of the Whole.

Mr. Clark moved that the Board resolve itself into the Committee of the Whole to receive a verbal report of the Attorney in reference to the employment of Messrs. C. A. Williams and Ralph Peck to represent the Sanitary District in regard to the collection of delinquent taxes.

The motion prevailed and the Board resolved itself into the Committee of the Whole with Mr. Healy in the Chair.

The Committee of the Whole rose and the Board resumed business.

The Chairman reported that the Committee had considered the recommendations of the Attorney of the Board that Messrs. C. A. Williams and Ralph Peck be employed to represent the Sanitary District in regard to the collection of delinquent taxes, the compensation to be paid Messrs. Williams and Peck to be 20% of the amount of delinquent taxes collected. A motion was carried that the entire subject matter be referred to the Committee on Judiciary with full power to act.

Mr. Healy moved that the report of the Committee be adopted.

The motion prevailed.

ADJOURNMENT.

Mr. Carr moved that the Board adjourn.

The motion prevailed.

L. E. King
Clerk.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

TUESDAY, SEPTEMBER 4, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel presiding, the roll being called, there were:

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Absent—Mr. Paullin—One.

Bids.

The Clerk opened and read bids received for furnishing lump coal for the 39th Street Pumping Station as shown on page 1118 of the Proceedings.

Mr. Clark moved that the bids be referred to the Chief Engineer for tabulation and to the Committee on Engineering for report.

The motion prevailed.

REPORTS OF OFFICERS.

The Clerk read a report of Attorney C. Arch Williams relative to the depositing of $25,000 worth of bonds of the

THE SANITARY DISTRICT OF CHICAGO

BIDS FOR FURNISHING LUMP COAL FOR 39TH ST. PUMPING STATION

In Order of Magnitude—Lowest Bid First

Bids Opened September 4, 1919

In Order Received	In Order of Magnitude	1 Name and Address of Bidder	2 Amount of Deposit	3 Name of Fuel	4 Per Cent of Moisture as Delivered	5 Per Cent of Ash in Dry Coal	6 B. T. U. per Pound of Dry Coal	7 Price per Ton Delivered on Cars	8 * Net B. T. U. for One Cent
1	1	East Coal Co., Chicago, Ill..	$200.00	Diamond Mine, Perry. Co., Ill...	8.4	13.0	12,700	$5.51	41,253

The lowest bid is the one furnishing the greatest number of net British Thermal Units for one cent.

*This is computed from figures in columns 4, 5, 6 and 7, furnished by the bidder as per rule in specifications.

$$\text{Net B. T. U. for one cent} = \frac{2000 \times \text{B. T. U. per pound dry coal} \times (100 \text{ per cent, less per cent of moisture as delivered})}{\text{Price per ton} + (1 \text{ cent} \times \text{number of per cent of ash in dry coal})}$$

Second Liberty Loan with the Treasurer, which was ordered published and filed, as follows:

CHICAGO, September 4, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Pursuant to directions of the Committee on Finance at a recent meeting, I prepared, in triplicate, a receipt to be signed by the Treasurer of the Sanitary District for Second Liberty Loan Bonds of the Value of $25,000.00, without coupons attached, which bonds have been held by Mr. John McGillen, former Clerk of the District, pursuant to an escrow agreement between the District and the T. J. Forschner Contracting Company, dated June 20, 1918 (page 1015 of the Proceedings) in accordance with an order of the Board of Trustees passed August 8, 1918 (page 892 of the Proceedings).

These bonds have been delivered to the Treasurer of the District, who has signed a receipt therefor in triplicate, the original of which is attached hereto and should be filed with the Clerk. The duplicate copy is held by Mr. John McGillen and the triplicate copy is to be delivered to the T. J. Forschner Contracting Company.

Respectfully submitted,
C. ARCH WILLIAMS,
Attorney.

CHICAGO, August 28, 1919.

RECEIPT FOR LIBERTY BONDS.
Forschner Contract.

Received from Mr. John McGillen five Second Liberty Loan Bonds each for One Thousand Dollars ($1,000.00) numbered respectively 791342, 791343, 791344, 791345, 791346, and two Liberty Loan Bonds each for the sum of Ten Thousand Dollars ($10,000.00) numbered respectively 34142 and 34143 without coupons attached to any of said bonds, the four coupons attached to each bond, the last of which matured in November, 1919, having been already detached, which bonds were delivered to and held by said John McGillen as Clerk of the Sanitary District of Chicago under an escrow agreement between said District and the T. J. Forschner Contracting Company dated June 20, 1918 (Proceedings Page 1015) in accordance with an order of the Board of Trustees passed on August 8, 1918 (Proceedings Page 892).

This receipt is executed by the undersigned in triplicate, one to be delivered to the Board of Trustees of the Sanitary District, one to Mr. John McGillen, and one to said Forschner Contracting Company.

G. M. REYNOLDS,
Treasurer.
By J. R. WASHBURN,
Assistant Treasurer.

CHICAGO, September 4, 1919.

The Clerk presented his report of purchases made during the month of June, 1919, which was ordered published and filed, as follows:

To The Honorable The Committee On Finance.

GENTLEMEN—I submit herewith statements of all purchases made by me under authority of The Board of Trustees for the month of June, 1919.

Trusting that same will meet with your approval, I remain,

Yours very truly,
L. F. KING,
Purchasing Division.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, August 28, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to report that the semiannual interest on the sixteenth issue of

bonds of the Sanitary District, amounting to the sum of ten thousand, eight hundred eighty ($10,880.00) dollars, will fall due September 15, 1919 and recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to draw a warrant payable to the order of the Treasurer of The Sanitary District of Chicago, for the sum of ten thousand, eight hundred eighty ($10,880.00) dollars, to pay the semiannual interest due September 15, 1919, on five hundred forty-four thousnad ($544,000.00) dollars of the sixteenth issue of bonds at 4 per cent per annum.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance.

CHICAGO, September 4, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a request from the Chief Engineer to make a transfer of funds from an unexpended account to other accounts in order to provide funds for the payment of expenditures for which no appropriations were made.

Your Committee having considered the matter, is of the opinion that said requests should be granted, and, therefore recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby, authorized and directed to make the following transfers in appropriations for the year 1919 in accordance with the request of the Chief Engineer attached hereto.

Department of Engineering.

From Account No. 64-J-6-Main Channel Storage Basin.....$10,256.57

To the following accounts:

No. 641-H-29 Byrne Bros. Dredging and Engineering Company, claim Section 9, Calumet-Sag Channel $9,256.57

No. 641-H-29a Calumet-Sag Channel, Section 9 ..... 1,000.00

Total $10,256.57

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
CHAS. H. SERGEL,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, September 4, 1919.

To the Honorable, the President, and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for payments on sundry contracts and fo rmiscellaneous services and supplies, and recommends that they be approved and ordered paid.

Mr. Lawley moved that the report be adopted and that the accompanying vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel *(except as to voucher in favor of T. J. Forschner Contracting Co., for $46,783.07, on which Mr Sergel voted "nay")*, Carr, Clark, Healy, Lawley, Littler and Mueller—Seven

Nays—None *(except as above stated)*.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, September 4, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the General Assembly of the State of Illinois, at its last session passed an Act, in force July 1, 1919, by the terms of which the Sanitary District was authorized to build and maintain highways along or near any of its channels on land owned by it and to repair and maintain the same whenever such highways so constructed or maintained are, in the discretion of the Board of Trustees necessary to make accessible and available for convenient use, dock property owned by the Sanitary District.

Your Committee further reports that it has received a report from the Chief Engineer relative to the right of way of the Sanitary District along its North Shore Channel with special reference to its availability for use as dock property which in general terms describes the location of said right of way, its width at various points, the channel built through the same and the accessibility of said right of way for dock purposes.

It appears that that part of said right of way extending from Lawrence avenue to a point where the same reaches the residential sections of the City of Evanston and Village of Wilmette is rapidly developing into business property and if a dock is constructed along its bank it can be devoted to that purpose, while that portion of said right of way located in the City of Evanston and the Village of Wilmette for a distance of about one and one half miles, if a dock is constructed along its bank can be devoted to other purposes. To render such docks accessible for all kinds of traffic it is necessary to construct a heavy traffic concrete highway along the bank of the North Shore Channel from Lawrence avenue to connect with Sheridan Road in the Village of Wilmette, consisting of a concrete highway 35 feet wide, 12 inches thick at the center and 8 inches thick at the sides with macadam shoulders 4 feet wide which will stand up under the heaviest traffic for many years.

The Chief Engineer recommends that a highway such as described be constructed upon the right of way of the North Shore Channel of the Sanitary District along the following route: beginning at Lawrence avenue and running near the east line of the right of way of said North Shore Channel to Lincoln avenue, thence across said channel and northerly near the west line of said right of way to Emerson street, thence back across said channel and running along near the east line of said right of way to Sheridan Road, Wilmette, the construction of said highway to include all necessary bridges, ditches culverts and a subway under the tracks and right of way of the Chicago & Northwestern Railroad Company (Mayfair Division) and all works incidental to a heavy traffic highway.

Your Committee having carefully considered the report of the Chief Engineer above referred to fully concurs in the same, and finds that in order to make the dock property of the Sanitary Dis-

trict, along its North Shore Channel, described in said report, accessible and available, it is necessary to construct upon said right of way such a heavy traffic highway following the route described by the Chief Engineer, and therefore recommends the passage of the following order:

Ordered, That the recommendation of the Chief Engineer to construct a heavy highway such as is described by him in said report, on the right of way of the North Shore Channel of the Sanitary District following the route therein specified be and the same is hereby approved.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
PATRICK J. CARR,
JAS. H. LAWLEY,
MATT A. MUELLER,
Committee on Engineering.

CHICAGO, September 2, 1919.

To the Honorable, the Chairman and Members of The Committee on Engineering.

GENTLEMEN—I have the following to report relative to the property of the Sanitary District along the North Shore Channel, with special reference to its availability for use as dock property.

At the present time both banks of the North Branch of the Chicago River are given over to industrial plants, using docks, as far north as Berteau avenue, which is three-fourths of a mile south of Lawrence avenue. Undoubtedly similar industries will, in the near future, push on upstream and the banks of the North Shore Channel will be in demand for dock purposes.

The right-of-way of the Sanitary District begins at Lawrence avenue and extends northerly for a distance of approximately eight miles to the shore of Lake Michigan in Wilmette. It comprises a strip of land approximately 660 feet wide, but it is as wide as 1100 feet in places. The North Shore Channel is about 80 feet wide at the water line and occupies generally the center of this 660 foot strip. There is, therefore, a strip of land about 290 feet wide on each side of the channel available for lease. At two places on the west side f the channel, the available property is wider. Between Ainslie and Argyle streets it is 400 feet wide and between Foster and Bryn Mawr avenues, for a distance of half a mile it has an average width of 640 feet. At one place, on the east side of the channel, between Touhy and Howard avenues, for a distance of half a mile, there is no property available for the reason that all the property, except the slope of the bank, is owned by the National Brick Company, which is using this slope for dockage. This company has constructed docks and slips and is making use of the North Shore Channel for navigation.

At the present time there is only one industrial lease from the Sanitary District along the North Shore Channel, namely, a parcel of land with dockage rights, just north of Lawrence avenue west of the channel. More of this property could be leased if a proper road were constructed making it accessible. There is no road paralled to and near the North Shore Channel and most of the roads crossing it are narrow, few of them paved, none constructed for heavy traffic, and generally they are one-half mile apart.

The Chicago and West Ridge Railroad runs parallel to the North Shore Channel, immediately east of the right-of-way of the Sanitary District from Lincoln avenue to Oakton avenue, a distance of two and one-half miles. This territory should develop rapidly into good dockage property. The next two and one-half miles of property along the Channel between Oakton avenue and West Railroad avenue, lies just west of the industrial section of Evanston, practically all of it within

one-half mile of the Chicago & Northwestern Railroad. This should also develop into good dockage property.

West of the North Shore Channel, practically all of the five mile stretch of territory from Bryn Mawr avenue to Emerson street is devoted to truck farming. The produce from this section could be transported to the South Water street district more cheaply by water than by the present methods. This would require the use of docks along the channel. One industrial plant, a gas plant, is now located on this side of the channel, at Oakton avenue.

The north end of the North Shore Channel passes through residence sections of Evanston and Wilmette, except the small section around Central street, Evanston, which is devoted to business. This one and one-half mile reach of the channel could be devoted to docks for pleasure craft.

It is obvious that practically all of the Sanitary District property along the North Shore Channel should develop into good dock property. A start has already been made by the lease at Lawrence avenue.

In order for this property to be developed so that it can be leased for dockage, and thus bring in revenue to the Sanitary District it is necessary that it be made easily accessible to all kinds of traffic. Accessibility can be obtained by the construction of a substantial road along the North Shore Channel from Lawrence avenue, Chicago, to Sheridan Road, Wilmette. A concrete raod, 36 feet wide, 12 inches thick at the center and 8 inches thick at the sides, with macadam shoulders four feet wide, should stand up under the heaviest traffic for the next decade, and longer if properly maintained. This will probably prove to be the cheapest form of road, as to first cost and maintenance.

I therefore recommend the construction of such a road along the North Shore Channel, beginning at Lawrence avenue, Chicago, and running near the east property line of the Sanitary District to Lincoln avenue; then across the channel and northerly near the west property line to Emerson street; then back across the channel and running along near the east right-of-way line to Sheridan Road, Wilmette; such construction to include all necessary drainage ditches, culverts, a subway under the Chicago & Northwestern Railroad (Mayfair Division), and all works incidental to a heavy traffic road.

Respectfully submitted,

G. M. Wisner,
Chief Engineer.

51st G. A. House Bill No. 260 in Senate, 1919.

Reported from House, May 23, 1919.

Read first time, ordered printed, and referred to Committee on Judiciary.

A Bill.

For an Act to amend an Act entitled, "An Act to create sanitary districts and to remove obstructions in the Desplaines and Illinois Rivers," approved May 29, 1889, in force July 1, 1889, as amended, by adding thereto a section to be known as section 10a.

Section 1. Be it enacted by the People of the State of Illinois, represented in the General Assembly: An Act entitled, "An Act to create sanitary districts and to remove obstructions in the Desplaines and Illinois Rivers," approved May 29, 1889, in force July 1, 1889, as amended, is amended by adding thereto a section to be known as section 10a, to read as follows:

Sec. 10a. Any district organized under this Act shall have power to build and miantain highways along or near any canal or channel built by the District upon land owned by said District, and to repair and maintain public highways near or along any such canal or channel, whenever such highways so constructed, or so repaired or maintained, are necessary, in the discretion of the Board of Trustees, to make accessible and avail-

able for convenient use dock property owned by the district.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Passed and not voting—Mr. Carr—One.

Mr. Clark presented the following report from the Committee on Engineering.

CHICAGO, September 4, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that on November 4, 1915 (page 1547 of the Proceedings) A. Guthrie & Co. Inc. entered into a contract with the Sanitary District for the excavation and collateral work on section 14 of the Calumet-Sag Channel, by the terms of which the mechanical and electrical equipment for the operation of and the sector gates themselves are to be tested in operation by said Contractor. He further states that the Sanitary District agreed to place transformers in the transformer house near said gates and to furnish electrical current thereto for the use of said Contractor in making said tests but in order to furnish said current, the Sanitary District will be obliged to install said transformers at once, and run three wires thereto from the nearest transmission lines of the Sanitary District which are on Ashland avenue.

He further states that said Company is now using electrical current furnished by the Public Service Company of Northern Illinois at a point between five and six hundred feet from said sector gates and that wires can be run and electric current furnished to make said tests at a cost of not to exceed $300.00 which is much cheaper than if such service is furnished by the Sanitary District, and he requests that he may be authorized to order A. Guthrie & Co. Inc. to perform the work above specified and obtain said electrical current, the same to be paid for under the extra work clause of its said contract.

Your Committee having had the matter under consideration, recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to order A. Guthrie & Co. Inc. to perform the work above specified and to obtain said electrical current the same to be paid for under the extra work clause of its said contract, provided the cost of the same shall not exceed the sum of $300.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

MATT. A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
H. E. LITTLER,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Clark, Healy, Lawley, Littler and Mueller—Five.

Nays—None.

Passed and not voting—Messrs. Sergel and Nance—Two.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, September 4, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering to which were referred at the meeting held August 21, 1919 (page — of the Proceedings) bids for paving the Blue Island and Riverdale Road, having considered all proposals presented and the qualifications of each bidder together with the report submitted by the Chief Engineer finds that the lowest responsible bidder is the James A. Sackley Company.

Your Committee further reports that it is of the opinion that said Company is competent to comply satisfactorily with the terms and conditions of the contract for doing said work and having had the matter under consideration recommends the passage of the following order:

Ordered, That the contract for paving the Blue Island and Riverdale Road be and the same is hereby awarded to the James A. Sackley Company for the unit prices named in its bid aggregating the sum of $23,200.00, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute in duplicate the said contract in accordance with the plans and specifications of the Sanitary District when the same shall have been executed by said James A. Sackley Company and a bond for the faithful performance of said contract has been approved by the Committe on Finance, and said Company has deposited with the Sanitary District Liberty Bonds, payable to bearer, of the face value of $12,000.00 as additional security for the faithful performance of said contract in accordance with the terms of an agreement executed by said Company and the Sanitary District, the form of which is to be approved by the Attorney; and it is further

Ordered, That the checks of the respective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
H. E. LITTLER,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, September 4, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a final certificate from the Chief Engineer that the work covered by the contract of Byrne Brothers Dredging and Engineering Company, dated September 25, 1913 (page 1188 of the Proceedings) for the excavation and construction of contract section 9 of the Calumet-Sag Channel, has been completed in accordance with all the terms and conditions of the contract and to the satisfaction of the Chief Engineer and your Committee having read the final certificate of the Chief Engineer, hereto attached, and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of

Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to pay to Byrne Brothers Dredging and Engineering Company, upon the voucher of the Chief Engineer the total sum of $1,000.00 found to be due under said contract, upon the execution by said Company of a receipt in full of all claims and demands arising out of or resulting from the performance of the work under said contract, and also upon the execution of an affidavit by an officer of said Company that all materialmen, mechanics and workmen employed by said Company have been paid in full; said payment, however, to be made subject to any unaccrued or unmatured obligations imposed by said contract.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
MATT A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
H. E. LITTLER,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

FINAL CERTIFICATE.

CHICAGO, August 19, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I transmit herewith final voucher amounting to $1,000.00 in favor of Byrne Bros. Dredging & Engineering Company, as per contract dated September 25, 1913 (page 1188 of Proceedings), for the excavation and construction of Contract Section 9 of the Calumet-Sag Channel.

The contract requires that all work be completed on or before November 1, 1917. The work was entirely completed on October 2, 1917, with the exception of about 100 square yards of rip-rap, which it was impossible for the contractor to place until he was ordered to discontinue pumping and to remove his pumps.

This pumping was ordered discontinued on October 21, 1917. The pumps were then removed and the rip-rap completed to the satisfaction of the Chief Engineer on November 3rd.

If this meets with your approval, I would recommend that the final voucher be paid.

Respectfully submitted,

G. M. WISNER,
Chief Engineer.

Mr. Clark presented the following report from the Committee on Engineering.

CHICAGO, September 4, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that on September 26, 1918 (page 1081 of the Proceedings) the Chief Engineer was authorized and directed to dismantle the sewage testing station at the Union Stock Yards, to salvage such material and apparatus from said plant as might be of value and erect an activated sludge testing station at the sewer outlet of one of the large tanneries situated on the North Branch of the Chicago River.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that it is advisable to install in two settling tanks now in said station certain mechanical devices manufactured solely by the Dorr Company known as a 20 foot and 12 foot Dorr thickener to be used for experimental purposes. He further states that the Dorr Company does not wish to sell said 20 foot thickener but has offered to rent the same to

the Sanitary District at the rate of $50.00 per month for the first six months and thereafter at the rate of $25.00 per month up to ten months total time, all rental paid to be credited on the purchase of other equipment from said Company. Also to rent to the Sanitary District a 12 foot thickener at a monthly rental of $120.00 per month or sell the same to the District for the sum of $1255.00 or a new thickener for the sum of $1288.00, and he requests authority to rent the two thickeners on the basis above mentioned and to make the best arrangements he can in applying any rental paid on the purchase price of similar thickeners.

Your Committee having had the matter under consideration recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized to arrange with the said Dorr Company for the rental of said thickeners on the basis hereinabove stated, and to make the best arrangements possible to have said Company accept on the purchase price of any apparatus hereafter purchased from said Company the amount paid to it by the Sanitary District as rental for the use of said thickeners.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

MATT A. MUELLER,
JAS. H. LAWLEY,
H. E. LITTLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, September 4, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering herewith submits a form of license agreement to be entered into between The Sanitary District of Chicago, and the Chicago and Western Indiana Railroad Company. The Belt Railway Company of Chicago, corporations, and the Director General of Railroads, operating the Chicago & Western Indiana Railroad and The Belt Railway of Chicago, whereby said companies grant permission to the Sanitary District to install and maintain a four duct underground conduit line across the right of way and under the tracks of said railroads, in the vicinity of 75th street, where the same intersects certain public highway known as Western avenue, in the City of Chicago, County of Cook and State of Illinois, the location of said conduit being indicated in red lines on the blue print attached to said agreement.

The agreement has been approved by the Attorney, and your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District, and the Clerk be, and they are hereby authorized and directed to execute in triplicate said license agreement hereto attached.

Respectfully submitted,

WALLACE G. CLARK,
Chairman,

MATT A. MUELLER,
JAS. H. LAWLEY,
H. E. LITTLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Nays—None.

Real Estate Development.

Mr. Clark presented the following report from the Committee on Real Estate Development:

CHICAGO, September 4, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Real Estate Development transmits herewith form of lease to be entered into between the Sanitary District and Vincent S. Buszwiewisz of lots 214, 217 and 218 in Sanitary District Trustees' Subdivision of the right of way from north and south center line of Section 30, township 39 North, Range 14 East of the 3rd Principal Meridian to the Will County line, containing 80.47 acres of land more or less, of which 40 acres are available for pasture from July 1, 1919 to June 30, 1922, at an annual rental of $80.00.

Your Committee reports that said lease is in the usual form, and provides that the Sanitary District may terminate the same by giving 90 days' notice in writing to said tenants of its intention so to do, in the event that it desires to use said land for any of its corporate purposes, other than for farming.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees and the Clerk be, and they are hereby, authorized and directed to execute in duplicate, the form of lease herewith submitted, the same having been executed by said lessee.

Respectfully submitted,

PATRICK J. CARR,
Chairman.
WALLACE G. CLARK,
WILLIAM J. HEALY,
MATT A. MUELLER,
Committee on Real Estate Development.

Mr. Clark moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

REFERRING BACK TO FINANCE.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, September 4, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has examined and approved the bond of the James A. Sackley Company, in the penal sum of $11,600.00, with Thomas J. Rigney and John B. Sackley as sureties thereon, for the faithful performance of its contract for doing all the work and furnishing all the materials, tools, labor, appliances and appurtenances necessary for paving Blue Island and Riverdale Road in the City of Chicago, County of Cook and State of Illinois, and, therefore, recommends the passage of the following order:

Ordered, That the bond of the James A. Sackley Company in the penal sum of $11,600.00 above specified for faithful performance of its contract for paving Blue Island and Riverdale Road, be, and the same is hereby approved; and it is further

Ordered, That said contract and bond be printed in the Proceedings.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

The following is the contract of the Jas. B. Sackley Co. with the Sanitary District:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR PAVING THE BLUE ISLAND AND RIVERDALE ROAD IN THE CITY OF CHICAGO.

This Agreement, Made and entered into this..... day of..... A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated The Sanitary District, and the James A. Sackley Company, a corporation organized under the laws of the State of Illinois, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed and by these presents does covenant, contract and agree, with the said Sanitary District, for and in consideration of the payments made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty expressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances, and appurtenances, called for by this agreement (free from all claims, liens and charges whatsoever), in the manner and under the conditions hereinafter specified, that are necessary for paving the Blue Island and Riverdale Road in the City of Chicago, County of Cook, State of Illinois.

The work done and materials furnished shall be strictly pursuant to and in conformity with the specifications and plans, which are signed, and made a part of this agreement. The said specifications and plans are intended to co-operate, and any work appearing upon the plans and not mentioned in the specifications, or mentioned in the specifications, and not appearing upon the plans, shall be executed according to the true intent and meaning of the said specifications and plans, the same as though the said work was contained and described in both.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of the Sanitary District of Chicago, and his properly authorized agents, by whose measurements and calculations the quantities and amounts (including extras) of the several kinds of work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Chief Engineer of said Sanitary District, shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between the said Sanitary District and said Contractor, that said Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide every question which may arise relative to the execution of the work under this contract on the part of the said Contractor, and his estimate and decision shall be final and conclusive; and such estimate and decision, in case any question shall arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Chief Engineer" or "Engineer" are used herein they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the words "the work" are used herein, they shall be interpreted

to mean the work including all material, labor, tools, and all appliances and appurtenances, necessary to perform and complete everything specified or implied on the plans or in this contract, in full compliance with all the terms and conditions hereof.

Wherever the word "section" is used herein it shall be understood to refer to the entire section of the specification following the number referred to in parenthesis.

The sections are numbered consecutively.

Wherever under the provisions hereof an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

PAVING THE BLUE ISLAND AND RIVERDALE ROAD IN THE CITY OF CHICAGO.

Specifications Location.

1. The improvement covered by these specifications is to be constructed on the public highway known as the Blue Island and Riverdale Road and the streets intersecting the same between Halsted street and Wentworth avenue located in the City of Chicago, County of Cook, State of Illinois.

Description.

2. The work covered by these specifications consists of preparing the sub-grade, paying with macadam, constructing road ditches and otherwise improving the Blue Island and Riverdale Road within the limits and in the manner shown on the accompanying plans and as herein specified and as directed by the Engineer.

The work under this contract includes all the work embraced by these specifications and accompanying plans, all of which are made a part hereof. In the event of any discrepancy between the plans and specifications, the decision of the Engineer shall be decisive thereon. The figured dimensions on the plans are to be taken as correct, but the contractor is required to carefully check all dimensions of structures before beginning work thereon. Should any errors be discovered, the Engineer's attention shall be called to same, and proper corrections made. All notes on the plans shall be carefully observed by the Contractor, and are made a part of this contract. All elevations shown on plans herein specified are referred to Chicago City Datum (C. C. D.)

The Sanitary District will require that the work be prosecuted with all speed, and with the least inconvenience to the public and abuttors.

Character of Material.

3. A profile of the ground and cross sections of the roadway as shown on the accompanying plans are believed to be reasonably correct, but do not purport to be absolutely so, and together with any schedules of quantities are presented as only an approximation. It is not expected that rock will be found. The Contractor must satisfy himself regarding the character or amount of peat, clay, sand, quick sand, gravel, glacial drift, rock and all other material to be encountered and work to be performed.

ITEM 1—MACADAM PAVEMENT.

Description.

4. Item 1 comprises the clearing of the area to be paved, the preparation of the sub-grade, the construction of the macadam pavement, the maintenance of the work and all other items incidental thereto.

The price specified to be paid per square yard of finished macadam pavement shall include the furnishing of all labor, tools, material and appurtenances necessary to carry out the work as shown on the plans and as herein specified and to fully complete the pavement ready for use and traffic; and shall also include the providing of watchmen, signs, fences, red lights, and all other precautionary measures necessary for the protection of persons, and property, the clearing of the ground, the excavation and filling required to prepare the areas to be paved, and all other work herein specified to be performed under Item 1.

The Contractor shall make all adjustments necessary to bring the existing manholes to the grade of the finished roadway as established by the Engineer, including the furnishing and placing of brick masonry or the cutting and removing of concrete and resetting the cast iron frames and covers, all cost of said work being included in the unit price herein specified under Item 1.

Sub-Grade.

5. The Contractor shall clear the areas to be paved of all roots, trees, timbers, fences, pipes, debris or other ob-

stacles and shall remove such materials from the site of the work. He shall perform all excavations and all filling necessary to bring the sub-grade to the required elevations. All excavated materials if suitable for the purpose may be placed elsewhere in the roadway embankment or shall be removed from the site of the work. Where filling is required the contractor may place in the embankment suitable materials which have been excavated in constructing the road ditches as specified under Item 2. If no suitable excavated materials are available, the contractor shall furnish at his own expense all filling materials required to construct the specified sub-grade.

All soft, spongy and yielding spots, and all vegetable or perishable material shall be entirely removed from the sub-grade and the space refilled with gravel, broken stone or other suitable material.

The sub-grade shall be brought to a firm, unyielding surface by thoroughly rolling with a self-propelled roller weighing not less than ten (10) tons and all portions of the surface of the sub-grade that are inaccessible to the roller shall be thoroughly tamped with a hand tamper about ten (10) inches in diameter, and weighing not less than fifty (50) pounds.

The shoulders along both sides of the macadam roadway constructed hereunder shall be rolled and compacted when the finished roadway surface is being rolled.

After the sub-grade is prepared the surface elevations of the same shall be determined and if correct accepted by the Engineer before any stone is deposited on it. If not correct, such alterations shall be made as are ordered to attain the desired grade.

Macadam.

6. Upon the sub-grade, prepared as herein specified, shall be spread a sufficient quantity of first-class limestone macadam of uniform size, to make a layer, when thoroughly rolled, seven (7) inches thick. The broken stone shall have its diametrical axes as near as possible the same length, of a size to pass through a ring seven (7) inches in diameter, and be retained on a ring two (2) inches in diameter. The crushed stone shall be clean, hard, durable, particles of stone free from loam, clay or organic matter, soft or micaceous pebbles or other impurities. Upon this layer of broken stone shall be spread a sufficient quantity of sand or limestone screenings to just fill all interstices and thoroughly bond the stone. The entire surface shall be thoroughly flooded with water and rolled with a ten (10) ton roller until the material is solidly compacted to a true even surface.

Medium.

7. Upon the macadam above specified shall be spread a layer of medium crushed limestone of the quality specified in Section 6, crushed to a size to pass through two (2) inch ring, but be retained on a one (1) inch ring. A sufficient quantity shall be placed to produce, when thoroughly rolled, a layer five (5) inches thick. Upon this shall be spread a sufficient quantity of limestone screenings to entirely fill all interstices and completely bond the medium crushed stone. The surface of the roadway shall then be kept well sprinkled and rolled with a ten (10) ton roller until the road is thoroughly puddled and solidly compacted, and no further settlement takes place. All surplus mud or gravel, or surplus crushed stone, screenings or other debris shall be cleaned from the surface as ordered by the Engineer.

All materials used in the macadam pavement and the method of placing same shall be subject to the approval of the Engineer.

Maintenance.

(8) The Contractor shall maintain the macadam pavement during the period of this contract, shall repair the roadway embankments and pavements whenever depressions or other defects appear in same by placing and compacting additional filling material and paving material, and by performing other work thereon as the Engineer may direct, and shall leave the pavement in good condition and true to grade upon completion of all work hereunder.

Measurements.

(9) No extra or customary measurements of any kind will be allowed in measuring the work under these specifications. The actual number of square yards of surface of macadam pavement placed will be measured by the Engineer and used in computing the square yards of macadam pavement to be paid for.

Payment.

(10) The unit price specified to be paid per square yard for macadam

pavement, under Item 1 shall include the excavation, filling and preparation of the sub-grade, furnishing and placing of material, the rolling and compacting, disposal of all surplus excavation, cleaning up of ground, care of existing structures, maintenance, etc., as specified, and furnishing of all labor, material, appurtenances, etc., necessary to complete the work as specified.

ITEM 2—EXCAVATION.

Description.

(11) Item 2 comprises the excavation of drainage ditches along both sides of the roadway constructed hereunder and any excavations ordered to be performed by the Engineer other than that necessary to prepare the sub-grade for macadam pavement.

The price specified to be paid per cubic yard of excavation shall include all clearing and grubbing, disposal of excavated materials, all pumping, and drainage of the site, maintenance of the work and the furnishing of all labor, tools, materials and appurtenances necessary to carry out the work as shown on the plans, and as herein specified and to fully complete the ditches in serviceable condition throughout their entire length.

All work of cleaning out existing drainage pipes, culverts and catch basins and connecting same to the ditches constructed hereunder shall be performed by the Contractor without extra charge therefor.

Excavation.

(12) The Contractor shall excavate the specified drainage ditches along both sides of the roadway constructed hereunder to the lines and grades shown on the plans and established in the field by the Engineer. The side slopes of said ditches shall be true to line, smooth and uniform throughout.

Disposal.

(13) All materials excavated in constructing ditches and elsewhere under this contract if suitable for the purpose may be deposited in the roadway embankments as herein specified under Item 1. All excavated material which in the opinion of the Engineer is not suitable for the roadway embankment, and all excess material not needed therefor shall be removed from the site of this work by the Contractor.

Maintenance.

(14) The Contractor shall maintain the ditches during the period of this contract, shall perform all cleaning necessary and shall leave the specified ditches true to line, grades and dimensions, and in serviceable condition throughout their entire length upon completion of all work hereunder.

Measurement.

(15) The amount of excavation for which payment will be made under Item 2 of this contract will be determined from the cross section notes and estimates of the Engineer. Payment will be made for the actual yardage removed from within the theoretical prism of the ditch. No payment will be made for any excavation outside or in excess of the theoretical cross sections of the ditch as shown on the plans and as staked out in the field by the Engineer, and no payment will be made for excavation of any additional material required for filling or grading the roadway embankment.

Payment.

(16) The unit price specified per cubic yard for excavation under Item 2 shall include clearing and grubbing, excavating of materials, disposal of excavated materials, pumping and draining the site, maintenance of the work and furnishing all labor, materials, appurtenances, etc., necessary to complete the work as specified.

ITEM 3—12 INCH PIPE.

Description.

(17) Under Item 3 the Contractor shall furnish and lay new vitrified tile pipe for the culverts at street intersections and elsewhere, as shown on the plans or ordered by the Engineer, to the lines and grades given by the Engineer.

The price specified to be paid per lineal foot of 12 inch vitrified tile pipe, shall include the furnishing of all labor, tools, materials and appurtenances necessary for constructing the culverts and for backfilling, and restoring the roadways across the trench, all as shown on the plans, or as ordered by the Engineer. Excavation necessary for placing the pipe will be paid for under the unit price for excavation specified under Item 2.

Vitrified Tile Pipe.

(18) All vitrified tile pipe shall be of standard quality made of the best material, thoroughly and perfectly

burned, of homogenous texture without cracks or imperfections, well glazed, so that their inner and outer surfaces shall be smooth, hard and even.

The pipe shall be at least two (2) feet in length, and shall be straight, true to form, of full diameter throughout, and shall have deep and wide socket joints. The thickness of the pipe and the dimensions of the deep and wide socket shall be at least equal to those of single strength standard sewer pipe.

Laying Pipe.

(19) All pipes shall be laid true to the lines and grades given by the Engineer. The ends or shoulders of each pipe shall abut against the next adjacent pipes in such a manner that there will be no unevenness of any kind along the bottom half of the pipes. The bed shall be even and firm. Bell holes shall be cut, and particular care shall be taken to prevent the pipe bearing on the socket.

Joints.

(20) Jute gaskets saturated with neat Portland Cement shall be placed in the bell of each pipe, and the joints thoroughly filled and rammed with Portland Cement mortar made of equal volumes of cement and clear, sharp screened torpedo sand.

Interior of Pipe.

(21) The interior of the pipe shall be thoroughly cleaned and all dirt, cement or superfluous materials of every description removed therefrom as the work proceeds, for which purpose a disc mold or swab, filling the entire bore of the pipe, and attached to a rod sufficiently long to pass two (2) joints from the ends of the pipe last laid shall be continuously worked through as the laying of the pipe proceeds.

Measurment.

(2) No extra or customary measurements of any kind will be allowed in measuring the work under these specifications. The actual length measured on the center line of the work shall be used in computing the lineal feet of pipe to be paid for.

Payment.

(23) The price specified to be paid per lineal foot of pipe under Item 3 shall include the furnishing and placing of all materials, and backfilling and restoration of the roadways across the trench, and the furnishing of all labor, tools, materials and appurtenances necessary to complete the culverts, and all work incidental thereto as specified.

GENERAL CONDITIONS

Sanitary District Law.

Article 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled, "An Act to Create Sanitary Districts and to Remove Obstructions from the Des Plaines and Illinois Rivers," approved May 29, 1889, in force July 1, 1889, and all acts amendatory thereof and supplementary thereto.

City Ordinances.

Art. 2. The said Contractor also agrees to carry on all work provided for in this contract in strict conformity with all ordinances of the City of Chicago and all Acts of Congress which in any way affect the performance of the work hereunder.

Omissions on Contract Drawings.

Art. 3. The Contract Drawings furnished, form a part of these specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications or contract drawings.

Examination of Site.

Art. 4. All bidders for work under this contract are required, before submitting proposals to examine the sites of the work and adjacent premises, the various means of approach to the sites and the plans hereinbefore mentioned as being on file in the office of the Chief Engineer, and to make all necessary investigations in order to inform themselves thoroughly as to the character and magnitude of all work involved in the complete execution of this contract also as to the facilities for delivering and for handling material and plant at the site, and for disposing of material to be removed from the site, and the conditions and difficulties that will be encountered in the performance of the work specified herein. No pleas of ignorance of conditions that exist, or that may hereafter exist, or of difficulties that will be encountered in the execu-

tion of the work hereunder, as a result of failure to make the necessary examinations and investigations, will be accepted as a sufficient excuse for any failure or omission on the part of the Contractor to fulfill in every detail all of the requirements of this contract, or will be accepted as a basis for any claims whatsoever for extra compensation or for an extension of time for the performance of the work

Approximate Quantities.

Art. 5. It is expressly understood and agreed by the parties hereto that the quantities of the various classes work to be done and materials to be furnished under this contract, which have been estimated as stated in the advertisement and in the "Requirements for Bidding and Instructions to Bidders," attached hereto, are only approximate and are to be used solely for the purpose of comparing on a uniform basis, the proposals offered for the work under this contract; and the Contractor further agrees that the Sanitary District will not be held responsible if any of said quantities shall be found incorrect; and said Contractor will not make any claim for damages or for loss of profits because of a difference between the quantities of the various classes of work as estimated and the work actually done or for an extension of time for the performance of the work. If any error, omission, or misstatement shall be discovered in the said estimated quantities, the same shall not invalidate this contract or release the Contractor from the execution and completion of the whole or any part of the work herein specified, to the satisfaction of the Engineer and in accordance with the specifications and the contract drawings, herein mentioned, and for the prices herein agreed upon and fixed therefor, or excuse him from any of the obligations or liabilities hereunder or entitle him to any damages or compensation otherwise than may be provided for in this contract, except for such extra work as may be required, for the performance of which written orders must be given and received as herein specified.

Changes in Contract Drawings.

Art. 6. The Sanitary District reserves the right to make any changes in the specifications and Contract Drawings which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby. If such alterations increase the quantity of the work to be done, such increase shall be paid for according to the quantity of work actually done at the unit prices specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

Extra Work.

Art. 7. The Contractor shall perform only such extra work as the Engineer may order in writing, provided however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided, he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this contract and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actual cost of the same can be determined, then the

said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work performed hereinbefore and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 8. In estimating the cost of extra work, the cost of material shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amounts paid for same as shown by the payrolls of the Contractor, with cost of indemnity insurance added, when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, if requested by the Chief Engineer, verify by his affidavit the correctness of the amounts paid for materials and labor. It is further agreed that in all cases of question or dispute arising or growing out of this contract in anyway regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of delay or of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision.

Art. 9. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents. The Contractor shall be guided by the lines, stakes, marks and grades given by them, and shall carefully preserve the same as far as possible during the progress of the work, and shall furnish all needed facilities, without extra charge therefor, to enable the Engineer to properly give lines and grades and measure the work from time to time.

Materials, Workmanship and Inspection.

Art. 10. All materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all work which, during the progress and before its final acceptance may become damaged from any cause, shall be removed and replaced by good and satisfactory work, without extra charge therefor. The Engineer and his assistants shall have at all times free access to every part of the work and to all points where material to be used in the work is manufactured, procured, stored or dumped and shall be allowed to examine any material furnished for use in the work under this contract.

All inspection of any and all material furnished for use in the work to be performed under this contract shall be made at the site of the work after the delivery of the material; provided, that, if requested by the Contractor, the Engineer may at his option perform, or have performed, inspection of material at points other than at the site of the work. In any such case the Contractor shall pay the Sanitary District the extra cost of such inspection, including the necessary expenses of the inspector and the salary of the inspector for the

extra time expended in performing any such inspection at said other points.

Progress Certificates.

Art. 11. It is further expressly agreed that the granting of any progress certificates, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates shall be subject to the correction of the final certificate.

Cost of Work.

Art. 12. All books and accounts kept by the Contractor in connection with this contract shall be open to the inspection of the Chief Engineer of the Sanitary District, or his properly accredited representative.

The Contractor shall furnish the Engineer reasonable facilities for obtaining such information as he may desire respecting the progress and execution of the work and the character of the materials, including all information necessary to determine the cost of the work, such as the number of men employed, their pay, the time during which they have worked on the various classes of construction, the cost of repairs to machinery, and other information required by the Engineer. The Contractor shall, on request, furnish the Engineer with copies of expense bills for transportation charges on all machinery, material and supplies shipped to or from the work under this contract.

Plant.

Art. 13. The Contractor shall furnish all material and supplies, plant, tools and implements, in fact, all material and appliances of every sort or kind that may be necessary for the full and complete carrying out of this contract, and shall furnish and maintain, subject to the approval of the Engineer all barricades and other protections, lights and signs, necessary for the proper protection of the public. He shall also furnish a watchman. The cost of all the above shall be covered by the amounts paid at the rates and prices herein specified, and no extra charge shall be made therefor.

Night, Sunday or Holiday Work.

Art. 14. Whenever the Contractor shall be permitted or directed to perform work at night or on Sundays or holidays, or to vary the period of hours during which work is carried on each day, he shall give written notice to the Engineer, so that proper inspection may be provided. Such work shall be done under the regulations to be furnished in writing by the Engineer and no extra compensation shall be allowed therefor.

Clearing Site.

Art. 15. The Contractor further agrees to remove all materials, implements, barricades, falsework, debris and rubbish connected with or caused by said work immediately upon completion of the same and to leave the site of the work in perfect condition insofar as affected by the work under this contract.

Precautions.

Art. 16. The Contractor shall take whatever precaution may be necessary to render any portion of the work secure in every respect, or to decrease the liability of accident, from any cause, or to avoid contingencies which are liable to delay the completion of the work.

Workmen.

Art. 17. The Contractor shall employ competent foremen and laborers, and shall discharge at the request of the Engineer any incompetent or unfaithful men in his employ. None but men expert in their respective branches of work shall be employed where special skill is required.

Sanitation.

Art. 18. In accordance with the Rules and Regulations for the Guidance of Sanitary Inspector, etc., adopted by the Board of Trustees on July 31, 1913, page 997 of the Proceedings for 1913, the Contractor shall introduce and enforce among his employes such regulations in regard to cleanliness, and the disposal of garbage and wastes, as shall conduce to their health and tend to prevent the inception and spread of contagious and infectious diseases among them, and shall make provision for an ample supply of suitable drinking water, and shall take such means as the Engineer may direct to effectually prevent the creation of a nuisance on any part of the right of way or property or said Sanitary District, easement, streets or adjacent property. Necessary sanitary conveniences for the use of the labor-

ers on the work, properly secluded from public observation shall be constructed and maintained by the Contractor in such manner and at such points as shall be approved, and their use shall be strictly enforced.

Patents.

Art. 19. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in anywise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of designs, furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Damages.

Art. 20. If any damage shall be done by the Contractor or by any person or persons in his employ to the owner or occupants of any land or to any real or personal property adjoining or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damage, and cause the Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself, or of his employes, that is in the nature of a legal liability, and he hereby agrees to indemnify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such injuries or such damages received or sustained by any person or persons, from said Contractor, or his servants, agents or employes, in the execution of said work; or by or in consequence of any negligence in guarding the same or by or on account of any omission or act of said Contractor, his agents or employes; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employers' Liability Act.

Art. 21. The Contractor further agrees to insure to his employes or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State;" providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10, 1911, in force May 1, 1912, approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in anywise come against said Sanitary District by reason of any accidental injuries or deaths suffered by any of his employes in and about the performance of this contract.

Responsibility of Contractor.

Art. 22. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor will be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employes.

The Contractor shall not assign, by power of attorney or otherwise, any portion of the moneys that may become due through the performance of this contract.

Liens.

Art. 23. If at any time during the progress of said work, the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make the payments hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporation, for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Time.

Art. 25. The Contractor agrees to begin the work covered by this contract within thirty (30) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor, and to prosecute the same with all due diligence and to entirely complete the work on or before December 1, 1919.

It is understood and agreed that Time is the essence of this contract, and that a failure on the part of said Contractor to complete the work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 26. It is therefore covenanted and agreed that in case the said Contractor shall fail or neglect to complete the work herein specified on or before the date hereinbefore fixed for completion, the said Contractor shall and will pay the said Sanitary District the sum of Ten Dollars ($10.00) for each and every day the Contractor shall be in default in the time of completion of this contract.

Said sum of Ten Dollars ($10.00) per day is hereby agreed upon, fixed and determined by the parties hereto, as the liquidated damages which said Sanitary District will suffer by reason of such defaults, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the said work, the Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto. It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments, shall not in any respects constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to Time and Liquidated Damages for Delays.

Extensions or Additions.

Art. 27. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period or periods of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time, but no extension of time shall be given for any minor alterations or additions, and the provisions of this paragraph shall not otherwise alter, change or invalidate the provisions of this contract, with reference

to "Liquidated Damages" and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 27. The Contractor shall delay or suspend the progress of the work or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided, that in event of such delay or delays or of such suspension or suspensions of the progress of the work, or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay, or delays, suspension or suspensions.

Unavoidable Delay.

Art. 28. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by necessary or unavoidable act or delay of the Sanitary District or by riot, insurrection, war, pestilence, strikes, acts of public authorities, fire, lightning, earthquake, cyclone or through any default of other parties under contract with said Sanitary District, then the time herein fixed for the completion of such part of said work, so delayed, shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowances shall be made unless a claim therefor in writing is presented to the Engineer within four (4) days after the commencement of such delay. And it is further expressly agreed that said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of any delays resulting from any of the causes above specified, except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. Said Engineer shall decide the number of days that said Contractor has been so delayed, and his decision shall be final and binding upon both parties hereto.

Forfeiture of Contract.

Art. 29. It is further agreed by said Contractor that if the work to be done under this contract shall be abandoned by the Contractor, or if there shall be a failure by said Contractor to perform the work of the character, and in the time herein specified; or if said Contractor shall fail financially or from any other cause whatsoever be unable to carry out said contract and complete the said work; or if the contract shall be assigned by the said Contractor; or if the Contractor shall lose control of said work for any cause whatsoever, except by act of God or the public enemy; or if the Contractor shall refuse to or neglect to follow the instructions of the Engineer; or if in the opinion of the Engineer the Contractor refuses or neglects to use measures to protect the said materials, work and adjacent structures from damage; or if in the opinion of the Engineer the Contractor is guilty of carelessness or incompetency in the execution of said work; or in the opinion of the Engineer the said work has been or is being delayed by the Contractor; or if in the opinion of the Engineer the rate of progress is not such as to insure the completion of the work within the time specified or if at any time the Engineer shall be of the opinion and so shall certify in writing to said Sanitary District that said work or any part thereof is unnecessarily or unreasonably delayed, or that the Contractor is willfully or persistently violating any of the conditions or covenants of this contract, or is not fulfilling said contract in good faith, said Sanitary District shall have the power and authority, and may then immediately notify said Contractor to discontinue all work or any part thereof, that may be designated by the Engineer of said Sanitary District.

Upon notice being given as aforesaid, by the said Sanitary District to the said Contractor, or upon the happening of any of the conditions hereinbefore in

this section specified, the said Sanitary District shall have a lien upon all the materials, supplies, machinery, implements and tools of the Contractor for the purpose hereinafter specified, and the said Sanitary District may thereupon immediately take possession of all said materials, supplies, machinery, implements and tools, for the uses and purposes hereinafter set forth; thereupon the said Sanitary District shall have the power to, and may at the cost of said Contractor, complete the said work by letting a new contract, and in completing the said work by contract, said Sanitary District may use such materials, supplies, machinery, implements, tools and plant as may be the property of said Contractor, and may make the necessary repairs and replacements thereto.

The cost of fully completing all the work provided for under this contract shall include the sum or sums of money paid by the Sanitary District to other contractors if all or any part of said work is completed by contract, and any sum or sums of money paid by the Sanitary District for the cost of repairs and replacements upon machinery, implements, tools and plant of the Contractor hereunder, used in the completion of said work, and also all sums of money paid for first aid, medical, surgical and hospital attendance and as compensation for accidental injuries or death suffered by employes in the course of their employment in the performance of said work under the employers' liability act of the State of Illinois in force July 1, 1913, and all acts amendatory thereof and supplementary thereto.

The cost of fully completing all the work under this contract as aforesaid shall be charged to the said Contractor, and the amount of said cost or expense so charged shall be deducted from and paid by the Sanitary District out of any moneys that may be due, or may at any time thereafter become due to said Contractor under and by virtue of this contract, so far as the same shall suffice therefor.

Should the amount remaining unpaid of the contract price be insufficient to reimburse the Sanitary District for the cost of fully completing all work as foresaid then the Sanitary District may sell all materials, supplies, machinery, implements, tools and plant then on hand, obtained from said Contractor, at public sale on giving said Contractor twenty (20) days' notice of the time and place of such sale, and the net proceeds derived from the sale of the said property at such sale shall be credited to the Contractor, and should the amount received from said sale be then insufficient to pay such deficiency, the Contractor and his bondsmen shall be liable to pay the amount of said deficiency; and at any such sale of said property as provided hereunder, the Sanitary District may bid and become a purchaser of said property.

Contractor's Bond.

Art. 31. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the amount of this contract for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such sureties thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Prices.

Art. 32. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the labor, tools, materials and appurtenances necessary to complete the work specified, and for doing all the work contemplated and specined in this contract, also for all loss or damage arising out of the nature of the work aforesaid or from the action of the elements or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work, and the whole thereof, in full compliance with the plans and specifications, and the requirements of the Engineer under them, to-wit:

1. For Macadam Pavement, complete, in place, as specified, the sum of

One Dollar and Sixty-five Cents ($1.65) per square yard.

2. For Excavation, including disposal of material, as specified, the sum of One Dollar and Ten Cents ($1.10) per cubic yard.

3. For 12-inch Tile Pipe, complete, in place, as specified, the sum of Two Dollars and No Cents ($2.00) per lineal foot.

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents, and patented material, appliances and processes used in the work described in the specifications and agreements. Before final payment is made, the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

Art. 33. The said Sanitary District agrees to pay said Contractor the sums herein specified in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed Eighty-seven and One-half (87½) per cent of the value of the work properly performed under this contract, and that the remaining Twelve and One-half (12½) per cent shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and delivery of the final certificate of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract.

Final Payment.

Art. 33. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials, except in the manner set forth in this contract, nor until all the stipulations, provisions, and conditions, hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificate pay, and, it hereby binds itself to pay the said Contractor in cash, the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the successors, heirs and legal representatives of said Contractor.

In Witness Whereof, on the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Committee on Finance, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its..... to be duly attested and its corporate seal to be hereunto affixed.

Contractor's Bond.

KNOW ALL MEN BY THESE PRESENTS, That we, the James A. Sackley Compan, as principal, and John B. Sackley and Thomas J. Rignely, as sureties, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of Eleven Thousand Six Hundred Dollars and No Cents ($11,600.00), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals, and dated this 4th day of September, A. D. 1919.

THE CONDITION OF THE ABOVE OBIGATION IS SUCH, That whereas the above bounden James A. Sackley Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the 4th day of September, A. D 1919, for doing all the work and furnishing all the materials, tools, labor, appliances and appurtenances necessary for paving the Blue Island and Riverdale Road in the City of Chicago, County of Cook, State of Illinois, as specified in the foregoing contract.

Now, if the said James A. Sackley Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the plans accompanying the same, and in the time and manner therein prescribed, and further, shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees, which may in anywise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in anywise result from the carelessness or neglect of said James A. Sackley Company, its agents, employes or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, and moreover shall pay to the said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including all valid claims and demands for first aid, medical, surgical and hospital attendance and compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois, entitled, "An Act to promote the general welfare of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or deaths suffered in the course of employment, approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said James A. Sackley Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person and shall repay any overpayment, then is this obligation to be null and void, otherwise to remain in full force and effect.

AND IT IS HEREBY EXPRESSLY UNDERSTOOD AND AGREED, and made a condition hereof, that any judgment, rendered against said The Sanitary District of Chicago, as aforesaid, in any suit for damages occasioned by carelessness or neglect of said James A. Sackley Company or its agents, employes or workmen in the premises, and also that any judgment of any court or award of any Board of Aribitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or deaths suffered by employes, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said James A. Sackley Company, shall be conclusive against each and all parties to this obligation,

as to amount, liability and all other things pertaining thereto.

JAMES B. SACKLEY COMPANY. (Seal)

TEMPORARY CHAIRMAN.

President Sergel called Mr. Healy to the chair, and took a chair on the floor of the Board room.

MISCELLANEOUS AND NEW BUSINESS.

President Sergel presented the following resolution:

Resolved, That the highway to be constructed by the Sanitary District along the North Shore Channel be named the McCormick Road, in honor of the former President of the Board, Col. Robert R. McCormick.

(CHARLES H. SERGEL.)

President Sergel moved that the resolution be adopted.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

ADJOURNMENT.

Mr. Lawley moved that the Board adjourn.

The motion prevailed.

Clerk.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING.

THURSDAY, SEPTEMBER 18, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Absent—None.

SUSPENSION REGULAR ORDER OF BUSINESS.

Trustee Clark moved to suspend the regular order of business for the purpose of introducing a report from the Committee on Engineering preliminary to the opening of the bids for the North Shore Channel Highway, as follows:

CHICAGO, September 18, 1919.

To the Honorable, The President, and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on September 4, 1919 (page 1131 of the Proceedings), approved a report of the Chief Engineer in which he recommended the construction of a heavy traffic highway upon the right-of-way

of the North Shore Channel of The Sanitary District, along a route which extends between Lawrence Avenue, Chicago, and a point in Sheridan Road in the Village of Wilmette.

Your Committee further reports that it examined and approved the plans and specifications prepared by the Chief Engineer for the construction of said highway and in order that said work might proceed as rapidly as possible directed that said work be advertised so that bids could be received and opened at the meeting of the Board to be held September 18, 1919.

Your Committee, therefore, recommends the passage of the following order:

Orered, That the plans and specifications prepared by the Chief Engineed for the construction of the Highway above specified be and the same are hereby approved and it is further

Ordered, That the action of the Committee on Engineering, in directing that the work above specified be advertised, be and the same is hereby ratified and confirmed.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Trustee Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

REGULAR ORDER OF BUSINESS.

Bids.

The Clerk announced that the bid of the Warner Construction Company was received at 12:07 P. M., seven minutes after the closing time for the receipt of bids.

President Sergel stated that under the advertisement the only bids that can be entertained were those received up until 12 o'clock noon.

Trustee Clark moved that all bids be opened and that they be referred to the Engineering Committee to make report on all the physical conditions surrounding the bids, at which time the Committee will take into consideration the fact that said bid was received at 12:07 o'clock P. M.

The motion prevailed.

The Clerk opened and read the bids received for the North Shore Channel Highway as shown in the schedule printed on page 1154-A of the Proceedings.

Mr. Clark moved that the bids be referred to the Chief Engineer for tabulation and to the Chief Engineer for report.

The motion prevailed.

REPORTS OF OFFICERS.

The Clerk presented the report of the Treasurer for the month of August, 1919, which was ordered published and filed, as follows:

GEORGE M. REYNOLDS,
Treasurer, The Sanitary District of Chicago.

The Clerk presented the report of the Chief Engineer for the month of May, 1919, which was ordered published and filed, as follows:

CHICAGO, June 1, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I herewith present the report of the Engineering Department for the month of May, 1919, giving the detailed operations of the same.

CONSTRUCTION.

NORTH SHORE CHANNEL.

Spoil Banks.

The National Brick Company removed 10,920 cubic yards of material from the south spoil bank, between Brown street and W. Railroad avenue, during the month.

CONTRACT FOR SLOPING BANKS.

No work was done on this contract during the month.

CALUMET-SAG CHANNEL.

Section 1.

James O. Heyworth, Contractors, continued operation throughout the month. Drag line No. 2, on the south berm, was engaged in excavating dam at Main Channel, between M. C. Stations 969+00 and 972+75, from the 1st to the 31st, working one 12-hour shift per day. Locomotive Crane, on the north berm was engaged in excavating dam at I & M Canal Station 9+50 from the 1st to the 24th, working one 10-hour shift per day; Placing forms for connecting Main Channel walls with Calumet-Sag walls on the 26th and 27th; Hoisting concrete from the 28th to the 31st, at Station 969+00, working one 10-hour shift per day. Derrick No. 1 on the south berm, was engaged in cleaning up, at station 20+50 from the 1st to 31st. Concrete mixer on the north berm, at station 969+00 engaged in mixing concrete for connection of Main Channel and Calumet-Sag Channel walls from the 28th to the 31st, working one 10-hour shift per day. Miscellaneous work was carried on as follows: Digging outfall ditch at Archer Road on the 1st and 2nd. General cleanup from the 1st to the 17th. Patching walls on the 5th, 10th, to 14th. Dismantling and storing machinery from the 5th to 17th. Building forms on the 26th and 27th. Digging holes for snubbing posts, west wall of Main Channel was carried on, on the 29th by force account.

An average daily force of 39 men was employed. At the end of the month 93.8 per cent of the total estimated value of the contract was completed.

E. A. Hanrahan, Contractor for removing flume at station 69+50 employed a small force of men in removing flume from the 1st to the 10th and 20th to 28th, on which date this work was completed.

Section 2.

E. A. Hanrahan, Contractor employed an average daily force of 5.3 men in cleaning outfall ditch and placing 24-inch tile at station 112+25, on north side of channel, from the 12th to the 16th, on which date the work on this section was completed.

Section 3.

E. A. Hanrahan, Contractor for cleaning ditches, etc., on this section, employed an average daily force of 4.9 men cleaning outfall ditch, station 137+00 and hauling and placing tile, from the 19th to the 29th. Truck was engaged in hauling tile on the 17th, 19th and 28th on force account basis. Work completed on this section on the 29th.

Section 4.

E. A. Hanrahan, Contractor for cleaning outfall ditch on this section, employed an average daily force of

4.3 men in cleaning outfall ditch, station 204+00, on the 17th and 19th, on which date the work was completed.

Section 13.

A. Guthrie & Co., Inc., Contractors, continued operations throughout the month. Steam Shovel No. 2 was engaged in excavating rock and glacial drift in channel between stations 759+50 and 757+10, from the 5th to the 12th, working one 10-hour shift per day. Steam shovel No. 3 was engaged in excavating glacial drift in channel between stations 761+00 and 761+81 from the 23rd to the 25th, working one 10-hour shift per day and on the 27th and 28th, working an average of 4 hours per day, and hoisting concrete for walls on the 27th and 28th, working an average of 6 hours per day. Two dinky engines and 4 dump cars, in cut, were engaged in hauling spoil from shovel No. 2 to south wall between stations 765+00 and 777+00 from the 5th to the 12th and 23rd to the 25th, working one 10-hour shift per day and on the 27th and 28th working an average of 4 hours per day. Three dinky engines and 6 dump cars were engaged in hauling concrete from the mixer to the C. R. I. & P. Ry. abutment on the 1st to the 2nd, working one 9-hour shift per day; on the 5th working two hours; on the 8th and 9th working one 7-hour shift per day. Hauling concrete to retaining walls from the 13th to the 16th working one 7-hour shift per day, and on the 21st and 22nd, working one 10-hour shift per day, and from the 26th to the 31st working one 5-hour shift per day; Hauling concrete to sector gates on section 14 on the 17th and 19th, working one 10-hour shift per day. Hauling concrete to Chicago street abutment on the 19th, 23rd and 24th, working one 10-hour shift per day. 2 concrete mixers were engaged in mixing concrete as noted above. Pumping channel was carried on at station 757+50 from the 1st to the 31st, working an average of 6½ hours per day. At station 782+00 on the 4th, working one 10-hour shift and on the 23rd working one 2-hour shift and on the 29th working one 3-hour shift. Traveler No. 1 on the north wall was engaged in building forms for wall between stations 760+25 and 759+75 on the 2nd, 5th to 9th, 16th, 17th, 26th, 31st, working one 10-hour shift per day. Concreting on the 22nd, 23rd working one 10-hour shift per day and on the 27th working one 5-hour shift. Traveler No. 2 on south wall was engaged in building forms between stations 760+90 and 758+96 from the 10th to the 14th, 18th, 20th, 23rd to 24th, 27th and 28th, working one 10-hour shift per day; concreting on the 15th, 16th, 21st, 22nd, 26th, working one 10-hour shift per day and on the 29th and 31st, working one 5-hour shift per day. Hand work was carried on as follows: Cleaning off rock for wall footings for south wall between stations 761+50 and 760+50 from the 1st to 11th, 760+46 and 759+96 on the 17th and station 758+46 and 759+12 on the 22nd and 23rd; for north wall between stations 760+50 and 761+00 from the 12th to 16th, stations 758+46 and 759+02 from the 27th to the 31st working one 10-hour shift per day. Leveling backfill between stations 766+00 and 777+00 from the 5th to the 12th, 23rd and 24th, working one 10-hour shift per day and on the 27th and 28th, working one 4-hour shift. Building wood concrete forms between stations 760+90 and 761+81 for south wall from the 7th to the 12th. Concreting same on the 13th and 14th. Building forms for north wall between stations 760+25 and 761+81 from the 17th to the 19th, 25th to 27th, concreting same on the 20th, 21st, and 28th. An average daily force of 71.1 men was employed. At the end of the month 61.8 per cent of the total estimated value of the contract was completed.

Section 14.

A. Guthrie & Co., Inc., Contractors continued operations throughout the month. Steam shovel No. 5 on the north berm was engaged in excavating spoil from spoil bank on the 1st and 2nd, 5th to the 30th, between stations 814+00 and 806+00, working one 10-hour shift per day. Two dinky engines and 16 dump cars were engaged in hauling spoil from shovel No. 5 to north wall between stations 800+00 and 870+00, from the 5th to the 9th, 13th to 22nd, and to Ashland avenue from the 10th to the 12th, for approach, working one 10-hour shift per day. Three dinky engines and 16 dump cars were engaged in hauling spoil from shovel No. 5 to north wall between stations 794+00 and 802+00 and the south wall between stations 805+00 and 815+00 from the 23rd to the 30th, working one 10-hour shift per day. One dinky engine and 2 dump cars were engaged in hauling stone to cover roof of sewage discharge chamber on the 13th, working one 10-hour shift. Hauling stone to Ashland avenue approach from the 16th to the 19th, working one 10-hour shift per day. One dinky engine was engaged in syphoning water from sector gates from the 1st to the 10th and from the 22nd to the 26th, working one 10-hour shift per day. Pumping channel was carried on at station 846+00 from the 15th to the 27th, working one 10-hour shift per day and 28th to the 31st working one 7-hour shift per day. At station 737+00 from the 15th to the 31st, working one 12-hour shift per day. 3 Teams were engaged in leveling backfill behind walls from the 1st to the 12th, 22nd, 23rd, and 24th to the 31st between stations 800+00 and 815+00, working one 10-hour shift per day. Hand work was carried on as follows: Leveling backfill between stations 800+00 and 820+00 on the 1st, 2nd, 5th to the 9th, 13th to the 30th, working one 10-hour shift per day. An average daily force of 77.6 men was employed. At the end of the month 99.8 per cent of the total estimated value of the contract was completed.

BRIDGES.

Division Street Bridge.

The Kelly Atkinson Construction Company employed an average daily force of 6.5 men in painting bridge steel on the 2nd, 6th to the 8th, working one 10-hour shift per day.

A. Guthrie & Co. employed a force of 14 men digging drain ditch along roadway at the north end of this bridge on the 5th, working one 10-hour shift.

The Public Service Co. of Northern Illinois employed a force of 11 men and auto truck in replacing gas main on this bridge on the 26th, working a 4-hour shift.

Chicago Street Bridge.

A. Guthrie & Co. employed an average daily force in building concrete forms for the south abutment on the 2nd, 5 th and 6th, 13th and 14th building tower and chutes on the 7th; Concreting south abutment 19th, 20th, 23rd, 24th; Removing forms on 26th and 27th. Building forms for north abutment on the 28th, 29th and 31st.

C. R. I. & P. Ry. (Main Line) Bridge.

A. Guthrie & Co. employed an average daily force of 12 men building forms for east half of north abutment on the 1st and 2nd, working one 10-hour shift. Concreting same on the 5th, working 2 hours. Removing forms on the 6th and 7th. Excavating for concrete forms on east half of the north pier on the 5th, working one 8-hour shift. Building forms on the 6th and 7th, working one 10-hour shift. Concreting same on the 8th and 9th, working one 7½-hour shift per day. Removing forms on the 10th, working one 10-hour shift. An aver-

age daily force of 9.5 men was employed in excavating spoil between the north pin and the north abutment from the 12th to the 31st, working one 10-hour shift per day. The substructure was ready for the erection of steel work on bridge No. 3 on the 31st.

The C. R. I. & P. Ry. Co. employed an average daily force of 4.5 men in bracing water pipe line running along the R. I. right of way line because of excavation done by A. Guthrie & Co., from the 12th to the 17th, working an average of 5½ hours per day, on the 21st, and 23rd, working an average of 4 hours per day, on the 28th and 29th working one 8-hour shift per day.

The Overland Construction Co. employed an average daily force of 7 men loading material for bridge No. 3 on the 27th and unloading same at the bridge site on the 28th, Loading girders for same on the 29th and 31st working one 8-hour shift per day. Began placing castings for bridge superstructure on the 28th.

B. & O. and G. T. W. Bridges.

Pumping channel was carried on by A. Guthrie & Co. throughout the month at station 749+00, working an average shift of 11 hours per day. A. Guthrie & Co. employed an average daily force of 7 men excavating for mud sills, framing and placing trestle bents on the 1st, 2nd, 5th, 6th, 10th to 19th, 22nd, 23rd, 27th, and 28th. An average daily force of 9 men were engaged in excavating to place trestle bents from the 10th to the 12th, 15th to the 24th, 29th to the 31st, working one 10-hour shift per day. An average daily force of 8 men was employed in removing cribbing back of the south abutment of the B. & O. bridge on the 5th, 6th, 8th and 9th, working 9 and 8-hour shifts per day. An average daily force of 7 men was engaged in placing grillage forms and concreting same on the 6th and 7th. A force of 8 men was employed in unloading cinders and leveling same on future L. H. B. Ry. tracks north of channel from the 7th to the 9th. An average daily force of 6 men was employed in laying turnout from B. & O. track No. 2 for west bound B. & O. track to McCook line on the 14th, 15th, 19th, 29th and 31st. An average daily force of 12 men was employed in unloading timbers for B. & O. trestle on the 26th, 27th and 31st.

The Strobel Steel Construction Co. employed an average daily force of 9 men on the following work: Laying guard rail on B. & O. (McCook Line) trestle over channel on the 1st. Cleaning up for B. & O. Official inspection B. & O. Stoney Creek Bridge on the 2nd. Unloading cinders for I. H. B. Ry. future tracks on the 3rd. Surfacing tracks B. & O. (C. C. Div.) north of channel on the 5th and 6th. Moving wires to allow placing of floor section on the 7th. Moving pipe line and signal wires to temporary location a/c of new location of I. H. B. Ry. tracks from the 13th to the 15th and 23rd to the 24th. The aforementioned work was carried on in one 8-hour shift per day.

The Grand Trunk Western Ry. Co. employed an average daily force of 5 men in loading and unloading rails and material for G. T. W. track diversion on the 20th and 27th, working one 9-hour shift per day.

Ashland Avenue Bridge.

A. Guthrie & Co. employed an average daily force of 8 men working as follows: Building trestle for backfill on the 1st. Unloading screenings on the 2nd. Backfilling approaches on the 6th, 7th, 8th to the 13th. Spreading gravel for roadway from the 14th to the 19th. Tearing out temporary bridge from the 22nd to the 24th. Digging ditch for tile drain from the 29th to

the 31st, working one 10-hour shift per day.

Controlling Works.

A. Guthrie & Co. employed an average daily force of 6 men backfilling the Morgan Park Sewer from the 1st to the 31st. An average daily force of 10 men was employed removing old concrete floor at the sector gates on the 1st and 2nd to the 16th. Placing new floor on the 17th and 19th. Cleaning up for new concrete floor west sector gates from the 21st to the 28th, working one 10-hour shift per day.

The Sanitary District employed 1 man painting sector gate machinery houses on the 2nd, working one 8-hour shift.

Nichols Brothers, Electrical Contractors, employed an average daily force of 3 men as follows: Moving equipment from R. R. to site of work on the 14th, 22nd to the 24th, unpacking same from the 17th to the 21st, installing machinery from the 26th to the 31st, working one 8-hour shift per day.

Sewage Treatment Plant on North Branch of the Chicago River.

The Sanitary District Organization employed a force of 6 men loading tanks and other material on a scow at the Stock Yards Testing Station from the 25th to the 31st, preparatory to moving same to the vicinity of Halsted street and Chicago ave. where they are to be used in the new Tannery Testing Station, and a force of 3 men was engaged in building weirs and installing recording gauges at Montrose ave., Irving Park boulevard, Belmont ave., Diversey boulevard, Clybourn ave., Chicago ave., Kinzie st. and Blackhawk street, throughout the month.

Desplaines River Sewage Treatment Plant.

Leyden-Ortseifen Company, Contractor, commenced operations on the 9th and continued throughout the month. The work consisting of preliminary ditching and other items preparatory to the construction, the laying of water main and tile drains was also carried on during the month, an average daily force of 6 men was employed.

SEWERS.

CALUMET INTERCEPTING SEWER.

Contract Section No. 5.

Byrne Brothers Dredging and Engineering Company, Contractors, continued operations throughout the month. The work consisting of repairs to plant, building forms, laying construction track and other miscellaneous items. An average daily force of 14 men and 2 teams were employed.

Contract Section No. 6.

Byrne Brothers Dredging and Engineering Company, Contractors, continued operations throughout the month. The work consisting of grading streets, placing backfill on the Chicago Gun Club property, laying tile sewer in 116th street. The sewer was pumped out on the 19th and the work of cleaning the same was carried on from the 19th to the 31st. An average daily force of 56 men and one team were employed.

Evanston Intercepting Sewer.

Nash-Dowdle Company, Contractors, continued operations throughout the month. The work consisting of construction of manholes, making sewer connections, cleaning out of sewer in Custer avenue, cleaning and repairing streets and parkways in various locations. An average daily force of 21 men and 2 teams were employed.

Temporary Pumping Plant at Evanston.

Nash-Dowdle Company, Contractors- continued the operation of the pumps throughout the month. An average daily force of 3 men was employed.

Desplaines River Intercepting Sewer.

Nash Brothers, Contractors, continued operations throughout the month. The work consisting of the construction of the main line sewer in First avenue, in tunnel, between Madison and Lake streets and the construction of the Madison street line in tunnel. An average daily force of 93 men was employed. The work was 30.7 per cent completed at the end of the month.

PUMPING STATIONS.

Calumet Sewage Pumping Station.

T. J. Forschner, Contracting Company Contractors, continued operations throughout the month. The work consisting of placing concrete in the substructure of the station, placing reinforcing steel, anchor bolts, electrical conduits and other similar work. An average daily force of 96 men was employed. The work was 24.7 per cent completed at the end of the month.

Evanston Sewage Pumping Station.

Nash-Dowdle Company, Contractors, continued operations throughout the month. The work consisted of excavation and placing concrete in the substructure of the station. The manufacturing of the pumps, electrical equipment, valves, and piping was carried on in the various shops. An average daily force of 21 men was employed.

MAINTENANCE AND OPERATION.

MAIN CHANNEL.

Bridges.

The main channel repair force worked at the controlling works and 16th street Desplaines river Bridge on painting and repair work.

Controlling Works.

The Bear Trap Dam was open some part of seven days or a total of forty-seven hours, an average of one hour and thirty-one minutes for each day of the month.

The Sanitary District Organization employed a force of 4 men repairing, cleaning and painting window frames, flag pole, gates, doors, etc., at the Controlling Works, from the 16th to the 30th.

MAIN CHANNEL EXTENSION.

Walls.

The Sanitary District Organization employed an average daily force of 12 men from the 2nd to the 31st, repairing rafts, cleaning form lumber and cutting out disintegrating concrete, north of the 16th street bridge.

BRIDGES.

16th Street Bridge.

The Sanitary District Organization employed a force of 4 men from the 22nd to the 31st, in replacing posts and railings on the approach to this bridge and scraped the steel work preparatory to painting same.

Two men were on duty on the 9th and 16th street bridges, working from 7 a. m. to 3 p. m. and from 3 p. m. to 11 p. m.

Butterfly Dam.

This dam was operated on the 4th, 11th, 18th and 25th to ascertain its condition. On May 3rd light circuit was repaired and new rod made.

Dams at the Power House.

The Forty-Eight Foot Dam was open some part of ten days or a total of sixty-five hours and thirty-five minutes, an average of two hours and seven minutes for each day of the month. The Twelve Foot Dam was closed the entire month.

Samples of canal water were taken every eight hours for the Sanitary Division. A weather vane was installed on the 6th. The bell was repaired on the 8th. Three men were on duty working shifts of 8 hours each, throughout the month.

I. & M. Canal Lock at the Power House

15 boats passed through the lock

during the month. The lock was operated by the dam tender. The Lock circuit was repaired on the 8th. Dredging was done in front of the lock gates from the 26th to the 29th by the Electrical Department.

NORTH SHORE CHANNEL.

Outfall and Ditches.

The Sanitary District Organization employed a force of 8 men cleaning catch basins near the Wilmette Pumping Station from the 2nd to the 19th. Repairing the Laurel avenue sewer outfall from the 20th to the 23rd; Repairing the southwest ditch at Dempster street from the 24th to the 31st.

BRIDGES.

Kenilworth (Touhy) Avenue Bridge.

The Sanitary District Organization employed a force of 3 men laying the new floor on this bridge from the 1st to the 12th, on which date the bridge was opened to traffic. And a force of two men, in painting the steel work were engaged from the 1st to the 20th, on which date the painting was completed.

Church Street Bridge.

The Sanitary District Organization employed a force of 3 men on the work of underpinning the west abutment with concrete and trimming up the ditches west of the channel from the 12th to the 20th and 5 men from the 20th to the 31st. Tools and material were moved to the Dempster street bridge and a shanty was built. The work of underpinning the west abutment was begun on the 27th.

SEWAGE TREATMENT PLANTS.

Morton Grove Plant.

This plant was operated throughout the month and the regular maintenance and operation supervised by the Sanitary Division.

PUMPING STATIONS.

39th Street Pumping Station.

This station was operated, pumping sewage and some fresh water, throughout the month. The pumps were operated as follows:

Sewer pump No. 1 was operated some part of sixteen days or a total of one hundred and sixteen hours and thirty-five minutes. Pump No. 2 some part of eighteen days or a total of three hundred and seven hours and fifty minutes. Pump No. 3 some part of fourteen days or a total of two hundred and three hours and forty-five minutes. Pump No. 4 some part of twenty-four days or a total of four hundred and fifteen hours and forty-five minutes. Screw pump No. 5 was operated some part of one day or a total of eight hours and forty minutes. The five pumps were operated for a grand average of seven hours and seven minutes for each day of the month, and pumped an average of twelve thousand three hundred and twenty-eight cubic feet of sewage for each minute of the month.

Fresh water pumps No's. 5 and 6 were operated some part of one day or a total of nine hours and fifty minutes, an average of nineteen minutes for each day of the month, and pumped an average of eight hundred and thirty-six cubic feet of water for each minute of the month.

On the third day of the month during a heavy rain screw pump No. 5 was operated eight hours and forty minutes pumping sewage.

Sewage pump No. 2 was shut down on the 1st on account of a burned thrust bearing and was put back in service on the 8th. Repairs were made to the thrust plates on sewage pump No. 3 on the 8th and 9th. Two 250 gallon oil storage tanks were installed between the 20th and 28th, and changes were made in the oil filtering system to make the loss of oil im-

possible. Miscellaneous repair work was carried on throughout the month. A heavy rain on the 3rd taxed the capacity of the station and one of the fresh water pumps was used to pump sewage.

Lawrence Avenue Pumping Station.

This station was operated pumping sewage and fresh water, throughout the month. The pumps were operated as follows:

Sewer pump No. 1 was operated some part of seven days or a total of eighty hours and fifty minutes. Pump No. 2 some part of seventeen days or a total of three hundred and twelve hours and fifty minutes. Pump No. 3 some part of twenty days or a total of four hundred hours and fifteen minutes. The three pumps were operated for a grand average of eight hours and thirty-two minutes for each day of the month and pumped an average of four thousand seven hundred and eighty-seven cubic feet of sewage for each minute of the month.

Fresh water pump No. 4 was operated some part of ten days or a total of one hundred and six hours and ten minutes, an average of three hours and twenty-five minutes for each day of the month, and pumped an average of three thousand eight hundred and ninety-nine cubic feet of water for each minute of the month.

The stoker of boiler No. 2 was overhauled between the 12th and the 20th. All storage coal was used up and on the 21st coal began to come in from the Sangamon County Mining Company.

Wilmette Pumping Station.

This station was operated, pumping fresh water, throughout the month. The pumps were operated as follows:

Pump No. 1 was operated some part of twenty-nine days or a total of six hundred and sixteen hours and forty-seven minutes. Pump No. 2 some part of sixteen days or a total of two hundred and seventy-eight hours and twenty-seven minutes. Pump No. 3 some part of fifteen days or a total of one hundred and ninety-nine hours and fifty-three minutes. Pump No. 4 some part of thirty days or a total of five hundred and twenty-three hours and twenty-six minutes. The four pumps were operated for a grand average of thirteen hours and three minutes for each day of the month, and pumped an average of one thousand eight hundred and sixty cubic feet of water for each minute of the month.

STRUCTURES AND EQUIPMENT FOR SANITARY AND SPECIAL INVESTIGATIONS.

Laboratory at 39th Street.

Chemical analyses were made weekly of samples collected from the Main Channel and the Illinois river at Morris, Ottawa, Peru and Chillicothe. Special analyses were made on the samples sent from Lockport. The laboratory force was engaged in working up records, on the Stockyards Testing Station.

Sewer and Rain Gages.

Rain gages were operated at the 39th street pumping station, Stock Yards testing station, Lockport, Kensington, and at 31st and Western ave. The records collected were worked up as time permitted.

Investigation of Water Pollution.

Daily samples were collected from Lake Michigan at 39th st. and from the Main Channel at Lockport. Weekly samples from Lockport, and the Illinois River at Morris, Ottawa, Peru and Chillicothe.

ENGINEERING.

Map Drafting Division.

The following work was carried on during the month. The Des-Plaines River Sewer Atlas was completed. Be-

gan plotting North Branch Topographic Survey. Laying out route for telephone line along Main Channel. Indexing and filing maps and plans. Compiling Calumet-Sag Channel Atlas and Chicago River Atlas. Preparing plat A. E. & C. R. R. easement for Desplaines River Sewer Computing Co-ordinates for North Branch Survey. Reducing notes North Branch Survey. Obtaining data at the C. & N. W. Ry. office, for the Desplaines River Sewer Atlas. Copying data at the County Building for Calumet Sewer Atlas. Taking inventory of Cooley maps. Tracing plan of vault fixtures. Coloring Right of Way maps for Storage Basin. Printing Index cards.

Sanitary Division.

The preparation of a report on the testing station work at the Stock Yards was continued. The preparation of plans and specifications for the Calumet sewer was continued. Conferences were held with officials of the City of Chicago. Preparation of plans of the Desplaines River treatment works was continued and conferences held with the village officials. The preparation of supplementary plans for the Calumet and Evanston pumping stations was continued. Correspondence was carried on with Consulting Engineer A. B. Wood on all pumping stations. Studies were made of the proposed re-arrangement of the 95th street pumping station. Preparation of plans and specifications of the Des-Plaines River Sewage Treatment Plant was continued. The preparation of plans for the storm overflow to the Calumet River at Wildwood was continued. Studies were continued on an auxiliary generator station at the Calumet Sewage Treatment Plant, to be run by oil engines. Conferences were held with various parties from the Calumet Region in Indiana over proposed schemes for sewage diversion and treatment. A meeting was held with the Mayors and other public officials of the towns in this region and the City Engineers of Hammond, East Chicago, Whiting and Gary were requested by their respective Mayors or Citizens to prepare basic data and to form a Committee with the Chief Engineer and Sanitary Engineer of the Sanitary District to make a report. A visit was made to the Milwaukee Testing Station by the Chemist and Sanitary Engineer.

Rridge Division.

Work was continued on the detail drawings for the reinforced concrete work of the Calument Sewage Pumping Station.

The detail drawings of the steel work for the Desplaines Sewage Pumping Station were checked. A new layout was made for track diversion and temporary trestles at the G. T. W. Ry. bridge and B. & O. C. T. bridge. A plan was begun for a new concrete outfall at Dempster street (N. S. C.) also for a concrete culvert across Dempster street west of the North Shore Channel. A preliminary draft was made for an agreement with the City of Chicago for the construction of a single leaf bascule bridge across the Chicago River.

Hydraulic Measurement Division.

The self-recording gauges at the Main Channel at Willow Springs and Lemont and on the Lake Front at the U. S. Coast Guard Station were operated and periodically inspected. The records from the gauges were worked up in the office.

Field Parties.

Party was engaged on Chicago River dredging and docking. Setting concrete monuments on Section "O" Main Channel. Locating and estimating fill at sewer outlet at Argo. Tak-

ing soundings at Lemont under stone loading platform. Inspecting I. & M. Canal for obstructions Survey for outfalls on the North Shore Channel. Repairs to Desplaines River Levee at Summit. High water on the Des-Plaines River. Survey of the North Branch. Taking photographs of Section 1 Calumet-Sag Channel.

The Calumet-Sag Field parties performed the usual routine construction duties as follows: The Sag Division on Section 1; the Blue Island Division on Sections 13 and 14.

The general engineering force and other employees continued superintending engineering, construction and maintenance work, checking estimates, compiling unit, construction costs of the Desplaines River, Evanston and Calumet sewers and of the Calumet-Sag Channel sections.

Desplaines River Sewage Treatment plant. Evanston and Calumet Pumping stations.

Keeping the accounts of the department, preparing vouchers, furnishing information for other departments, and performing other necessary duties, etc.

Respectfully submitted,

G. M. WISNER,
Chief Engineer.

The Clerk presented report of the Attorney relative to the deposit of $12,000 of Liberty Bonds by the James A. Sackley Company, which was ordered published and filed, as follows:

Tuesday, September 9, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — I transmit herewith agreement between the James A. Sackley Company and The Sanitary District of Chicago with reference to the deposit by said Company with the Sanitary District of Liberty Bonds to the face value of $12,000.00 as security in addition to the bond of said Company for the faithful performance of its contract with the District, which contract and bond were approved by the Board of Trustees on September 4th, 1919. The agreement herewith transmitted was authorized by the Board of Trustees on September 4th, 1919, and was executed in duplicate and the duplicate copy delivered to the Sackley Company. pany.

The $12,000.00 in Liberty Bonds were delivered by the Sackley Company to the undersigned, who has delivered the same to the Treasurer of the Sanitary District, and I also transmit herewith the receipt of the Treasurer for said bonds.

I recommend that said agreement and receipt be published in the Proceedings and filed with the Clerk of the Sanitary District.

Respectfully submitted,

C. ARCH WILLIAMS,
Attorney.

CHICAGO, September 9, 1919.

Receipt for Liberty Bonds in Connection with the Contract Between The Sanitary District of Chicago and The James A. Sackley Company.

Received from C. Arch Williams, Attorney for The Sanitary District of Chicago, twelve Second Liberty Loan Converted 4¼ per cent Bonds, aggregating $12,000.00 face value, each for the sum of $1,000.00 with one coupon attached to each of said bonds, said conpons maturing May 15th, 1920, each for interest amounting to $21.25, which bonds are numbered as follows:

898255, 898256, 898257, 898258, 898259, 898260, 898261, 898262, 898263, 898264, 898265, and 898266,

said bonds being deposited with the Sanitary District under an agreement dated September 4, 1919, between the Jas. A. Sackley Company and The San-

itary District of Chicago, authorized by the Board of Trustees of the Sanitary District at its meeting on September 4, 1919, as additional security to the bond of Jas. A. Sackley Company approved by the Board of Trustees of the Sanitary District September 4, 1919, to secure the faithful performance of the contract between the said Jas. A. Sackley Company and the Sanitary District approved by the Board of Trustees on September 4, 1919.

G. M. Reynolds,
Treasurer.

By J. R. Washburn,
Ass't. Treasurer.

The Clerk presented report of the Attorney transmitting copy of order of the Public Utilities Commission of Illinois approving agreement between the Aurora, Elgin & Chicago Railroad Company and the Sanitary District dated February 8th, 1919, relative to the construction, maintenance and use of a four foot intercepting sewer in First Avenue, Maywood, Cook County, Illinois, which was ordered published and filed, as follows:

Chicago, September 8, 1919.

To the Honorable, The President and Members of the Board of Trustees of The Sanitary District of Chicago.

Gentlemen—I transmit herewith copy of the order of the Public Utilities Commission of Illinois approving the agreement between the Aurora, Elgin & Chicago Railroad Company and the Sanitary District of Chicago, dated February 8th, 1919, "Relative to the construction, maintenance and use of a four foot intercepting sewer in First Avenue, Maywood, Cook County, Illinois."

This order was received by me in a letter from the Public Utilities Commission under date of September 5th, and I respectfully request that the same be filed with the Clerk by order of the Board.

Respectfully submitted,
C. Arch Williams,
Attorney.

REPORTS OF COMMITTEES.

Engineering.

Trustee Clark presented the following report from the Committee on Engineering:

Chicago, September 18, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

Gentlemen—Your Committee on Engineering reports that it has received a communication from the Electrical Engineer in which he states that it is necessary to install at the Terminal Station of the Sanitary District at 31st street and Western avenue, a platform scale of sufficient capacity to weigh material delivered by auto trucks or wagons; that Fairbanks, Morse & Co. have offered to furnish a 20 ton auto truck scale for the sum of $645.00 and the auxiliary steel work therefor for the sum of $291.20. Said scale and auxiliary steel is to be installed by the regular employes of the Sanitary District. He requests that he may be authorized to accept the offer of said Comapany as to the purchasing of said scale and to either accept the offer of said Company as to purchasing said auxiliary steel or to purchase the same in the open market for a price not in excess of $291.20.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Electrical Engineer be and he is hereby authorized and directed to accept said offer of Fairbanks, Morse & Co. to furnish said scale for the sum of $645.00 and either to accept said offer of said Company to furnish said auxiliary steel for the sum

of $291.20 or to purchase said auxiliary steel in the open market for the lowest price obtainable, provided the cost of the same shall not exceed the sum of $291.20.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Trustee Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Sergel, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Trustee Clark presented the following report from the Committee on Engineering:

CHICAGO, Sept. 18, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Electrical Engineer in which he states that it is necessary to obtain a supply of coal for the operation of the H. N. May substation during the coming peak load period in order to care for the street lighting system of the City of Chicago.

Your Committee further reports that it has had difficulty in obtaining a supply of coal for the Thirty-ninth Street Pumping Station and the Lawrence Avenue Pumping Station which will meet the guarantee specified in the contracts for furnishing said coal, and is of the opinion that it is not advisable under the circumstances to advertise for bids for furnishing coal which will meet the specified guarantees for the H. N. May Station.

Your Committee further reports that the Electrical Engineer has taken up with the Edwards & Bradford Lumber Company the question of its ability to furnish coal to said station which will meet said guarantees on the terms and for the prices specified in its bid for furnishing coal to the Lawrence Avenue Pumping Station. Said Company has offered to furnish such coal if said contract is modified in the following particulars, towit: That the price quoted in said bid be made "subject to increases or decreases by change of miners' scale or freight rates," and that Section 9 of said specifications relating to accidents, car shortage, etc., be changed so that "deliveries would be subject to failure of the railroads to supply sufficient or suitable equipment, to strikes, labor agitation and disturbances, mine accidents and other causes beyond our control" and the Electrical Engineer recommends that said offer be accepted and approximately 1,000 tons of coal screenings be ordered from said Company on the terms and for the prices specified in its said bid for supplying coal to the Lawrence Avenue Pumping Station.

Your Committee is of the opinion that said offer of said Company should be accepted and the contract awarded to said Company to furnish coal on the basis of said specifications as amended in the particulars specified, and recommends the passage of the following order:

Ordered, That a contract, amended as above specified, for furnishing approximately 1,000 tons of coal screenings to the H. N. May Substation be and the same is hereby awarded to the Edwards & Bradford Lumber Company on the terms and for the prices specified in its bid for furnishing coal screenings to the Lawrence Avenue Pumping Station, and it is further

Ordered, That the Chairman of the Committee on Finance and the Clerk be and they are hereby authorized and directed to execute in duplicate said contract as amended in accordance with the specifications of the Sanitary District when the same shall have been executed by said Edwards & Bradford Lumber Company and a bond for the faithful performance of said work shall have been furnished, and approved by the Committee on Finance.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
PATRICK J. CARR,
Committee on Engineering.

Trustee Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Clark, Healy, Lawley, Littler, Mueller and Paullin—Six.

Nays—Messrs. Sergel and Nance—Two.

Trustee Clark presented the following report from the Committee on Engineering:

CHICAGO, September 18, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering to which were referred at the meeting of May 1, 1919 (page 365-A of the Proceedings), bids for furnishing coal screenings for the Thirty-ninth Street Pumping Station reports that on July 17, 1919 (page 903 of the Proceedings), the Board rejected the bid of the Sangamon County Coal Company for the reason that analyses of samples selected from coal furnished by said Company showed that none of the coal furnished equalled the guarantee specified and also on August 7, 1919 (page 968 of the Proceedings), the Board rejected the bid of the Sterling Midland Coal Company for the same reason and authorized the Chief Engineer to purchase from the Bickett Coal & Coke Company a sufficient number of cars of coal to enable him to determine by analyses whether said coal equalled said guarantee.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that the analyses of samples of coal furnished by the Bickett Coal & Coke Company show that said coal does not equal the guarantee specified and recommends that said bid be rejected and that a contract for furnishing said coal for said station be awarded to the Edwards & Bradford Lumber Company, the only remaining bidder.

Your Commmittee further reports that the Chief Engineer states that analyses of samples of the coal furnished by said Company show that said coal will comply with the specifications and he recommends that said contract be awarded to said firm for furnishing said coal.

Your Committee further reports that it is advised by the Attorney that an inspection of the bid of the last mentioned Company shows that it made said bid on the condition that the prices quoted were made "subject to increases or decreases by change of miner's scale or freight rates" and also refused to concur in Section 9 of the specifications relating to accidents,, car shortage, etc., and stipulated that "deliveries would be subject to failure of the railroads to supply sufficient or suitable equipment, to strikes, labor agitation and disturbances, to mine accidents and other causes beyond our control," and that said bid is therefore informal.

Your Committee further reports that it is advised by said Company that it is ready and willing to enter into a contract to furnish said coal for said sta-

tion in accordance with the specifications if the same are amended in the particulars above noted.

Your Committee is of the opinion that inasmuch as said Edwards & Bradford Lumber Company is the only bidder which can furnish coal equal to the specified guarantee that the specifications should be amended in the particulars specified and a contract awarded to said Company, otherwise the Sanitary District may face a shortage of coal during the winter months.

Your Committee therefore recommends the passage of the following order:

Ordered, That the bid of the Bickett Coal & Coke Company be, and the same is hereby rejected for the reason stated; and it is further

Ordered, That the specifications of the Sanitary District for furnishing coal screenings for the Thirty-ninth Street Pumping Station be and the same are hereby amended in the particulars above specified, and it is further

Ordered, That the contract as amended for furnishing coal screenings to the Thirty-ninth Street Pumping Station be and the same is hereby awarded to the Edwards & Bradford Lumber Comapny on the terms and for the prices specified in its bid, and it is further

Ordered, That the Chairman of the Committee on Finance and the Clerk be and they are hereby authorized and directed to execute in duplicate said contract as amended in accordance with the specifications of the Sanitary District when the same shall have been executed by said Edwards & Bradford Lumber Company and the bond for the faithful performance of said work shall have been furnished and approved by the Committee on Finance, and it is further

Ordered, That the check of the respective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Trustee Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Messrs. Sergel and Nance — Two.

Trustee Clark presented the following report from the Committee on Engineering:

CHICAGO, September 18, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering to which were referred at the meeting May 1, 1919 (page 365-A of the Proceedings), bid for furnishing coal screenings for the Lawrence Avenue Pumping Station reports that on July 17, 1919 (page 903 of the Proceedings), the Board rejected the bid for the Sangamon County Coal Company for the reason that analyses of samples selected from coal furnished by said Company showed that none of the coal furnished equalled the guarantee specified.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that the analyses of samples of coal furnished by the Sterling Midland Coal Company and by the Bickett Coal & Coke Company show that said coal does not equal the guarantee specified and rec-

ommends that said bids be rejected and that a contract for furnishing said coal for said station be awarded to the Edwards & Bradford Lumber Company, the only remaining bidder.

Your Committee further reports that the Chief Engineer states that analyses or samples of the coal furnished by said Company show that said coal will comply with the specifications and he recommends that said contract be awarded to said firm for furnishing said coal.

Your Committee further reports that it is advised by the Attorney that an inspection of the bid of the last mentioned Company shows that it made said bid on the condition that the prices quoted were made "subject to increases or decreases by change of miner's scale or freight rates" and also refused to concur in Section 9 of the specifications relating to accidents, car shortage, etc., and stipulated that "deliveries would be subject to failure of the railroads to supply sufficient or suitable equipment, to strikes, labor agitation and disturbances, to mine accidents and other causes beyond our control," and that said bid is therefore informal.

Your Committee further reports that it is advised by said Company that it is ready and willing to enter into a contract to furnish said coal for said station in accordance with the specifications if the same are amended in the particulars above noted.

Your Committee is of the opinion that inasmuch as said Edwards & Bradford Lumber Company is the only bidder which can furnish coal equal to the specified guarantee that the specifications should be amended in the particulars specified and a contract awarded to said Company, otherwise the Sanitary District may face a shortage of coal during the winter months.

Your Committee therefore recommends the passage of the following order:

Ordered, That the bids of the Sterling Midland Coal Company and the Bickett Coal & Coke Company be and the same are hereby rejected for the reason stated, and it is further

Ordered, That the specifications of the Sanitary District for furnishing coal screenings for the Lawrence Avenue Pumping Station be and the same are hereby amended in the particulars above specified, and it is further

Ordered, That the contract as amended for furnishing coal screenings to the Lawrence Avenue Pumping Station be and the same is hereby awarded to the Edwards & Bradford Lumber Company on the terms and for the prices specified in its bid, and it is further

Ordered, That the Chairman of the Committee on Finance and the Clerk be and they are hereby authorized and directed to execute in duplicate said contract as amended in accordance with the specifications of the Sanitary District when the same shall have been executed by said Edwards & Bradford Lumber Company and a bond for the faithful performance of said work shall have been furnished and approved by the Committee on Finance, and it is further

Ordered, That the check of the respective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
PATRICK J. CARR,
Committee on Engineering.

Trustee Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—seven.

Nays—Messrs. Sergel and Nance — Two.

Trustee Clark presented the following report from the Committee on Engineering:

CHICAGO, September 18, 1919.

To the Honorable, The President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Electrical Engineer in which he states that the Sanitary District for a number of years has been using certain transformers belonging to the City of Chicago at the Wabansia Avenue Substation; that the City has recently notified him that it will shortly need these transformers for its own purposes.

He further states that the City has abandoned the use of the Emerald Avenue Substation where the Sanitary District has transformer equipment, but that the load supplied from said station can be transferred to the Ashland Avenue Substation by increasing the equipment therein, and that the transformers which are now in use at the Emerald Avenue Substation can be used in place of the transformers belonging to the City at the Wabansia Avenue Substation, and he recommends that three 500 K. V. A. transformers be purchased for installation at said Ashland Avenue Substation to care for the load now supplied from said station and also the Emerald Avenue Substation, and requests that he may be authorized to prepare plans and specifications for the purchase of said transformers.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Electrical Engineer be and he is hereby authorized and directed to prepare plans and specifications for the purchase of the transformers above specified and present the same when prepared to your Committee for approval.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,

Trustee Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Trustee Clark presented the following report from the Committee on Engineering:

CHICAGO, September 18, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Electrical Engineer in which he states that when a coffer dam placed in the penstock on No. 6 unit at the Power House at Lockport was nwatered it was discovered that the head gates were in bad condition and will have to be practically rebuilt: that this condition is largely due to the fact that said head gates were never equipped with hydraulic rams for operating same as are all the other headgates on the other units. He further states that it is extremely important that rams be installed in the gates in question in order to prevent any delay in getting Unit No. 6 back in service in time for the peak load, and he requests authority to purchase in the open market three hydraulic rams to operate said gates at an estimated cost of $500.00 each, the work of installing

said rams to be done by the regular employes of the Sanitary District.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Electrical Engineer be and he is hereby authorized and directed to purchase in the open market for the lowest price obtainable three hydraulic rams to operate the head gates of Uni No. 6 at the Power House at Lockport, provided the cost of the same shall not exceed the sum of $500.00 each and to install said rams by the regular employes of the Sanitary District.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Trustee Clark presented the following report from the Committee on Engineering:

CHICAGO, September 18, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that in the year 1912, the Sanitary District constructed the Stony Creek Diversion Ditch in order to divert the waters of Stony Creek during the construction of contract Section 13 of the Calumet-Sag Channel, and constructed temporary bridges across said ditch at Robinson, Chicago and Canal Streets in the City of Blue Island.

He further states that said bridges are now in need of repairs and that their maintenance is not included in the contract for work on said section, and he estimates the cost of repairing said bridges at $450.00, $400.00 and $400.00 respectively.

He further states that said work can be performed at a less cost by A. Guthrie & Co., Inc., contractor for said Section 13, under the "extra work" clause of its contract than in any other manner, and he requests authority to order said contractor to do said work.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized to order A. Guthrie & Co., Inc., to perform the work of repairing said bridges, under the "extra work" clause of its said contract, provided that the cost thereof shall not exceed the respective sums above stated.

Trustee Clark presented the following report from the Committee on Engineering:

CHICAGO, September 18, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Electrical Engineer in which he states that the two three-quarter ton auto trucks used as trouble cars by the Electrical Department which were purchcased by the Sanitary District from the International Harvester Company over two years ago have given unusually good service but further use will necessitate frequent repairs and it is advisable to obtain two new trucks in their stead. He further states that the International Harvester Company has offered to furnish the chassis for two new three-quarter ton trucks, transfer the bodies and lighting equipments from the chassis of the old trucks and mount same on the new chassis, make all necessary repairs to said bodies and repair and letter same at a cost of $1,775.00 for each truck and will allow on said price the sum of $750.00 for each old chassis, making each new truck cost the net sum of $1,025.00 and he recommends that said offer be accepted.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Electrical Engineer be and he is hereby authorized and directed to accept the offer of the International Harvester Company to furnish the Sanitary District with two new three-quarter ton auto trucks on the basis stated.

Trustee Clark presented the following report from the Committee on Engineering:

CHICAGO, September 18, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering herewith submits a form of license agreement to be entered into between The Baltimore & Ohio, Chicago Terminal Railroad Company and the Sanitary District whereby said Railroad Company grants permission to the Sanitary District to install and maintain a four duct underground conduit line across the right of way and under the tracks of said Railroad Company in the west side of Western Avenue near 75th street, as indicated by red lines on a blue print attached to said agreement.

Your Committee having examined said agreement, which has been approved by the Attorney recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District, and the Clerk be, and they are hereby authorized and directed to execute in duplicate the form of said agreement hereto attached.

JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Trustee Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Trustee Clark presented the following report from the Committee on Engineering:

CHICAGO, September 18, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Assistant Chief Engineer in which he states that the peat near the Bach Road crossing the Calumet-Sag Channel is on fire and has been burning for the past ten days; that the fire is now in close proximity to the riprap slopes of the Calumet-Sag Channel, and if said fire should destroy the peaty soil which supports said riprap slopes the same would collapse. He further states that in order to put out said fire it is necessary to rent a scow with boiler, pump and hose on a per diem basis, said equipment to be operated by the employes of the Sanitary District at a total estimated cost of $1,000.00.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to rent said scow and equipment on a per diem basis for the purpose stated, provided the cost of the same shall not exceed the sum of $1,000.00 and to operate said scow and equipment with the employes of the Sanitary District.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Trustee Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Trustee Clark presented the following report from the Committee on Engineering:

CHICAGO, September 18, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the specifications for the construction of a heavy traffic highway upon the right-of-way of the North Shore Channel of the Sanitary District contain special provisions relative to the furnishing of cement by the Sanitary District to the Contractor.

Your Committee further reports that it examined and approved the specifications prepared by the Chief Engineer for the purchase of said cement and in order that work of constructing said highway might not be delayed for lack of cement, your Committee directed that the purchase of said cement be advertised so that bids could be received and opened at the meeting of the Board to be held September 25, 1919, or the next regular meeting thereafter.

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the specifications prepared by the Chief Engineer for the purchase of the cement above specified be and the same are hereby approved, and it is further

Ordered, That the action of the Committee on Engineering, in directing that the purchase of said cement be advertised, be and the same is hereby ratified and confirmed.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Trustee Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Recess.

Mr. Clark moved that the Board take a recess for five minutes for the purpose of considering informal bids received for furnishing 2,000 tons of lump coal for the 39th Street Pumping Station.

The motion prevailed.

At the expiration of said period of time the Board reconvened and proceeded to the regular order of business.

Trustee Clark presented the following report from the Committee on Engineering:

CHICAGO, September 18, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering to which were referred at the meeting of September 4, 1919 (page 1118 of the Proceedings) bids for furnishing approximately 2,000 tons of Franklin County No. 2 inch lump coal for the Thirty-ninth street Pumping Station reports that it has considered the proposal of the East Coal Company the only one presented, together with the report submitted by the Chief Engineer and is of

the opinion that the price bid for said coal is excessive.

Your Committee further reports that it has considered informal bids obtained by the Chief Engineer from four coal companies to furnish said coal in accordance with the guarantee contained in the specifications therefor and has also considered a report made by the Chief Engineer with reference to said bids.

Your Committee finds that the Bickett Coal & Coke Company is the lowest responsible bidder and said Company guarantees that said coal will meet the requirements of said specifications.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the bid of the East Coal Company be and the same is hereby rejected for the reason stated and that the check of said bidder be returned to it, and it is further

Ordered, That the contract for furnishing approximately 2,000 tons of Franklin County No. 2 inch lump coal for the Thirty-ninth Street Pumping Station be and the same is hereby awarded to the Bickett Coal & Coke Company on the terms and for the price specified in its bid, said contract to be drafted so that it will comply with the guarantee specified in the specifications of the Sanitary District, and it is further

Ordered, That the Chairman of the Committee on Finance and the Clerk be and they are hereby authorized and directed to execute in duplicate said contract in accordance with the specifications of the Sanitary District when the same shall have been executed by said Bickett Coal & Coke Company and a bond for the faithful performance of said work shall have been furnished, and approved by the Committee on Finance.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Trustee Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Mr. Nance.

Passed and Not Voting—President Sergel.

Finance.

Trustee Lawley presented the following report from the Committee on Finance:

CHICAGO, September 18, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that Mrs. Peter Homerding has presented a claim against the Sanitary District to recover damages for personal injuries to herself and damages to a buggy in which she was driving caused by her horse stepping into a hole in the flooring of the Stevens street bridge across the Main Channel of the Sanitary District at Lemont, Illinois.

Your Committee further reports that said claimant has offered to settle said claim for the sum of $25.00, which, in the opinion of your Committee is a reasonable settlement.

Your Committee having fully considered the matter recommends the passage of the following order:

Ordered, That the Chairman of the

Committee of Finance of the Board of Trustees of the Sanitary District, and the Clerk, be, and they are hereby authorized and directed to issue a warrant in the sum of $25.00, payable to Mrs. Peter Homerding on a voucher to be approved by the Attorney in full settlement of the above claim and deliver said warrant to said claimant upon the execution by her and her husband of a release of all claims or demands for damages arising out of the said accident.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
WILLIS O. NANCE,
MATT A. MUELLER,
Committee on Finance.

Trustee Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Trustee Lawley presented the following report from the Committee on Finance:

CHICAGO, September 18, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to report that bonds of The Sanitary District of Chicago, to the amount of two hundred six thousand ($206,000.00) dollars will mature October 1, 1919.

Your Committee further reports that the semi-annual interest on the eleventh, seventeenth and twenty-sixth issues of bonds of The Sanitary District of Chicago, amounting to the sum of twenty-one thousand five hundred sixty dollars ($21,560.00), will fall due October 1, 1919. Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees and the Clerk be, and they are hereby, authorized to draw a warrant payable to the order of the Treasurer of The Sanitary District of Chicago, for the sum of two hundred twenty-seven thousand five hundred sixty dollars ($227,560.00), to pay the principal and semi-annual interest due October 1, 1919, on bonds of The Sanitary District of Chicago, as follows:

The principal of 125 bonds of the eleventh issue		$125,000.00
The principal of 56 bonds of the seventeenth issue		28,000.00
The principal of 53 bonds of the twenty-sixth issue		53,000.00
Total bonds		$206,000.00
Six months' interest on $250,000.00 of the eleventh issue, at 4%	$ 5,000.00	
Six months' interest on $192,000.00 of the seventeenth issue at 4%	3,840.00	
Six months' interest on $636,000.00 of the twenty-sixth issue at 4%	12,720.00	
Total interest		$ 21,560.00
Total principal and interest		$227,560.00

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
WILLIS O. NANCE,
MATT A. MUELLER,
Committee on Finance.

Trustee Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Trustee Lawley presented the following report from the Committee on Finance:

CHICAGO, September 18, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance herewith submits to the Board a grant of easement whereby The Forest Preserve District of Cook County, grants to The Sanitary District a perpetual easement to construct, reconstruct, repair, maintain and operate an intercepting sewer and appurtenance thereto in the Des Plaines River District in, under and through certain real estate therein described. Said easement is in the usual form in use by the District in such cases.

Your Committee further reports that it has examined said grant of easement, which has been approved by the Chief Engineer and Attorney and therefore recommends the passage of the following order:

Ordered That the Chairman of the Committee on Finance of the Board of Trustees, of The Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute in duplicate the said form of easement hereto attached. The same having been duly executed by the proper officials of The Forest Preserve District of Cook County.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
WILLIS O. NANCE,
MATT A. MUELLER,
Committee on Finance.

Trustee Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Trustee Lawley presented the following report from the Committee on Finance:

CHICAGO, September 18, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that in accordance with the terms of a contract dated June 29, 1916 (page 903 of the Proceedings), between Byrne Bros. Dredging & Engineering Co. and the Sanitary District, for the excavation and collateral work on contract section six of the Calumet Intercepting sewer, the Sanitary District has retained from time to time, as a reserve percentage, 12½% of the amount due said contractor, which on September 15, 1919, equal the sum of $75,906.86, which sum under the terms of said contract cannot be paid said contractor until 30 days' after the completion of the work under said contract, and said Contractor has requested that he be paid $50,000.00 of said sum.

Your Committee further reports that said contractor also entered into a contract with the Sanitary District dated June 29, 1916 (page 864 of the Proceedings) for the construction of the Calumet Intercepting Sewer Contract section No. 5 and is behind in the progress of said work but the Chief Engineer reports that said Company has installed a good system and in all probability said contract will be completed during the coming year and it will aid said contractor very materially on the work on this section if said payment is made.

Your Committee further reports that it is of the opinion that said payment of $50,000 should only be made to said contractor on condition that the sureties on its bonds for the faithful performance of both of said contracts consent thereto in writing and your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to pay upon the voucher of the Chief Engineer to Byrne Bros. Dredging & Engineering Company the sum of $50,000.00 retained on said contract No. 6 for the excavation and collateral work on said Calumet Intercepting sewer, provided that the United States Fidelity & Guaranty Company, as surety on the bond of said contractor for the faithful performance of its contract for the construction of said contract section 6 and also as surety on the bond of said contractor for the faithful performance of its contract for the construction of contract section five of said intercepting sewer consents in writing that said payment may be made and that all the conditions and terms of both said contracts shall otherwise remain in full force and effect.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
WILLIS O. NANCE,
MATT A. MUELLER,
Committee on Finance.

Trustee Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Trustee Lawley presented the following report from the Committee on Finance:

CHICAGO, September 18, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a communication from the Chief Engineer in which he states that the work covered by the contract of Jas. O. Heyworth with the Sanitary District for the excavation and construction of contract section one of the Calumet-Sag Channel dated September 24, 1914 (page 1629 of the Proceedings), and for making the connection between the Main Channel and the Calumet-Sag Channel authorized by the Board June 6, 1918 (page 401 of the Proceedings), has been completed in accordance with all the terms and conditions of the contract except as to the time of completion. It appears from said communication that there was default in time of 157 days in the completion of said work but the contractor claims he was delayed in completing said work for a total period of 213.4 days, due to war conditions, failure to obtain the site of the work at Archer Road and at two railroad crossings and for time lost in moving machinery for scabbling and the Chief Engineer has extended the time for the completion of said work for a period of time equal to said 157 days' delay.

The Chief Engineer further states that he has deducted the sum of $1,000.00 from the amount due said Contractor, which is to be withheld until the questions of additional compensation due to the increased cost of said work due to war conditions and the validity of a claim submitted by the Contractor for extra backfilling have been settled.

Your Committee is of the opinion that the sum of $44,424.90, found to be due said Contractor after deducting the sum of $1,000.00 should be paid and recom-

mends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to pay to Jas. O. Heyworth on the voucher of the Chief Engineer said sum of $44,424.90 upon the execution by him of a receipt in full of all claims and demands arising out of or resulting from the performance of the work under said contract except as to said sum of $1,000.00 withheld by the Sanitary District as above stated, and as to all unsettled claims for additional compensation due to war conditions and as to said claim for extra backfilling, and also upon the execution of an affidavit by him that all materialmen, mechanics and workmen employed by him under said contract have been paid in full, said payment, however, to be made subject to any unaccrued or unmatured obligation imposed by said contract.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Trustee Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, Sept. 18, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Yours respectfully,

JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—None.

Employment.

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, Sept. 18, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of actions taken:

NEW APPOINTMENTS.

Provided for in 1919 Budget.

Illinois Valley Department.

Edw. P. Napier, Rodman, $100.00 per month.

Joseph Merrion, Rodman, $100.00 per month.

W. L. Clark, Rodman, $100.00 per month.

John J. Burke, Rodman, $100.00 per month.

Walter Weitemeyer, Rodman, $100.00 per month.

Engineering Department.

Stanley Kasperak Oiler, $140.00 per month.

Frank A. Wittick, Inspector, $115.00 per month.

F. J. Otto, Inspector, $115.00 per month.

John Carroll, Rodman, $100.00 per month.

Harold J. Rawle, Steamfitter, $1.00 per hour.

John McCarthy, Rough Carpenter, 70 cents per hour.

E. Boe, Rough Carpenter, 60 cents per hour.

Michael Griffin, Rough Carpenter, 65 cents per hour.

Thomas Gallor, Laborer, 50 cents per hour.

Brony Gobek, Laborer, 50 cents per hour.

L. A. Passavento, Laborer, 50 cents per hour.

Philip Muldoon, Laborer, 50 cents per hour.

Michael Callahan, Laborer, 50 cents per hour.

John Shields, Laborer, 50 cents per hour.

Jack Regan, Laborer, 50 cents per hour.

John Ryan, Laborer, 50 cents per hour.

John Kepplen, Laborer, $4.50 per day.

S. Schmidl, Laborer, $4.50 per day.

Sam. Milazo, Laborer, $4.50 per day.

Louis Hoffman, Laborer, $4.50 per day.

INCREASES.

Engineering Department.

Saml. Vanderweil, Laborer, $96.00 per month to $105.00 per month.

Arthur LeBeau, Laborer, $96.00 per month to $105.00 per month.

Jos. Runnella, Laborer, $96.00 per month to $105.00 per month.

Michael Walsh, Laborer, $96.00 per month to $105.00 per month.

Michael Maloney, Laborer, $96.00 per month to $105.00 per month.

Joseph Genero, Laborer, $96.00 per month to $105.00 per month.

James Roach, Laborer, $96.00 per month to $105.00 per month.

James Marcharek, Laborer, $96.00 per month to $105.00 per month.

Jos. Ranctre, Laborer, $96.00 per month to $105.00 per month.

D. Clark, Laborer, $96.00 per month to $105.00 per month.

Saml. Stewart, Laborer, $96.00 per month to $105.00 per month.

Jas. O. Preston, Laborer, $96.00 per month to $105.00 per month.

Wm. Cantrell, Laborer, $96.00 per month to $105.00 per month.

Herbert Raetzke, Laborer, $96.00 per month to $105.00 per month.

Joseph Dunne, Laborer, $96.00 per month to $105.00 per month.

Chas. Weiland, Laborer, $96.00 per month to $105.00 pe rmonth.

Chas. Heintz, Laborer, $96.00 per month to $105.00 per month.

James H. Root, Laborer, $96.00 per month to $105.00 per month.

John Erickson, Laborer, $96.00 per month to $105.00 per month.

Salvator Goifre, Laborer, $96.00 per month to $105.00 per month.

Michael Freeman, Laborer, $96.00 per month to $105.00 per month.

C. Downs, Laborer, $96.00 per month to $105.00 per month.

T. J. Reaney, Laborer, $96.00 per month to $105.00 per month.

A. F. Ubrich, Laborer, $96.00 per month to $105.00 per month.

Geo. Sitts, Laborer, $96.00 per month to $105.00 per month.

Jos. McGuire, Laborer, $96.00 per month to $105.00 per month.

Leonard Ballinger, Laborer, $96.00 per month to $105.00 per month.

Alex. Kluczowski, Laborer, $96.00 per month to $105.00 per month.

Joseph Veugler, Craneman, $7.00 per day to $1.00 per hour.

B. Mulvaney, Laborer, $96.00 per month to $105.00 per month.

Fred Gabriel, Laborer, $96.00 per month to $105.00 per month.

TRANSFERS.

Clerk's Department.

Margaret Barclay, Stenographer, $125.00 per month to Stenographer and Proceedings Clerk at $200.00 per month.

Engineering Department.

Frank Belcastro, Laborer, $96.00 per month to Oiler at $140.00 per month.

Stanley Dubel, Laborer, $96.00 per month to Oiler at $150.00 per month.

Electrical Department.

Robert Klaiber, Stenographer, $125.00 per month to Time, Material and Order Clerk at $125.00 per month.

REINSTATEMENTS.

Due to honorable discharge from U. S. Army Service.

Clerk's Department.

George W. Miller, Vault Clerk, $150.00 per month.

Police Department.

Stanley Vojta, Patrolman, $125.00 per month.

Engineering Department.

Ralph S. Scott, Sub-instrument Man, $130.00 per month.

T. Elmer Dunne, Sub-instrument Man, $130.00 per month.

Joseph Haley, Steamfitter, $1.00 per hour.

Thos. P. Nugent, Laborer, $105.00 per month.

James Ryan, Laborer, $4.50 per day.

Electrical Department.

John F. Hayes, Stenographer, $125.00 per month.

Edw. G. Witt, Groundman, $115.00 per month.

Respectfully submitted,

GEORGE W. PAULLIN,
Chairman.
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Employment.

Mr. Paullin moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Healy, Lawley, Littler, Mueller and Paullin—Six.

Nays—None.

Passed and Not Voting—President Sergel.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, Sept. 18, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development presents herewith contracts in duplicate with the Superior Stone Company, Lyons, Illinois, and with the Aermotor Company, 2500 W. Twelfth street; Olsen & Tilgner Manufacturing Company, 2278 Elston avenue; Frank W. Williams Company, 2215 Taylor street, and the Standardized Japanning Company, 2120 Southport avenue, Chicago, all corporations, wherein the Sanitary District agrees to furnish and said companies agree to take electric power for the peoriods of time and upon the terms and conditions set forth in said contracts which are in the usual form and have been approved by the Electrical Engineer. All are renewals except that of the Standardized Japanning Company.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and Clerk be and they are hereby authorized and directed to execute, in duplicate, the attached contracts which have been duly executed by said Companies.

Respectfully submitted,

H. E. LITTLER,
Chairman.
WALLACE G. CLARK,
MATT A. MUELLER,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—None.

ADJOURNMENT.

Mr. Mueller moved that the Board adjourn.

The motion prevailed.

L. E. Kunz

Clerk.

628.09773
C435

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, OCTOBER 2, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel presiding, the roll being called, there were:

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Absent—None.

Bids.

The Clerk announced that three bids had been received for furnishing cement for the North Shore Channel Highway.

SUSPENSION REGULAR ORDER OF BUSINESS.

Mr. Clark moved to suspend the regular order of business and take up for consideration the proposals presented for cement under the order of "New Business."

The motion prevailed.

MINUTES.

Mr. Lawley moved that the minutes of the regular meeting of August 7, adjourned meeting of August 12; regular meeting of August 14; regular meeting of August 21 and regular meeting of September 4, 1919, all be approved

as printed without being read.

The motion prevailed.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance to which were referred at the meeting of July 17, 1919 (page 878-A of the Proceedings) bids for furnishing and delivering transmission oil to the Sanitary District under Divison "H" of the specifications, having considered all of the proposals presented and the qualifications of each bidder, together with the report submitted by the Electrical Engineer, finds that the lowest responsible bidder is the William H. Reid Company.

Your Committee further reports that it is of the opinion that said Company is competent to comply satisfactorily with the terms and conditions of the contract for furnishing said oil and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the contract for furnishing and delivering transmission oil to the Sanitary District under Division "H" of the specifications be, and the same is hereby awarded to the William H. Reid Company for the price named in its bid of 27.5 cents per gallon, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District, and the Clerk be and they are hereby authorized and directed to execute in duplicate, the said contract in accordance with the plans and specifications of the Sanitary District when the same shall have been executed by said William H. Reid Company and a bond for the faithful performance of said contract shall have been furnished by said Company and approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for furnishnig and delivering said oil be returned upon the execution and approval of said bond.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a communication from the Clerk in which he says that on July 31, 1919, he issued his payroll check No. 804 on the Continental and Commercial National Bank in the sum of $104.16 payable to the order of George M. Reynolds, Treasurer of the Sanitary District, in payment of his salary for the last half of the month of July, 1919, which check was lost and payment thereof stopped at the bank and the Clerk requests authority to issue a duplicate check in lieu thereof.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby authorized and directed to issue a new check in the sum of $104.16 payable to the order of George M. Reynolds and deliver the same to him in payment of his salary as above specified.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has examined and approved the bond of the Bickett Coal & Coke Company, in the penal sum of $4000.00 with the Southern Surety Company, as surety thereon, for furnishing and delivering 1,000 tons of Franklin County Illinois two (2) inch lump coal on board cars on the side track of the 39th street pumping station of The Sanitary District of Chicago, and, therefore, recommends the passage of the following order:

Ordered, That the bond of the Bickett Coal & Coke Company in the penal sum of $4,000.00 above specified for the faithful performance of its contract for furnishing and delivering the coal above specified, be, and the same is hereby approved; and it is further

Ordered, That said contract and bond be printed in the Proceedings.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

The following is the contract and bond between the Bickett Coal & Coke Company and The Sanitary District of Chicago.

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR FURNISHING AND DELIVERINNG COAL AT THIRTY-NINTH STREET PUMPING STATION.

THIS AGREEMENT, Made and entered into this 18th day of September A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the Bickett Coal and Coke Company, a corporation organized under the laws of the state of Illinois party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments made as provided for herein, to the Contractor by the said Sanitary District, and under penalty expressed in the bond, bearing even date herewith, hereto attached, at his proper cost and expense to furnish and deliver all coal called for by this agreement (free from all claims, liens and charges whatsoever), in the manner and under the conditions hereinafter

stipulated, and said Sanitary District has covenanted, contracted and agreed and by these presents does covenant, contract and agree with said Contractor to order, accept, receive and pay for all coal so furnished and delivered, in the manner and under the conditions hereinafter stipulated.

It is further covenanted and agreed that the coal furnished and delivered shall be measured and tested under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and by the duly appointed agent of said Sanitary District, by whose measurements and calculations the quantities and quality of the coal furnished and delivered under this contract, and the rates of payment therefor, shall be determined, and said coal shall be accepted or condemned. The said Chief Engineer or other engineer designated by the Sanitary District shall have full power to reject or condemn any or all coal furnished and delivered under this contract which in his opinion does not conform to its spirit and to the terms and conditions herein expressed.

Wherever the words "Chief Engineer" or "Engineer" are used herein they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago or other Engineer designated by said Sanitary District.

SPECIFICATIONS

FOR FURNISHING AND DELIVERING COAL ON TRACK AT 39TH STREET PUMPING STATION.

General.

1. This contract includes the furnishing and delivering of coal as hereinafter specified on board cars on the side track of the 39th Street Pumping Station of The Sanitary District of Chicago, in Chicago, Illinois, between September 15, 1919 and December 1, 1919, inclusive.

Description of Coal Required.

2. Coal shall be of good quality of bituminous lump coal reasonably free from slate, dirt and other foreign matter coming from mines located along the right of way and tracks of the Illinois Central Railroad Company, or directly connected therewith by connecting spur tracks, which coal shall conform to these specifications.

Size.

3. Lump coal shall consist of coal known as two-inch lump. It shall consist of all coal retained on a screen with two (2) inch circular openings.

B. T. U.

4. Coal shall contain not less than twelve thousand three hundred (12,300) British thermal units per pound of dry coal.

Ash.

5. Coal shall contain not more than fifteen (15) percent of ash for dry coal.

Quantity.

6. The probable quantity of coal required is estimated at two thousand (2000) tons. The Contractor further agrees that any difference between the quantity of coal mentioned in the advertisement and the quantities of coal actually delivered hereunder shall not invalidate this contract or release the contractor from delivering all quantities of coal required by the pumping station as ordered by the Engineer, and the Contractor shall not be entitled to any extra payment for damages or loss of profits because of a difference between said quantity of coal mentioned in the advertisement for proposals and the quantities of coal actually ordered and delivered under this contract. The Contractor shall keep himself informed as to the rate of consumption from time to time and shall bear all demurrage charges caused by the delivery of coal more rapidly than the existing provisions for storage will allow of unloading and storing.

Purchase of Coal on the Open Market.

7. Should the Contractor fail to furnish and deliver coal of the quality equal, or superior, to the coal herein specified, then the said Sanitary District may declare this contract forfeited, either as to a portion of the same or the whole thereof and the Chief Engineer may purchase on the open market, at the lowest price then obtainable, such quantity, or quantities, of coal equal or superior to that herein specified as the Contractor shall fail to furnish and deliver or as may be needed from time to time by the requirements of said pumping station, notwithstanding such forfeiture. The Sanitary District shall not be obliged to have tested and analyzed the coal so purchased on the open market. The cost of said coal so purchased and all costs and expenses incurred by the Chief Engineer of said Sanitary District in purchasing and delivering such coal at the said pumping station as above specified in excess

of the cost hereunder to said Sanitary District for an equal quantity of coal of a corresponding grade if furnished and delivered by said Contractor at the said pumping station as specified, shall be paid to the Sanitary District by said contractor.

Should the Contractor fail to furnish and deliver coal in such quantities, or at such times, as the requirements of said pumping station may demand, or as ordered by the Chief Engineer of said Sanitary District, then said Chief Engineer may purchase in the open market, at the lowest price then obtainable, such quantity or quantities of coal equal or superior to that herein specified as the said Contractor shall fail to furnish and deliver or as may be needed by the requirements of said pumping station. The Sanitary District shall not be obliged to have tested or analyzed the coal so purchased on the open market. The cost of said coal so purchased and all costs and expenses incurred by the Chief Engineer of said Sanitary District in purchasing and delivering such coal at the said pumping station in excess of the cost hereunder to said Sanitary District for an equal quantity of coal of the grade herein specified if furnished and delivered by said Contractor at the said pumping station as specified, shall be paid to the Sanitary District by said Contractor.

Weights.

8. The Weights of the coal delivered shall be determined on scales under the supervision of the railroad over whose lines the coal is shipped, except in cases where the Chief Engineer of the Sanitary District elects to check the weights, in which case the weights shall be determined on the scales of the said Sanitary District at the pumping station. In cases where said Sanitary District weights are to govern, the Contractor, his duly accredited agent or some person in the office of said contractor, will be notified by telephone and if he so requests, will be given two (2) hours in which to reach the pumping station to check said weights. A ton is two thousand (2,000) pounds avoirdupois. All shipments shall be consigned to the Contractor at the point of delivery and receipted railroad freight bills showing the origin of the shipment, car numbers, routing, weights and date of shipment shall be promptly furnished by the contractor to the Sanitary District.

Mine Accidents, Car Shortage, etc.

9. If at any time during the period covered by this contract, there shall be a mine accident, railroad congestion, car shortage, or any other cause, which, in the opinion of the Contractor, shall make it desirable for him to deliver coal from sources other than the County and State named in this contract, it shall then be the duty of the Contractor to notify in writing the said Chief Engineer, who may, at his option, permit the Contractor to deliver, for such period as he may deem wise, the necessary quantity of coal from a source, satisfactory to the Engineer, other than herein specified, such coal to be equal in quality and subject to the same tests and analyses to that contracted for.

Samples.

10. The Sanitary District will appoint an agent to select a representative sample of coal from each car load delivered under this contract. Such agent will make the tests and analyses hereinafter specified from any single sample taken from any car load of coal or from the combination of samples taken from not to exceed six car loads of coal consecutively delivered to the Sanitary District. This work will be done by the Sanitary District at its sole cost and expense.

11. If the contractor so requests in writing, the Chief Engineer of said Sanitary District or said duly appointed agent will notify said Contractor, his duly appointed agent or some person in the office of said contractor by telephone at least two hours in advance of the time when any sample of coal is to be seleced, so that said Contractor may have a representative present at said time and in that event the sample or samples then selected shall each be divided into three equal portions which shall each be deposited in a suitable receptacle and made air tight. One of said portions of each sample shall be delivered to the contractor, the second portion of same to the agent of the Sanitary District and the third portion of same shall be sealed in the presence of the agents of both parties hereto and delivered to the agent of the Sanitary District and held by him for further use as hereinafter specified.

If the contractor, his duly appointed agent or person in his office after being notified as herein specified, refuses, fails or neglects to be present at the time any sample of said coal is selected, then

said agent of said Sanitary District may select a sample of said coal and subject the same or said combined sample including same, to the tests hereinafter specified.

If the said contractor, his agent or person in his office being notified as herein specified shall refuse, fail or neglect to be present on three consecutive occasions when the samples are selected, then such samples of coal may thereafter be taken and said sample or combined sample tested and analyzed by said agent of said Sanitary District without notifying said contractor until said contractor shall again request said Sanitary District to notify him, his duly appointed agent or someone in his office of the time when such samples are to be selected.

Tests and Analyses.

12. The Sanitary District agrees to have the samples selected at any one time, or a combined sample above provided for, tested and analyzed by said duly appointed agent by the method described in Bulletin 22 of the Bureau of Mines, Department of the Interior and a copy of each test and analysis shall be delivered by said agent to each of the parties hereto.

In this test and analysis the British Thermal Units delivered in each car load of coal shall be determined from each sample or combined sample as follows:

Multiply the number of British Thermal Units per pound of dry coal by the percentage of moisture (expressed in decimals).

Subtract the product so found from the number of British Thermal Units per pound of dry coal.

The result is the British Thermal Units per pound of coal as delivered for that sample which result shall be applied in determining the British Thermal Unit in the coal contained in the car or cars from which said sample or samples so combined have been taken.

The contractor and the Sanitary District shall be bound by the report of the test and analysis of any sample of coal taken at any time or a combined sample thereof when the contractor has not requested in writing that he desires his representative to be present when the samples are taken or after he has made such request and fails or refuses to have a representative present.

If the Contractor or his representative is present when any sample is selected he and said Sanitary District shall be bound by the report of the test and analysis of the second portion of any sample deposited in said suitable air tight receptacle and delivered to the agent of the Sanitary District as above specified unless he objects, giving his reason for such objection in writing to said report, within five (5) days from the receipt of the same.

If said Contractor does so object to said report then the third portion of said sample, which was sealed and delivered to the agent of the Sanitary District for further use, shall be delivered with seal unbroken to a chemist of high standing to be mutually agreed upon by the parties hereto and tested and analyzed by such chemist within ten (10) days from the receipt of such sample at the sole expense of said Contractor and the test and analysis so made shall be final and binding upon the parties hereto, and the price to be paid said Contractor for the car loads of coal represented by said samples shall be determined by said report, and in the event that such test and analysis is not reported to the Sanitary District within said period of ten (10) days, then the parties hereto agree that the report of the first analysis shall be final and binding upon the parties hereto. In case said parties do not mutually agree upon said chemist, then upon the application of either of the parties hereto the then Chief Justice of the Circuit Court of Cook County, Illinois, may appoint such chemist who shall test and analye said third sample of coal as herein specified, at the sole expense of said Contractor, including all court expenses The decision of said chemist shall be final and binding upon both parties hereto.

Determination of Price.

13. The price per ton to be paid for any coal delivered shall be determined by dividing the average number of British Thermal Units per ton of coal delivered by the number of British Units for one cent calculated from the Contractor's guaranteed analysis and subtracting from the result obtained one cent for each percent of ash for dry coal delivered. The resulting value will be the price per ton which will be paid for that particular coal except as hereinafter specified. The name of the coal to be supplied, the locality from which said coal is to be supplied and the said guaranteed analysis is as follows:

Guaranteed Analysis.

Name...Franklin County, 2" Lump Coal
Locality.....Franklin County, Illinois

Guaranteed Analysis.

Moisture % as delivered.....10%
Ash%, dry coal.....15%
B. T. U. per lb. dry coal.....12.300

Price.

Four and forty one-hundredths dollars ($4.40) per ton.

Rejection of Coal.

14. The Chief Engineer of said Sanitary District may, at its option, reject any coal which the analysis report shows does not comply with the requirements of Sections 3, 4 and 5, or may accept the same subject to the following reductions in the price per ton as computed in accordance with section 12:

For each one hundred (100) B. T. U. (or fraction thereof) greater than fifty (50) that B. T. U. content falls below twelve thousand three hundred (12,300), a reduction of four (4) cents per ton.

For each one (1) per cent that the ash content exceeds fifteen (15) percent, a reduction of eight (8) cents per ton.

Payments.

15. Payment for coal delivered and acceped during any month will be within the following month at the rate herein specified under "Determination of Price" (See Section 12 and 13), provided that the requirements regarding freight bills have been complied with.

Examination of Premises.

16. All bidders for furnishing and delivering of coal under this contract are required before submitting proposals, to carefully examine the premises at the pumping station and to make all necessary examinations and investigations to inform themselves thoroughly as to the facilities for delivering coal in the quantities and in the manner specified in this contract and in the specifications forming part of same, the existing storage capacity of the station, and to inform themselves thoroughly as to all of the difficulties that may be involved in the complete fulfillment of all of the terms and conditions of this contract and specifications. No plea of ignorance of conditions that exist or that may hereafter exist or of difficulties that may be encountered in the fulfillment of all of the terms and conditions of this contract and specifications, due to a failure on the part of the bidder to make the necessary examinations and investigations that would disclose same, will be accepted as an excuse for any failure or omission on the part of the Contractor to fulfill in every detail all of the requirements of this contract and specifications, or will be accepted as a basis for any claims whatsoever for extra compensation.

Employers' Liability Act.

17. The Contractor further agrees to insure to his employes or their beneficiaries the compensation provided for in the Act of the General Assembly of the State of Illinois, entitled, "An Act ot promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and for a penalty for its violation, and repealing an Act, entitled, 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in anywise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employes in or about the performance of this contract.

Contractor's Bond.

18. The Contractor shall execute a bond in the sum of Four Thousand Dollars ($4,000.00) for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the said Sanitary District, conditioned upon the faithful performance of all of the terms and conditions of this contract and specifications, and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then, in that case, the said Board of Trustees may, on giving ten (10) days' notice thereof to said Contractor in writing,

require said Contractor to furnish a new and additional bond in the sum of not to exceed Four Thousand Dollars ($4,000.00) with such sureties thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

IN WITNESS WHEREOF, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Committee on Finance, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its President, to be duly attested and its corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

KNOW ALL MEN BY THESE PRESENTS, That we, the Bickett Coal & Coke Company and Southern Surety Company, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of Four Thousand Dollars ($4,000.00) lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this 18th day of September, A. D. 1919.

THE CONDITION OF THE ABOVE OBLIGATION IS SUCH, That whereas, the above bounden Bickett Coal & Coke Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the 18th day of September, A. D. 1919, for doing all the work and furnishing all the materials, tools, labor, appliances and appurtenances necessary for furnishing and delivering two thousand tons of Franklin County, Illinois, two-inch lump coal on board cars on the side track of the 39th Street Pumping Station of The Sanitary District of Chicago, as specified on the attached contract.

Now, If the said Bickett Coal & Coke Company shall in all respects well and truly keep and perform the said contract on its part, and in the time and manner therein prescribed, and further, shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages and expenses, and attorneys' fees, which may in anywise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, which may in anywise result from the carelessness or neglect of said Bickett Coal & Coke Company, its agents, employes or workmen in any respect whatsoever, or which may result in account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including all valid claims and demands for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois, entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled, 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suf-

fered in the course of employment,' approved June 10, 1911, in force May 1, 1912,' approved June 28, 1913, in force July 1, 1913, and all Acts amendatory thereof and supplementary thereto which may accrue to each and every person who shall be employed by said Bickett Coal & Coke Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

And It Is Hereby Expressly Understood and Agreed, And made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suit for damages occasioned by carelessness or neglect of said Bickett Coal & Coke Company, or its agents, employes or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators, or of the State Industrial Board of the State of Illinois, rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28, 1913, in force July 1, 1913, and all Acts amendatory thereof and supplementary thereto, relating to the compensation for accidental injuries or deaths suffered by employes in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Bickett Coal & Coke Company shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

Mr. Lawley presented the following report from the Committee on Finance:

Chicago, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

Gentlemen—Your Committee on Finance reports that it has examined and approved the bond of the Edwards & Bradford Lumber Company with the Maryland Casualty Company thereon as surety, for the faithful performance of its contract for furnishing and delivering coal screenings into the bins of the Lawrence Avenue pumping station of the Sanitary District, and therefore recommends the passage of the following order:

Ordered, That the bond of the Edwards & Bradford Lumber Company for the faithful performance of the above specified contract, said bond being in the penal sum of $6,000.00 be, and the same is hereby approved, and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
Jas. H. Lawley,
Chairman.
Matt. A. Mueller,
George W. Paullin,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the contract and bond between the Edwards & Bradford Lumber Company and the Sanitary District of Chicago.

The Sanitary District of Chicago.

Contract and specifications for furnishing and delivering coal at the Lawrence Avenue pumping station.

This Agreement, Made and entered into this 18th day of September, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and

by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the Edwards & Bradford Lumber Company, a corporation organized under the laws of the State of Iowa, party of the second part, hereinafter designated the Contractor.

WITNESSETH, That the said Contractor has covenanted, contracted and agreed and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments made as provided for herein, to the Contractor by the said Sanitary District, and under penalty expressed in the bond, bearing even date herewith, hereto attached, at his proper cost and expense to furnish and deliver all coal called for by this agreement (free from all claims, liens and charges whatsoever), in the manner and under the conditions hereinafter stipulated, and said Sanitary District has covenanted, contracted and agreed and by these presents does covenant, contract and agree with said Contractor to order, accept, receive and pay for all coal so furnished and delivered, in the manner and under the conditions hereinafter stipulated.

It is further covenanted and agreed that the coal furnished and delivered shall be measured and tested under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and by the duly appointed agent of said Sanitary District, by whose measurements and calculations the quantities and quality of the coal furnished and delivered under this contract, and the rates of payment therefor, shall be determined, and said coal shall be accepted or condemned. The said Chief Engineer or other engineer designated by the Sanitary District shall have full power to reject or condemn any or all coal furnished and delivered under this contract which in his opinion does not conform to its spirit and to the terms and conditions herein expressed.

Wherever the words "Chief Engineer" or "Engineer" are used herein they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago or other Engineer designated by said Sanitary District.

SPECIFICATIONS FOR FURNISHING AND DELIVERING COAL ON TRACK AT LAWRENCE AVE. PUMPING STATION.

General.

1. This contract includes the furnishing and delivering of coal as hereinafter specified into the bins of the Lawrence Avenue Pumping Station of The Sanitary District of Chicago, in Chicago, Illinois, from May 1, 1919, until May 1, 1920, inclusive.

Description of Coal Required.

2. Coal shall be of good quality of bituminous coal screenings reasonably free from slate, dirt and other foreign matter, and shall conform to the following specifications:

Size.

3. Screenings shall consist of all coal as mined passing between bars the minimum width between which is one and one-quarter (1¼) inches. Screenings shall contain not more than forty (40) per cent by weight of matter that will pass through a screen with one-quarter (¼) inch round holes.

B. T. U.

4. Screenings shall contain not less than twelve thousand three hundred (12,300) British thermal units per pound of dry coal.

Ash.

5. Screenings shall contain not more than fifteen (15) per cent of ash for dry coal.

Quantity.

6. The probable quantity of coal required is estimated at an average of four hundred tons per month, the consumption varying considerably from month to month during the year. The quantity is given only as an approximation and it is hereby distinctly understood and agreed that the Contractor shall furnish at the price determined as per Sections Twelve (12) and Thirteen (13) hereof, the quantity of coal required to operate the pumping station during the period of this contract as may be ordered by the Chief Engineer, be the same more or less than the quantity herein mentioned. The Contractor further agrees that any difference between the quantity of coal mentioned in the advertisement and the quantities of coal actually delivered hereunder shall not invalidate this contract or release the Contractor from delivering all quantities of coal required by the pumping station as ordered by the Engineer, and the Contractor shall not be entitled to any extra payment for damages or for loss of profits because of a difference

between said quantity of coal mentioned in the advertisement for proposals and the quantities of coal actually ordered and delivered under this contract. The Contractor shall keep himself informed as to the rate of consumption from time to time and shall bear all demurrage charges caused by the delivery of coal more rapidly than the existing provisions for storage will allow of unloading and storing.

Purchase of Coal on the Open Market.

7. Should the Contractor fail to furnish and deliver coal of the quality equal, or superior, to the coal herein specified, then the said Sanitary District may declare this contract forfeited, either as to a portion of the same or the whole thereof, and the Chief Engineer may purchase on the open market, at the lowest price then obtainable, such quantity, or quantities, of coal equal or superior to that herein specified as the Contractor shall fail to furnish and deliver or as may be needed from time to time by the requirements of said pumping station until May 1, 1920, notwithstanding such forfeiture. The Sanitary District shall not be obliged to have tested or analyzed the coal so purchased on the open market. The cost of said coal so purchased and all costs and expenses incurred by the Chief Engineer of said Sanitary District in purchasing and delivering such coal at the said pumping station as above specified in excess of the cost hereunder to said Sanitary District for an equal quantity of coal of a corresponding grade if furnished and delivered by said Contractor at the said pumping station as specified, shall be paid to the Sanitary District by said Contractor.

Should the Contractor fail to furnish and deliver coal in such quantities, or at such times, as the requirements of said pumping station may demand, or as ordered by the Chief Engineer of said Sanitary District, then said Chief Engineer may purchase in the open market, at the lowest price then obtainable, such quantity or quantities of coal equal or superior to that herein specified as the said Contractor shall fail to furnish and deliver or as may be needed by the requirements of said pumping station until May 1, 1920. The Sanitary District shall not be obliged to have tested or analyzed the coal so purchased on the open market. The cost of said coal so purchased and all costs and expenses incurred by the Chief Engineer of said Sanitary District in purchasing and delivering such coal at the said pumping station in excess of the cost hereunder to said Sanitary District for an equal quantity of coal of the grade herein specified if furnished and delivered by said Contractor at the said pumping station as specified, shall be paid to the Sanitary District by said Contractor.

Weights.

8. The weights of the coal delivered shall be determined on scales under the supervision of the railroad over whose lines the coal is shipped, except in cases where the Chief Engineer of the Sanitary District elects to check the weights, in which case the weights shall be determined on the scales of the said Sanitary District at the pumping station. In cases where said Sanitary District weights are to govern, the Contractor, his duly accredited agent or some person in the office of said Contractor, will be notified by telephone and if he so requests, will be given two (2) hours in which to reach the pumping station to check said weights. A ton is two thousand (2,000) pounds avoirdupois. All shipments shall be consigned to the Contractor at the point of delivery and receipted railroad freight bills showing the origin of the shipment, car numbers, routing, weights and date of shipment shall be promptly furnished by the Contractor to the Sanitary District.

9. It is hereby understood and agreed that all deliveries under this contract will be made subject to a failure of the railroads to supply sufficient or suitable equipment, to strikes, labor agitations and disturbances, to mine accidents and other causes beyond the control of said Contractor.

Samples.

10. The Sanitary District will appoint an agent to select a representative sample of coal from each car load delivered under this contract. Such agent will make the tests and analyses hereinafter specified from any single sample taken from any car load of coal or from the combination of samples taken from not to exceed six car loads of coal consecutively delivered to the Sanitary District. This work will be done by the Sanitary District at its sole cost and expense.

11. If the Contractor so requests in writing, the Chief Engineer of said Sanitary District or said duly appointed agent will notify said Contractor, his duly appointed agent or some person in

the office of said Contractor by telephone at least two hours in advance of the time when any sample of coal is to be selected, so that said Contractor may have a representative present at said time and in that event the sample or samples then selected shall each be divided into three equal portions which shall each be deposited in a suitable receptacle and made air tight. One of said portions of each sample shall be delivered to the Contractor, the second portion of same to the agent of the Sanitary District and the third portion of same shall be sealed in the presence of the agents of both parties hereto and delivered to the agent of the Sanitary Disrict and held by him for further use as hereinafter specified.

If the Contractor, his duly appointed agent or person in his office after being notified as herein specified, refuses, fails or neglects to be present at the time any sample of said coal is selected, then said agent of said Sanitary District may select a sample of said coal and subject the same or said combined sample including same, to the tests hereinafter specified.

If the said Contractor, his agent or person in his office after being notified as herein specified shall refuse, fail or neglect to be present on three consecutive occasions when the samples are selected, then such samples of coal may thereafter be taken and said sample or combined sample tested and analyzed by said agent of said Sanitary District without notifying said Contractor until said Contractor shall again request said Sanitary District to notify him, his duly appointed agent or someone in his office of the time when such samples are to be selected.

Tests and Analyses.

12. The Sanitary District agrees to have the samples selected at any one time, or a combined sample above provided for, tested and analyzed by said duly appointed agent by the method described in Bulletin 22 of the Bureau of Mines, Department of the Interior, and a copy of each test and analysis shall be delivered by said agent to each of the parties hereto.

In this test and analysis the British Thermal Units delivered in each carload of coal shall be determined from each sample or combined sample as follows:

Multiply the number of British Thermal Units per pound of dry coal by the percentage of moisture (expressed in decimals).

Subtract the product so found from the number of British Thermal Units per pound of dry coal.

The result is the British Thermal Units per pound of coal as delivered for that sample which result shall be applied in determining the British Thermal Unit in the coal contained in the car or cars from which said sample or samples so combined have been taken.

The Contractor and the Sanitary District shall be bound by the report of the test and analysis of any sample of coal taken at any time or a combined sample thereof when the Contractor has not requested in writing that he desires his represenative to be present when the samples are taken or after he has made such request and fails or refuses to have a representative present.

If the Contractor or his representative is present when any sample is selected he and said Sanitary District shall be bound by the report of the test and analysis of the second portion of any sample deposited in said suitable air tight receptacle and delivered to the agent of the Sanitary District as above specified unless he objects, giving his reason for such objection in writing to said report, within five (5) days from the receipt of the same.

If said Contractor does so object to said report, then the third portion of said sample, which was sealed and delivered to the agent of the Sanitary District for further use, shall be delivered with seal unbroken to a chemist of high standing to be mutually agreed upon by the parties hereto and tested and analyzed by such chemist within ten (10) days from the receipt of such sample at the sole expense of said Contractor and the test and analysis so made shall be final and binding upon the parties hereto, and the price to be paid said Contractor for the car loads of coal represented by said samples shall be determined by said report, and in the event that such test and analysis is not reported to the Sanitary District within said period of ten (10) days then the parties hereto agree that the report of the first analysis shall be final and binding upon the parties hereto. In case said parties do not mutually agree upon said chemist, then upon the application of either of the parties hereto the then Chief Justice of the Circuit Court of Cook County, Illinois, may appoint such chemist who shall test and analyze said

third sample of coal as herein specified, at the sole expense of said Contractor, including all court expenses. The decision of said chemist shall be final and binding upon both parties hereto.

Determination of Price.

13. The price per ton to be paid for all the coal delivered during any month shall be determined by dividing the average number of British Thermal Units per ton of coal delivered during the month by the number of British Thermal Units for one cent calculated from the Contractor's guaranteed analysis and subtracting from the result obtained one cent for each per cent of ash for dry coal delivered. The resulting value will be the price per ton which will be paid for that particular coal except as hereinafter specified. The name of the coal to be supplied, the locality from which said coal is to be supplied and the said guaranteed analysis is as follows:

Guaranteed Analysis.

Name .....Economy
Locality....Williamson County, Illinois

Guaranteed Analysis.

Moisture, % as delivered..... 7%
Ash%, dry coal.....13%
B. T. U. per pound, dry coal.....12,300

Price.

Three and eighty one-hundredths dollars ($3.80) per ton.

Above price is subject to increase or decrease by change of miners' scale or freight rates.

Rejection of Coal.

14. The Chief Engineer of said Sanitary District may, at its option, reject any coal which the analysis report shows does not comply with the requirements of sections 3, 4 and 5, or may accept the same subject to the following reductions in the price per ton as computed in accordance with section 12:

For each one (1) per cent of coal in excess of forty (40) per cent passing through a screen with one-quarter (¼) inch holes, a reduction of four (4) cents per ton.

For each one hundred (100) B. T. U. (or fraction thereof) greater than fifty (50) that the B. T. U. content falls below twelve thousand three hundred (12,300), a reduction of six (6) cents per ton.

For each one (1) per cent that the ash content exceeds fifteen (15) per cent, a reduction of ten (10) cents per ton.

Payments.

15. Payment for coal delivered and accepted during any month will be within the following month at the rate herein specified under "Determination of Price" (See Sections 12 and 13), provided that the requirements regarding freight bills have been complied with.

Examination of Premises.

16. All bidders for furnishing and delivering of coal under this contract are required before submitting proposals, to carefully examine the premises at the pumping station and to make all necessary examinations and investigations to inform themselves thoroughly as to the facilities for delivering coal in the quantities and in the manner specified in this contract and in the specifications forming part of same, the existing storage capacity of the station, and to inform themselves thoroughly as to all of the difficulties that may be involved in the complete fulfillment of all of the terms and conditions of this contract and specifications. No plea of ignorance of conditions that exist or that may hereafter exist or of difficulties that may be encountered in the fulfillment of all of the terms and conditions of this contract and specifications, due to a failure on the part of the bidder to make the necessary examinations and investigations that would disclose same, will be accepted as an excuse for any failure or omission on the part of the Contractor to fulfill in every detail all of the requirements of this contract and specifications, or will be accepted as a basis for any claims whatsoever for extra compensation.

Employers' Liability Act.

17. The Contractor further agrees to insure to his employes or their beneficiaries the compensation provided for in the Act of the General Assembly of the State of Illinois, entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and for a penalty for its violation, and repealing an Act entitled, 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suf-

fered in the course of employment,' approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in anywise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employees in or about the performance of this contract.

Contractor's Bond.

18. The Contractor shall execute a bond in the sum of Six Thousand Dollars ($6,000.00) for the performance of the work under this contract, with good and sufficient sureties, the same to be saisfactory to the Board of Trustees of the said Sanitary District, conditioned upon the faithful performance of all of the terms and conditions of this contract and specifications and should the sureties on any bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then, in that case, the said Board of Trustees may, on giving ten (10) days notice thereof to said Contractor in writing, require said Contractor to furnish a new and additional bond in the sum of not to exceed Six Thousand Dollars ($6,000.00) with such sureties thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

In Witness Whereof, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Committee on Finance, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its President, to be duly attested and its corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

Know All Men by These Presents, That we, the Edwards & Bradford Lumber Company, a corporation organized under the laws of the State of Iowa as principal and the Maryland Casualty as surety, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of Six Thousand Dollars ($6,000.00) lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this 18th day of September, A. D. 1919.

The Condition of the Above Obligation is Such, That whereas, the above bounden Edwards & Bradford Lumber Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the 18th day of September, A. D. 1919, for doing all the work and furnishing all the materials, tools, labor, appliances and appurtenances necessary for furnishing and delivering coal screenings to The Sanitary District of Chicago into the bins of the Lawrence Avenue pumping station.

Now, if the said Edwards & Bradford Lumber Company shall in all respects well and truly keep and perform the said contract on its part, and in the time and manner therein prescribed and further, shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages and expenses, and attorneys' fees, which may in anywise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, which may in anywise result from the carelessness or neglect of said Edwards & Bradford Lumber

Company, its agents, employees or workmen, in any respect whatsoever, or which may result in account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever including all valid claims and demands for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois, entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment," approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all Acts amendatory thereof and supplementary thereto which may accrue o each and every person who shall be employed by said Edwards & Bradford Lumber Company in or about the performance of said contract or which shall accrue to the beneficiaries of any such person, then in this obligation to be null and void, otherwise to remain in full force and effect.

And It Is Hereby Expressly Understood and Agreed, And made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suit for damages occasioned by carelessness or neglect of said Edwards & Bradford Lumber Company or its agents, employees or workmen, in the premises, and also that any judgment of any court, or award of any Board of Arbitrators, or of the State Industrial Board of the State of Illinois, rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28, 1913, in force July 1, 1913, and all Acts amendatory thereof and supplementary thereto, relating to the compensation for accidental injuries or deaths suffered by employees, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Edwards & Bradford Lumber Company shall be conclusive, against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

Mr. Lawley presented the following report from the Committee on Finance:

Chicago, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

Gentlemen—Your Committee on Finance reports that it has examined and approved the bond of the Edwards & Bradford Lumber Company with the Maryland Casualty Company thereon as surety, for the faithful performance of its contract for furnishing and delivering coal screenings on board cars on the side track of the 39th street pumping station for the Sanitary District, and therefore recommends the passage of the following order:

Ordered, That the bond of the Edwards & Bradford Lumber Company for the faithful performance of the above specified contract, said bond being in the penal sum of $15,000.00 be, and the same is hereby approved, and it is further

Ordered, That the form of said con-

tract and bond be prnited in the Proceedings of the Board.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the contract and bond between the Edwards & Bradford Lumber Company and the Sanitary District of Chicago.

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR FURNISHING AND DELIVERING COAL AT THE THIRTY-NINTH STREET PUMPING STATION.

THIS AGREEMENT, Made and entered into this 18th day of September, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the Edwards & Bradford Lumber Company, a corporation organized under the laws of the State of Iowa, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents doe scovenant, contract and agree with the said Sanitary District, for and in consideration of the payments made as provided for herein, to the Contractor by the said Sanitary District, and under penalty expressed in the bond, bearing even date herewith, hereto attached, at his proper cost and expense to furnish and deliver all coal called for by this agreement (free from all claims, liens and charges whatsoever), in the manner and under the conditions hereinafter stipulated, and said Sanitary District has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with said Contractor to order, accept, receive and pay for all coal so furnished and delivered, in the manner and under the conditions hereinafter stipulated.

It is further covenanted and agreed that the coal furnished and delivered shall be measured and tested under the direction and supervision of the Chief Engineer of The Sanitary District of Chciago, and by the duly appointed agent of said Sanitary District, by whose measurements and calculations the quantities and quality of the coal furnished and delivered under this contract, and the rates of payment therefor, shall be determined, and said coal shall be accepted or condemned. The said Chief Engineer or other engineer designated by the Sanitary District shall have full power to reject or condemn any or all coal furnished and delivered under this contract which in his opinion does not conform to its spirit and to the terms and conditions herein expressed.

Wherever the words "Chief Engineer" or "Engineer" are used herein they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago or other Engineer designated by said Sanitary District.

SPECIFICATIONS

FOR FURNISHING AND DELIVERING COAL ON TRACK AT 39TH STREET PUMPING STATION.

General.

1. This contract includes the furnishing and delivering of coal as hereinafter specified on board cars on the side track of the 39th Street Pumping Station of The Sanitary District of Chicago, in Chicago, Illinois, from May 1, 1919, until May 1, 1920, inclusive.

Description of Coal Required.

2. Coal shall be of good quality of bituminous coal screenings reasonably free from slate, dirt and other foreign matter coming from mines located along the right-of-way and tracks of the Illinois Central Railroad Company, or directly connected therewith by connecting spur tracks, which coal shall conform to these specifications:

Size.

3. Screenings shall consist of all coal as mined passing between bars the minimum width between which is one and

one-quarter (1¼) inches. Screenings shall contain not more than forty (40) per cent by weight of matter that will pass through a screen with one-quarter (¼) inch round holes.

B. T. U.

4. Screenings shall contain not less than twelve thousand three hundred (12,300) British thermal units per pound of dry coal.

Ash.

5. Screenings shall contain not more than fifteen (15) pre cent of ash for dry coal.

Quantity.

6. The probable quantity of coal required is estimated at an average of two thousand (2,000) tons per month, the consumption varying considerably from month to month during the year. The quantity is given only as an approximation and it is hereby distinctly understood and agreed that the Contractor shall furnish at the price determined as per Sections twelve (12) and thirteen (13) hereof, the quality of coal required to operate the pumping station during the period of this contract as may be ordered by the Chief Engineer, be the same more or less than the quantity herein mentioned. The Contractor further agrees that any difference between the quantity of coal mentioned in the advertisement and the quantities of coal actually delivered hereunder shall not invalidate this contract or release the contractor from delivering all quantities of coal required by the pumping station as ordered by the Engineer, and the Contractor shall not be entitled to any extra payment for damages or for loss of profits because of a difference between said quantity of coal mentioned in the advertisement for proposals and the quantities of coal actually ordered and delivered under this contract. The Contractor shall keep himself informed as to the rate of consumption from time to time and shall bear all demurrage charges caused by the delivery of coal more rapidly than the existing provisions for storage will allow of unloading and storing.

Purchase of Coal on the Open Market.

7. Should the Contractor fail to furnish and deliver coal of the quality equal, or superior, to the coal herein specified, then the said Sanitary District may declare this contract forfeited, either as to a portion of the same or the whole thereof and the Chief Engineer may purchase on the open market, at the lowest price then obtainable, such quantity, or quantities, of coal equal or superior to that herein specified as the Contractor shall fail to furnish and deliver or as may be needed from time to time by the requirements of said pumping station until May 1, 1920, notwithstanding such forfeiture. The Sanitary District shall not be obliged to have tested or analysed the coal so purchased on the open market. The cost of said coal so purchased and all costs and expenses incurred by the Chief Engineer of said Sanitary District in purchasing and delivering such coal at the said pumping station as above specified in excess of the c hereunder to said Sanitary District for an equal quantity of coal of a corresponding grade if furnished and delivered by said Contractor at the said pumping station as specified, shall be paid to the Sanitary District by said contractor.

Should the Contractor fail to furnish and deliver coal in such quantities, or at such times, as the requirements of said pumping station may demand, or as ordered by the Chief Engineer of said Sanitary District, then said Chief Engineer may purchase in the open market, at the lowest price then obtainable, such quantity or quantities of coal equal or superior to that herein specified as the said Contractor shall fail to furnish and deliver or as may be needed by the requirements of said pumping station until May 1, 1920. The Sanitary District shall not be obliged to have tested or analysed the coal so purchased on the open market. The cost of said coal so purchased and all costs and expenses incurred by the Chief Engineer of said Sanitary District in purchasing and delivering such coal at the said pumping station in excess of the cost hereunder to said Sanitary District for an equal quantity of coal of the grade herein specified if furnished and delivered by said Contractor at the said pumping station as specified, shall be paid to the Sanitary District by said Contractor.

Weights.

8. The weights of the coal delivered shall be determined on scales under the supervision of the railroad over whose lines the coal is shipped, exept in cases where the Chief Engineer of the Sanitary District elects to check the weights, in which case the weights shall be deter-

mined on the scales of the said Sanitary District at the pumping station. In cases where said Sanitary District weights are to govern, the Contractor, his duly accredited agent or some person in the office of said contractor, will be notified by telephone and if he so requests, will be given two (2) hours in which to reach the pumping station to check said weights. A ton is two thousand (2,000) pounds avoirdupois. All shipments shall be consigned to the Contractor at the point of delivery and receipted railroad freight bills showing the origin of the shipment, car numbers, routing, weights and date of shipment shall be promptly furnished by the contractor to the Sanitary District.

9. It is hereby understood and agreed that all deliveries under this contract will be made subject to a failure of the railroads to supply sufficient or suitable equipment, to strikes, labor agitations and disturbances, to mine accidents and other causes beyond the control of said contractor.

Samples.

10. The Sanitary District will appoint an agent to select a representative sample of coal from each car load delivered under this contract. Such agent will make the tests and analyses hereinafter specified from any single sample taken from any car load of coal or from the combination of samples taken from not to exceed six car loads of coal consecutively delivered to the Sanitary District. This work will be done by the Sanitary District at its sole cost and expense.

11. If the contractor so requests in writing, the Chief Engineer of said Sanitary District or said duly appointed agent will notify said Contractor, his duly appointed agent or some person in the office of said contractor by telephone at least two hours in advance of the time when any sample of coal is to be selected, so that said contractor may have a representative present at said time and in that event the sample or samples then selected shall each be divided into three equal portions which shall each be deposited in a suitable receptacle and made air tight. One of said portions of each sample shall be delivered to the contractor, the second portion of same to the agent of the Sanitary District and the third portion of same shall be sealed in the presence of the agents of both parties hereto and delivered to the agent of the Sanitary District and held by him for further use as hereinafter specified.

If the contractor, his duly appointed agent or person in his office after being notified as herein specified, refuses, fails or neglects to be present at the time any sample of said coal is selected, then said agent of said Sanitary District may select a sample of said coal and subject the same or said combined sample including same, to the tests hereinafter specified.

If the said contractor, his agent or person in his office after being notified as herein specified shall refuse, fail or neglect to be present on three consecutive occasions when the samples are selected, then such samples of coal may thereafter be taken and said sample or combined sample tested and analyzed by said agent of said Sanitary District without notifying said contractor until said contractor shall again request said Sanitary District to notify him, his duly appointed agent or someone in his office of the time when such samples are to be selected.

Tests and Analyses.

12. The Sanitary District agrees to have the samples selected at any one time, or a combined sample above provided for, tested and analyzed by said duly appointed agent by the method described in Bulletin 22 of the Bureau of Mines, Department of the Interior, and a copy of each test and analysis shall be delivered by said agent to each of the parties hereto.

In this test and analysis the British Thermal Units delivered in each car load of coal shall be determined from each sample or combined sample as follows:

Multiply the number of British Thermal Units per pound of dry coal by the percentage of moisture (expressed in decimals.)

Subtract the product so found from the number of British Thermal Units per pound of dry coal.

The result is the British Thermal Units per pound of coal as delivered for that sample which result shall be applied in determining the British Thermal Unit in the coal contained in the car or cars from which said sample or samples so combined have been taken.

The contractor and the Sanitary District shall be bound by the report of the test and analysis of any sample of coal taken at any time or a combined

sample thereof when the contractor has not requested in writing that he desires his representative to be present when the samples are taken or after he has made such request and fails or refuses to have a representative present.

If the Contractor or his reprensentative is present when any sample is selected he and said Sanitary District shall be bound by the report of the test and analysis of the second portion of any sample deposited in said suitable air tight receptacle and delivered to the agent of the Sanitary District as above specified unless he objects, giving his reason for such objection in writing to said report, within five (5) days from the receipt of the same.

If said Contractor does so object to said report then the third portion of said sample, which was sealed and delivered to the agent of the Sanitary District for further use, shall be delivered with seal unbroken to a chemist of high standing to be mutually agreed upon by the parties hereto and tested and analyzed by such chemist within ten (10) days from the receipt of such sample at the sole expense of said Contractor and the test and analysis so made shall be final and binding upon the parties hereto, and the price to be paid said Contractor for the car loads of coal represented by said samples shall be determined by said report, and in the event that such test and analysis is not reported to the Sanitary District wihin said period of ten (10) days then the parties hereto agree that the report of the first analysis shall be final and binding upon the parties hereto. In case said parties do not mutually agree upon said chemist, then upon the application of either of the parties hereto the then Chief Justice of the Circuit Court of Cook County, Illinois, may appoint such chemist who shall test and analyze said third sample of coal as herein specified at the sole expense of said Contractor, including all court expenses. The decision of said chemist shall be final and binding upon both parties hereto.

Determination of Price.

13. The price per ton to be paid for all the coal delivered during any month shall be determined by dividing the average number of British Thermal Units per ton of coal delivered during the month by the number of British Thermal Units for one cent calculated from the Contractor's guaranteed analysis and subtracting from the result obtained one cent for each percent of ash for dry coal delivered. The resulting value will be the price per ton which will be paid for that particular coal except as hereinafter specified. The name of the coal to be supplied, the locality from which said coal is to be supplied and the said guaranteed analysis is as follows:

Name ..... "Economy"

Locality.....Williamson County, Illinois

Guaranteed Analysis.

Moisture % as delivered..... 7%
Ash %, dry coal.....13%
B. T. U. per lb. dry coal.....12.300

Price.

Three and seventy-five one-hundredths dollars ($3.75) per ton.

Above price is subjet to increase or decrease by change in miners' scale or freight rate.

Rejection of Coal.

14. The Chief Engineer of said Sanitary District may, at its option, reject any coal which the analysis report shows does not comply with the requirements of Sections 3, 4 and 5, or may accept the same subject to the following reductions in the price per ton as computed in accordance with Section 12:

For each one (1) percent of coal in excess of forty (40) percent passing through a screen with one-quarter (¼) inch holes, a reduction of four (4) cents per ton.

For each one hundred (100) B. T. U. (or fraction thereof greater than fifty (50) that the B. T. U. content falls below twelve thousand three hundred (12,300), a reduction of six (6) cents per ton.

For each one (1) percent that the ash content exceeds fifteen (15) percent, a reduction of ten (10) cents per ton.

Payments.

15. Payment for coal delivered and accepted during any month will be within the following month at the rate herein specified under "Determination of Price" (See Section 12 and 13), provided that the requirements regarding freight bills have been complied with.

Examination of Premises.

16. All bidders for furnishing and delivering of coal under this contract are required before submitting proposals, to carefully examine the premises at the pumping station and to make all necessary examinations and investigations to inform themselves thoroughly as to the facilities for delivering coal in the quantities and in the manner specified in this contract and in the specifications forming part of same, the existing storage capacity of the station, and to inform themselves thoroughly as to all of the difficulties that may be involved in the complete fulfillment of all of the terms and conditions of this contract and specifications. No plea of ignorance of conditions that exist or that may hereafter exist or of difficulties that may be encountered in the fulfillment of all of the terms and conditions of this contract and specifications, due to a failure on the part of the bidder to make the necessary examinations and investigations that would disclose same, will be accepted as an excuse for any failure or omission on the part of the Contractor to fulfill in every detail all of the requirements of this contract and specifications, or will be accepted as a basis for any claims whatsoever for extra compensation.

Employers' Liability Act.

17. The Contractor further agrees to insure to his employees or their beneficiaries the compensation provided for in the Act of the General Assembly of the State of Illinois, entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and for a penalty for its violation, and repealing an Act, entitled, 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in anywise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employees in or about the performance of this contract.

Contractor's Bond.

18. The Contractor shall execute a bond in the sum of fifteen thousand dollars ($15,000.00) for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the said Sanitary District, conditioned upon the faithful performance of all of the terms and conditions of this contract and specifications and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then, in that case, the said Board of Trustees may, on giving ten (10) days notice thereof to said Contractor in writing, require said Contractor to furnish a new and additional bond in the sum of not to exceed fifteen thousand dollars ($15,000.00) with such sureties thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

In Witness Whereof, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Committee on Finance, and to be duly attested, and its corporate seal to be hereunto affixed and the party of the second part has caused these presents to be executed in duplicate by its President to be duly attested and the corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

KNOW ALL MEN BY THESE PRESENTS, That we, the Edwards & Bradford Lumber Company, a corporation organized under the laws of the state of Iowa as principal and the Maryland Casualty Company as surety are held and firmly bound unto The Sanitary District of Chicago in the penal sum of fifteen thousand dollars ($15,000.00) lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this 18th day of September A. D., 1919.

THE CONDITION OF THE ABOVE OBLIGATION IS SUCH, That whereas, the above bounden Edwards & Bradford Lumber Company, has entered into a certain contract with The Sanitary District of Chicago, bearing date the 18th day of September A. D. 1919, for doing all the work and furnishing all the materials, tools, labor, appliances and appurtenances necessary for furnishing and delivering coal screenings to the Sanitary District of Chicago on board cars on the side track of the 39th street pumping station as specified in the attached contract.

Now, if the said Edwards & Bradford Lumber Company shall in all respects well and truly keep and perform the said contract on its part, and in the time and manner therein prescribed, and further, shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages and expenses, and attorneys' fees, which may in anywise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, which may in anywise result from the carelessness or neglect of said Edwards & Bradford Lumber Company, its agents, employee or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever including all valid claims and demands for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois, entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment," approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all Acts amendatory thereof and supplementary thereto which may accrue to each and every person who shall be employed by said Edwards & Bradford Lumber Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

AND IT IS HEREBY EXPRESSLY UNDERSTOOD AND AGREED, and made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suit for damages occasioned by carelessness or neglect of said Edwards & Bradford Lumber Company or their agents, employees or workmen, in the premises, and also that any judgment of any court, or award of any Board of Arbitrators, or of the State Industrial Board of the State of Illinois, rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved

June 28, 1913, in force July 1, 1913, and all Acts amendatory thereof and supplementary thereto, relating to the compensation for accidental injuries or deaths suffered by employees, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Edwards & Bradford Lumber Company shall be conclusive, against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has examined and approved the bond of the Edwards and Bradford Lumber Company with the Maryland Casualty Company thereon as surety for the faithful performance of its contract for furnishing and delivering 1,000 tons of coal screenings on board cars on the side track of the H. N. May station for the Sanitary District, and therefore recommends the passage of the following order:

Ordered, That the bond of the Edwards & Bradford Lumber Company for the faithful performance of the above specified contract, said bond being in the penal sum of $1,800.00 be, and the same is hereby, approved, and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the contract and bond between the Edwards & Bradford Lumber Company and The Sanitary District of Chicago:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR FURNISHING AND DELIVERING COAL AT THE H. N. MAY PUMPING STATION.

ING STATION.

THIS AGREEMENT, Made and entered into this 18th day of September A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the Edwards & Bradford Lumber Company, a corporation organized under the laws of the State of Iowa, party of the second part, hereinafter designated the Contractor.

WITNESSETH—That the said Contractor has covenanted, contracted and agreed and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments made as provided for herein, to the Contractor by the said Sanitary District, and under penalty expressed in the bond, bearing even date herewith, hereto attached, at his proper cost and expense to furnish and

deliver all coal called for by this agreement (free from all claims, liens and charges whatsoever), in the manner and under the conditions hereinafter stipulated, and said Sanitary District has covenanted, contracted and agreed and by these presents does covenant, contract and agree with said Contractor to order, accept, receive and pay for all coal so furnished and delivered, in the manner and under the conditions hereinafter stipulated.

It is further covenanted and agreed that the coal furnished and delivered shall be measured and tested under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and by the duly appointed agent of said Sanitary District, by whose measurements and calculations the quantities and quality of the coal furnished and delivered under this contract, and the rates of payment therefor, shall be determined, and said coal shall be accepted or condemned. The said Chief Engineer or other engineer designated by the Sanitary District shall have full power to reject or condemn any or all coal furnished and delivered under this contract which in his opinion does not conform to its spirit and to the terms and conditions herein expressed.

Wherever the words "Chief Engineer" or "Engineer" are used herein they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago or other Engineer designated by said Sanitary District.

SPECIFICATIONS

FOR FURNISHING AND DELIVERING COAL ON TRACK AT LAWRENCE AVE. PUMPING STATION.

General.

1. This contract includes the furnishing and delivering of coal as hereinafter specified on board cars on the side track of the H. N. May Station of The Sanitary District of Chicago, in Chicago, Illinois.

Description of Coal Required.

2. Coal shall be of good quality of bituminous coal screenings reasonably free from slate, dirt and other foreign matter, and shall conform to the following specifications:

Size.

3. Screenings shall consist of all coal as mined passing between bars the minimum width between which is one and one-quarter (1¼) inches. Screenings shall contain not more than forty (40) percent by weight of matter that will pass through a screen with one-quarter (¼) inch round holes.

B. T. U.

4. Screenings shall contain not less than twelve thousand three hundred (12,300) British thermal units per pound of dry coal.

Ash.

5. Screenings shall contain not more than fifteen (15) per cent of ash for dry coal.

6. The amount of coal to be furnished under this contract is 1,000 tons, to be shipped as follows:

One car containing approximately 40 tons of coal every day for a period of ten days, beginning 48 hours after the approval by the Board of Trustees of the Sanitary District of the bond herein specified to be furnished by said Contractor, and thereafter one car containing approximately 40 tons of coal every other day until a total of 1,000 tons of coal has been delivered.

It is understood that said cars of coal must be unloaded by the Sanitary District by hand and therefore said Contractor hereby agrees to ship said coal in open cars.

The Contractor hereby agrees to bear all demurrage charges caused by shipping said coal more rapidly than herein specified or caused by carriers bunching said cars in transit.

6. The probable quantity of coal required is estimated at an average of four hundred tons per month, the consumption varying considerably from month to month during the year. The quantity is given only as an approximation and it is hereby distinctly understood and agreed that the Contractor shall furnish at the price determined as per sections twelve (12) and thirteen (13) hereof, the quantity of coal required to operate the pumping station during the period of this contract as may be ordered by the Chief Engineer, be the same more or less than the quantity herein mentioned. The Contractor further agrees that any difference between the quantity of coal mentioned in the advertisement and the quantities of coal actually delivered hereunder shall not invalidate this contract or release the Contractor from delivering all quantities of coal required by the pumping station as ordered by the Engineer, and the Contractor shall not

be entitled to any extra payment for damages or for loss of profits because of a difference between said quantity of coal mentioned in the advertisement for proposals and the quantities of coal actually ordered and delivered under this contract. The Contractor shall keep himself informed as to the rate of consumption from time to time and shall bear all demurrage charges caused by the delivery of coal more rapidly than the existing provisions for storage will allow of unloading and storing.

Purchase of Coal on the Open Market.

7. Should the Contractor fail to furnish and deliver coal of the quality equal, or superior, to the coal herein specified, then the said Sanitary District may declare this contract forfeited, either as to a portion of the same or the whole thereof and the Chief Engineer may purchase on the open market, at the lowest price then obtainable, such quantity, or quantities, of coal equal or superior to that herein specified as the Contractor shall fail to furnish and deliver as herein specified, notwithstanding such forfeiture. The Sanitary District shall not be obliged to have tested or analyzed the coal so purchased on the open market. The cost of said coal so purchased and all costs and expenses incurred by the Chief Engineer of said Sanitary District in purchasing and delivering such coal at the said pumping station as above specified in excess of the cost hereunder to said Sanitary District for an equal quantity of coal of a corresponding grade if furnished and delivered by said Contractor at the said pumping station as specified, shall be paid to the Sanitary District by said contractor.

Should the Contractor fail to furnish and deliver coal in such quantities, or at such times as the requirements of said pumping station may demand, or as ordered by the Chief Engineer of said Sanitary District, then said Chief Engineer may purchase in the open market at the lowest price then obtainable, such quantity or quantities of coal equal or superior to that herein specified as the said Contractor shall fail to furnish and deliver as herein specified. The Sanitary District shall not be obliged to have tested or analyzed the coal so purchased on the open market. The cost of said coal so purchased and all costs and expenses incurred by the Chief Engineer of said Sanitary District in purchasing and delivering such coal at the said pumping station in excess of the cost hereunder to said Sanitary District for an equal quantity of coal of the grade herein specified if furnished and delivered by said Contractor at the said pumping station as specified, shall be paid to the Sanitary District by said Contractor.

Weights.

8. The weights of the coal delivered shall be determined on scales under the supervision of the railroad over whose lines the coal is shipped, except in cases where the Chief Engineer of the Sanitary District elects to check the weights, in which case the weights shall be determined on the scales of the said Sanitary District at the pumping station. In cases where said Sanitary District weights are to govern, the Contractor, his duly accredited agent or some person in the office of said contractor, will be notified by telephone and if he so requests, well be given two (2) hours in which to reach the pumping station to check said weights. A ton is two thousand (2,000) pounds avoirdupois. All shipments shall be consigned to the Contractor at the point of delivery and receipted railroad freight bills showing the origin of the shipment, car numbers, routing, weights and date of shipment shall be promptly furnished by the contractor to the Sanitary District.

9. It is hereby understood and agreed that all deliveries under this contract will be made subject to a failure of the railroad to supply sufficient or suitable equipment, to strikes, labor agitations and disturbances, to mine accidents and other causes beyond the control of said contractor.

Samples.

10. The Sanitary District will appoint an agent to select a representative sample of coal from each car load delivered under this contract. Such agent will make the tests and analyses hereinafter specified from any single sample taken from any car load of coal or from the combination of samples taken from not to exceed six car loads of coal consecutively delivered to the Sanitary District. This work will be done by the Sanitary District at its sole cost and expense.

11. If the contractor so requests in writing, the Chief Engineer of said Sanitary District or said duly appointed agent will notify said Contractor, his duly appointed agent or some person in the office of said contractor by telephone

at least two hours in advance of the time when any sample of coal is to be selected, so that said contractor may have a representative present at said time and in that event the sample or samples then selected shall each be divided into three equal portions which shall each be deposited in a suitable receptable and made air tight. One of said portions of each sample shall be delivered to the contractor, the second portion of same to the agent of the Sanitary District and the third portion of same shall be sealed in the presence of the agents of both parties hereto and delivered to the agent of the Sanitary District and held by him for further use as hereinafter specified.

If the contractor, his duly appointed agent or person in his office after being notified as herein specified, refuses, fails or neglects to be present at the time any sample of said coal is selected, then said agent of said Sanitary District may select a sample of said coal and subject the same or said combined sample including same, to the tests hereinafter specified.

If the said contractor, his agent c person in his office after being notified as herein specified shall refuse fail or neglect to be present on three consecutive occasions when the samples are selected, then such samples of coal may thereafter be taken and said sample or combined sample tested and analyzed by said agent of said Sanitary District without notifying said contractor until said contractor shall again request said Sanitary District to notify him, his duly appointed agent or someone in his office of the time when such samples are to be selected.

Tests and Analyses.

12. The Sanitary District agrees to have the samples selected at any one time, or a combined sample above provided for, tested and analyzed by said duly appointed agent by the method described in Bulletin 22 of the Bureau of Mines, Department of the Interior and a copy of each test and analysis shall be delivered by said agent to each of the parties hereto.

In this test and analysis the British Thermal Units delivered in each car load of coal shall be determined from each sample or combined sample as follows:

Multiply the number of British Thermal Units per pound of dry coal by the percentage of moisture (expressed in decimals).

Subtract the product so found from the number of British Thermal Units per pound of dry coal.

The result is the British Themal Units per pound of coal as delivered for that sample which result shall be applied in determining the British Thermal Unit in the coal contained in the car or cars from which said sample or samples so combined have been taken.

The contractor and the Sanitary District shall be bound by the report of the test and analysis of any sample of coal taken at any time or a combined sample thereof when the contractor has not requested in writing that he desires his representative to be present when the samples are taken or after he has made such request and fails or refuses to have a representative present.

If the Contractor or his representative is present when any sample is selected he and said Sanitary District shall be bound by the report of the test and analysis of the second portion of any sample deposited in said suitable air tight receptacle and delivered to the agent of the Sanitary District as above specified unless he objects, giving his reason for such objection in writing to said report within five (5) days from the receipt of the same.

If said Contractor does so object to said report then the third portion of said sample, which was sealed and delivered to the agent of the Sanitary District for further use, shall be delivered with seal unbroken to a chemist of high standing to be mutually agreed upon by the parties hereto and tested and analyzed by such chemist within ten (10) days from the receipt of such sample at the sole expense of said Contractor and the test and analysis so made shall be final and binding upon the parties hereto, and the price to be paid said Contractor for the car loads of coal represented by said samples shall be determined by said report, and in the event that such test and analysis is not reported to the Sanitary District within said period of ten (10) days then the parties hereto agree that the report of the first analysis shall be final and binding upon he parties hereto. In case said parties do not mutually agree upon said chemist, then upon the application of either of the parties

hereto the then Chief Justice of the Circuit Court of Cook County, Illinois, may appoint such chemist who shall test and analyze said third sample of coal as herein specified, at the sole expense of said Contractor, including all court expenses. The decision of said chemist shall be final and binding upon both parties hereto.

Determination of Price.

13. The price per ton to be paid for all the coal delivered during any month shall be determined by dividing the average number of British Thermal Units per ton of coal delivered during the month by the number of British Thermal Units for one cent calsulated from the Contractor's guaranteed analysis and subtracting from the result obtained one cent for each percent of ash for dry coal delivered. The resulting value will be the price per ton whcih will be paid for that particular coal except as hereinafter specified. The name of the coal to be supplied, the locality from which said coal is to be supplied and the said guanranteed analysis is as follows:

Guaranteed Analysis.

Name ..... "Economy"
Locality ..... Williamson County

Guaranteed Analysis.

Moisture %, as delivered 7%
Ash %, dry coal 13%
B. T. U. per lb. dry coal 12.300

Price.

Three and eighty hundredths dollars ($3.80) per ton.

Above price is subject to increases or decreases by change of miners scale or freight rates.

Rejection of Coal.

14. The Chief Engineer for said Sanitary District may, at its option, reject any coal which the analysis report shows does not comply with the requirements of sections 3, 4 and 5, or may accept the same subject to the following reductions in the price per ton as computed in accordance with section 12:

For each one (1) percent of coal in excess of forty (40) percent passing through a screen with one-quarter (¼) inch holes, a reduction of four (4) cents per ton.

For each one hnudred (100) B. T. U. (or fraction thereof greater than fifty (50) that the B. T. U. content falls below twelve thousand three hundred (12,300), a reduction of six (6) cents per ton.

For each one (1) percent that the ash content exceeds fifteen (15) percent, a reduction of ten (10) cents per ton.

Payments.

15. Payment for coal delivered and accepted during any month will be within the following month at the rate herein specified under "Determination of Price" (See Section 12 and 13), provided that the requirements regarding freight bills have been complied with.

Examination of Premises.

16. All bidders for furnishing and delivering of coal under this contract are required before submitting proposals, to carefully examine the premises at the pumping station and to make all necessary examinations and investigations to inform themselves thoroughly as to the facilities for delivering coal in the quantities and in the manner specified in this contract and in the specificatons forming part of same, the existing storage capacity of the station, and to inform themselves thoroughly as to all of the difficulties that may be involved in the complete fulfillment of all of the terms and conditions of this contract and specifications. No plea of ignorance of conditions that exist or that may hereafter exist or of difficulties that may be encountered in the fulfillment of all of the terms and conditions of this contract and specifications, due to a failure on the part of the bidder to make the necessary examinations and investigations that would disclose same, will be accepted as an excuse for any failure or omission on the part of the Contractor to fulfill in every detail all of the requirements of this contract and specifications, or will be accepted as a basis for any claims whatsoever for extra compensation.

Employers' Liability Act.

17. The Contractor further agrees to insure to his employes or their beneficiaries the compensation provided for in

the Act of the General Assembly of the State of Illinois, entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and for a penalty for its violation, and repealing an Act, entitled, 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in anywise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employes in or about the performance of this contract.

Contractor's Bond.

18. The Contractor shall execute a bond in the sum of Eighteen Hundred Dollars ($1,800.00) for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the said Sanitary District, conditioned upon the faithful performance of all of the terms and conditions of this contract and specifications, and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then, in that case, the said Board of Trustees may, on giving ten (10) days' notice thereof to said Contractor in writing, require said Contractor to furnish a new and additional bond in the sum of not to exceed Eighteen Hundred Dollars ($1,800.00), with such sureties thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

In Witness Whereof, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Committee on Finance, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its President, to be duly attested and its corporate seal to be hereunto affixed.

The Sanitary District of Chicago.

CONTRACTOR'S BOND.

Know All Men by These Presents, That we, the Edwards & Bradford Lumber Company, a corporation organized under the laws of the State of Iowa, as principal, and the Maryland Casualty Company as surety, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of Eighteen Hundred Dollars ($1,800.00) lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this 18th day of September, A. D. 1919.

The Condition of the Above Obligation is Such, That whereas, the above bounden Edwards & Bradford Lumber Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the 18th day of September, A. D. 1919, for doing all the work and furnishing all the materials, tools, labor, appliances and appurtenances necessary for furnishing and delivering one thousand tons of coal screenings on board cars on the side-

track of the H. N. May Station as specified in the attached contract.

Now, If he said Edwards & Bradford Lumber Company shall in all respects well and truly keep and perform the said contract on its part, and in the time and manner therein prescribed, and further, shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages and expenses, and attorneys' fees which may in anywise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, which may in anywise result from the carelessness or neglect of said Edwards & Bradford Lumber Company, its agents, employes or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including all valid claims and demands for compensation for accidental injuries or death, under the provisions of the Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled, 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all Acts amendatory thereof and supplementary thereto which may accrue to each and every person who shall be employed by said Edwards & Bradford Lumber Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

And It Is Hereby Expressly Understood and Agreed, And made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suit for damages occasioned by carelessness or neglect of said Edwards & Bradford Lumber Company, or its agents, employes or workmen in the premises, and also that any judgment of any court, or award of any Board of Arbitrators, or of the State Industrial Board of the State of Illinois, rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28, 1913, in force July 1, 1913, and all Acts amendatory thereof and supplementary thereto, relating to the compensation for accidental injuries or deaths suffered by employes in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Edwards & Bradford Lumber Company, shall be conclusive against each and all parties to this obligation as to amount, liability and all other things pertaining thereto.

Edwards & Bradford Lumber Co. (Seal)

Mr. Lawley presented the following report from the Committee on Finance:

Chicago, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

Gentlemen—Your Committee on Finance, to which were referred at the meeting of July 17, 1919 (page 878-A of the Proceedings) bids for furnishing and delivering cup grease to the Sanitary District under Division "I" of the specifications, having considered all the proposals presented and the qualifications of each bidder, together with the report

submitted by the Electrical Engineer, finds that the lowest responsible bidder is the Sinclair Refining Company.

Your Committee further reports that it is of the opinion that the said Company is competent to comply satisfactorily with the terms and conditions of the contract for furnishing and delivering said cup grease, and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the contract for furnishing and delivering cup grease to the Sanitary District under Division "I" of the specifications be, and the same is hereby awarded to the Sinclair Refining Company for the price named in its bid of six cents per pound; and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate, the said contract in accordance with the specifications of the Sanitary District when the same shall have been executed by said Sinclair Refining Company, and a bond for the faithful performance of said work shall have been furnished by said company and approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for furnishing and delivering said cup grease be returned upon the execution and approval of said bond.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance to which were referred at the meeting of July 17, 1919 (page 878-A of the Proceedings) bids for furnishing and delivering cylinder oil to the Sanitary District under Division "C" of the specifications, having considered all of the proposals presented and the qualifications of each bidder, together with the report submitted by the Electrical Engineer, finds that the lowest responsible bidder is the William H. Reid Company.

Your Committee further reports that it is of the opinion that said Company is competent to comply satisfactorily with the terms and conditions of the contract for furnishing said oil and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the contract for furnishing and delivering cylinder oil to the Sanitary District under Division "C" of the specifications be, and the same is hereby awarded to the William H. Reid Company for the price named in its bid of $0.38 per gallon, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute, in duplicate, the said contract in accordance with the plans and specifications of the Sanitary District when the same shall have been executed by said William H. Reid Company and a bond for the faithful performance of said contract shall

have been furnished by said Company and approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for furnishing and delivering said oil be returned upon the execution and approval of said bond.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance, to which were referred at the meeting of July 17, 1919 (page 878-A of the Proceedings) bids for furnishing and delivering transformer oil to the Sanitary District under Division "G" of the specifications, having considered all the proposals presented and the qualifications of each bidder, together with the report submitted by the Electrical Engineer, is of the opinion that the bid of the Sinclair Refining Company should be rejected, for the reason that tests of the oil offered do not meet the requirements of the specifications and finds that the lowest responsible bidder is the Standard Oil Company.

Your Committee further reports that it is of the opinion that the said Company is competent to comply satisfactorily with the terms and conditions of the contract for furnishing and delivering said oil and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the bid of the Sinclair Refining Company for said oil be, and the same is hereby rejected, for the reason stated, and it is further

Ordered, That the contract for furnishing and delivering transformer oil to the Sanitary District under Division "G" of the specifications be, and the same is hereby awarded to the Standard Oil Company for the price named in its bid of 25.3 cents per gallon, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute, in duplicate, the said contract in accordance with the specifications of the Sanitary District when the same shall have been executed by said Standard Oil Company, and a bond for the faithful performance of said work shall have been furnished by said company and approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for furnishing and delivering said oil be returned upon the execution and approval of said bond.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance to which were referred at the meeting of July 17, 1919 (page 878-A of the Proceedings) bids for furnishing hydro-turbine oil to the Sanitary District under Division "A" of the specifications, having considered all the proposals presented and the qualifications of each bidder, together with the report submitted by the Electrical Engineer, is of the opinion that all bids for furnish- said oil should be rejected for the reason that the same are excessive.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That all bids received for furnishing hydro-turbine oil to the Sanitary District under Division "A" of the specifications be and the same are hereby rejected for the reason stated, and it is further

Ordered, That the checks of the respective bidders for furnishing said oil be returned to said bidders.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a communication from the Attorney in which he states in substance that the Board on September 18, 1919 (page 1184 of the Proceedings) authorized the payment to James O. Heyworth of the sum of $44,424.90 on account of work performed under his contract for the excavation and collateral work on section one of the Calumet-Sag Channel on certain terms and conditions expressed in the order of the Board relating thereto.

It appears that the Catholic Bishop of Chicago and F. J. Ruppert have filed claims with the Sanitary District alleging that they have sustained damage by reason of the work done by said James O. Heyworth in the performance of said work and in order to fully protect the District against such claims, the Attorney procured from said James O. Heyworth a bond to protect, indemnify and save harmless the Sanitary District against all liability which might come against it by reason of said claim and presented said bond to your Committee for its approval.

Your Committee further reports that it has examined said bond which is in the penal sum of $5,000.00 executed by said James O. Heyworth and the New Amsterdam Casualty Company and has approved the same.

Your Committee therefore recommends the passage of the following order:

Ordered, That the action of the Attorney in the premises be and the same is hereby ratified and confirmed, and it is further

Ordered, That the bond above specified be and the same is hereby approved.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance to which were referred at the meeting of July 17, 1919 (page 878-A of the Proceedings) bids for furnishing and delivering gasoline engine oil to the Sanitary District under Division "F" of the specifications, having considered all of the proposals presented and the qualifications of each bidder, together with the report submitted by the Electrical Engineer, finds that the lowest responsible bidder is the Sullivan Oil Company.

Your Committee further reports that it is of the opinion that said Company is competent to comply satisfactorily with the terms and conditions of the contract for furnishing said oil and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the contract for furnishing and delivering gasoline engine oil to the Sanitary District under Division "F" of the specifications be, and the same is hereby awarded to the Sullivan Oil Company for the price named in its bid of $0.38 per gallon, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute, in duplicate, the said contract in accordance with the plans and specifications of the Sanitary District when the same shall have been executed by said Sullivan Oil Company and a bond for the faithful performance of said contract shall have been furnished by said Company and approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for furnishing and delivering said oil be returned upon the execution and approval of said bond.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance, to which were referred at the meeting of July 17, 1919 (page 878-A of the Proceedings), bids for furnishing and delivering engine oil to the San-

itary District under Division "E" of the specifications, having considered all the proposals presented and the qualifications of each bidder, together with the report submitted by the Electrical Engineer, finds that the lowest responsible bidder is the Standard Oil Company.

Your Committee further reports that it is of the opinion that said bidder is competent to comply satisfactorily with the terms and conditions of the contract for furnishing and delivering said oil, and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the contract for furnishing and delivering engine oil to the Sanitary District under Division "E" of the specifications, be, and the same is hereby awarded to the Standard Oil Company for the price named in its bid of 21.3 cents per gallon, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute, in duplicate, the said contract in accordance with the specifications of the Sanitary District when the same shall have been executed by said Standard Oil Company and a bond for the faithful performance of said contract shall have been furnished by said Company and approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for furnishing and delivering said oil be returned upon the execution and approval of said bond.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 2, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

General Payroll for Last Half of September, 1919.

L. F. King, Clerk (general payroll)	$ 31,117.55

Construction Account.

Nash-Dowdle Company (work on Evanston Sewage Pumping Station)	$ 21,164.94	
A. Guthrie & Co., Inc. (work on Section 13, Calumet-Sag Channel)	16,799.83	
A. Guthrie & Co., Inc. (work on Section 14, Calumet-Sag Channel)	130.46	
T. J. Forschner Contracting Company (work on Calumet Sewage Pumping Station)	126,750.92

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel (except as to voucher in favor of the T. J. Forschner Contracting Co., for work done on the Calumet Sewage Pumping Station for $126,750.92, on which Mr. Sergel voted *"Nay"*), Carr, Clark, Healy, Lawley, Littler, Mueller, Nance (except as to voucher in favor of the T. J. Forschner Contracting Co., for work done on the Calumet Sewage Pumping Station for $126,750.92, on which Mr. Nance voted *"Nay"*) and Paullin—Seven on all

vouchers, and Nine on all vouchers with the exceptions above noted.

Nays—None (except as above shown).

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that on August 1, 1918 (page 802 of the Proceedings) Patrick A. Nash and Richard J. Nash, co-partners doing business under the name and style of Nash Bros., entered into a contract with the Sanitary District for the construction of the Des Plaines River Intercepting Sewer, Contract No. 1.

Your Committee further reports that it has received a communication from the Acting Chief Engineer in which he states that it is desirable to make a slight change in the line of said sewer in order to avoid damaging some valuable trees, which change will necessitate moving and replacing an existing public toilet, and he requests that he be authorized to order said contractors to perform said work as an extra under the "Extra Work" clause of said contract, at an estimated cost of $300.00.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized and directed to order Patrick A. Nash and Richard J. Nash, co-partners doing business under the name and style of Nash Bros., to perform the work above specified, provided the cost thereof shall not exceed the sum of $300.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Acting Chief Engineer in which he states that the plans for the Calumet Sewage Pumping Station show a roadway on 125th street graded on a gradual slope down to the ground surface near the east side of said station; that the building itself as finally located is quite a distance west of the east line of the lot and the entrance to the building is near and fronts on 125th street. He further states that it is advisable to change the grade of said roadway and to cut down a manhole to conform to said new grade and he requests that he be authorized to order the T. J. Forschner Contracting Company to perform said work under the extra work clause of its contract at a cost of not to exceed $250.00.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to order the T. J. Forschner Contracting Company to perform the work above specified under the extra work clause of

said contract, provided the cost of the same shall not exceed the sum of $250.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that it is necessary to rebuild two of the eight-inch centrifugal pumps at the 39th street pumping station; that he has obtained two informal bids for doing said work the lowest of which is that of the Fitzgerald Boiler Works in the sum of $250.00 for each pump, and the Chief Engineer recommends that the offer of said Company be accepted to the extent of rebuilding one of said pumps and if said work is acceptable that their offer to repair the other pump for the same price be then accepted.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized and directed to accept the bid of the Fitzgerald Boiler Works to perform the work of rebuilding said pumps above specified on the basis stated, provided the total cost of same shall not exceed the sum of $250.00 for each pump.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that on August 8, 1918 (page 892 of the Proceedings) the T. J. Forschner Contracting Company entered into a contract with the Sanitary District for constructing the Calumet Sewage Pumping Station and furnishing and installing certain electrical equipment therein.

Your Committee further reports that it has received a communication from the Electrical Engineer in which he states that it is advisable to make certain changes in the specifications for the switchboard layout and in some instances to increase the size of certain conduits and cables and in other instances to decrease said sizes at a net increased cost of $970.00 and he requests that he be authorized to order said Contractor to perform said work under the extra work clause of its said contract.

Your Committee having had the matter under consideration recommends the passage of the following order:

Ordered, That the Electrical Engineer be, and he is hereby, authorized and directed to order the T. J. Forschner Contracting Company to perform the work above specified under the extra work clause of its said contract, provided the cost thereof shall not exceed the sum of $970.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanynig order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering to which were referred at the meeting of September 18, 1919 (page 1180 of the Proceedings), bids for the construction of the North Shore Channel Highway, having considered all the proposals presented and the qualifications of each bidder, together with the report submitted by the Chief Engineer, is of the opinion that all bids for doing said work should be rejected for the reason that the same are excessive.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That all bids received for the construction of the North Shore Channel Highway be, and the same are hereby, rejected for the reason stated, and it is further,

Ordered, That the checks of the respective bidders for said work be returned to said bidders.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on September 26, 1918 (page 1081 of the Proceedings) authorized the Chief Engineer to dismantle the Sewage Testing Station at the Union Stock Yards, salvage the material and apparatus contained therein and erect an activated sludge testing station on a smaller scale, at the outlet of one of the large tanneries situated on the north branch of the Chicago River at a cost of not to exceed $5,000.00.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that at the time he made his estimate for said work he based it upon the

existing prices of labor and material, that since said time the cost of said work has largely increased due to an advance in the prices of labor and material and also due to the fact that the old material has deteriorated to such an extent that new material must be used and he requests authority to expend an additional sum of $8,500.00 in completing said testing station.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized to expend the sum of $8,500.00 in addition to the sum of $5,000.00 authorized to be expended as above specified, in completing the work of installing said activated sludge testing station on the north branch of the Chicago River.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on September 18, 1919 (page 1179 of the Proceedings) authorized the Electrical Engineer to prepare plans and specifications for the purchase of certain power and distribution transformers and present the same when prepared to your Committee for its approval.

Your Committee further reports that it has considered plans and specifications for said transformers prepared by the Electrical Engineer, and approved the same and recommends the passage of the following order:

Ordered, That the plans and specifications prepared by the Electrical Engineer for purchasing the transformers above specified be, and the same are hereby approved, and it is further

Ordered, That the Clerk be, and he is hereby, authorized and directed to advertise for bids for the purchase of said transformers in accordance with the plans and specifications so prepared by the Electrical Engineer.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Real Estate Development.

Mr. Carr presented the following report from the Committee on Real Estate Development:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Real-Estate Development reports that it has received a communication from the

Manager of the Real-Estate Department in which he states that the pamphlet entitled "Manufacturing sites along the Chicago Sanitary and Ship Canal," which was issued in 1916, should be revised in order to furnish the public the latest information relative to said sites.

He further states that he has procured estimates for printing and binding 2,000 copies of a revised edition of said pamphlet which can be procured for the sum of $500.00.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Manager of the Real-Estate Department be, and he is hereby, authorized to have 2,000 copies of said pamphlet printed, provided the cost thereof shall not exceed the sum of $500.00.

Respectfully submitted,

PATRICK J. CARR,
Chairman.
MATT. A. MUELLER,
WM. J. HEALY,
Committee on Real-Estate Development.

Mr. Carr moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Employment

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, October 2, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of actions taken:

NEW APPOINTMENTS.

Provided for in 1919 Budget.

Electrical Department—

C. M. Whitman, Draftsman, $160.00 per month.

John Hunley, Laborer, 50 cents per hour.

INCREASES.

Engineering Department—

John Boe, Carpenter, from 70c per hour to 80c per hour.

Horace Murray, Carpenter, from 60c per hour to 70c per hour.

E. Boe, Carpenter, from 60c per hour to 70c per hour.

Harry Lindquist, Carpenter, from 60c per hour to 70c per hour.

H. A. Doud, Carpenter helper, from 50c per hour to 60c per hour.

Chas. Heins, Carpenter Helper, from 50c per hour to 60c per hour.

Chas. Matjesk, Carpenter Helper, from 50c per hour to 60c per hour.

DROPPED FROM SERVICE.

Electrical Department—

Andrew F. Ryder, Operator (vacation employee) $125.00 per month.

Respectfully submitted,

GEORGE W. PAULLIN,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
JAS. H. LAWLEY,
Committee on Employment.

Mr. Paullin moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—None.

Passed and not voting—Messrs. Sergel and Nance—Two.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a communication from Col. Robt. McCormick, dated September 20, 1919, which was ordered published and filed as follows:

THE CHICAGO TRIBUNE
THE WORLD'S GREATEST NEWSPAPER

CHICAGO, September 20, 1919

Board of Trustees Sanitary District, 900 South Michigan Avenue, Chicago.

DEAR SIRS—I write to thank you heartily for the great compliment you paid me in naming the new road along the north shore channel after me.

The Sanitary District was the first work upon which I engaged and has always been closer to me than my private interests.

It will be a great pleasure to you to realize that during your period of office you are going to see the consummation of all the great projects; the Calumet canal, the disposal of sewage and the Deep Waterway.

Very truly yours

(Signed) ROBERT R. MCCORMICK.

The Clerk presented a communication from Wm. G. Keith Commissioner, Department of Gas and Electricity of the City of Chicago, in which he stated that $60,000.00 for the painting of electric light poles and equipment belonging to the City is inadequate for the purpose of painting all of said poles; that he is of the opinion that the poles should have a second coat to prevent against rusting and requesting the Sanitary District to set aside a sum of money sufficient to cover the painting of the remainder of the poles and to give all of said poles a second coat of paint.

Referred to the Committee on Engineering.

MISCELLANEOUS AND NEW BUSINESS.

Trustee Clark moved that the bids received by the Clerk for furnishing cement be returned to the various bidders without being opened, due to the fact that the Board has rejected the bid for the building of the Highway.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

ADJOURNMENT.

Trustee Lawley moved that when the Board adjourn that it adjourn to meet on Thursday, October 16, 1919.

The motion prevailed.

Trustee Lawley moved that the Board do now adjourn.

The motion prevailed.

L. E. King.

Clerk.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, OCTOBER 16, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel presiding, the roll being called, there were

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Absent—Mr. Paullin—One.

Bids.

The Clerk opened and read the bids received for Power Transformers and Distribution Transformers as shown on schedule appearing on page 1242-A of the Proceedings.

Mr. Littler moved that the Bids be referred to the Electrical Engineer for tabulation and to the Committe on Engineering for report.

The motion prevailed.

The Clerk opened and read the bids received for the Des Plaines River Sewage Treatment Works, as shown on schedule appearing on page 1242-A of the Proceedings.

Mr. Clark moved that the Bids be referred to the Chief Engineer for tabulation and to the Committee on Engineering for report.

The motion prevailed.

Mr. Clark moved to suspend the regular order of business and take up for consideration the report of the Special Committee on Lake Levels.

REPORTS OF COMMITTEES.

Mr. Clark presented the following report from the Committee on Settlement of Lake Level Controversy and Litigation with the United States concerning the withdrawal and diversion of water from Lake Michigan.

CHICAGO, October 16, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your special committee, on settlement of lake level controversy and litigation with the United States, concerning the withdrawal and diversion of water from Lake Michigan, begs to make the following report:

1. On January 5th, 1918, pursuant to previous extensive investigation and consideration, the Board of Trustees of The Sanitary District of Chicago passed an ordinance offering to compromise the litigation, now pending between the United States and the Sanitary District, with reference to the diversion of water from Lake Michigan, at Chicago, and the controversies involving claimed injury to navigation, due to supposed lowering of the levels of certain of the Great Lakes—Michigan, Huron, Erie and Ontario and connecting waters. Generally, the proposed settlement contemplated the defraying, by the Sanitary District, of the expense of constructing submerged dams or weirs, called compensating works, in the St. Clair and Niagara Rivers. These compensating works had, theretofore, been recommended in the report, called "Final Report—Waterway from Lockport, Illinois, to the Mouth of the Illinois River"—63rd Congress, 2nd Session, H. R. Document No. 762 and the works were designed, when built, to contract the flowage capacity of said rivers and they would, according to their purpose, cause the surface elevations of lakes, Michigan, Huron and Erie, to assume and remain at the levels that the lakes would have been, or would be, if the diversion from Lake Michigan of ten thousand cubic feet of water per second at Chicago had not or should not have existed. As a condition of the Sanitary District's defraying the expense of these works, it was proposed that Congress, or some other proper authority of the United States, fix the diversion from Lake Michigan at Chicago at not less than ten thousand cubic feet of water per second. Pursuant to the proposal made, in the Ordinance mentioned, there was introduced in Congress, by Congressman Gallagher of Illinois, on or about January 29th, 1918, a bill providing for the construction of said compensating works, and also authorizing the withdrawal of water mentioned on condition that the Sanitary District defray the expense of constructing the compensating works, above described. The Bill was referred to the House Committee on Rivers and Harbors and, by that Committee, the Bill was referred to the Secretary of War and Chief of Engineers, U. S. A., for their consideration and recommendation. The Chief of Engineers, shortly thereafter, and on or about the 15th day of February, 1918, advised the said House Committee that he could not recommend the passage of the Bill, due to the objections interposed by Canada, by which objections it was claimed by the Canadian authorities that the diversion at Chicago injured navigation in the lower St. Lawrence River at Montreal, and from Montreal to the Gulf of the St. Lawrence.

2. Accordingly, George M. Wisner, the chief engineer, and the attorney for the District, conferred with Canadian authorities in regard to Canadian ob-

*Bid for Temporary Heat

jections and possible means of obviating same. Mr. Wisner, chief engineer of the Sanitary District, in conference with various Canadian officials, suggested so regulating the outflow of Lake Ontario that a greater amount of water could be delivered to the lower St. Lawrence river at Montreal, during certain months—September, October and November—of the year, when navigation there required it. This suggestion received the tentative approval of Canadian authorities. Negotiations have been had with the Chief Engineer's office U. S. A., and the engineer at Chicago; the whole question has been studied, and for such purposes and investigation Mr. Francis C. Shenehon, an eminent hydraulic engineer, particularly familiar with the hydraulics of the Great Lakes, was employed to work out a plan for the regulation of the various Lakes, controlling their levels and compensating for any claimed lowering, due to the diversion at Chicago. Mr. Wisner, chief engineer of the Sanitary District on January 15th, 1918, by letter, in a preliminary way, outlined the position of the Sanitary District. in regard to this compromise. General William M. Black, chief of engineers, U. S. A., has visited and inspected the works of the Sanitary District. Your Committee has received and considered the plans and reports made by Mr. Shenehon for the regulation of Lake Erie by the construction of certain movable dams in the Niagara River, below the city of Buffalo, New York, which regulating works, to be constructed in the Niagara River, will immensely benefit navigation upon lakes Michigan, Huron, Erie, and connecting waters and water power at Niagara Falls and off-set for any lowering of the levels of lakes Huron, Michigan, and Erie, due to Chicago's diversion of ten thousand cubic feet per second. Your Committee has also received and considered the report of Mr. Shenehon with reference to the regulation of the outflow of Lake Ontario by constructing certain works, of a movable character, in the St. Lawrence River near Ogdensburg, New York. The works, to be constructed in the St. Lawrence River will regulate the level of Lake Ontario, benefit water power on the St. Lawrence River, by making the flow more even, and will remove any claimed damage to the St. Lawrence River at Montreal and below. Your Committee and certain of the Trustees of The Sanitary District of Chicago have recently visited the sites of the proposed works, in the Niagara River at Buffalo and in the St. Lawrence River at Ogdensburg.

3. The Committee is of the opinion that the plan proposed for the settlement of controversies relating to the amount of diversion from Lake Michigan, at Chicago, should be compromised and settled and that, by agreement between the United States and the Sanitary District, the permanent diversion should be fixed, and that such diversion should not be less than ten thousand cubic feet of water per second, to properly take care of Chicago's sanitary needs and to protect health and preserve life, insuring to the people of Chicago an unpolluted water supply from Lake Michigan. Your Committee is further of the opinion that the Board of Trustees of the Sanitary District should offer, in compromise, to defray the expense of constructing the works proposed by the report of Mr. Shenehon to be constructed in the Niagara River, to regulate and control the levels of Lakes Michigan, Huron and Erie, and connecting waters; the works, however, to be constructed by the United States with the funds so provided by the Sanitary District, and thereafter to be maintained by the United States at its own expense; further, the Sanitary District should agree that such works as planned by Mr. Shenehon, will, when constructed and operated, perform the functions and purposes for which they are to be pro-

vided. Your Committee is further of the opinion, that, so far as Canada is concerned, her claim with reference to injury, due to a diversion of ten thousand cubic feet per second at Chicago, was fully considered, disposed of and met by the treaty of January 11, 1909, between the United States and Great Britain, relating to boundary waters between the United States and Canada. However, it may be that the regulation of Lake Erie, by means of the works in the Niagara River, will require some regulation of the levels of Lake Ontario, in the manner proposed by Mr. Shenehon, in the opinion of the authorities of the United States Government, who may consider and pass upon these matters; and such authorities of the United States Government may not agree with the construction placed upon said treaty, by the Sanitary District, and may feel that Canadian objections are not entirely baseless. If such conditions arise, it is the recommendation of your Committee that the Sanitary District also offer to defray the expense of constructing regulating works in the St. Lawrence River, as recommended by the report of Mr. Shenehon, above mentioned.

The Sanitary District has employed, as special counsel in this matter, the former attorney of the District who carried on the litigation in behalf of the Sanitary District between it and the United States regarding the right of the Sanitary District of Chicago to divert water from Lake Michigan for its sanitary needs, to protect health and preserve life, and said special counsel has prepared a brief, in conjunction with the District's attorney, Mr. Shenehon and Mr. Wisner, the chief engineer of the Sanitary District, setting forth the proposal of the Sanitary District to compromise the litigation mentioned, and the reasons and arguments in support of the Sanitary District's position.

While your Committee is of the opinion that the position taken by the Sanitary District, in the litigation mentioned, regarding the diversion of water at Chicago, is sound and correct and should be sustained by the courts, nevertheless, in view of the fact that your Committee believes that controversies between Federal and State authorities should, if possible, be eliminated, and also of the fact that it would be of great benefit to both United States and the people of the Sanitary District if this controversy were finally settled, and considering the danger and menace to the health and lives of the people living within the limits of the Sanitary District, if the United States should be successful in the litigation, and having in mind, also under such conditions that upwards of a two hundred million dollar burden would be cast upon the people of the Sanitary District to initiate, install and operate an entirely different system, for the disposition and elimination of sewage and drainage, your Committee, having considered the matter, and the chief engineer of the Sanitary District, its attorney and said special counsel, having recommended the settlement on the basis outlined, recommends the passage of the following order:

Ordered, That the foregoing report of your Committee is hereby adopted by the Board of Trustees of the Sanitary District, and it is further

Ordered, That the Chief engineer, the attorney of the Sanitary District and said special counsel be, and they are hereby, authorized to procure the printing of the brief, above mentioned, setting forth the proposal of the Sanitary District, as above outlined, for the settlement of the controversy with the United States, regarding the amount of the diversion of water at Chicago, and that said chief engineer, attorney and special counsel have printed such number of said briefs as, in their opinion, is necessary and, after the same is printed, they

are authorized to present the same to the Secretary of War and Chief of Engineers of the United States Army and to such other authorities of the United States as may, in their opinion, be necessary, feasible and proper.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

WM. J. HEALY,
PATRICK J. CARR,

Special Committee on Lake Level Controversy.

Approved as to form:

C. ARCH WILLIAMS,
Attorney,

EDMOND D. ADCOCK,
Counsel.

Mr. Clark moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

REPORTS OF OFFICERS.

The Clerk presented his report of purchases made for and on behalf of the Sanitary District from June 30, 1919 to August 29, 1919, both inclusive, which was ordered placed on file.

The Clerk presented his report of money received and deposited with the Treasurer during the month of September, 1919, together with the receipt of the Treasurer therefor, which were ordered published and filed as follows:

CHICAGO, October 16, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I beg to report the receipt of seven hundred eighty-nine thousand two hundred sixty-four and five hundredths ($789,264.05) dollars during the month of September, 1919, from the following sources:

Total	$789,264.05

GEORGE M. REYNOLDS,
Treasurer, The Sanitary District of Chicago.

REPORTS OF COMMITTEES.

(Continued.)

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Engineering respectfully reports that pursuant to its direction the Attorney has prepared a "History of the Growth and Development of the Sanitary District as shown by the decisions of courts of review and the work of the Law Department."

In Part 1 of said history the purpose, organization, boundaries, plans, development, works and benefits of the District as shown in and by the opinions of the courts are set forth under appropriate headings and in logical and chronological order with marginal notations indicating the subject matter of the text. All questions of practice and procedure have been eliminated from the opinions so that the language of the courts is so arranged and connected as to constitute an authentic history.

Part 2 contains tables, schedules and a synopsis of all work done by the Law Department since the organization of the District.

This information is contained in a typewritten volume of 350 pages, letter size, with an elaborate index. It will be useful to trustees, officers and employees of the District, State, County and City officials and of much value to other taxpayers who may desire reliable information as to the Sanitary District.

Your Committee is of the opinion that a reasonable number of printed copies of this volume should be procured by the Board.

By direction of your Committee, informal bids for printing and binding said volume were solicited by the Clerk, who received three informal bids and reported same to your Committee, which finds that Bentley, Murray & Company, printers and binders, is the lowest bidder, its bid being as follows:

For 1000 copies on paper 6"x 9", estimated to cover 256 pages, bound in paper, with side and backbone printed in black ink	$ 750.00
For 1500 additional copies, same binding and printing...	225.00
Said pages to be printed in 10 point type.	
For 500 copies of the above number bound in black imitation leather and stamped on side and backbone in gold leaf, after deducting the price of paper covers therefor, the sum of	687.50
Total for 500 copies bound in imitation leather and 2000 copies with paper binding..	$1662.50

Your Committee having considered the foregoing matter, recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby authorized and directed to accept the foregoing bid of Bentley, Murray & Company to print 2500 copies of said volume of history, binding 500 copies thereof in black imitation leather, each stamped on side and backbone in gold leaf, and binding 2000 copies thereof in paper, with side and backbone printed in black ink, provided the total cost of said 2500 copies printed and bound as

hereinbefore described shall not exceed the sum of $1662.50.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler and Mueller—Six.

Nays—Messrs. Sergel and Nance—Two.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Engineering reports that on September 18, 1919 (page 1170 of the Proceedings), the Electrical Engineer was authorized to accept an offer of Fairbanks, Morse & Company to furnish a platform scale of sufficient capacity to weigh material delivered by auto trucks or wagons to the Sanitary District at 31st street and Western avenue, for the sum of $645.00 and to either accept the offer of said company to furnish auxiliary steel therefor, for the sum of $291.20, or to purchase said steel in the open market provided that the cost thereof did not exceed said amount.

Your Committee further reports that it has received a communication from the Electrical Engineer in which he states that he has received detailed drawings from said Fairbanks, Morse & Company, has made a complete estimate of what the installation of said scale would cost and has ascertained that a complete installation could not be made for less than $2500.00.

He further states that the purposes for which the scale is desired would not warrant such an expense and recommends that the authority for the purchase of said scale be rescinded.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the authority authorizing the Electrical Engineer to purchase said platform scale above specified, be and the same is hereby rescinded.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adpoted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Engineering reports that on August 14, 1919, (page 1034 of the Proceedings) the Sanitary District entered into a contract with the Ready and Callaghan Coal Company, for the construction of a sprinkling filter with appurtenances

in the Village of Morton Grove which contract provides for the use of Continental No. 1 brick, for facing at $22.00 per thousand; that since the execution of said contract the price of said brick has advanced to $24.00 per thousand, and he requests authority to expend the extra sum of $42.00 to cover 21,000 bricks at the advance of $2.00 per thousand above specified.

Your Committee having had the matter under consideration recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to expend the sum of $42.00 to cover the advance in the price of 21,000 bricks, as above specified.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Electrical Engineer, in which he states that the architect has reported to him that it is necessary to replace the frames of two windows on the switch board gallery and two windows on the main floor of the Power House, and that the work should be done at once.

He further states that he has received informal bids for doing said work and that the lowest is that of the J. C. MacFarland Company, of $464.00, and he recommends that said bid be accepted.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Electrical Engineer be and he is hereby authorized and directed to accept the bid of the J. C. MacFarland Company to replace the frames of said windows, for the sum of $464.00, and have said work done.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that the concrete outfall on the south side of the

Calumet-Sag channel immediately west of the Wabash Railroad is in bad condition due to the collapse of the adjoining banks and that he has started the work of protecting same by excavating and backfilling thereunder. He estimates that the work will cost about $400.00 and requests that his action in doing said work be ratified and confirmed.

Your Committee having had the matter under consideration recommends the passage of the following order:

Ordered, That the action of the Chief Engineer in having the necessary work done to protect said outfall be, and the same is hereby ratified and confirmed and that he be authorized to complete said work provided that the expense thereof shall not exceed the sum of $400.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Engineering reports that on September 18, 1919 (page 1175 of the Proceednigs), the Electrical Engineer was authorized to purchase in the open market for the lowest price obtainable three hydraulic rams to use in operating the head gates of Unit No. 6, at the Power House at Lockport, at a cost of not to exceed $500.00 each or a total of $1500.00.

Your Committee further reports that it has received a communication from the Electrical Engineer in which he states that after considerable difficulty he obtained quotations for said rams and that the lowest price received was that of William Heggie, of $1800.00, which is $300.00 in excess of the amount authorized by the Board, and he requests that he be authorized to expend said additional sum of $300.00 in the purchase of said rams.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Electrical Engineer be, and he is hereby authorized and directed to expend an additional sum of $300.00 over and above said sum of $1500.00 above specified for the purchase of said rams.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Finance reports that it has received requests from the Chief Engineer, the Attorney, the Clerk, and the Manager of the Department of Real Estate to make transfers of funds from various unexpended accounts to other accounts in order to provide funds for the payment of expenditures for which no appropriations have been made and to increase certain appropriations.

Your Committee having considered the matter is of the opinion that the requests should be granted and therefore recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby, authorized and directed to make the following transfers in appropriations for the year 1919, in accordance with the several requests of the heads of departments attached hereto.

No. 322, liquid fuel and illuminants	75.00	
No. 363, lubricants.....	15.00	
No. 364, motor vehicle supplies	10.00	
No. 452, motor vehicle parts	150.00	
No. 58, equipment (N. O. C.)	11.05	
No. 853, auto insurance	90.00	
No. 854, fidelity insurance	58.64	
		874.69

Respectfully submitted,
Jas. H. Lawley,
Chairman.
Matt A. Mueller,
Willis O. Nance,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

Chicago, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

Gentlemen—Your Committee on Finance reports that the appropriation bill of the Sanitary District for the year 1919 (page 116 of the Proceedings) sets up under the title "Operation of Pumping Stations" for the Thirty-ninth Street Pumping Station, eleven items for salaries aggregating $59,612.00 and for the Lawrence Avenue Pumping Station, eight items aggregating $31,612.00 for salaries, which positions and salaries

are set forth in the order hereinafter shown in this report.

Your Committee further reports that the Committee on Employment, subsequent to the passage of the annual appropriation bill, made provision for increases in salaries and authorized additional positions, which will increase the amounts appropriated for salaries of regular employees of the Thirty-ninth Street and the Lawrence Avenue Pumping Stations in the sums of $10,050.00 and $6,849.00 respectively, and the Chief Engineer has requested that a transfer of $16,899.00 be made from Account No. 99—Contingencies, to cover said increases for a period of six months and for the additional positions authorized.

Your Committee having considered said request is of the opinion that same should be granted and therefore recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby authorized and directed to transfer the sum of $16,899.00 from Account No. 99—Contingencies to Account No. 11—Salaries and Wages of Regular Employees (Thirty-Ninth Street Pumping Station) $10,050.00, and to Account No. 11—Salaries and Wages of Regular Employees (Lawrence Avenue Pumping Station) $6,849.00, in accordance with the requirements of the Committee on Employment as follows:

Steamfitters, two at union scale, $2,500.00	5,000.00
	$38,461.00

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel Carr, Healy, Lawley Littler, Mueller and Nance—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Finance reports that the semi-annual interest on the thirtieth issue of bonds of the Sanitary District, amounting to the sum of fifty-four thousand ($54,000.00) dollars, will fall due October 25, 1919, and recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Sanitary District and the Clerk be, and they are hereby authorized to draw a warrant payable to the order of the Treasurer of The Sanitary District of Chicago, for the sum of Fifty-four thousand ($54,000.00) dollars, to pay the semi-annual

interest due October 25, 1919, on two million seven hundred thousand ($2,700,000.00) dollars of the thirtieth issue of bonds at 4 per cent per annum.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Finance reports that it has received a communication from the Chief Engineer in which he states that he has included an item in the annual appropriation bill of the Sanitary District for the year 1919, of $2,000.00 for steel map cases, with which he intends to replace the present wooden cases in the vault of his department; that he had prepared a design for said fixtures which he desired to have installed progressively so as to permit the changing of the records from the old to the new cases with as little inconvenience with the work as possible and requests authority to purchase these units as required, none of which will cost more than $500.00.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to purchase said steel map cases as required, provided that the total cost thereof shall not exceed $2,000.00.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Finance reports that it has received a request from the Attorney for authority to purchase a winter top, to be installed on the automobile used by the Claim Division of his department.

He further states that he has received prices from various concerns for furnishing said top, the lowest of which was that of the France Auto Top Company of $157.00.

Your Committee having considered the matter is of the opinion that said request should be granted and therefore recommends the passage of the following order:

Ordered, That the Attorney be, and he is hereby, authorized to purchase a top for said automobile, provided that the cost shall not exceed $157.00.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, October 16, 1919.

To the Honorable, the President and Baord of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
CHAS. H. SERGEL,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Electrical Development herewith presents a contract with John J. Dondera, 6824 Windsor Ave., Berwyn, Illinois, wherein the Sanitary District agrees to furnish and said party agrees to take electrical energy for the period of time and upon the terms and conditions therein set forth. Said contract has been approved by the Electrical Engineer.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute in duplicate the attached contract with John J. Dondera, which has heretofore been executed by him.

Respectfully submitted,

H. E. LITTLER,
Chairman.
WALLACE G. CLARK,
WM. J. HEALY,
MATT. A. MUELLER,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Real Estate Development.

Mr. Carr presented the following report from the Committee on Real Estate Development:

CHICAGO, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Real Estate Development transmits herewith a form of lease between the Sanitary District and the Western Quarries Company, whereby the Sanitary District leases to said company part of the right of way of the Sanitary District located in Sections 15, 16, and 21, township 37 north, range 11, east of the third principal meridian, lying southerly of a line parallel to and 200 feet distant from the southerly edge of the Main Channel; situated in the Counties of Cook and Du Page containing 22.64 acres more or less, for a term beginning February 1, 1920 and ending January 31, 1923 at an annual rental $113.20. The lease provides for the payment by said company, of all taxes assessed against said property.

Your Committee further reports that the form of said lease has been approved by the Attorney and therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute the form of lease herewith submitted with the Western Quarries Company, the

same having been duly executed by said company.

Respectfully submitted,
PATRICK J. CARR,
Chairman.
WALLACE G. CLARK,
WM. J. HEALY,
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Real Estate.

Mr. Carr moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Carr presented the following report from the Committee on Real Estate Development:

CHICAGO, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Real Estate Development transmits herewith form of leases to be entered into between the Sanitary District and the following parties:

1. Joseph Jezisik, of tract 242A, in Haase and Marrs Subdivision, in Blue Island, Illinois, containing 1.18 acres more or less, from October 1, 1919, to September 30, 1922, at an annual rental of $5.90 amounting to $17.70 for the three year term.

2. Joseph Jezisik, of tract 104, 105 and 106 in the S.½, of Section 34, Township 37, North Range 13, East of the Third Principal Meridian, on the South Side of the Calumet Sag Right of Way, of The Sanitary District of Chicago, containing approximately 13.10 acres of tillable and 1.51 acres of grazing land from October 1, 1919 to September 30, 1922, at an annual rental of $68.02 amounting to $204.06 for the three year term.

3. Fred Wolff, of tracts 238 and 241, in Haase and Marrs Subdivision in Blue Island, Illinois, containing 5.45 acres of tillable land, from October 1, 1919 to September 30, 1922, at an annual rental of $27.25 or a total of $81.75 for the three year term.

4. Lola B. Willis, of tract 115, in the S. E.¼ of Sec. 35, Township 37, North Range 13, on the North Side of the Calumet Sag Channel between Homan and Kedzie Avenue, containing 5.51 acres of tillable land from September 1, 1919 to August 30, 1922, at an annual rental of $27.55, making a total of $82.65 for the three year term.

Your Committee reports that said leases are in the usual form and provides that the Sanitary District may terminate the same by giving thirty days notice in writing to said tenants of its intention so to do, in the event that it desires to use said land for any of its corporate purposes.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District, and the Clerk be, and they are hereby, authorized and directed to execute the forms of leases herewith submitted, the same having been executed by said lessees.

Respectfully submitted,
PATRICK J. CARR,
Chairman.
WALLACE G. CLARK,
WM. J. HEALY,
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Real Estate Development.

Mr. Carr moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Carr presented the following report from the Committee on Real Estate Development:

CHICAGO, October 16, 1919.

To the Honorable the President and the Board of Trustees of The Sanitary District of Chicago:

GENTLEMEN—Your Committee on Real Estate Development transmits herewith a form of lease between the Sanitary District and Frances M. Barton, Chicago, Illinois, of

The south one hundred twenty-five (125) feet (measured at right angles to the center line of the Main Channel of The Sanitary District of Chicago) of lots twenty-two (22) and twenty-four (24) of Sanitary District Trustees' Subdivision of Right-of-way from the north and south center line of Section thirty (30) township thirty-nine (39) north, range fourteen (14) east of the third principal meridian, to the Will County line, said property being situated in Section thirty-five (35) township thirty-nine (39) north, range thirteen (13) east of the third principal meridian in the City of Chicago, County of Cook, State of Illinois, and containing four (4) acres, more or less;

for a term of 99 years beginning November 1, 1919. The annual rentals to be paid are as follows:

For the first 5 years of said term the sum of $6,026.25; for the succeeding 15 years the sum of $19,886.55; for the succeeding 30 years the sum of $43,388.70 and for the last 49 years the sum of $76,773.69.

The lease provides that said lessee will within three years from the date thereof erect on the south 100 feet of said demised premises (except portion reserved for a railroad of-way), buildings which shall cost not less than $10,000.00; that he shall pay all taxes and assessments, and contains special provisions relative to the removal of spoil, insurance of buildings, reservation of a railroad right-of-way and the furnishing of a bond in the sum of $10,000.00 as security for the faithful performance of the conditions of said lease relating to the erection of buildings.

Your Committee further reports that the form of said lease has been approved by the Attorney, and therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate the form of lease above specified, the same having been duly executed by said Lessee.

Respectfully submitted,

PATRICK J. CARR,
Chairman.
WALLACE G. CLARK,
WM. J. HEALY,
MATT A. MUELLER,
Committee on Real Estate Development.

Mr. Carr moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler and Mueller—Six.

Nays—Messrs. Sergel and Nance—Two.

ADJOURNMENT.

Mr. Littler moved that the Board adjourn.

The motion prevailed.

L. E. Kunz
Clerk.
